↓

checks + recalculation

event reservoir

Provisional rough geometry: generation, display and intake only. Concept values; recalculate the full package after official data arrives.

COMPLETE PARTITION: HEADROOM IS NOT VACANCY

Five concept bands share edges and cover the provisional envelope without overlap or gaps

reversible
convertible, not awaiting development

shared edges
topology stays recomputable

pending
not regulatory approval

Provisional rough geometry: generation, display and intake only. Concept values require full-package recalculation after official data arrives.

THREE RESERVOIRS × TWELVE INTERFACES

Key areas are provisional constraints; nodes show design mechanisms, not official locations or commitments

01

technical + infrastructure

- 01 Controlled robot-street test
- 02 Edge-compute disconnection drill
- 03 Climate-peak microgrid validation
- 07 Human-takeover mobility desk

02

talent + everyday life

- 04 Account-free public service desk
- 05 Convertible learning and care room
- 06 Quiet-right and rest room
- 10 Open-model health-check kiosk

03

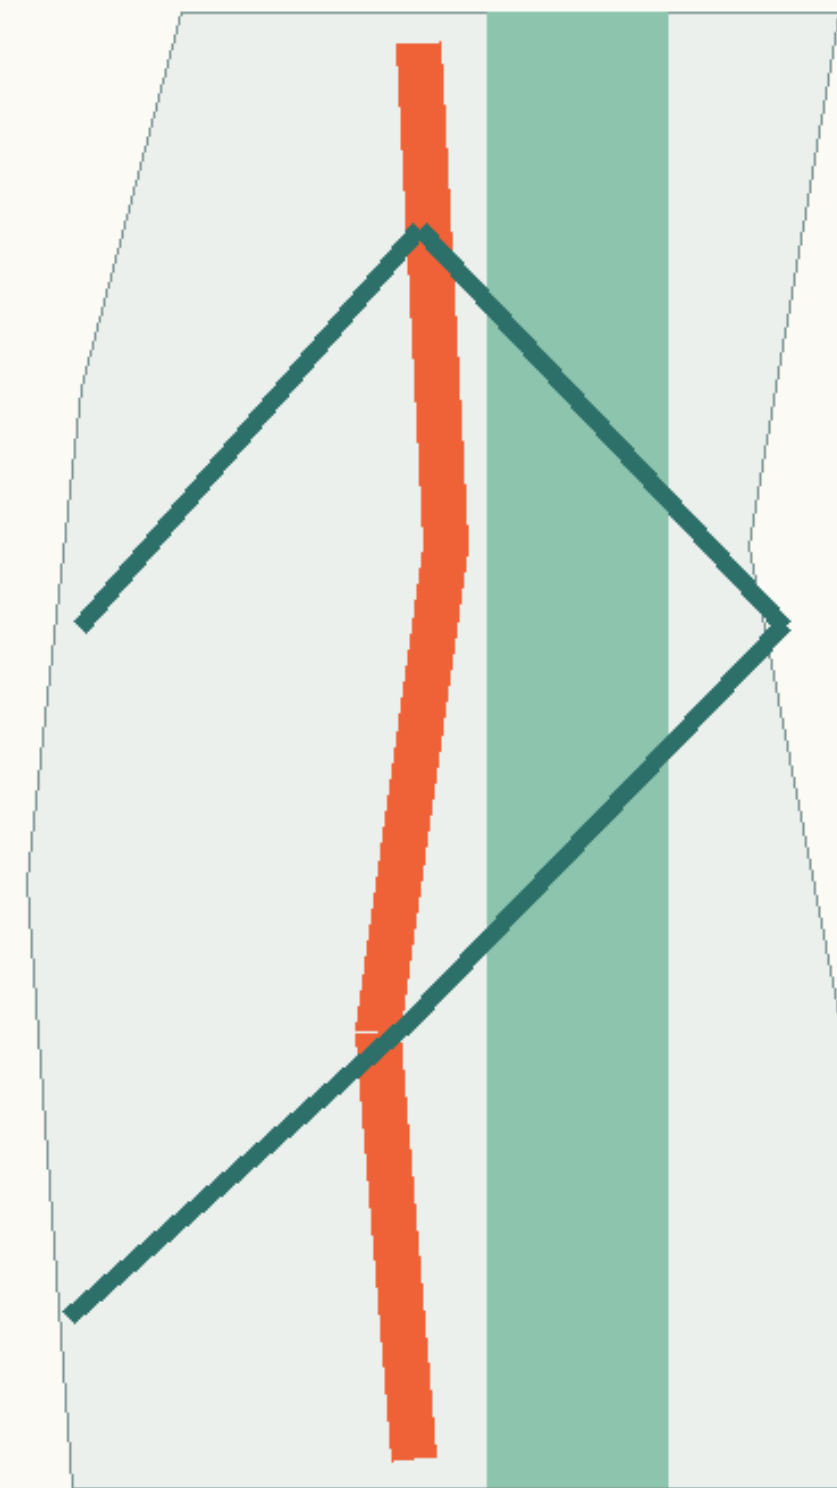

event + adoption

- 08 Low-speed logistics time-window interface
- 09 Algorithm-impact explanation station
- 11 Peak/off-peak event switching court
- 12 Deployment exit and recovery desk

Provisional rough geometry: generation, display and intake only. Concept values require full-package recalculation after official data arrives.

ONE SPINE, TWO WINGS: DAILY LIFE AND FAILURE SHARE A NETWORK

Slow travel, services, blue-green space, evacuation and takeover share connections; alignments remain pending

reserve spine

dispatch wings

blue-green recovery

human takeover

- outage: fixed signs + human desk
- peak: public space enters recovery
- heat: shade prioritized in green band
- test: non-test route stays open

Provisional rough geometry: generation, display and intake only. Concept values require full-package recalculation after official data arrives.
