Provisional geometry is a low-contrast constraint; locations and areas require full recalculation.

STRUCTURAL TRANSLATION

From Three Scope Levels to Operable Space

Concept land use retains complete topology; relationships—not provisional polygon shapes—lead the drawing.

All three polygons are provisional indexes; rectangular edges mean neither roads, parcels, nor ownership.

MOBILITY × BLUE-GREEN × SCENARIOS

A Verifiable Public Route Across Four Urban Systems

All alignments are conceptual relationships, not road, rail, bridge, tunnel, or utility engineering.

All locations are conceptual; recalculate the complete package after official polygons and professional conditions arrive.
