

One line, three commits, two forks, five segments, and the naming system

One spine, three parallel lines, four stitches, three interchanges

Continuous green belt + pocket parks + inscription system

Key Area Detailed Design — Three Commits

commit/zhongzhiyuan · commit/origin · commit/dazhongsi — what each solves, what it moves, what it depends on

Key areas 1.5.3

Three areas, two wings

Key area locations (provisional)

commit/zhongzhiyuan

Zhongzhiyuan AI Acceleration Area

192.1 ha (announced) · provisional rough range

Garden-type full-stack innovation district

Spatial moves

- Strengthen the Qinghe south bank so R&D backs become a public front room
- An open test walk along the spine puts pilot testing and display on one route
- A milestone array at the north end turns annual progress into a visible scale

Project handles

Handles: autonomous model pilot ground · safety governance sandbox · open test walk

Conditions to confirm / risks

Depends on: Qinghe blue line and flood control, 5th Ring noise and clearance, park ownership

AI scenarios and operations

SC-02 safety sandbox / SC-03 model pilot ground / SC-06 low-speed test segment

Renewal projects and phasing

JZ-04	Qinghe south bank innovation interface	Phase 2
JZ-05	Open test walk and pilot display	Phase 2
JZ-06	Northern milestone array	Phase 2
JZ-07	5th Ring gateway and cross-ring walking	Phase 3

commit/origin

Beijing AI Origin Community

104.3 ha (announced) · provisional rough range

Campus-adjacent open-source community

Spatial moves

- Stitch the campus-park-block boundaries into one continuous pedestrian interface
- Commit Zero and the Contributor Wall sit south of Qinghuayuan Station as the belt's origin
- Complete results release, talent services, youth housing and night third spaces

Project handles

Handles: open-source release hall · Contributor Wall · translation street

Conditions to confirm / risks

Depends on: campus ownership and opening hours, existing structures, station integration

AI scenarios and operations

SC-01 release hall / SC-07 translation street / SC-11 memory guided route

Renewal projects and phasing

JZ-01	Commit Zero and origin plaza	Phase 1
JZ-02	Contributor Wall and release hall	Phase 1
JZ-03	Translation street ground-floor renewal	Phase 1
JZ-08	Campus-park-block stitching walk	Phase 2

commit/dazhongsi

Dazhongsi AI Industry Cluster

72.0 ha (announced) · provisional rough range

Urban intelligent-economy and exchange district

Spatial moves

- Four-quadrant pedestrian connection around Dazhongsi Station dissolves junction severance
- The Merge Point plaza absorbs overflow from exhibitions, roadshows and public experience
- Compound use of planned green space and commerce: offices by day, events by night

Project handles

Handles: Merge Point plaza · data-element salon · international roadshow lounge

Conditions to confirm / risks

Depends on: station and municipal pipelines, commercial ownership, compound-use policy

AI scenarios and operations

SC-09 data-element salon / SC-10 roadshow lounge / SC-12 Global AI Week

Renewal projects and phasing

JZ-09	Merge Point plaza and station front	Phase 1
JZ-10	Four-quadrant pedestrian connection	Phase 1
JZ-11	Green-space compound use pilot	Phase 2
JZ-12	Roadshow and data-element lounge	Phase 3

Boundary and key areas are provisional rough ranges (dashed) — not an official redline; recompute when official polygons are released.

Open Source City · The Main Line / edison-land / conceptual, not statutory

Key points

- Zhongzhiyuan: a garden-type full-stack innovation district carrying the pilot-testing link.
- Origin Community: a campus-adjacent open-source and translation community carrying the origination-to-translation interface.
- Dazhongsi: an urban intelligent-economy and exchange district carrying the scenario-and-trade link.
- All three extents are provisional rough ranges; their deviation from the announced areas is disclosed in the text.

Open Source City · The Main Line | edison-land | conceptual, does not replace statutory planning or constitute a government decision; provisional boundary

5 / 7

12 scenario cards, 6 profiles, 12 renewal projects, 3 phases

21 known metrics, 4 unknown metrics, four self-checks

Key points

- site_area_sqm 1,141.3 ha (announced ~11.4 km², deviation +0.11%).
- key_area_total_area_sqm 369.3 ha (announced 368.4 ha, deviation +0.24%).
- compliance_matrix covers announcement 1.3 / 1.4 / 1.5 and agent.1–agent.6, 23 items in total.
- deterministic validation, spatial review, visual packaging check and professional evidence review must all pass.
