

Overall Concept & Structure

Overall concept · One Corridor Two Wings Three Starts Five Nodes · three-level scope

JINGZHANG START LINE

From the century-old railway origin to a global AI sports & wellness vitality belt — a city you can run through

The 'Start Line' Unites Three Meanings

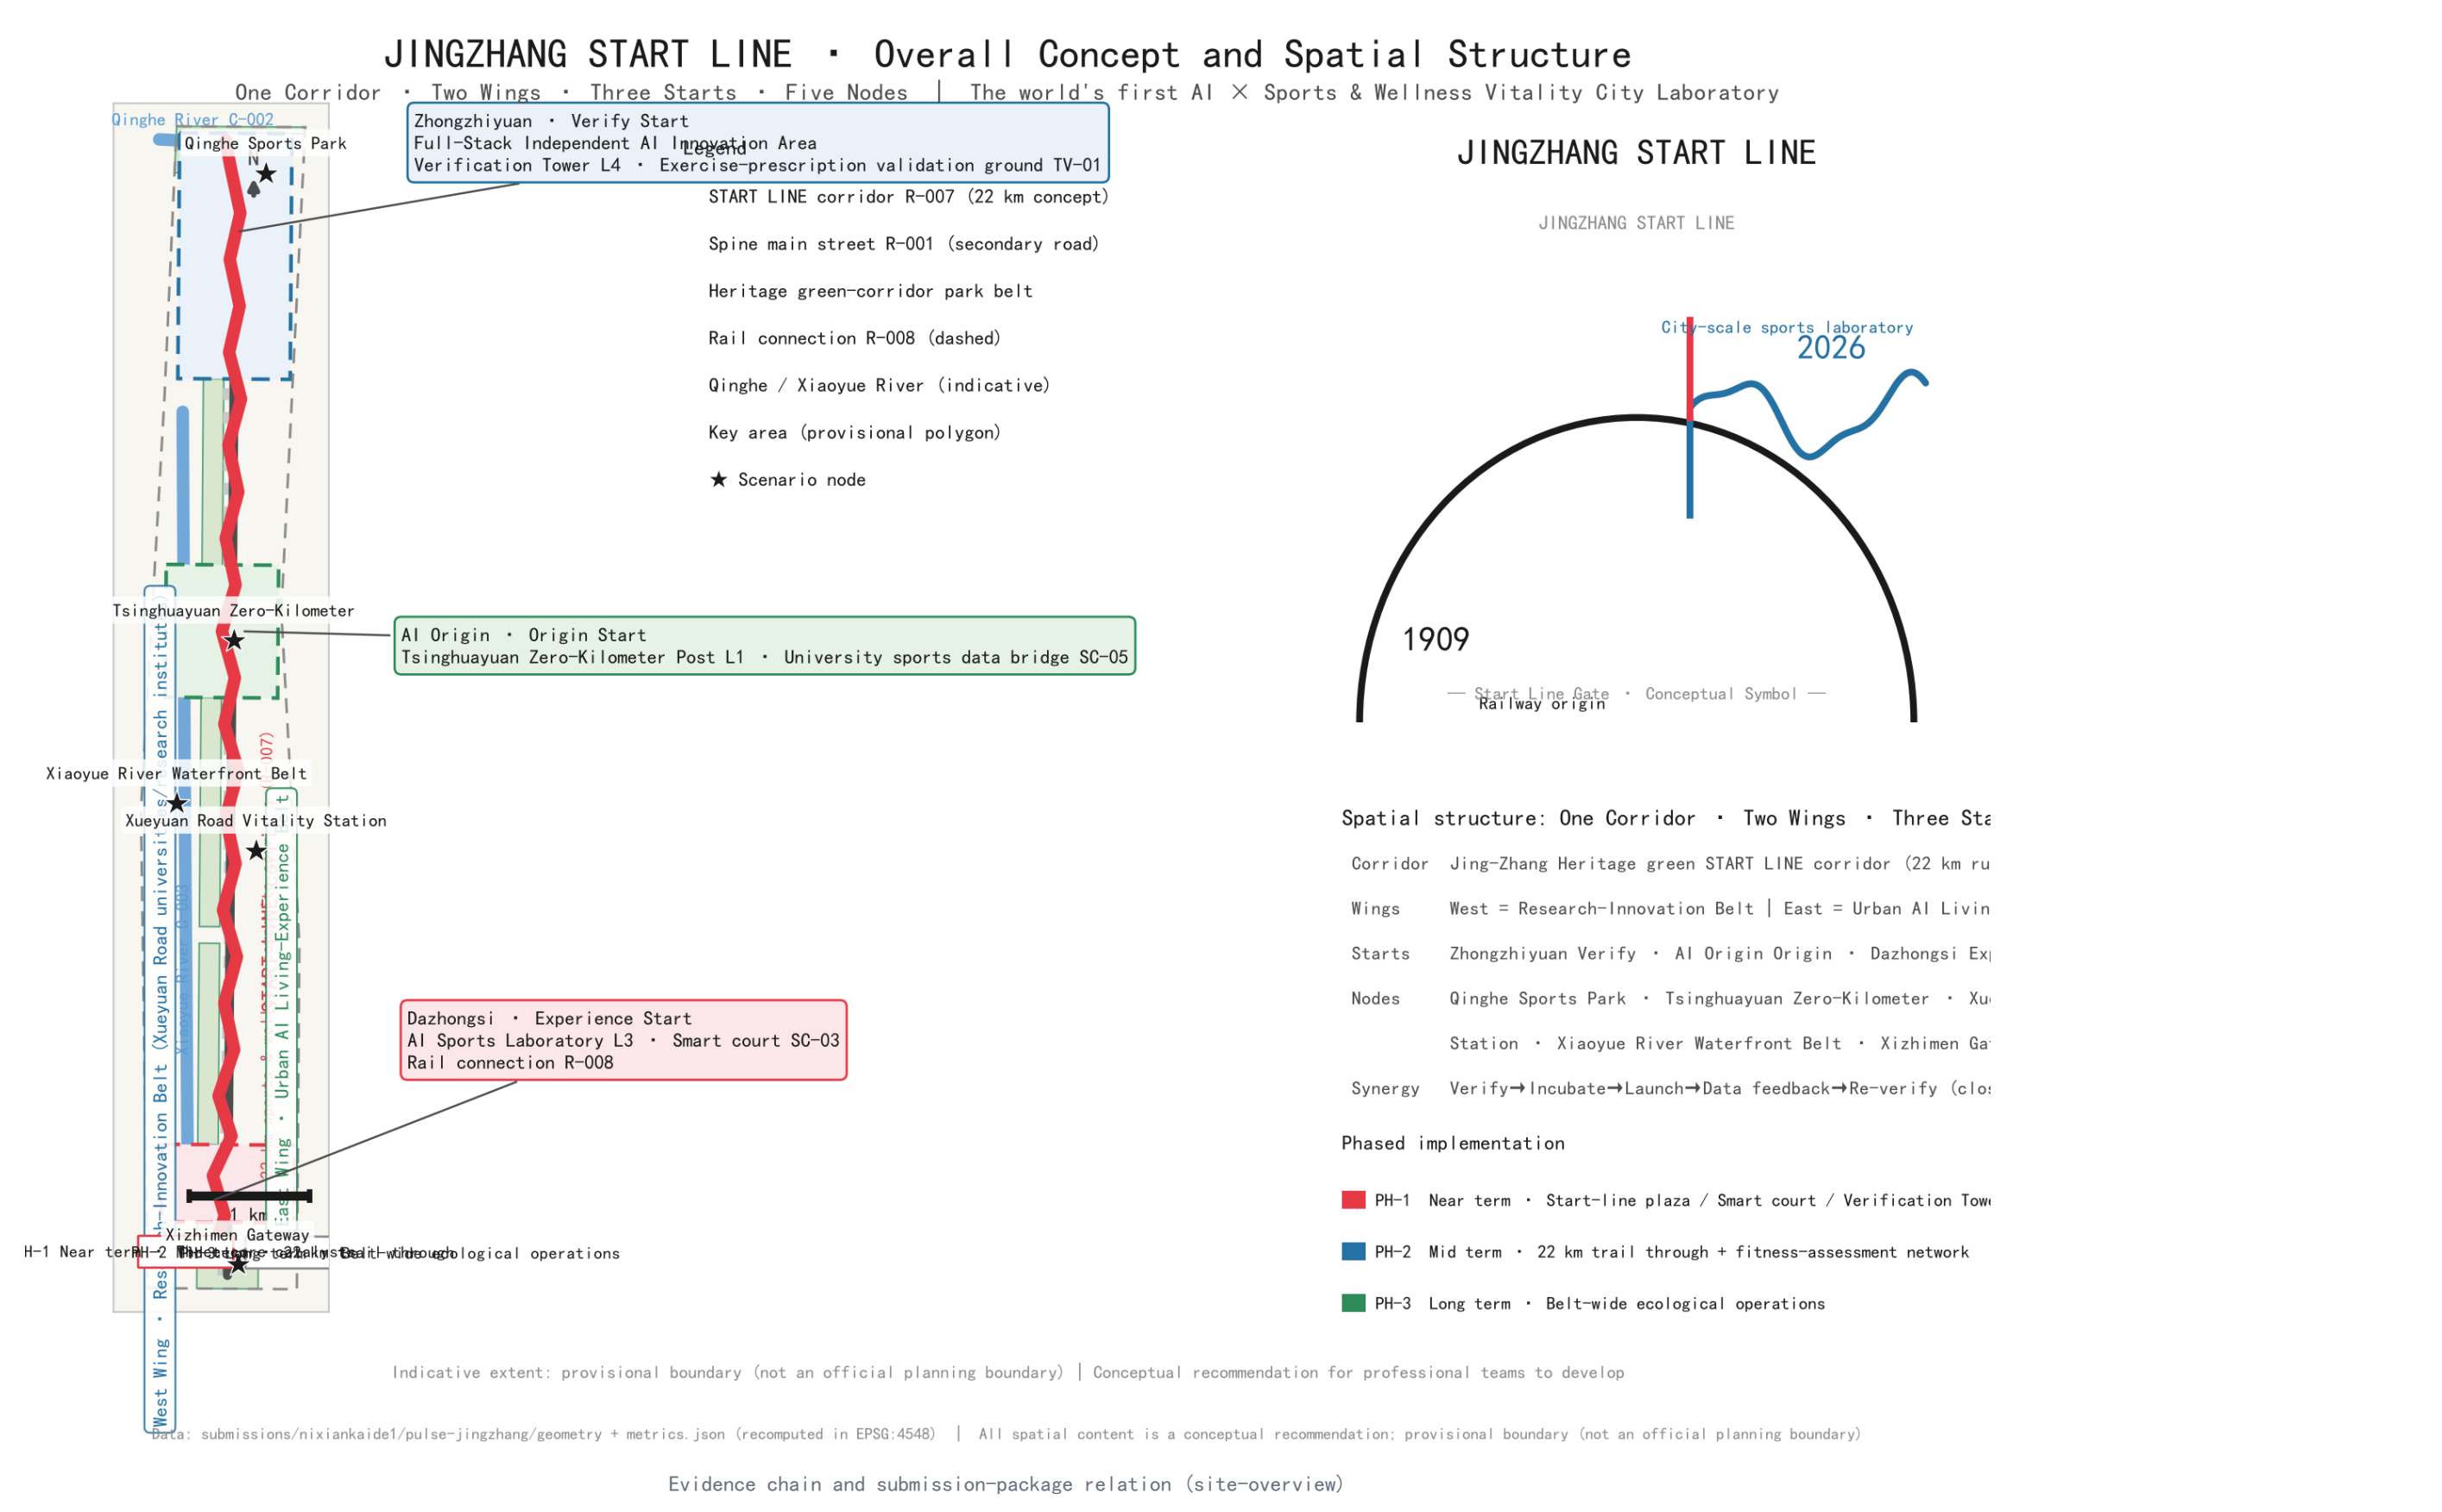

- Railway origin: Tsinghuayuan Station is the zero-kilometer point of the Jing-Zhang Railway and the start of China's self-built railways (1909 independent innovation)
- Sports origin: sports & wellness is humanity's first language, bringing AI from the screen onto the body (2026 city-scale sports laboratory)
- Innovation origin: AI computing signals make the city perceivable, responsive and evolvable — the start line of global AI innovation

Spatial Structure: 'One Corridor, Two Wings, Three Starts, Five Nodes'

- One Jing-Zhang Heritage Park green START LINE corridor: 22 km sports & wellness composite corridor (running + cycling + walking three-line)
- Two Wings = research-innovation belt (Xueyuan Road university cluster + research institutes); East belt = living-experience belt (urban AI life experience)
- Three Starts = Zhongzhiyuan (Verify Start) · AI Origin (Origin Start · Tsinghuayuan zero-kilometer) · Dazhongsi (Experience Start)
- Five Nodes = Qinghe Sports Park (north) · Tsinghuayuan Start Plaza (north-central) · Xueyuan Road Vitality Station (central) · Xiaoyue River waterfront belt (west wing) · Xizhimen gateway (south)

Synergy Loop

- Verify Start outputs → Origin Start incubation → Experience Start launch → the two wings supply factors → data flows back to Zhongzhiyuan for re-validation
- Naming system: Zhongzhiyuan · Verify Start / AI Origin · Origin Start / Dazhongsi · Experience Start / Zhongguancun · Service Start / Xiaoyue River · Empower Start

Coordinated Research Area

43.6 km2

industrial strategy & urban form

Overall Design Area

11.4 km2

regulatory-plan-depth urban design

Key-Area Detailed Design Area

368.4 ha

Zhongzhiyuan · AI Origin · Dazhongsi

Three-Level Transmission

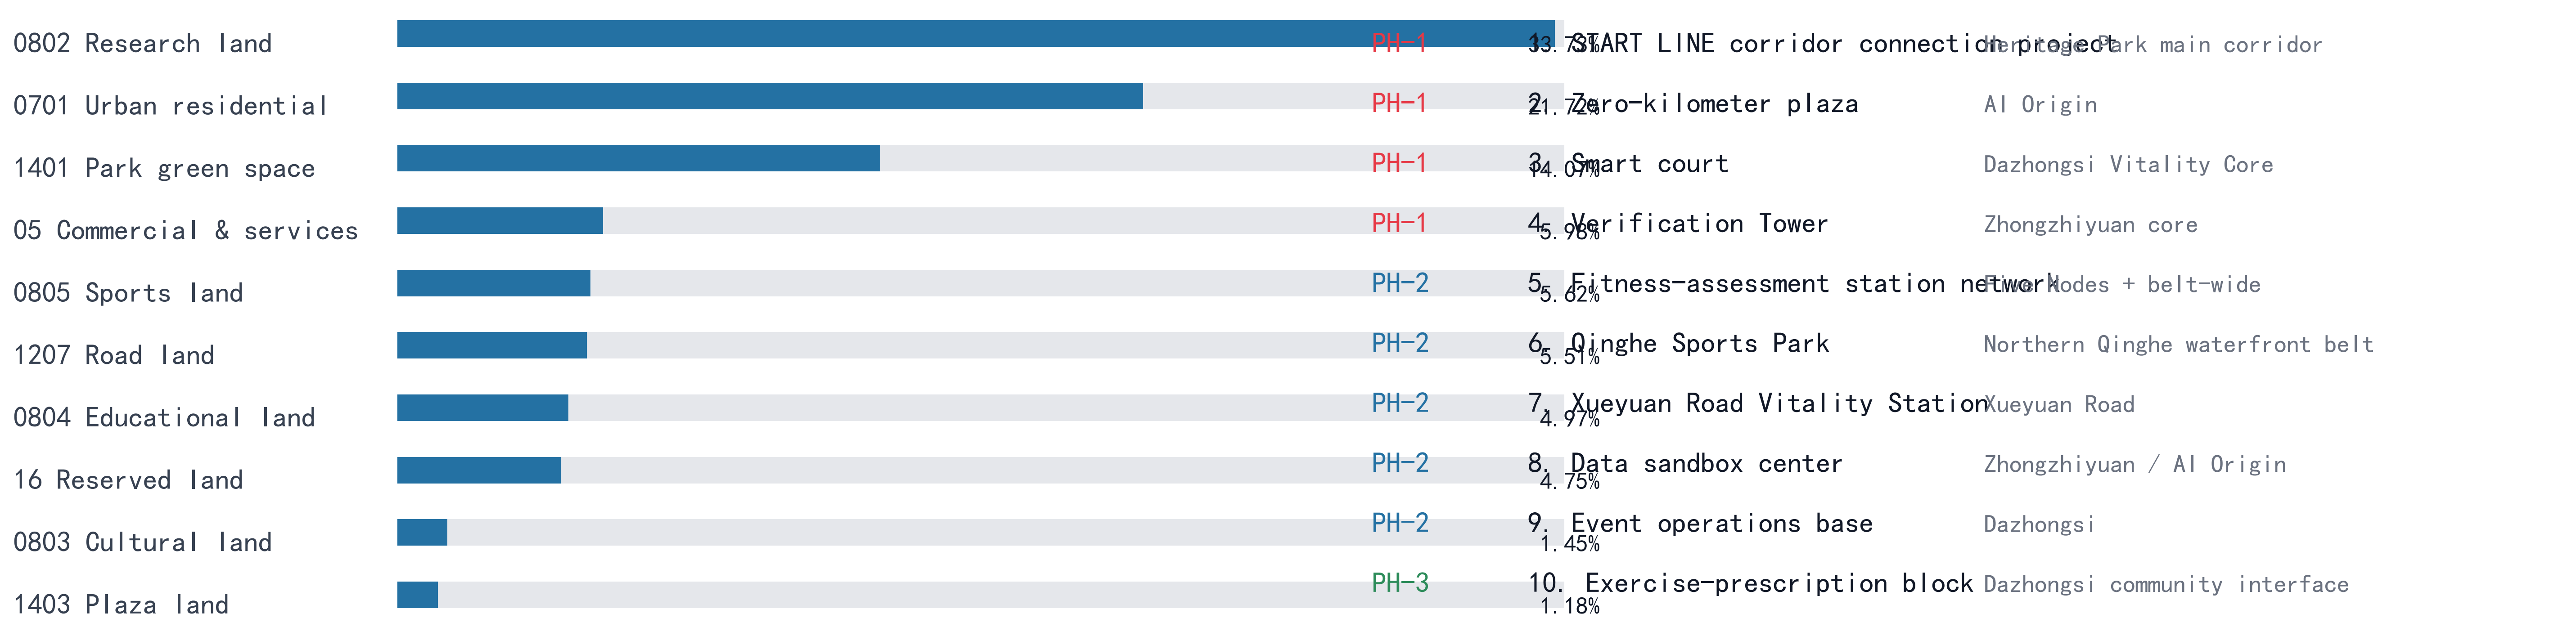

verify→origin→experience

One Corridor Two Wings Three Starts Five Nodes

Land Use & Renewal

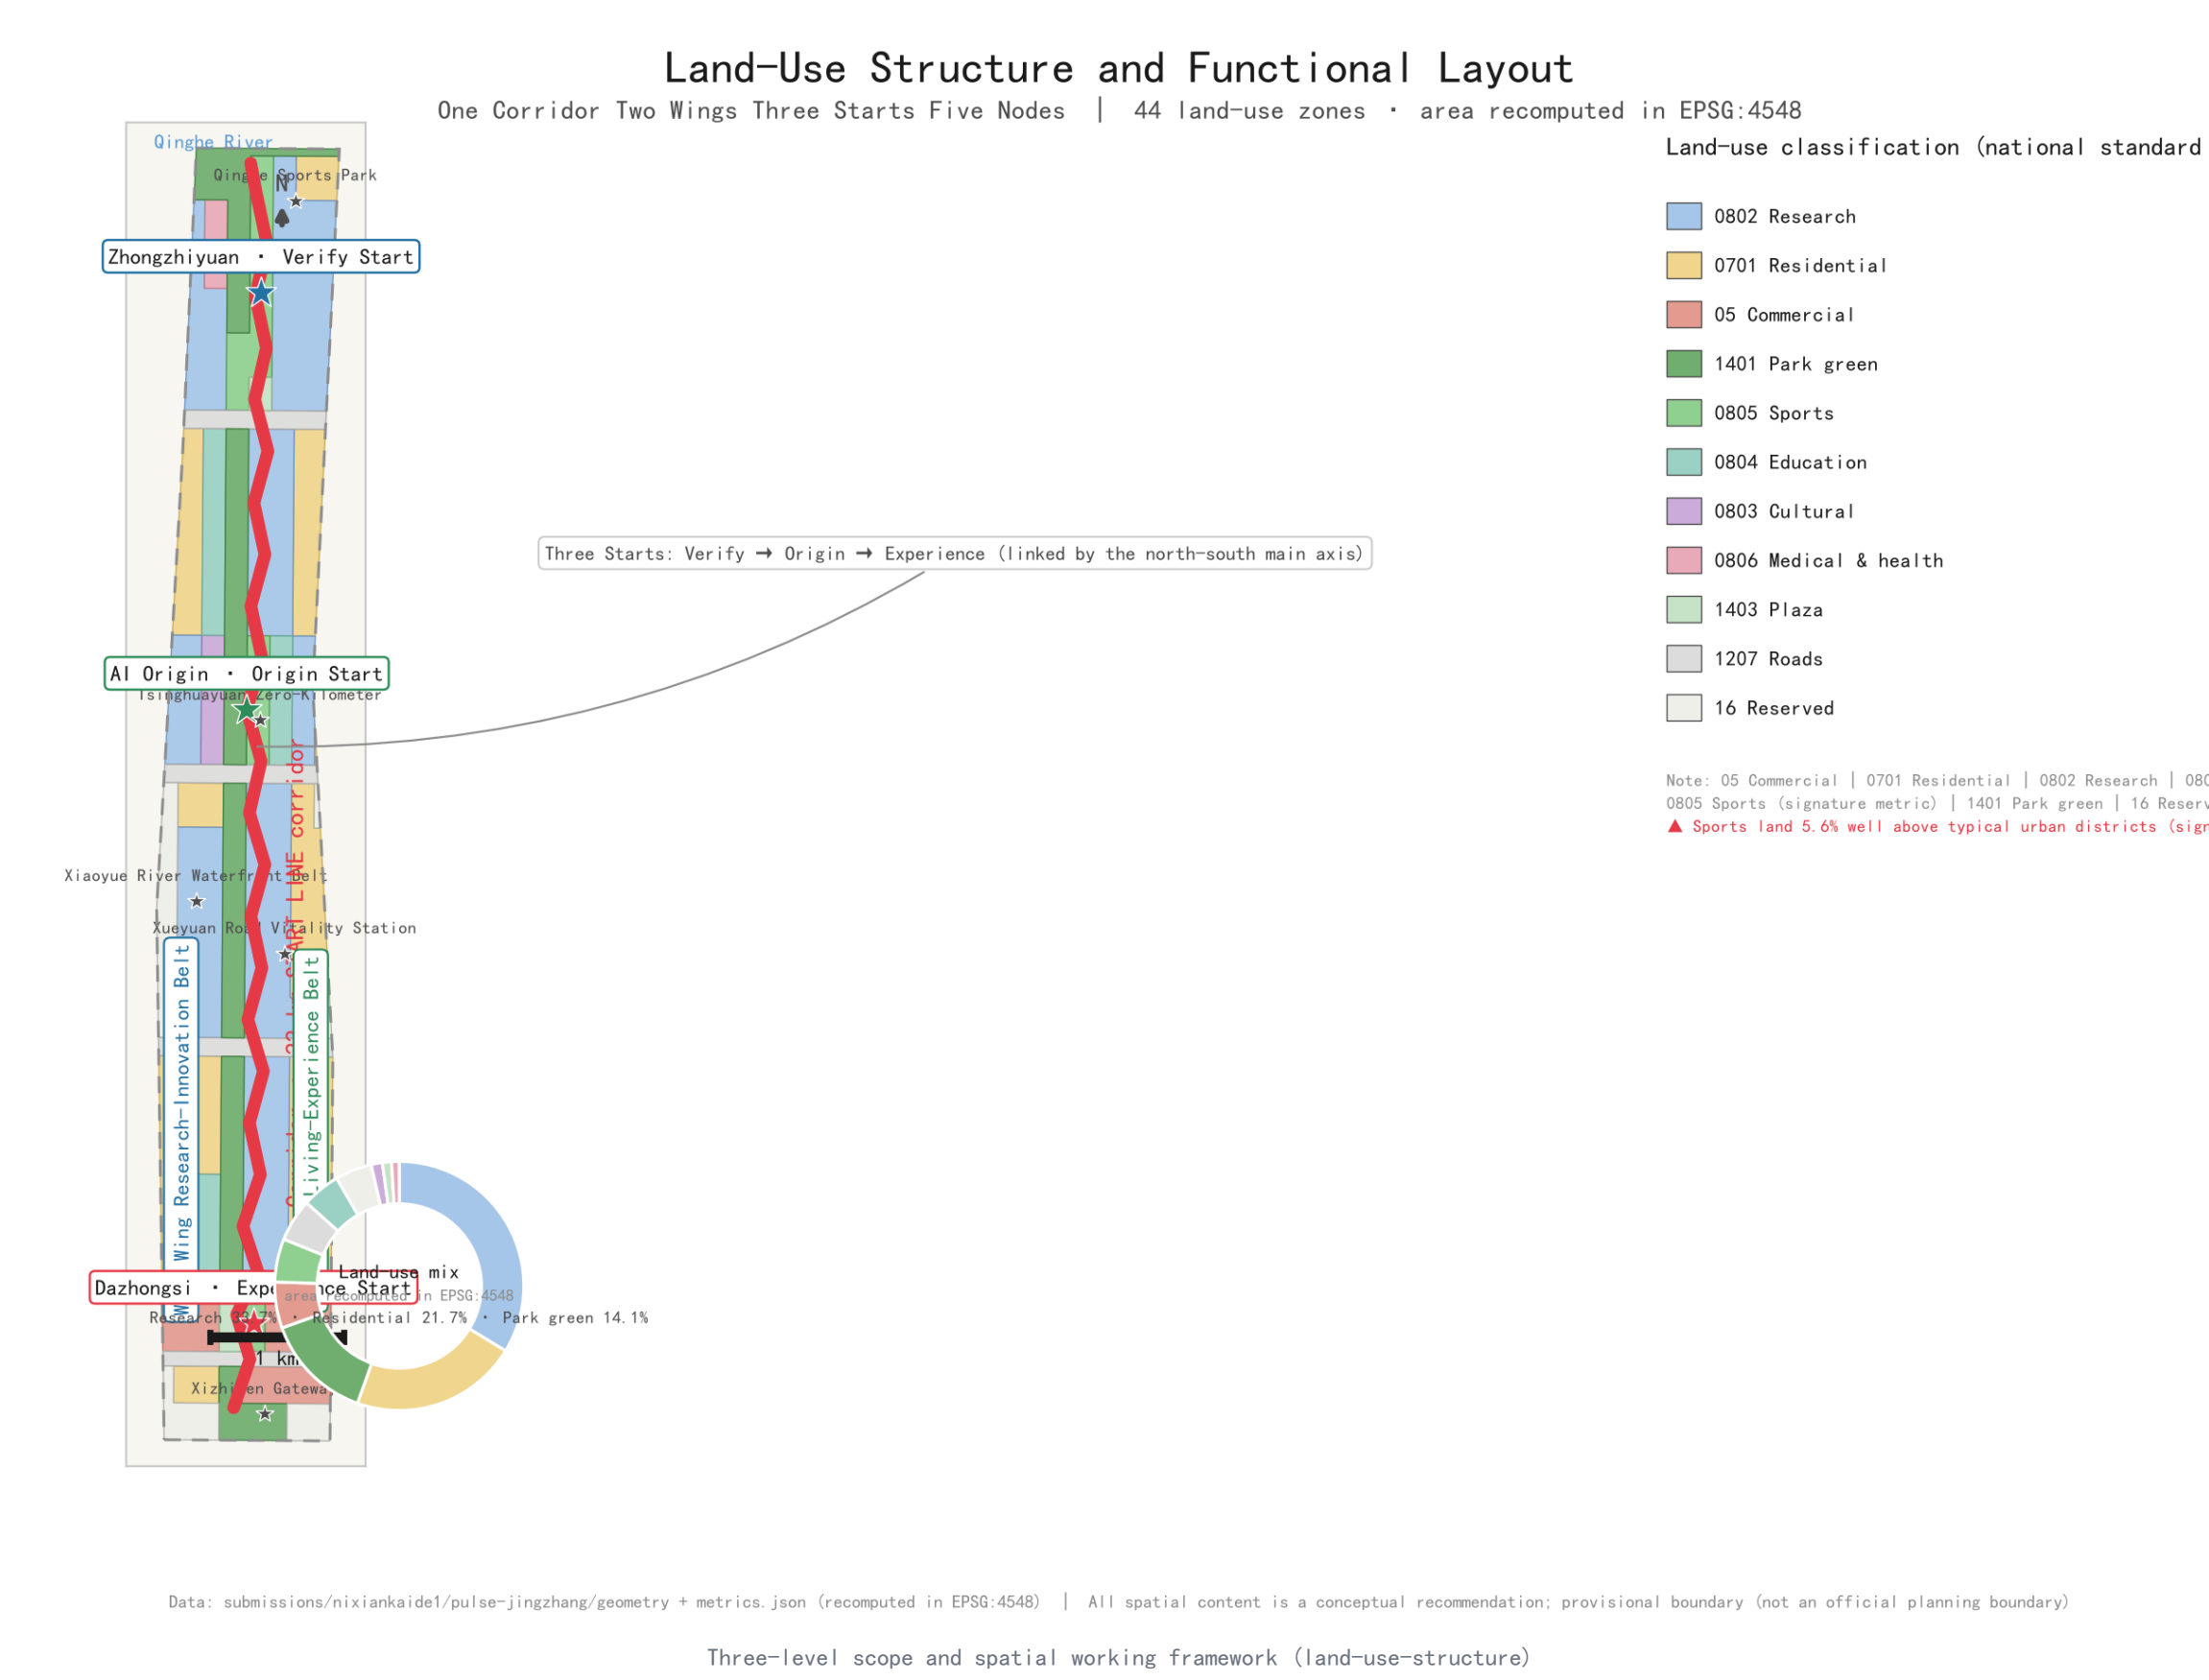

Land-use zones · Demolish – Renovate – Retain · renewal projects and phasing

Land-Use Structure (44 zones without gaps, 11.4 km²)Renewal Projects and Phasing (10 core catalysts)

Four Demolish – Renovate – Retain Logics (conceptual)

- Retain: Jing–Zhang railway heritage and heritage-protection units (former Tsinghuayuan Station site) — authentic protection; no new construction in heritage control areas
- Renovate: old industrial land and stock around universities — functional conversion + spatial mending
- Demolish: dilapidated buildings and inefficient land — possibility raised only; confirmed after building-by-building review
- New-build: node complexes at the Three Starts — supplementing testing/validation and experience/display functions

PH-1 Near term 2026—2028

Catalyst projects

start-line plaza · smart court · Verification Tower

PH-2 Mid term 2028—2030

22 km completion

START LINE corridor + fitness-assessment network

PH-3 Long term 2030—2035

Ecological operation

scenario access network + annual events

Demolish – Renovate – Retain

Four logics

retain / renovate / demolish / new-build

Transport, Blue-Green & Scenarios

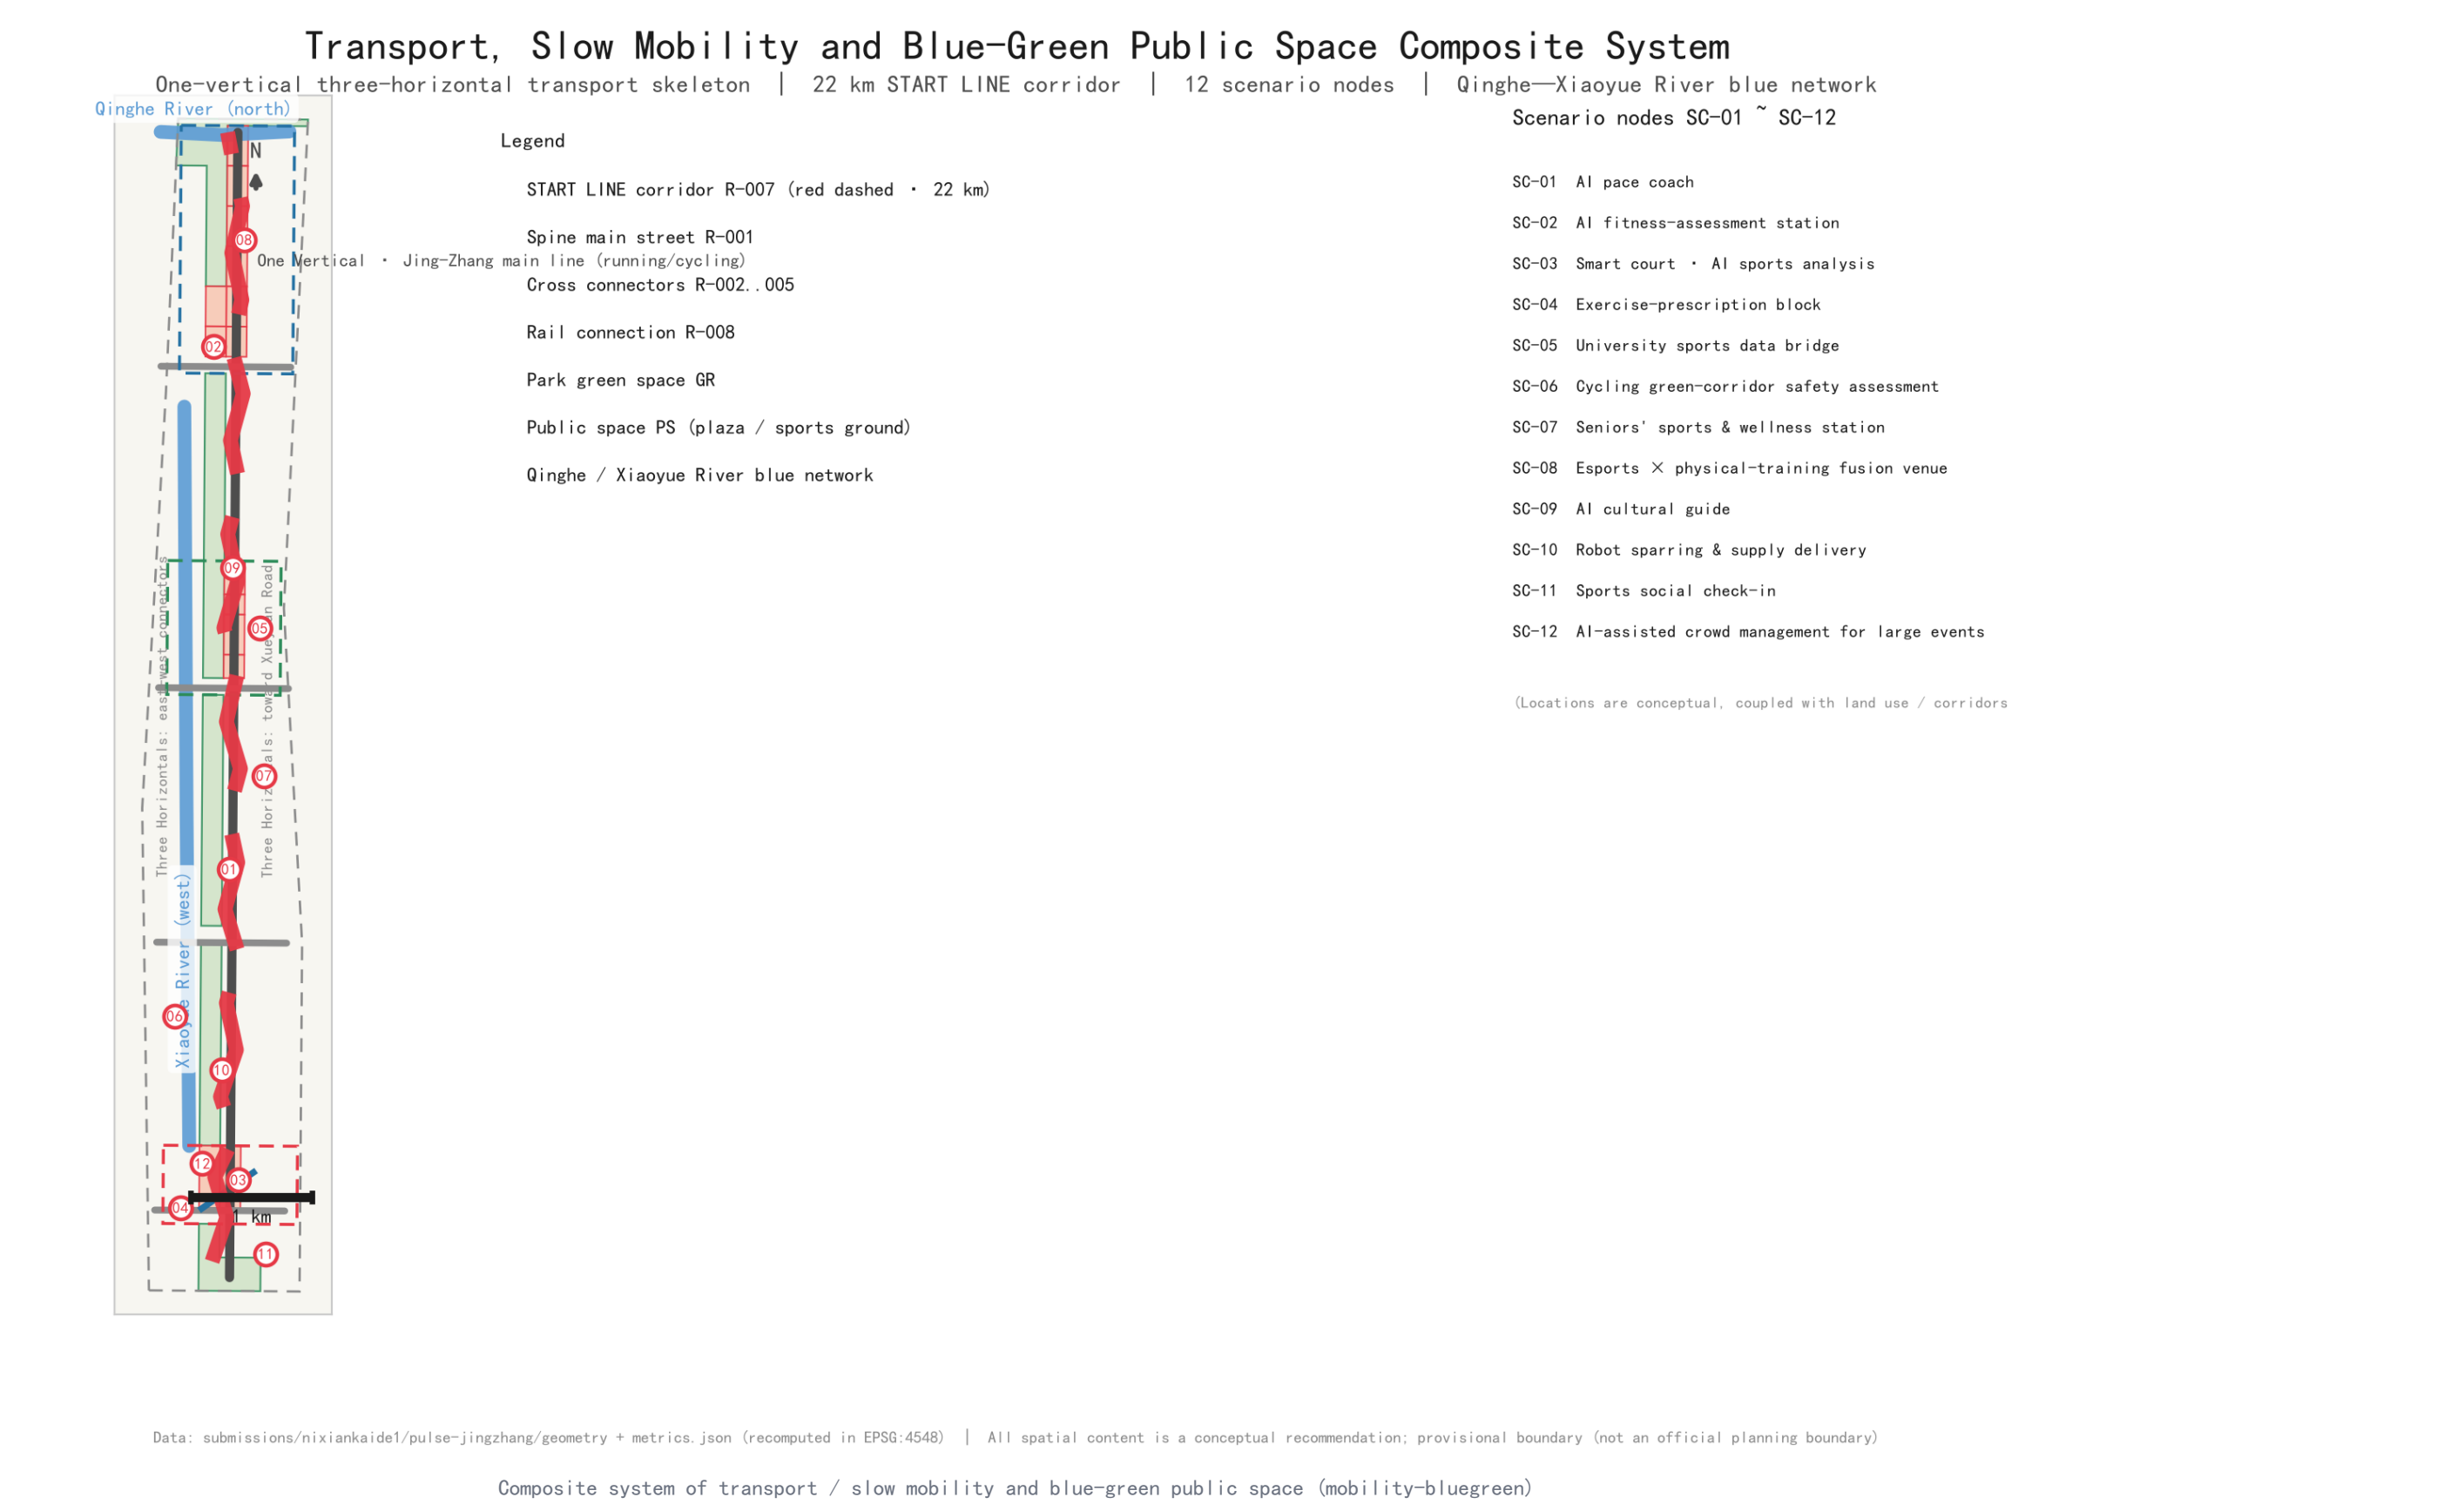

One vertical three horizontals · blue-green public space · AI scenarios

Transport & Slow Mobility: 'One Vertical, Three Horizontals' AI Scenarios (12 cards + 3 testing/validation)

- One Vertical: START LINE corridor R-007 — running + cycling + walking three-line, 22 km concept (9.7 km measured in the provisional range)
- Three Horizontals: Xueyuan Road, Dazhongsi East Road, Xizhimen Outer Street — east-west distribution and rail connections; intersections are scenario nodes
- Rail: Line 13, Changping Line and the Zhichun Road—Xizhimen interchange anchor; TOD concept 'start running right after exiting the station'

Blue-Green Public Space

- Qinghe (north) — Xiaoyue River (west wing) — Heritage Park green corridor (main axis) connected; Green 12% + Plaza 4%
- Public-space component library (six): fitness-assessment station, supply station, start gate, zero-kilometer post, honor wall, pace signag
- Four pilgrimage landmarks: L1 zero-kilometer post · L2 open-source achievement kilometer corridor · L3 AI Sports Laboratory · L4 Zhongzhiyuan Verification Tower

P1–P3

Sports-tech people

research · entrepreneurship · students

P4–P5

Community & commuters

seniors' health · cycling commute

P6

International users

athletes · tourists · events

6 personas

Full-population coverage

from research to foreign visitors

Key Areas & Metrics

Three key areas • core metrics and evidence

Zhongzhiyuan • Verify Start192.1 ha

'One Core, One Ring, One Belt': Verification Tower + testing/validation cluster, industry-service ring, sports & wellness testing belt facing the Qinghe River; SC-08/TV-01/TV-03

AI Origin • Origin Start104.3 ha

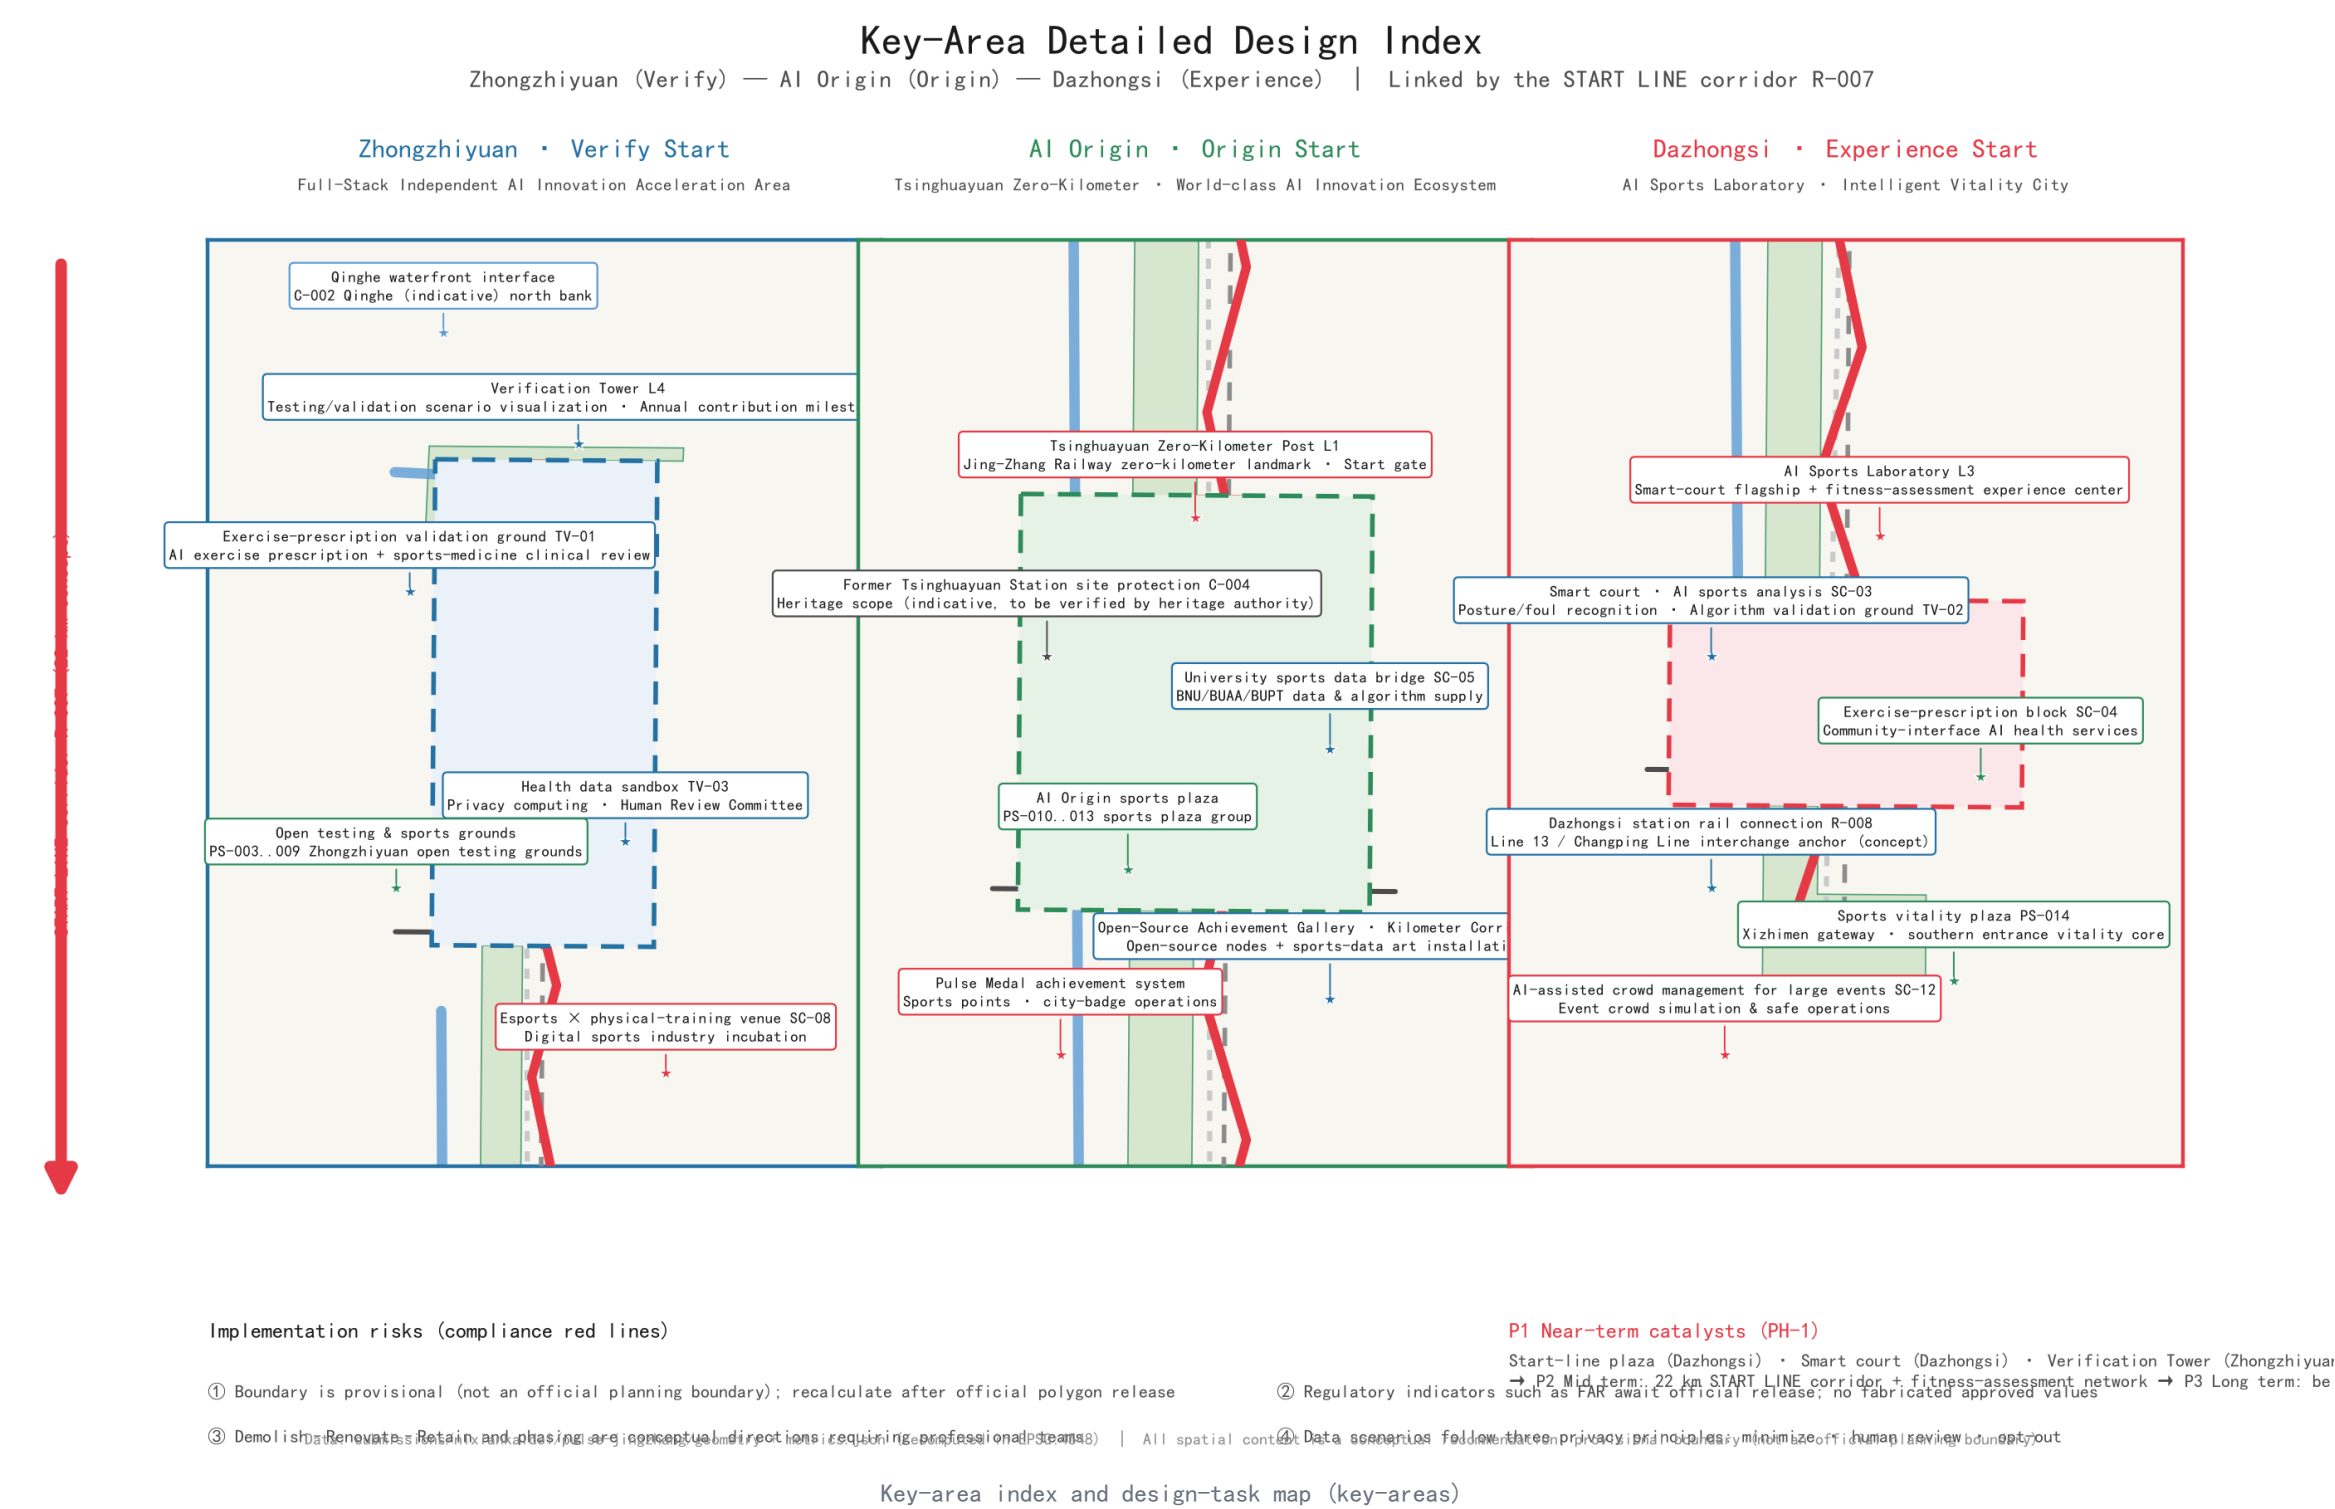

'One Plaza, One Axis, One Corridor': Tsinghuayuan Start Plaza (zero-kilometer post + start gate), Xueyuan Road Innovation Axis, Heritage Park main corridor; heritage protection first

Dazhongsi • Experience Start72.0 ha

'One Core, Two Interfaces': Dazhongsi Vitality Core (smart-court flagship + fitness-assessment experience center), community interface, rail interface; SC-03/SC-04/TV-02

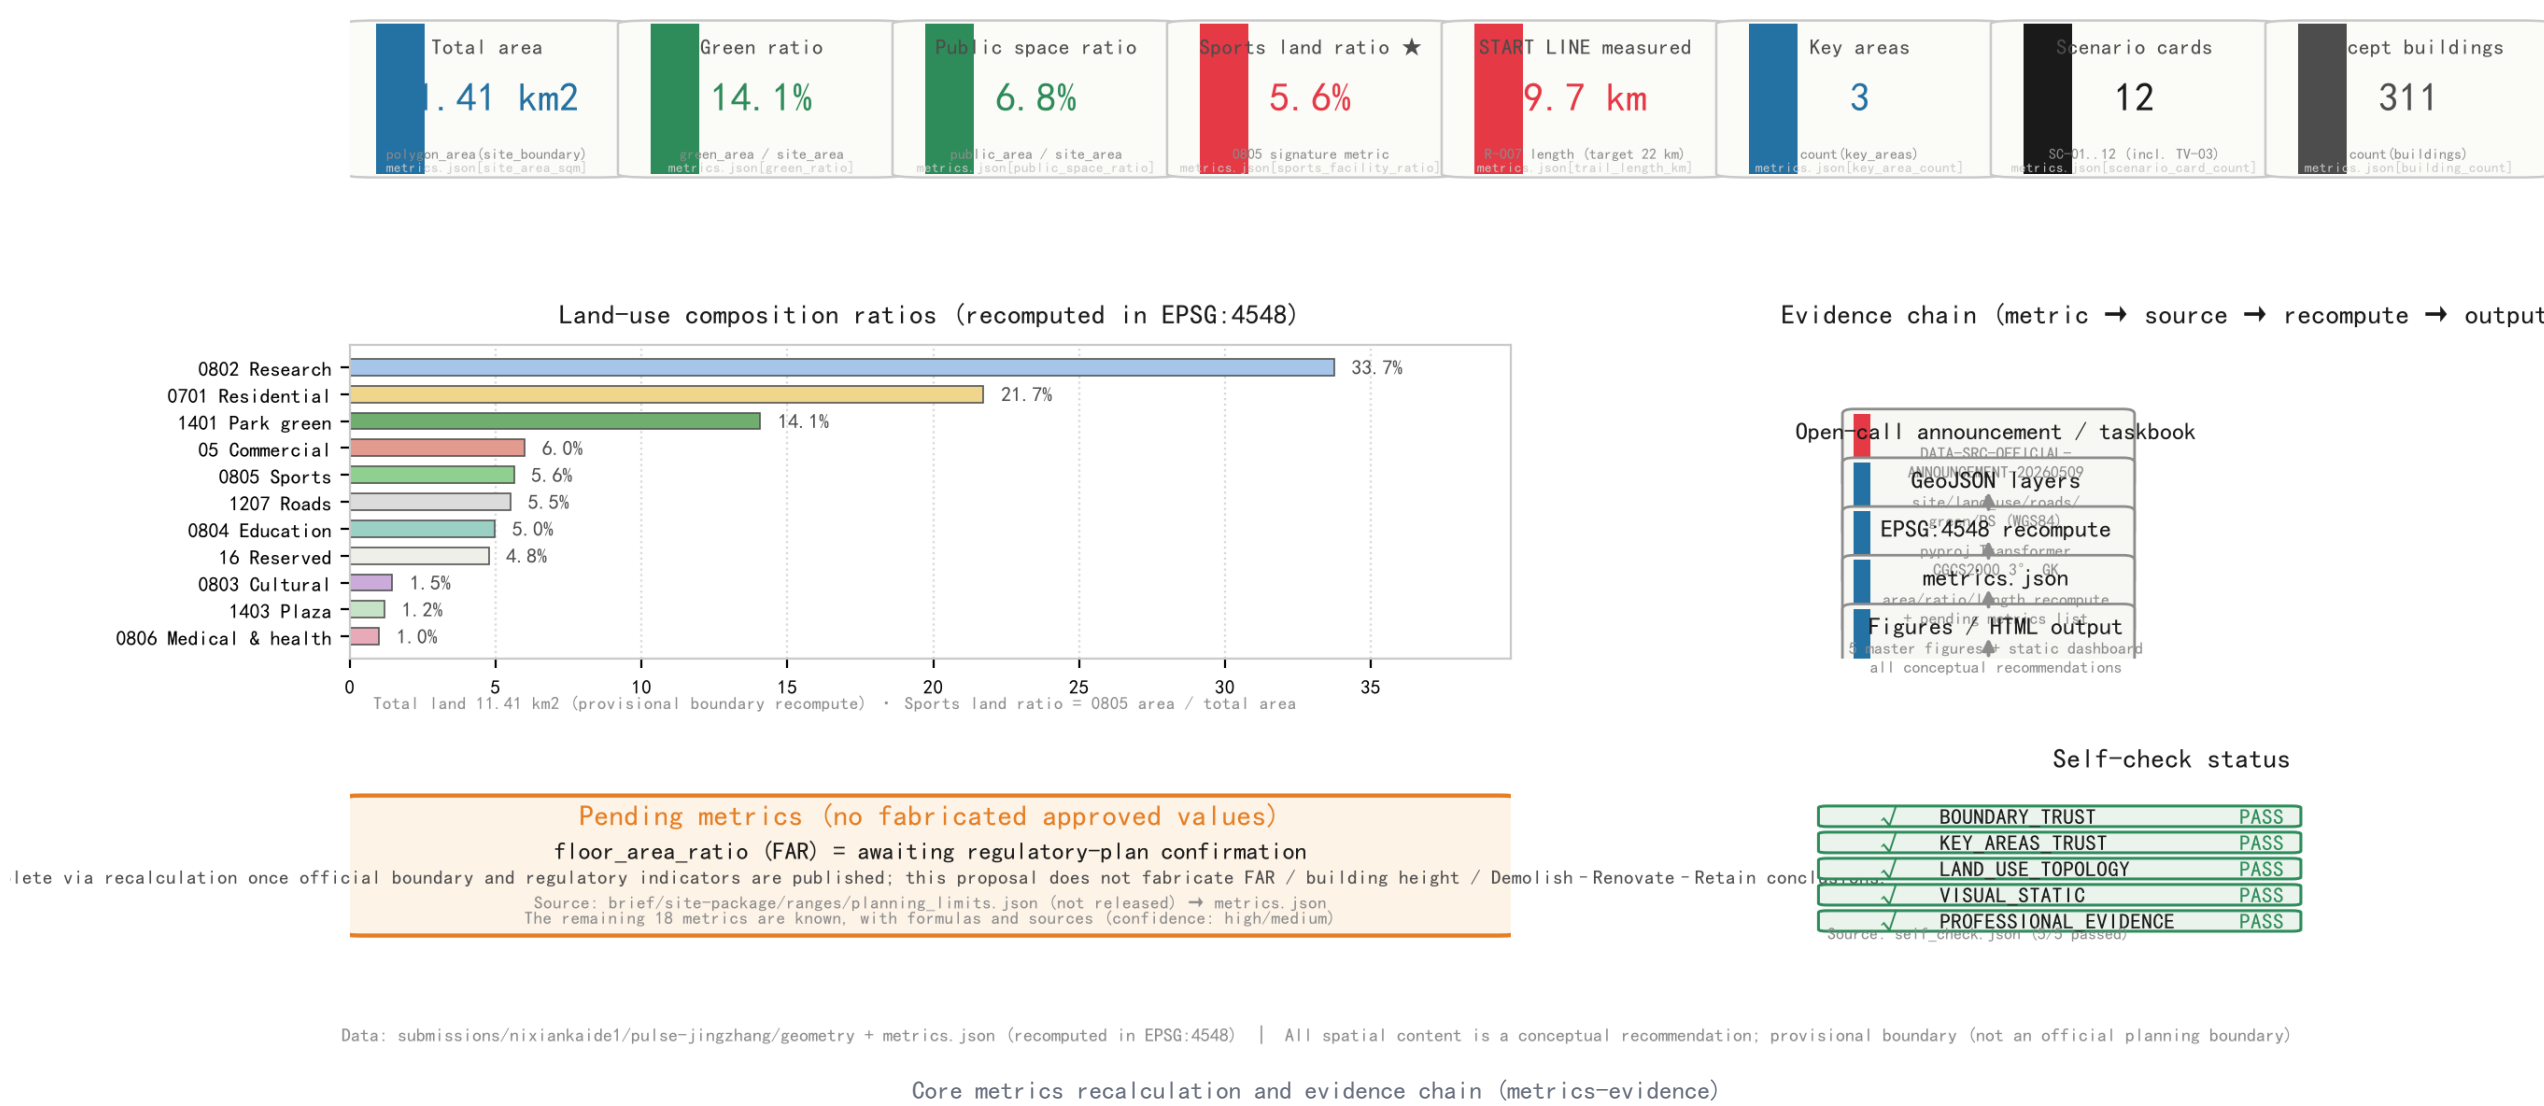

Core Metrics (same source as metrics.json, EPSG:4548 recalculation)

site_area_sqm	11,412,825 m ²	Overall Design Area
green_ratio	14.07%	green share
public_space_ratio	6.80%	public-space share
sports_facility_ratio	5.62%	sports land (signature)
trail_length_km	9.7 km	measurable START LINE length
spine_road_length_km	9.49 km	north-south spine main street
research_space_ratio	33.73%	research share
residential_ratio	21.72%	residential share
building_footprint_area_sqm	3,297,093 m ²	building footprint
building_count	311	conceptual building footprints
land_use_zone_count	44	land-use zones
scenario_card_count	12	scenario cards
persona_count	6	user personas
landmark_count	4	pilgrimage landmarks
case_study_count	6	global cases
renewal_project_count	10	core catalyst projects
key_area_count	3	key areas
phase_count	3	implementation phases

Core Metrics Recalculation and Evidence Chain
