

JingZhang Timetable: Making the AI City

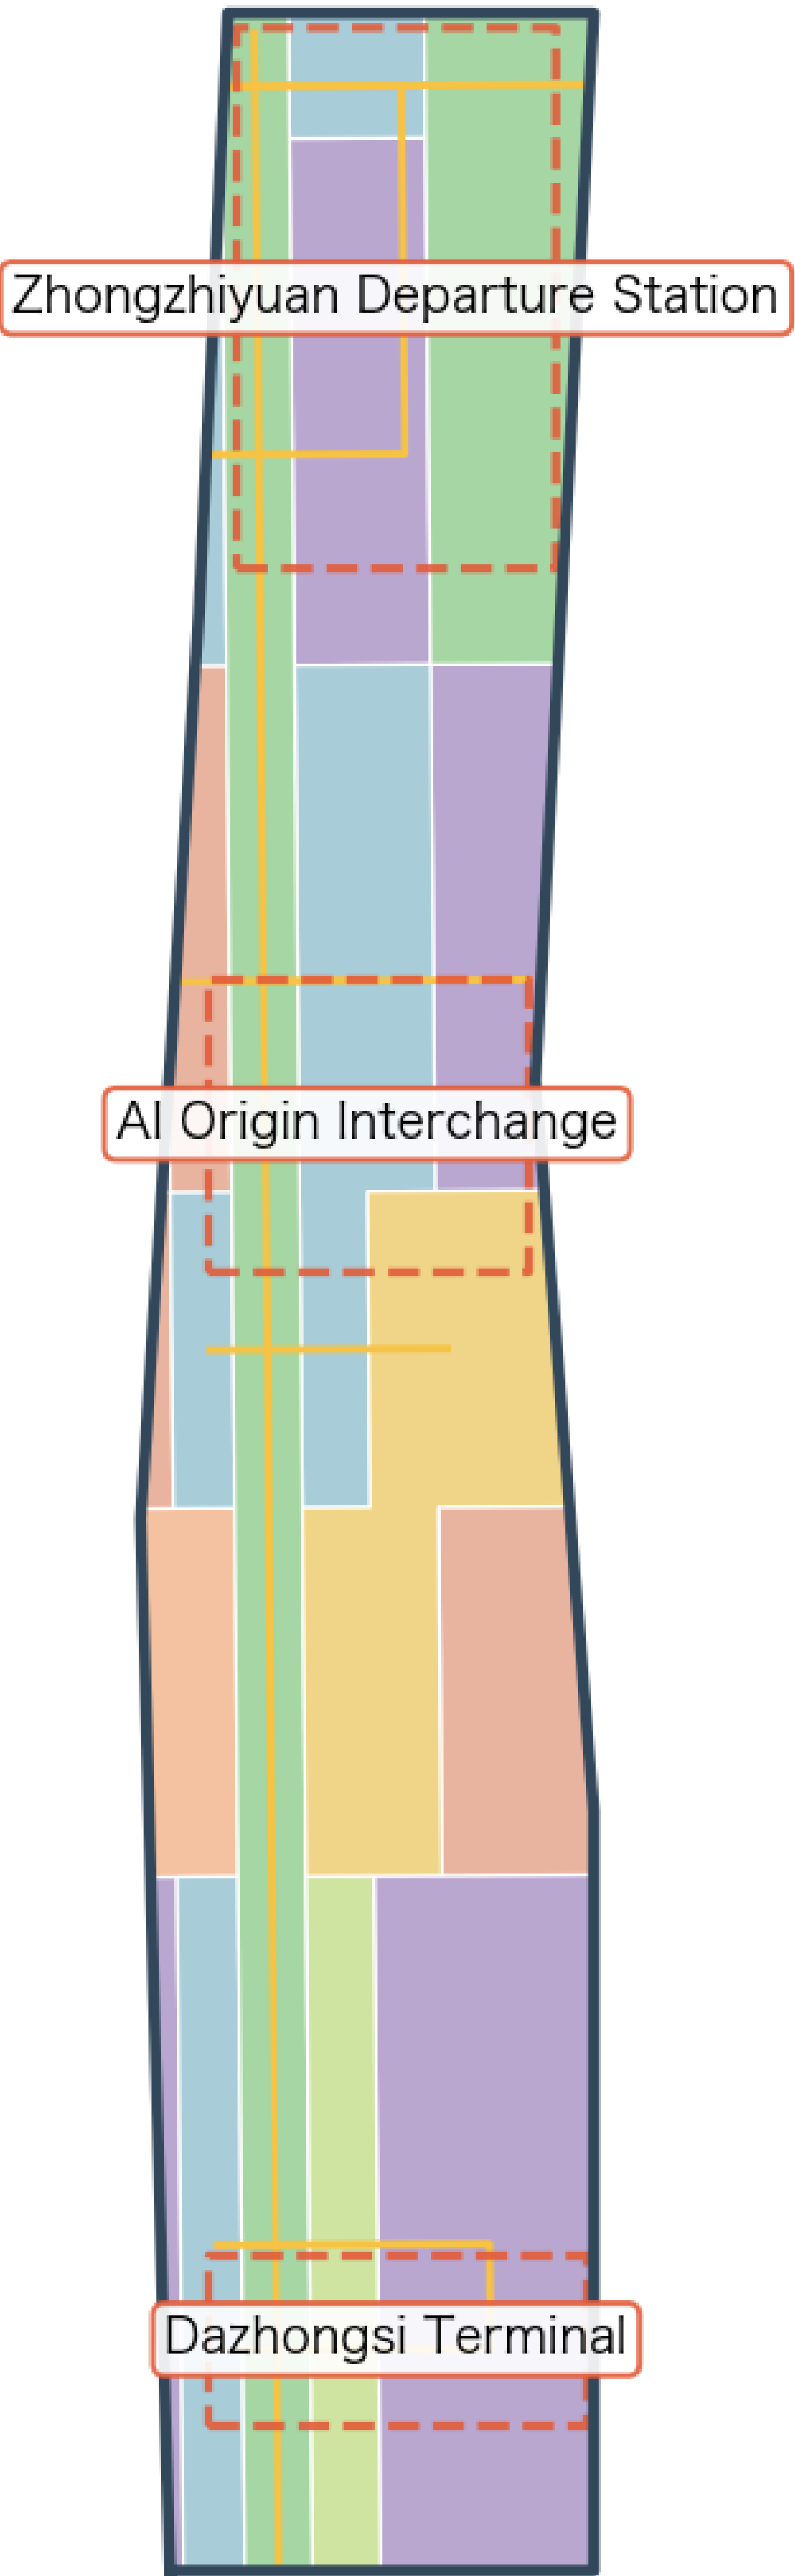

Centennial Jing-Zhang AI Innovation Belt · Open-Source Submission · One Timetable · Three Stations · Two Wings

QUERYABLE · TRANSFERABLE · REVERSIBLE

A3-01 Overview & Overall Concept

Queryable · Transferable · Reversible — organizing the AI innovation belt through the Jing-Zhang railway timetable
Based on the provisional boundary for generation, display, and discussion only; recalculation of the full chain is required once o

JingZhang Timetable Belt · Overall Land Use

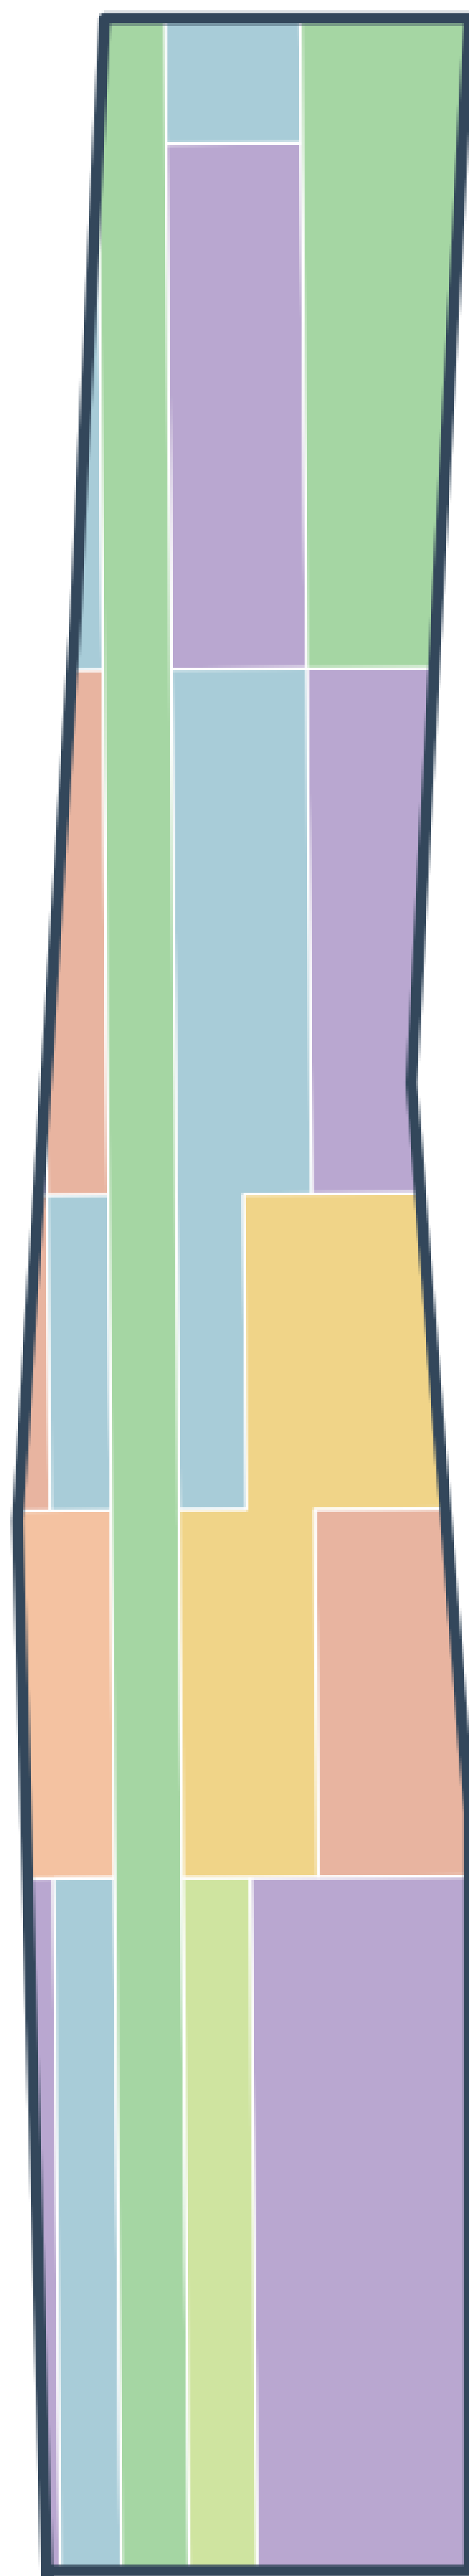

Note: provisional boundary is for display only, not an official redline.

A3-02 Land Use & Spatial Structure

One spine, three stations (departure / interchange / terminal), two wings (service / scenario).

Based on the provisional boundary for generation, display, and discussion only; recalculation of the full chain is required once o

One Timetable · Three Stations · Two Wings — Spatial Structure

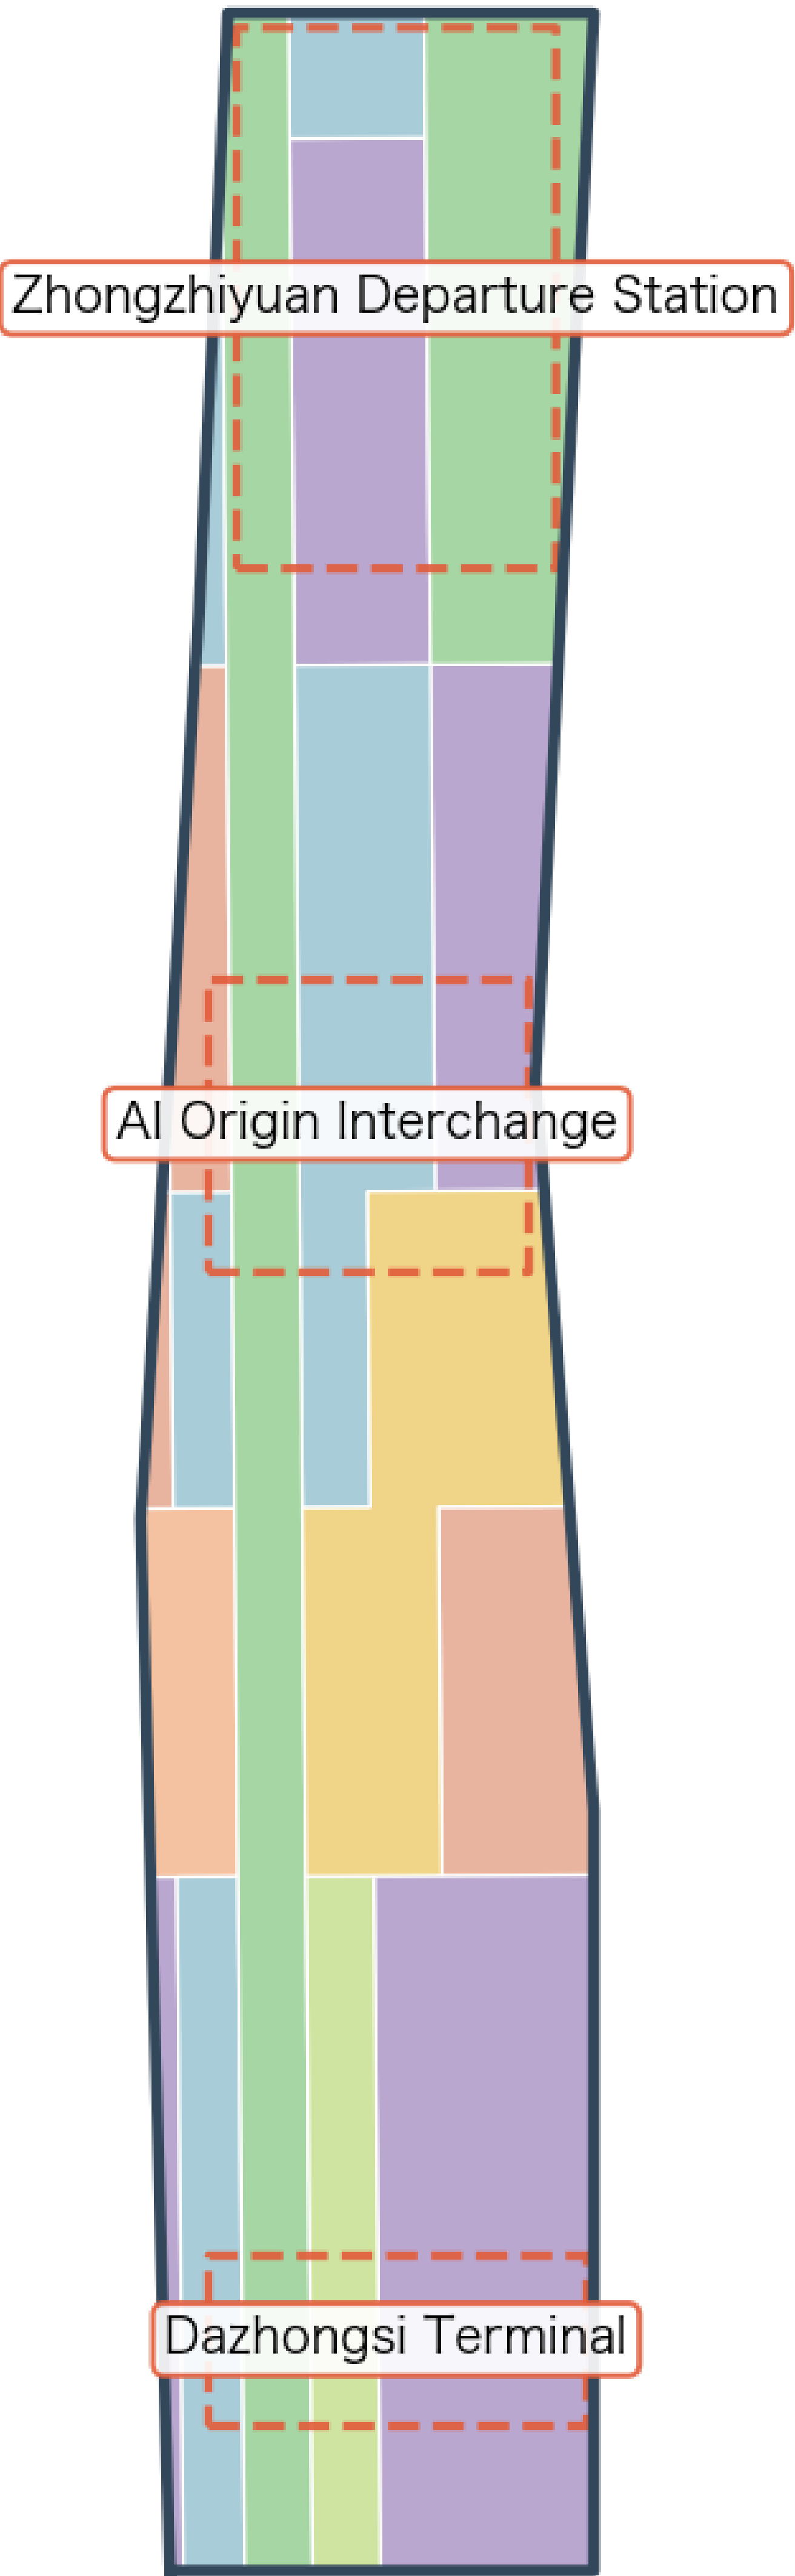

Land Use

Residential	Health
Community	Commercial
Research	Park/Green
Culture	Plaza
Education	Reserved
Sports	

A3-03 Three Stations Detailed Design

Zhongzhiyuan departure yard · AI Origin interchange · Dazhongsi terminal parlour.
Based on the provisional boundary for generation, display, and discussion only; recalculation of the full chain is required once o

Three Stations · Key Area Detailed Design Index

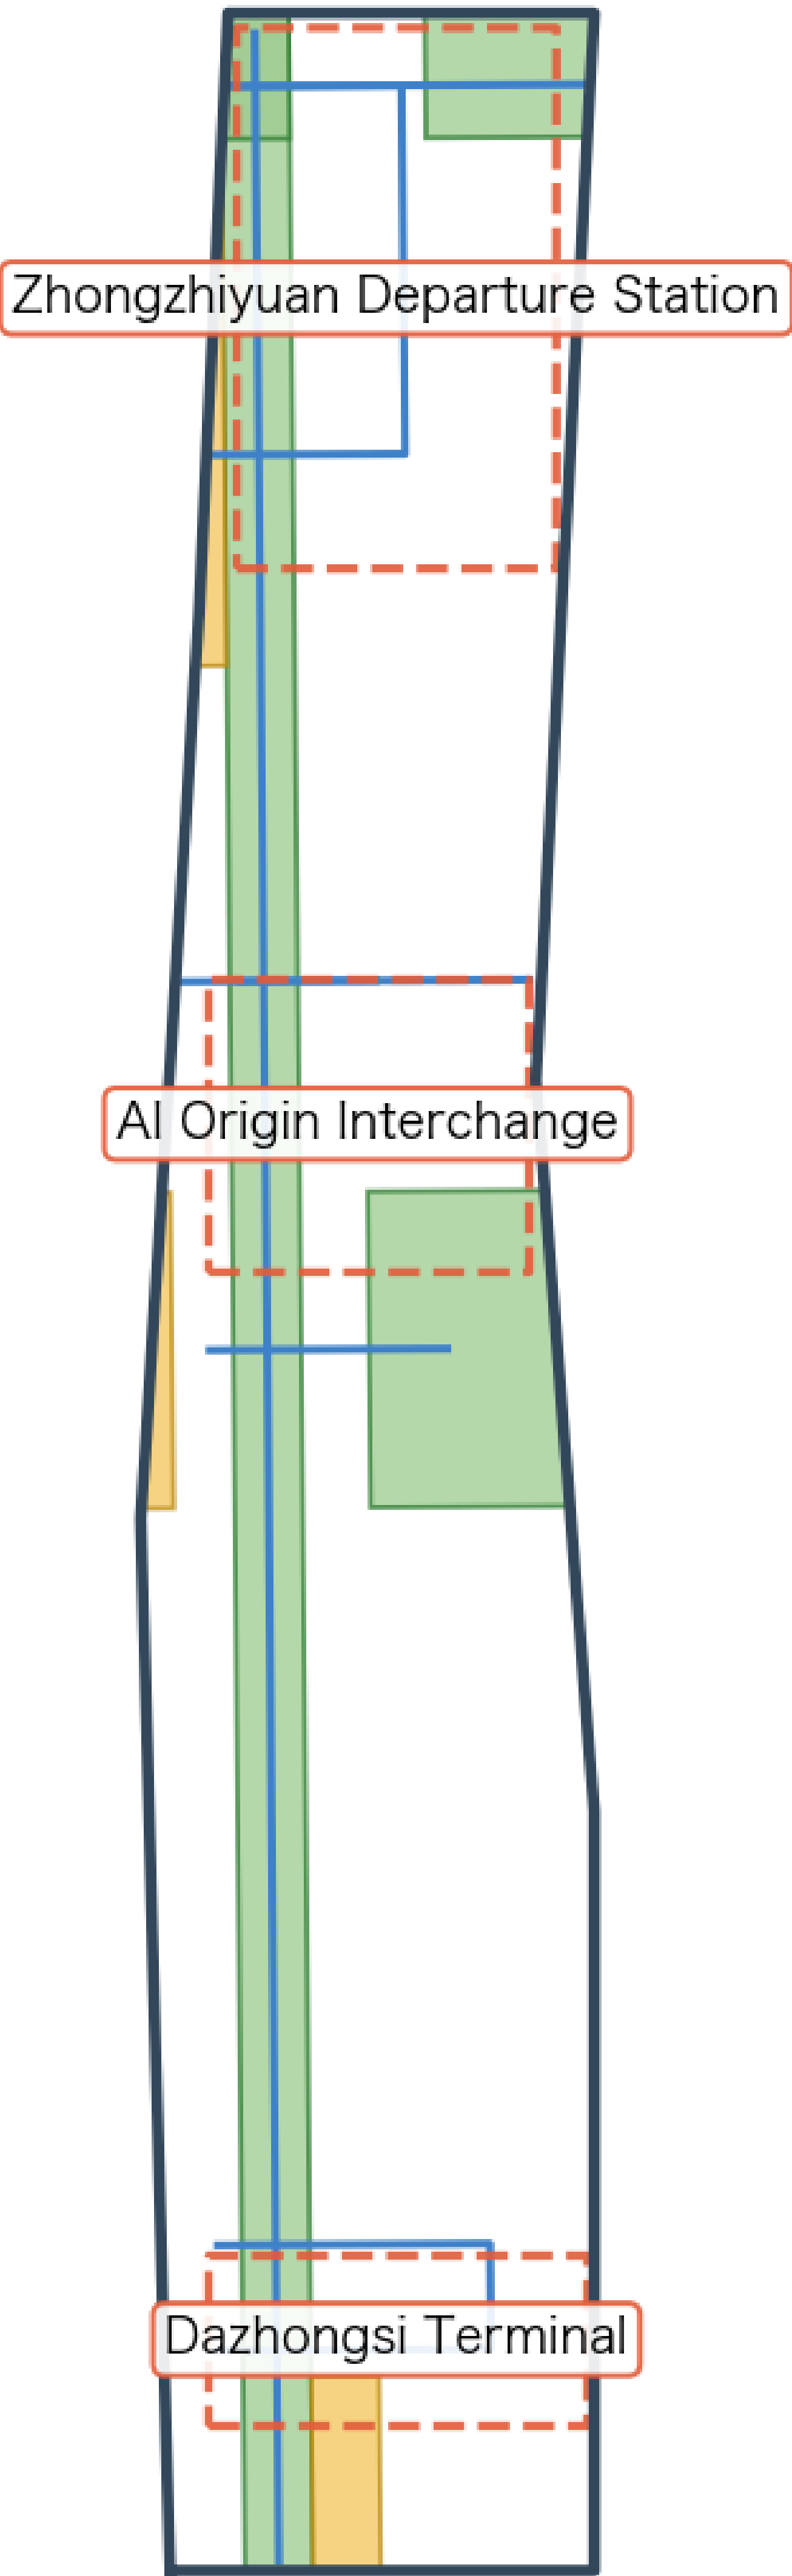

- Key Areas
- Zhongzhiyuan Departure Station
 - AI Origin Interchange
 - Dazhongsi Terminal

A3-04 Slow-Mobility Blue-Green System

North-south Timetable ridge slow axis and blue-green corridors; station-city integration.
Based on the provisional boundary for generation, display, and discussion only; recalculation of the full chain is required once o

JingZhang Timetable Belt — Slow-Mobility · Blue-Green · Public Space System

- Green corridor
- Public space
- Road/slow axis

A3-05 Core Metrics & Evidence Chain

EPSG:4548 recalculation, consistent with metrics.json.
Based on the provisional boundary for generation, display, and discussion only; recalculation of the full chain is required once o

Core Metrics & Evidence Chain

EPSG:4548 recalcul · provisional boundary

Overall design area	11,412,825 m²
Green ratio	24.8%
Public space ratio	2.7%
Road centerline length	17,314 m
Key area count	3
AI scenario cards	12
Global ecosystem cases	6
Renewal projects	9

All metrics are reproducible from metrics.json and geometry/*.geojson
