

THE PAUSE LINE · OVERALL STRUCTURE

One spine, three courts, six crossings, twelve stations

THE PAUSE LINE

Keep computation running while allowing the city to pause

PROVISIONAL CONSTRAINT · 非官方红线

ONE PAUSE SPINE

Continuous slow mobility and low-stimulation public interface; the provisional polygon stays a faint constraint.

THREE RHYTHM COURTS

Calm validation at Zhongzhiyuan, shared learning at AI Origin, civic reflection at Dazhongsi.

SIX + TWELVE

Six east-west transitions and twelve public stations with selectable quiet, social and event intensity.

AI BOUNDARY

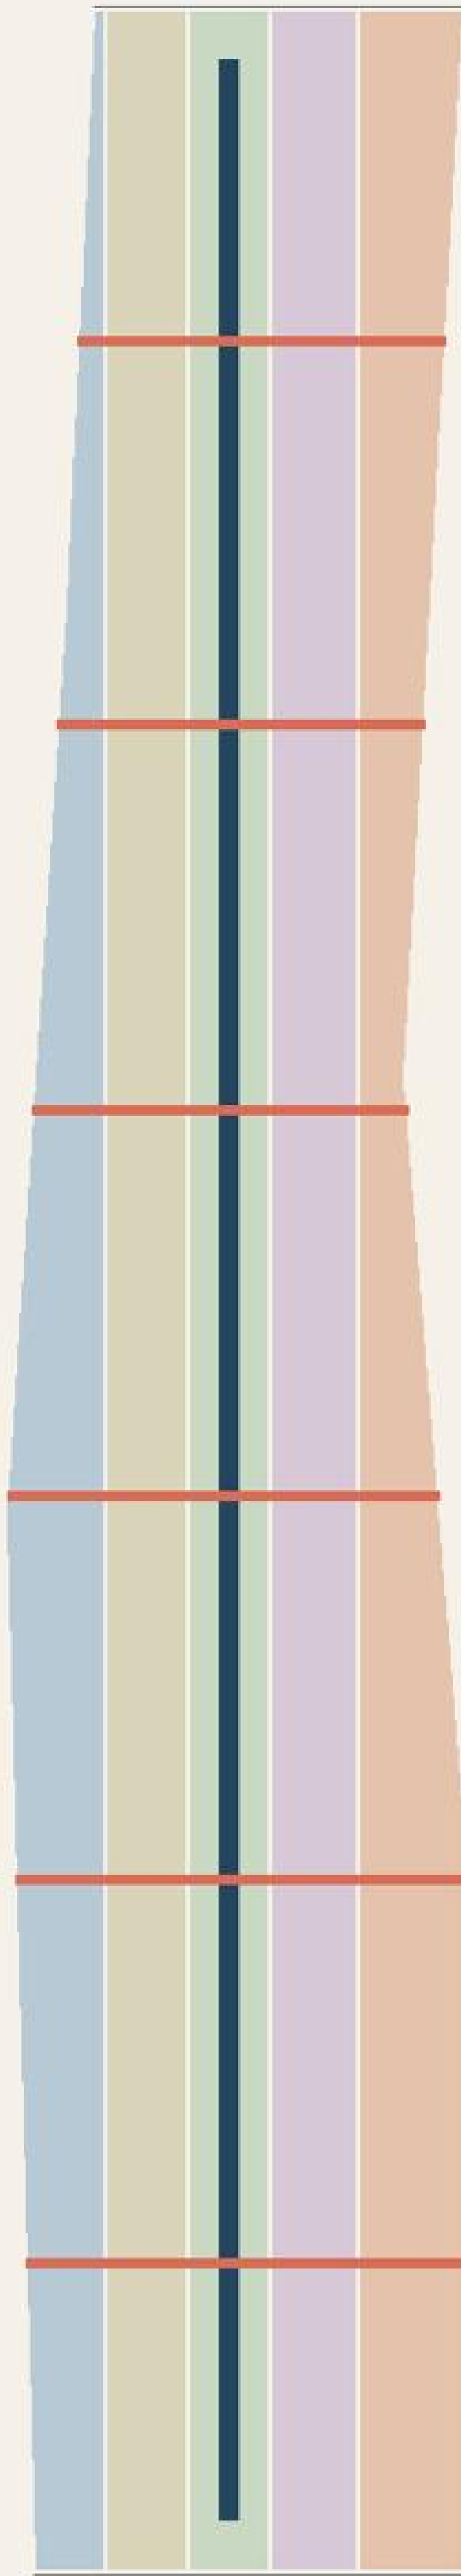

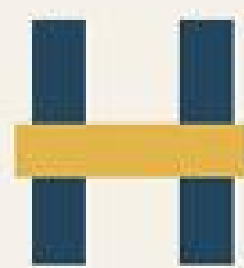

Optimize space-level state only. Never infer attention, emotion, disability or mental state.

LAND USE AND KEY AREAS

Five functional bands + three rhythm courts

FIVE FUNCTIONAL BANDS ACROSS THREE SCALES

Pause is a public-space concept, not statutory land-use code 16

PROVISIONAL CONSTRAINT · 非官方红线

- 0802 Research
- 0702 Public service
- 1401 Green spine
- 0804 Learning transfer
- 05 Urban adoption

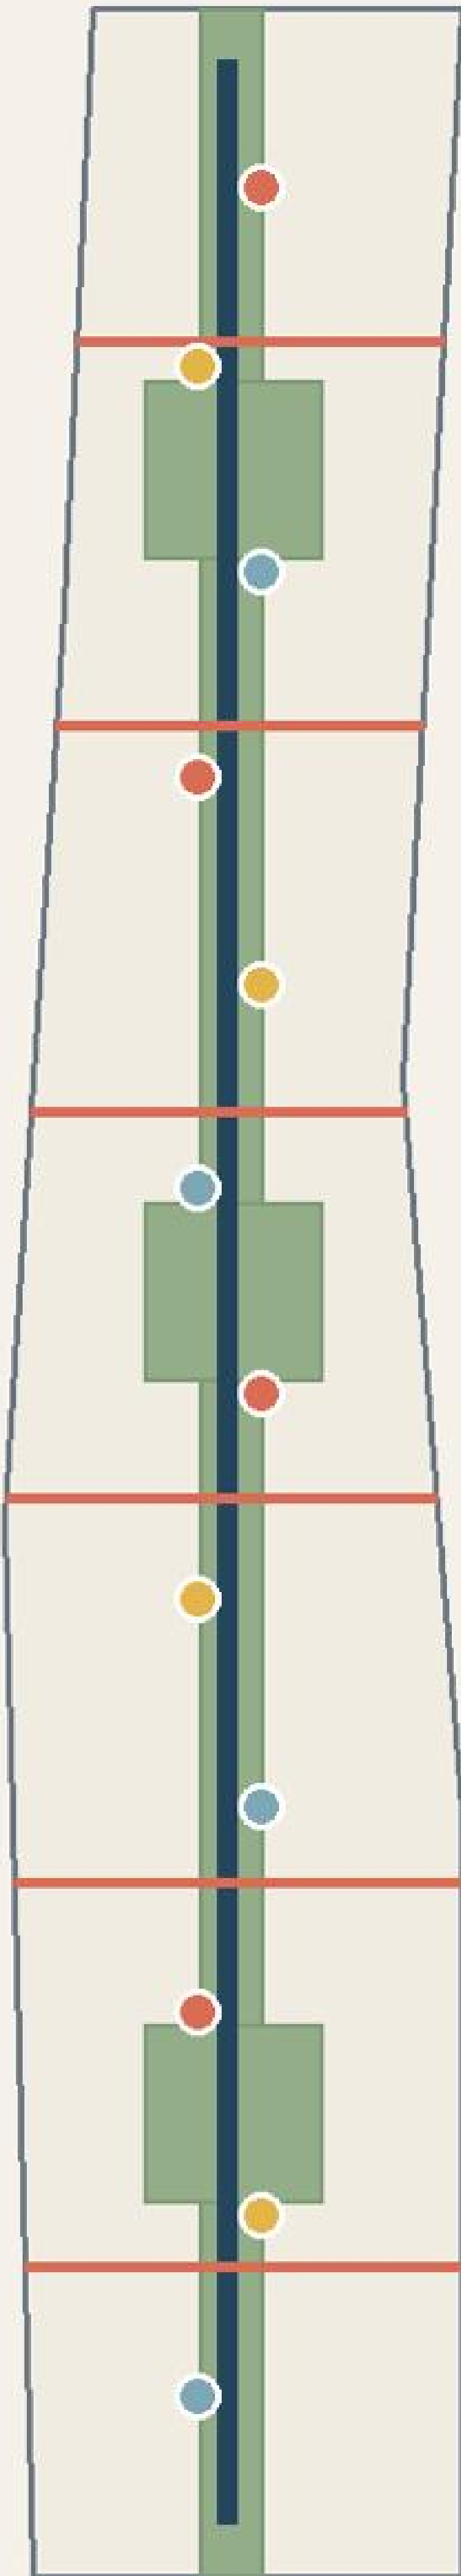

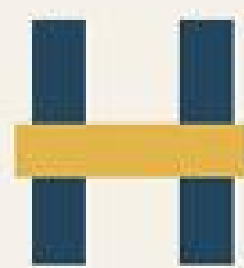

43.6 km2 COORDINATION
Sets common rules for innovation, talent district and the two supporting wings.

11.4 km2 OVERALL DESIGN
Uses one evidence chain for land use, mobility, blue-green space and phasing.

368.4 ha KEY AREAS
Three courts test before release, during creation and after adoption.

MOBILITY, BLUE-GREEN SPACE AND SENSORY INTENSITY

One public line, three selectable states

QUIET

Low stimulation, slower response, non-digital signs

SOCIAL

Small-group exchange, learning encounters, bookable

EVENT

Public demos, cultural events, explicit time windows

AI reads space-level state only; it never identifies people or infers emotion, disability or attention.

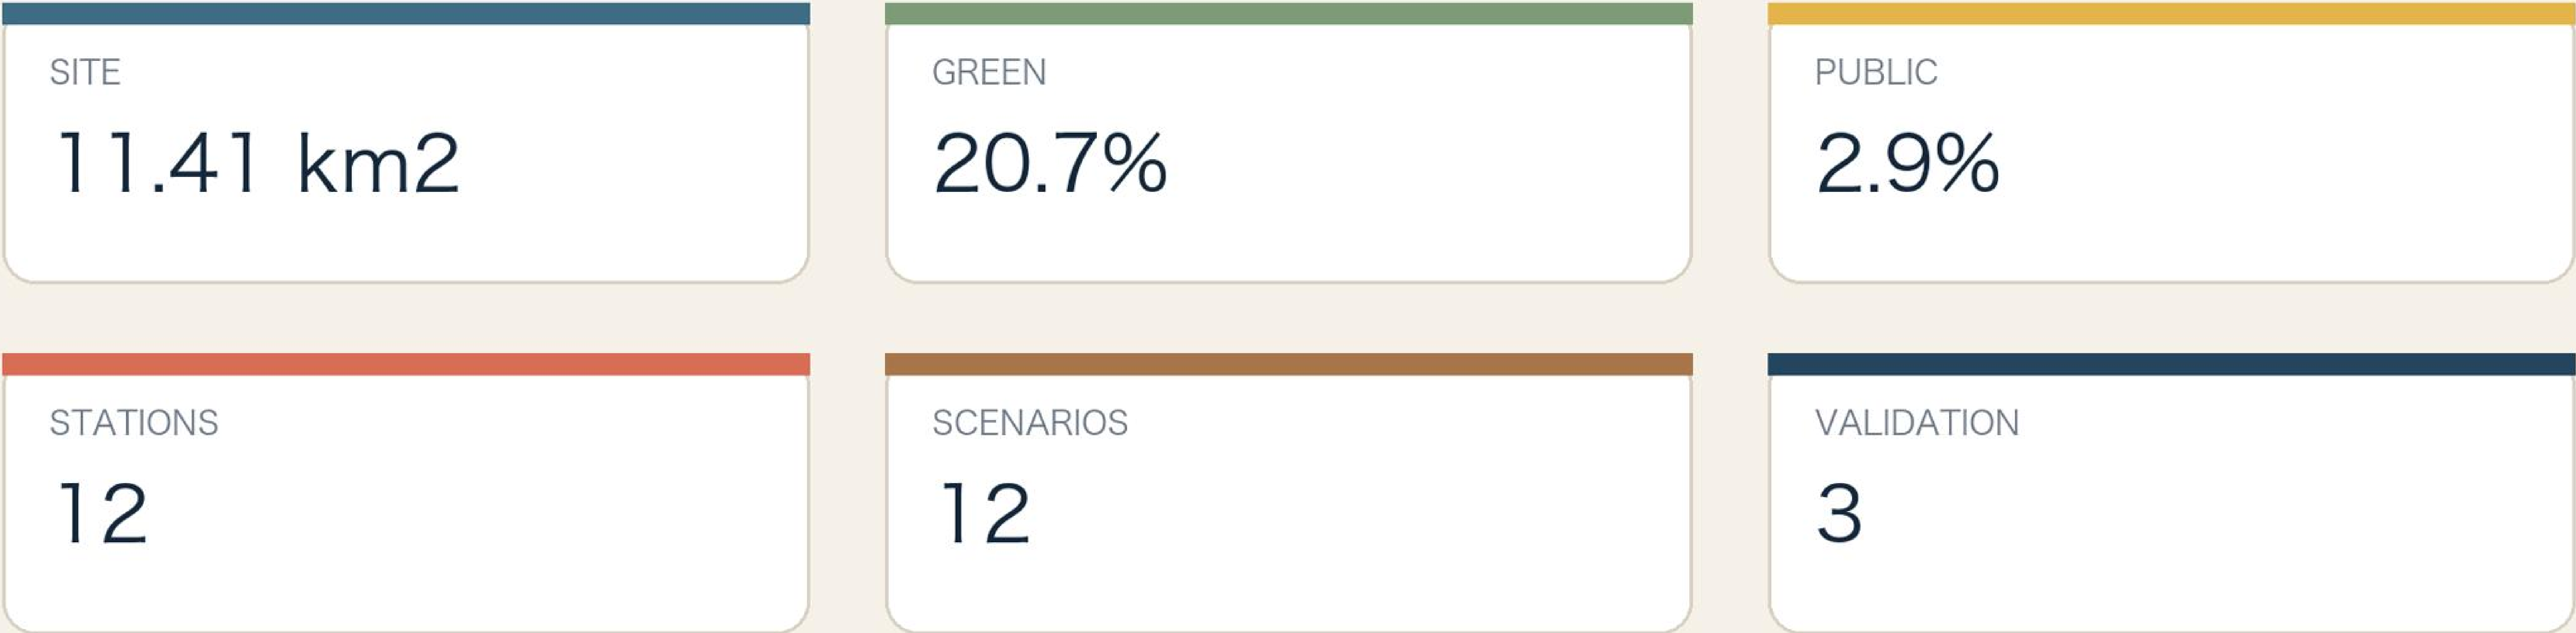

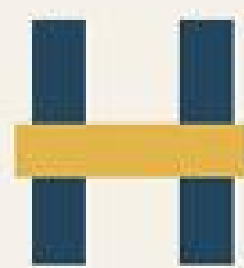

PROVISIONAL CONSTRAINT · 非官方红线

METRICS, PHASING AND COMPLIANCE

Same-source recomputation + pending conditions + professional gates

METRICS AND EVIDENCE CHAIN

Known values come from same-source geometry; statutory and engineering controls remain pending

PENDING: official polygons, FAR, height, road redlines, ownership, utilities, heritage and engineering
