

The Jing-Zhang Mileposts: One Belt•Three Cores•Two Wings•Nine Stations. Heritage park innovation spine; Zhongzhiyuan (full-stack acceleration), Origin Community (Mile Zero), Dazhongsi (urban terminus); two service wings; nine themed mile stations.

Land use per national classification (33 partitions, zero symmetric difference); retain-renovate-renew-reserve framework; conceptual building footprint 985,000 m²; regulatory indicators pending official controls.

Spine slow mobility + rail interchange (Wudaokou/Qinghua East Rd West/Dazhongsi); ~28.7 km conceptual network; distributed energy + edge compute + municipal integration; rivers/rail shown indicatively.

Green 23.5%, public space 9.3% (design recomputation); four AI pilgrimage landmarks: Zero Milepost, Centennial Mile Wall, Contributor Milepost installation, Dazhongsi Terminus.

**Zhongzhiyuan: full-stack testing ground (test/validation). Origin
Community: Zero Release Hall, open-source gallery, low-disturbance
renewal. Dazhongsi: four-quadrant connectivity, roadshow & data-
element lounges.**

12 scenario cards (3 industry test/validation); annual Milepost Day (Sep) & Zero Open Day (Mar); digital milestone lighting protocol; developer residency; 'Mile Zero' global narrative.

Core metrics recomputed (EPSG:4548); 16 announcement + 6 agent tasks covered; 5 standards addressed; 15 depth items complete; 4 self-check gates PASS; pending: official boundaries/controls/existing data.
