

01 Concept

Urban interface protocol and three public endpoints

Position

MAIN-IF-01 connects ZZY, ORG, and DZS as distinct endpoint prototypes.

Guarantee

PARALLEL-HUMAN-01 remains available; provisional geometry is not a statutory redline.

02 Evidence tiers

formal / background / provisional

Formal

Call, taskbook, laws, and land-use vocabulary frame the proposal.

Background

NIST, WCAG, and three cases provide transferable methods only.

Provisional

SITE-001 and key areas support relative placement and recalculation tests.

03 Spatial protocol

Eight components make the concept traceable

Components

MAIN-IF / GW / EP / SB / HRG / FS / OSC / EDGE.

Check

Each object carries a project, scenario, operator, assumption, and acceptance condition.

07 AI scenarios

12 scenarios and 12 human review gates

Minimum data

Only versions, aggregate events, or voluntary case material are collected.

Public interest

Screen-free, paper, phone, staff, withdrawal, and appeal routes stay parallel.

08 Components and VI

Civic Protocol Modernism

Colors

Black responsibility, orange review, cyan access, green commons, yellow test.

Kit

Interface mark, consent post, human desk, test rail, quiet beacon.

09 Cultural map

Infrastructure becoming public knowledge

Route

Rail memory, Qinghe ecology, open-source work, civic appeal, device culture.

Landmark

OPEN BRACKET has no face recognition, ranking, or dynamic advertising.

10 Projects and phases

12 projects, 3 implementation phases

Phase 01

0-18 months: light public interface, ORG and DZS pilots.

Phase 02/03

18-60 months: ground-floor renewal, ZZY test yard, ecological edge.

11 Metrics

Geometry, delivery counts, and operational targets stay separate

Recalculation

Site, footprint, green/public ratios, and interface lengths derive from geometry.

Targets

12 scenarios, 12 gates, 100% fallback; response and availability require baselines.

12 Risk and rights

Reviewable, stoppable, recalculable

Risk

Boundary, ownership, controls, transport, utilities, heritage, and budget gaps are explicit.

Rights

Text, geometry, and code-generated diagrams are original; no photos, logos, tiles, or font files are copied.
