

Jing-Zhang Rail Handoff

京张·接力交路 — One Rail, a Century of Handoffs

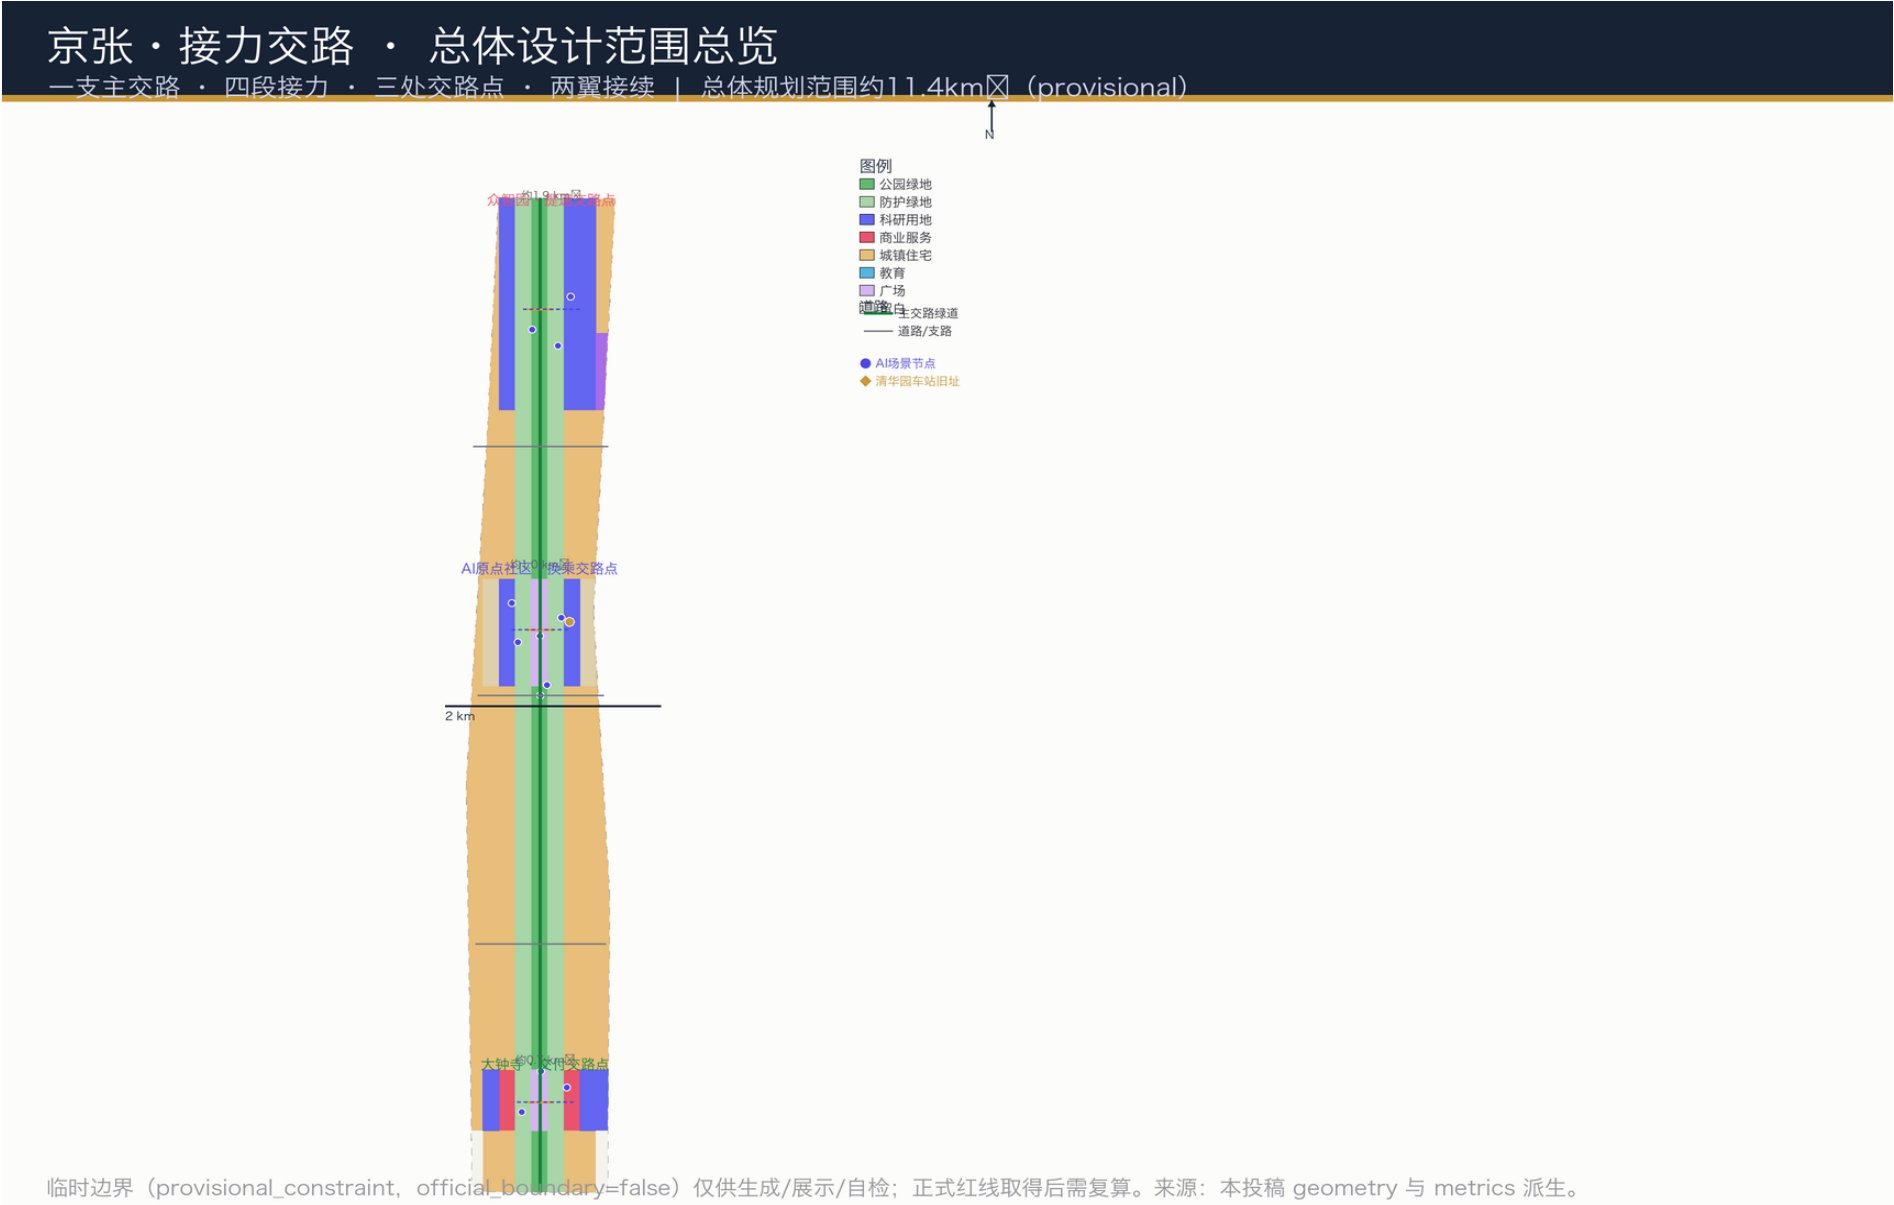

Concept: one main handoff rail · four relay segments (seed→transfer→accelerate→deliver) · three handoff points · two relay wings. Governance mechanism: the Rail Handoff Protocol — results, talent, and scenarios are handed off, signed, and traced at each handoff point; no scenario enters the next segment before the previous one passes.

This drawing is an AI concept proposal using provisional_constraint temporary boundaries (official_boundary=false), for generation, display and self-check discussion only; all geometry and metrics must be recalculated once official redlines are available. All spatial suggestions are conceptual / reference schemes for professional teams to deepen; they are not statutory plans, approvals, ownership, or engineering conclusions.

Three-Level Scope Framework

Coordinated / Overall / Key-Area levels

This drawing is an AI concept proposal using provisional_constraint temporary boundaries (official_boundary=false), for generation, display and self-check discussion only; all geometry and metrics must be recalculated once official redlines are available. All spatial suggestions are conceptual / reference schemes for professional teams to deepen; they are not statutory plans, approvals, ownership, or engineering conclusions.

Coordinated Research: Ecosystem & Global Cases

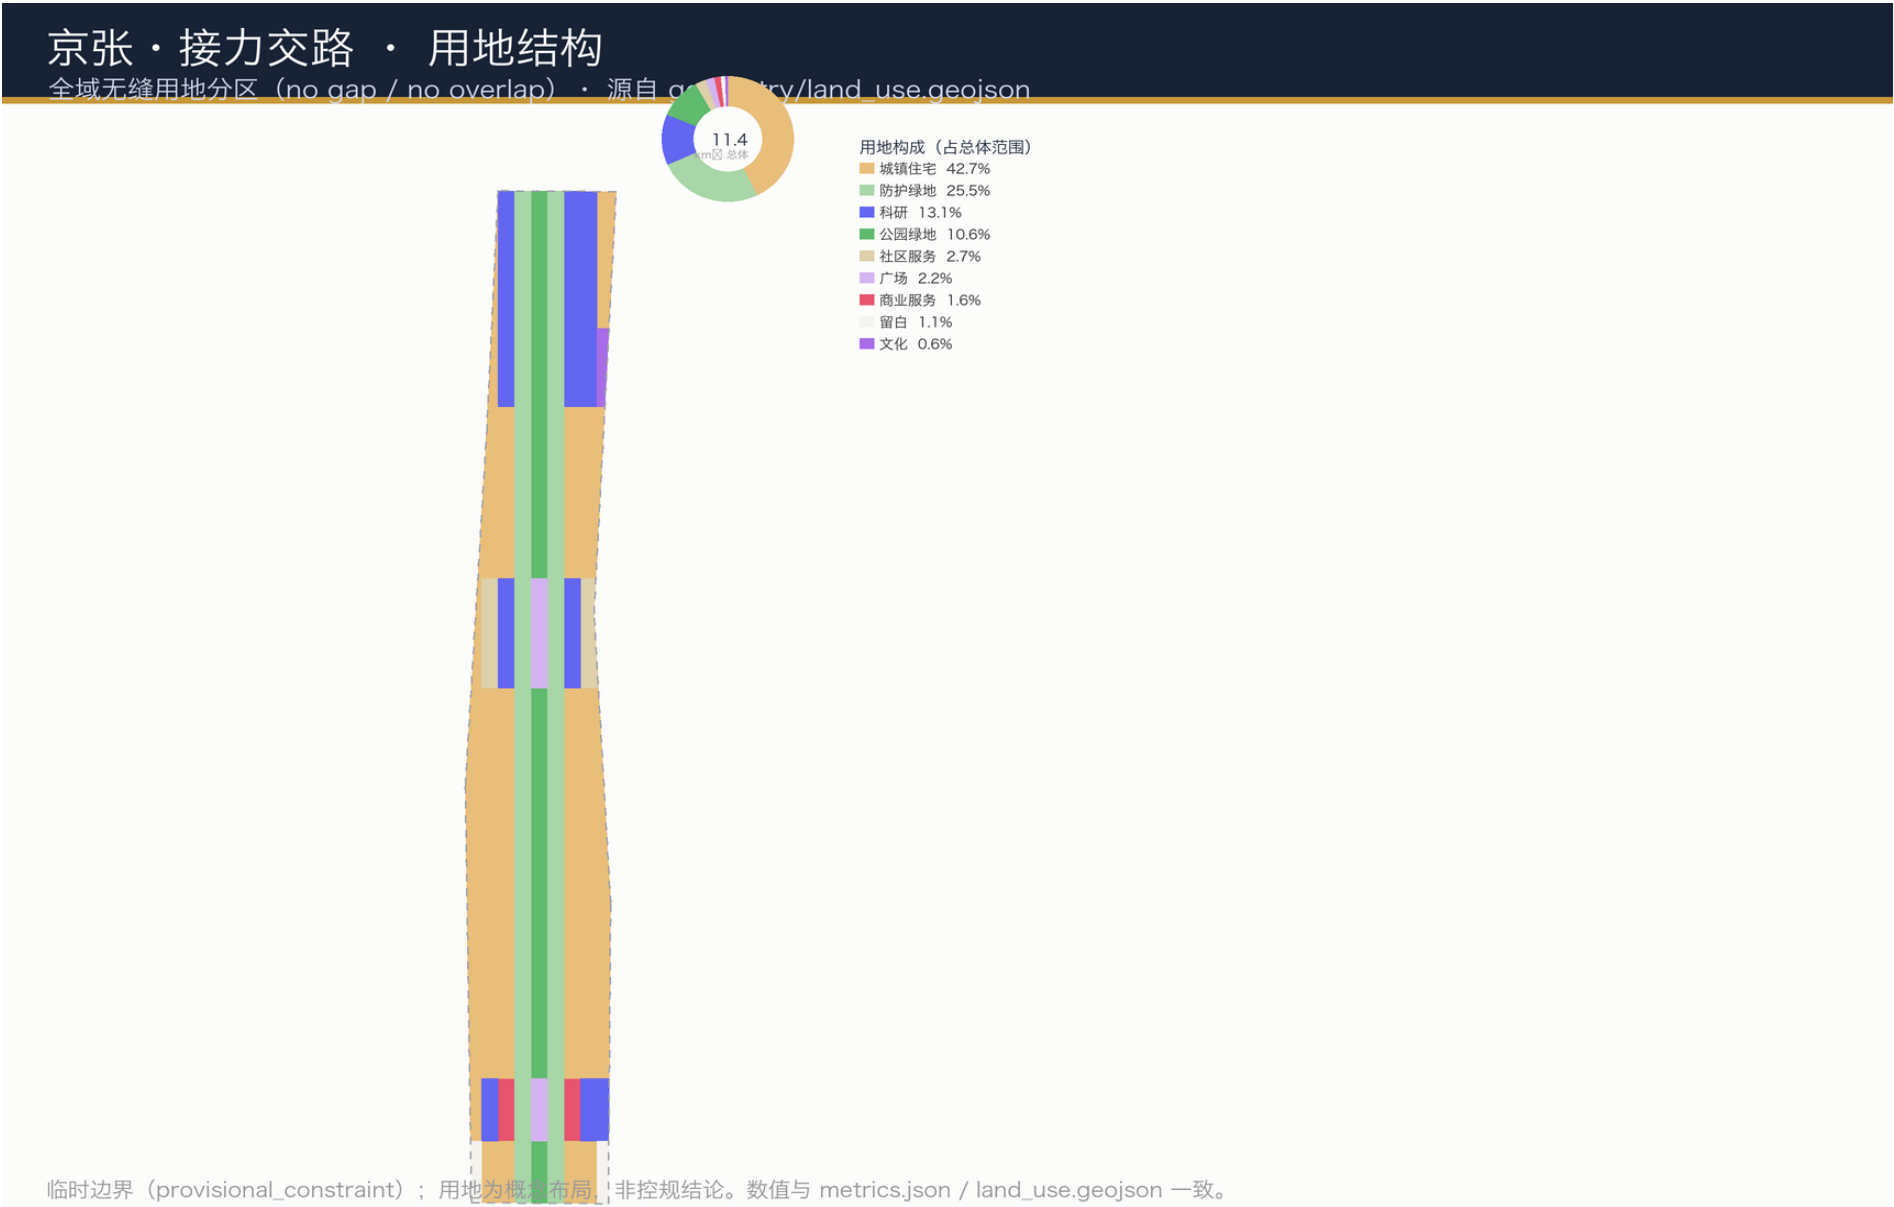

Eight global AI ecosystem cases

Ecosystem cases: King's Cross (rail→knowledge quarter), Kendall Square (university-anchored), one-north (city-as-campus), Station F (operation-as-brand), Zhangjiang (platform urbanization), Shenzhen Nanshan (test beds), Yunqi (event brand), Zhongguancun (reference frame). 12 AI scenario cards, 4 industry test/validation scenarios, 6 user personas; 4 pilgrimage landmarks and an honor-display system; a three-source cultural narrative (railway / Zhongguancun / AI new culture); an annual event system (Jing-Zhang Relay Handoff Festival, Scenario Open Days, Developer Week, International Rail-Handoff Prize).

This drawing is an AI concept proposal using provisional_constraint temporary boundaries (official_boundary=false), for generation, display and self-check discussion only; all geometry and metrics must be recalculated once official redlines are available. All spatial suggestions are conceptual / reference schemes for professional teams to deepen; they are not statutory plans, approvals, ownership, or engineering conclusions.

Overall Spatial Structure & Land Use

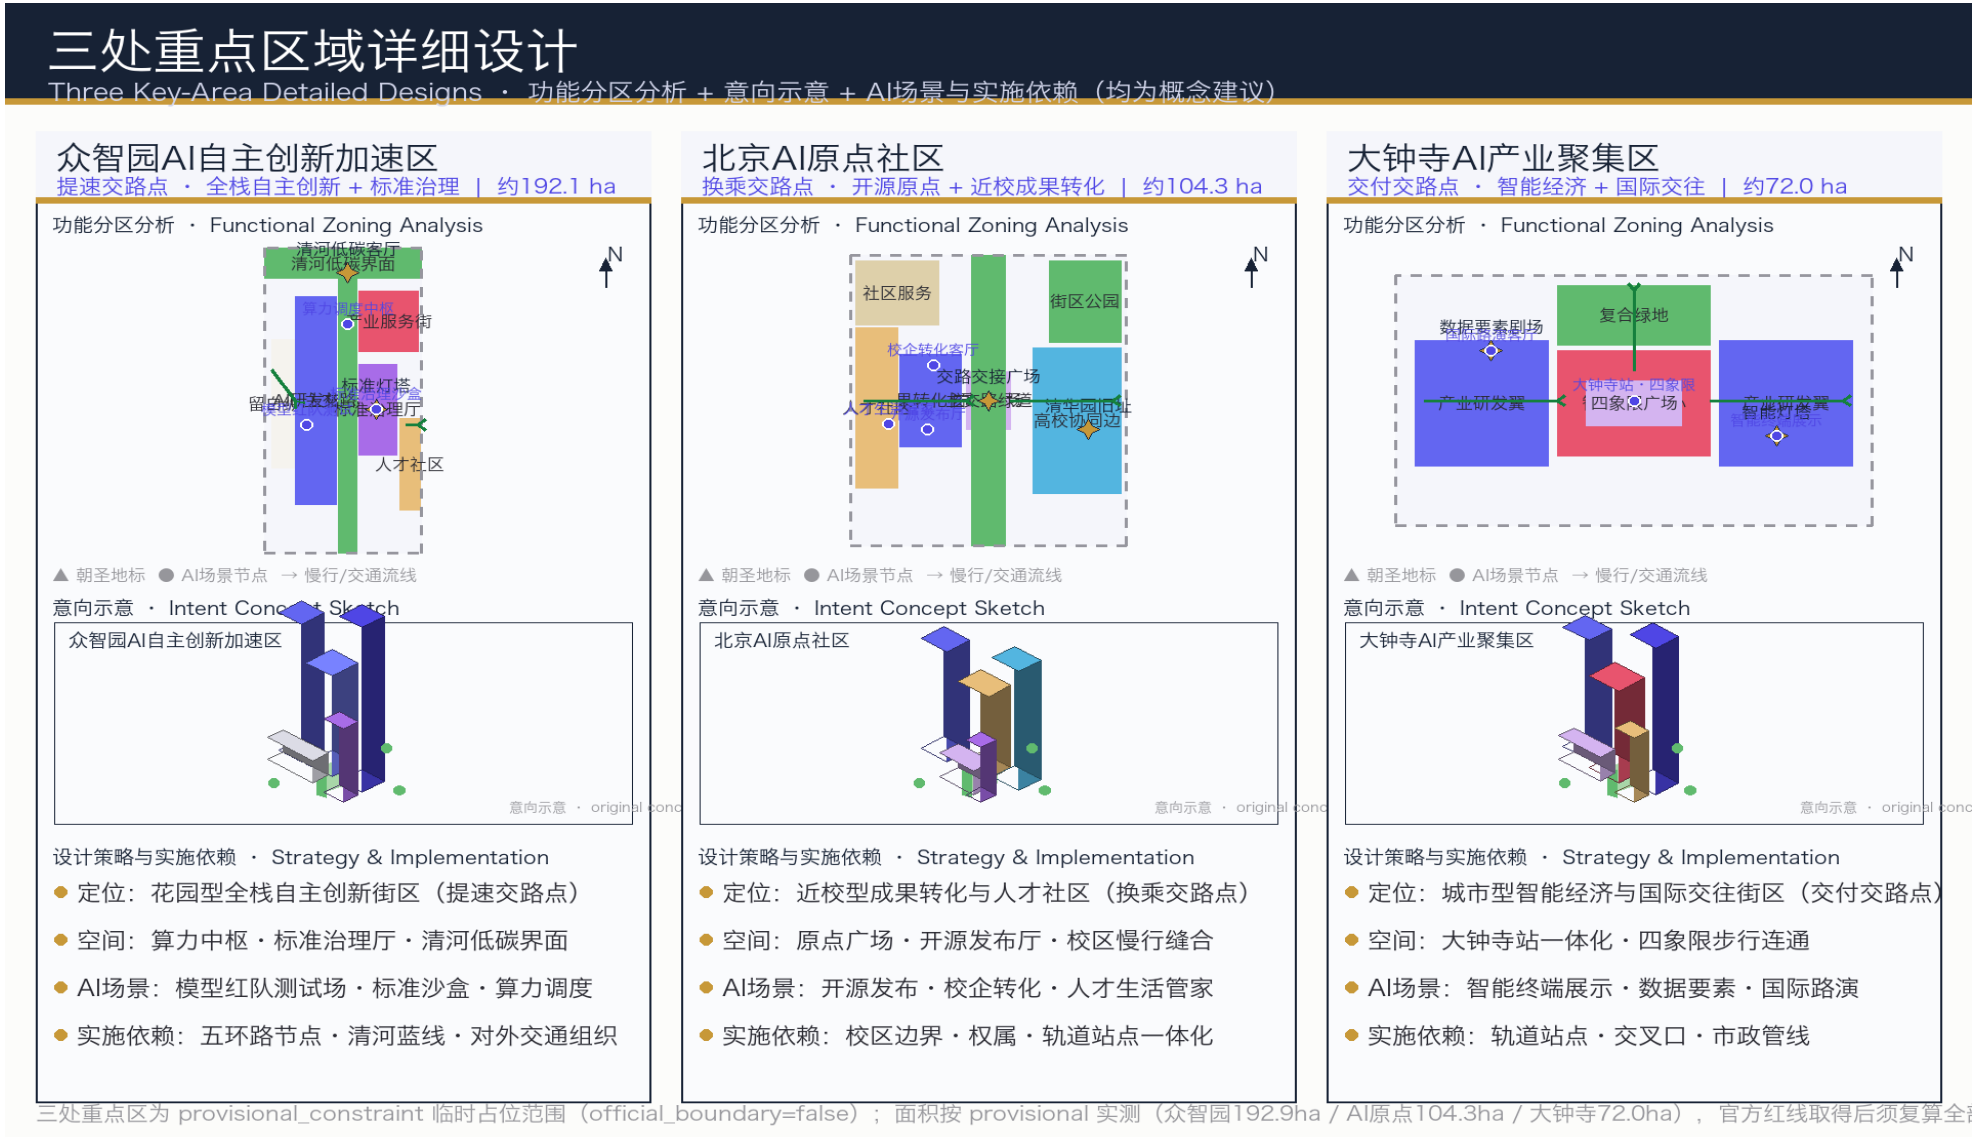

One main handoff rail · four segments · three handoff points · two wings

This drawing is an AI concept proposal using provisional_constraint temporary boundaries (official_boundary=false), for generation, display and self-check discussion only; all geometry and metrics must be recalculated once official redlines are available. All spatial suggestions are conceptual / reference schemes for professional teams to deepen; they are not statutory plans, approvals, ownership, or engineering conclusions.

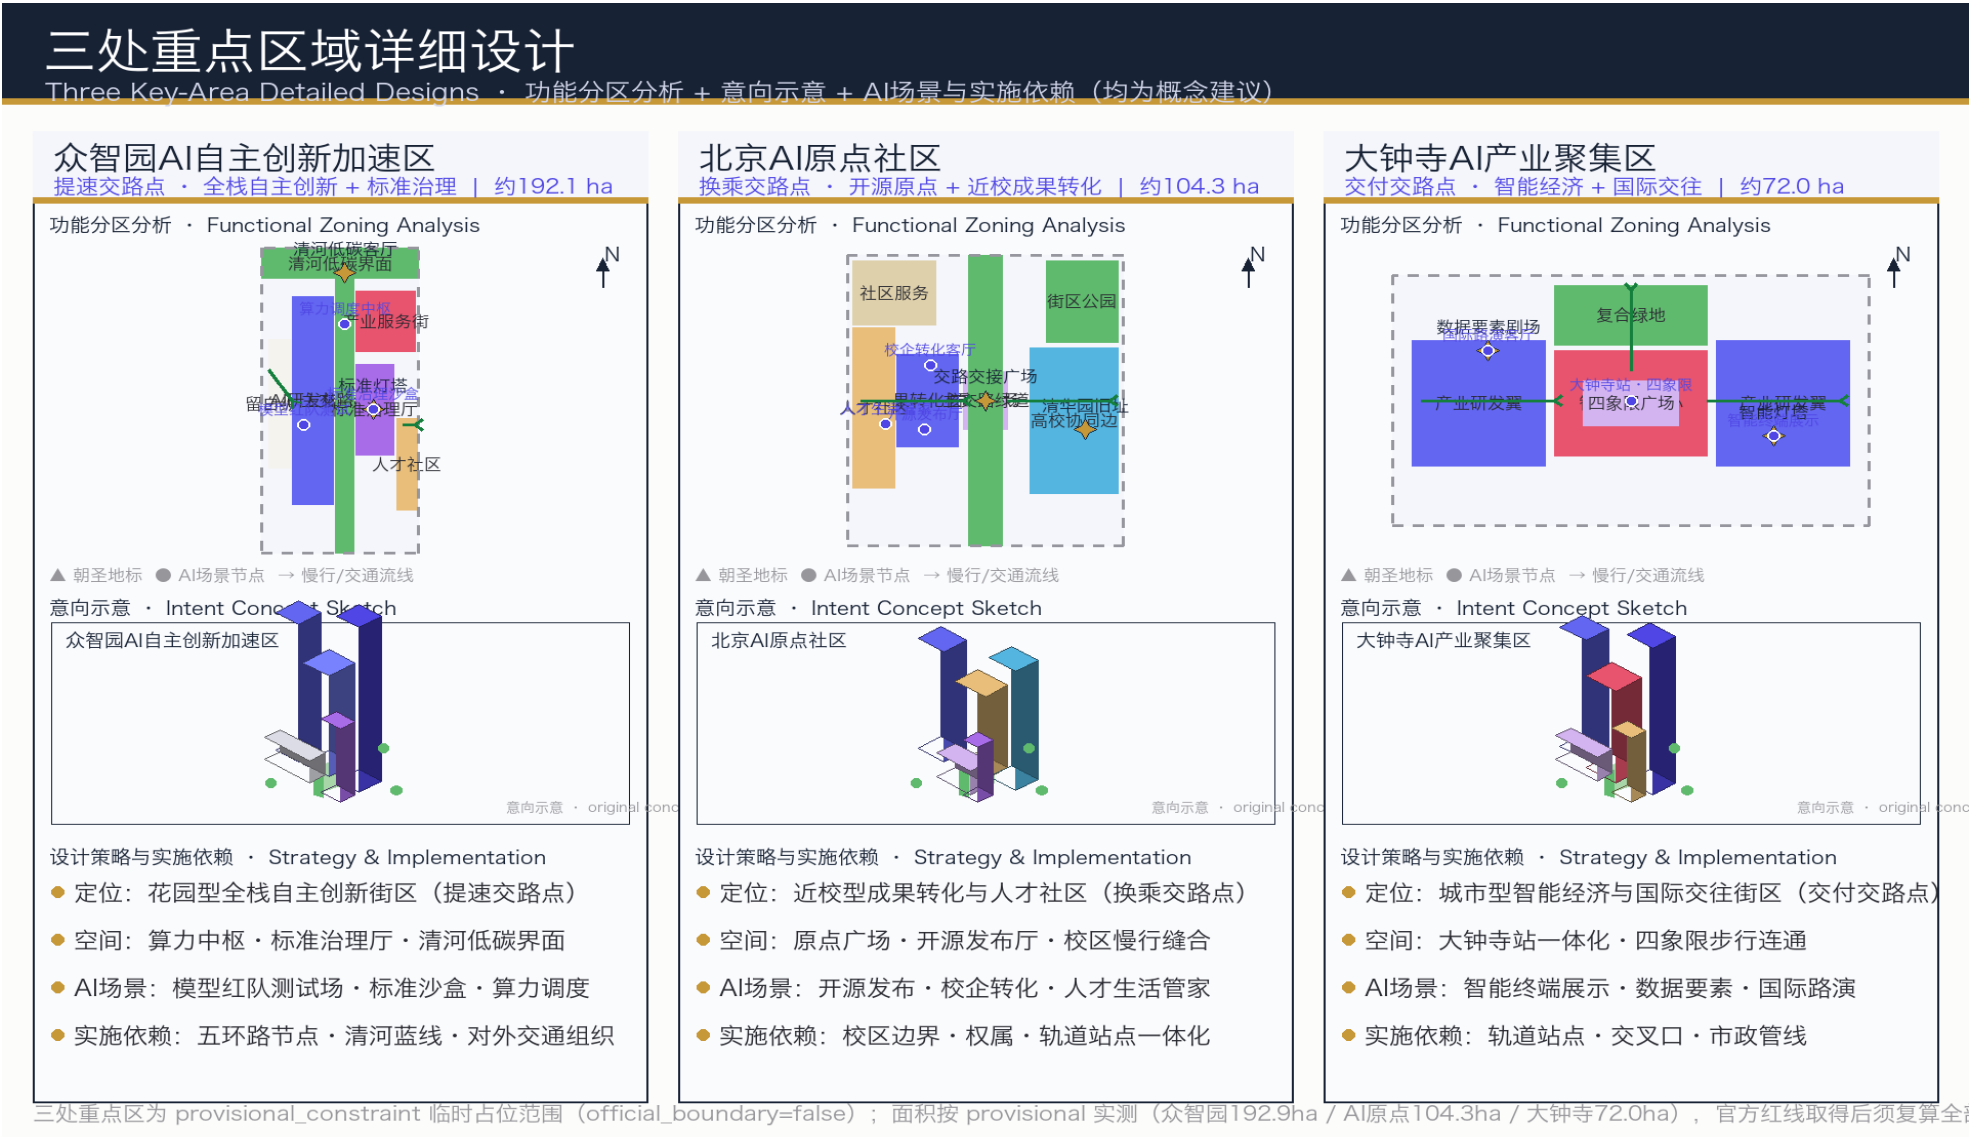

Key Area 1: Zhongzhiyuan (Accelerate Handoff Point)

Full-stack innovation acceleration

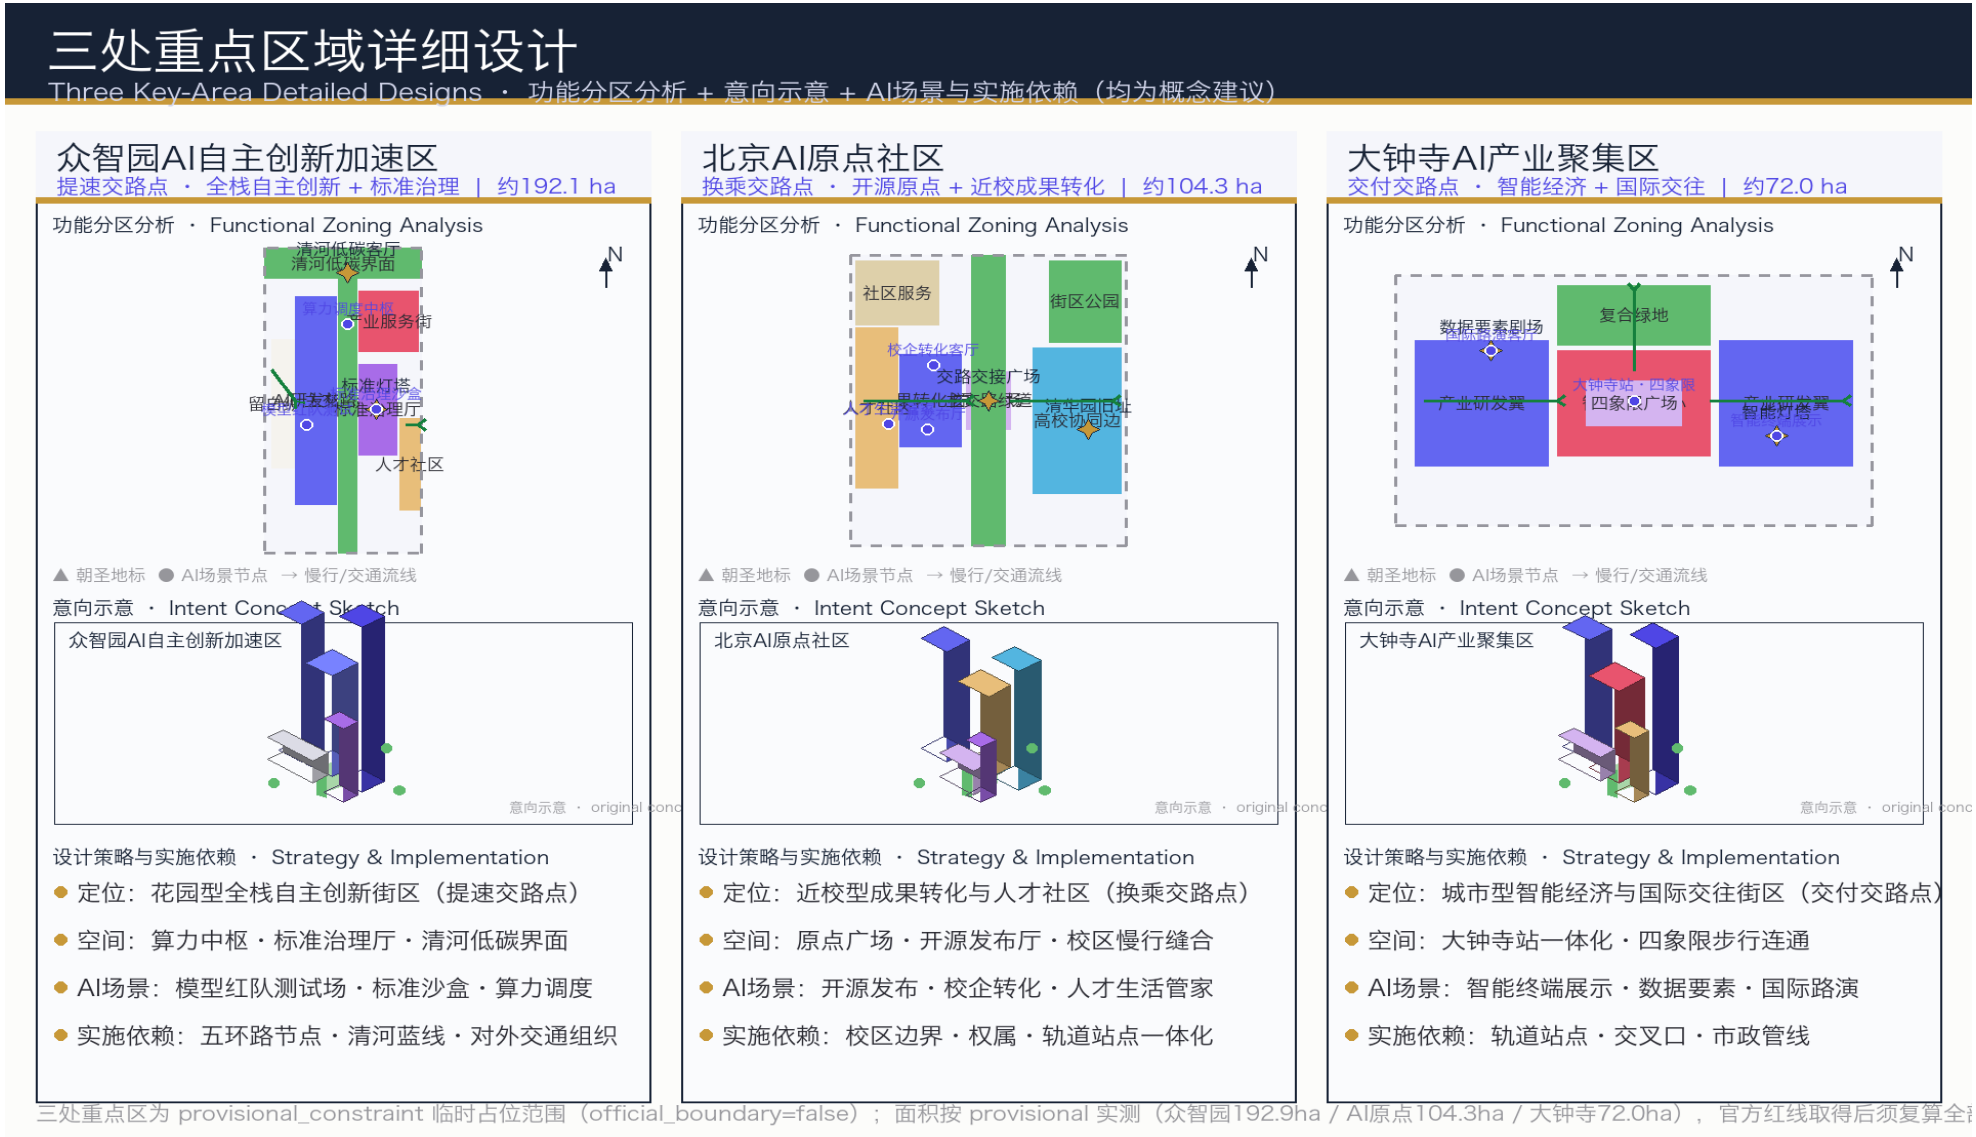

Key Area 2: AI Origin Community (Transfer Handoff Point)

Results translation & talent handoff

Key Area 3: Dazhongsi (Deliver Handoff Point)

Smart economy & international exchange

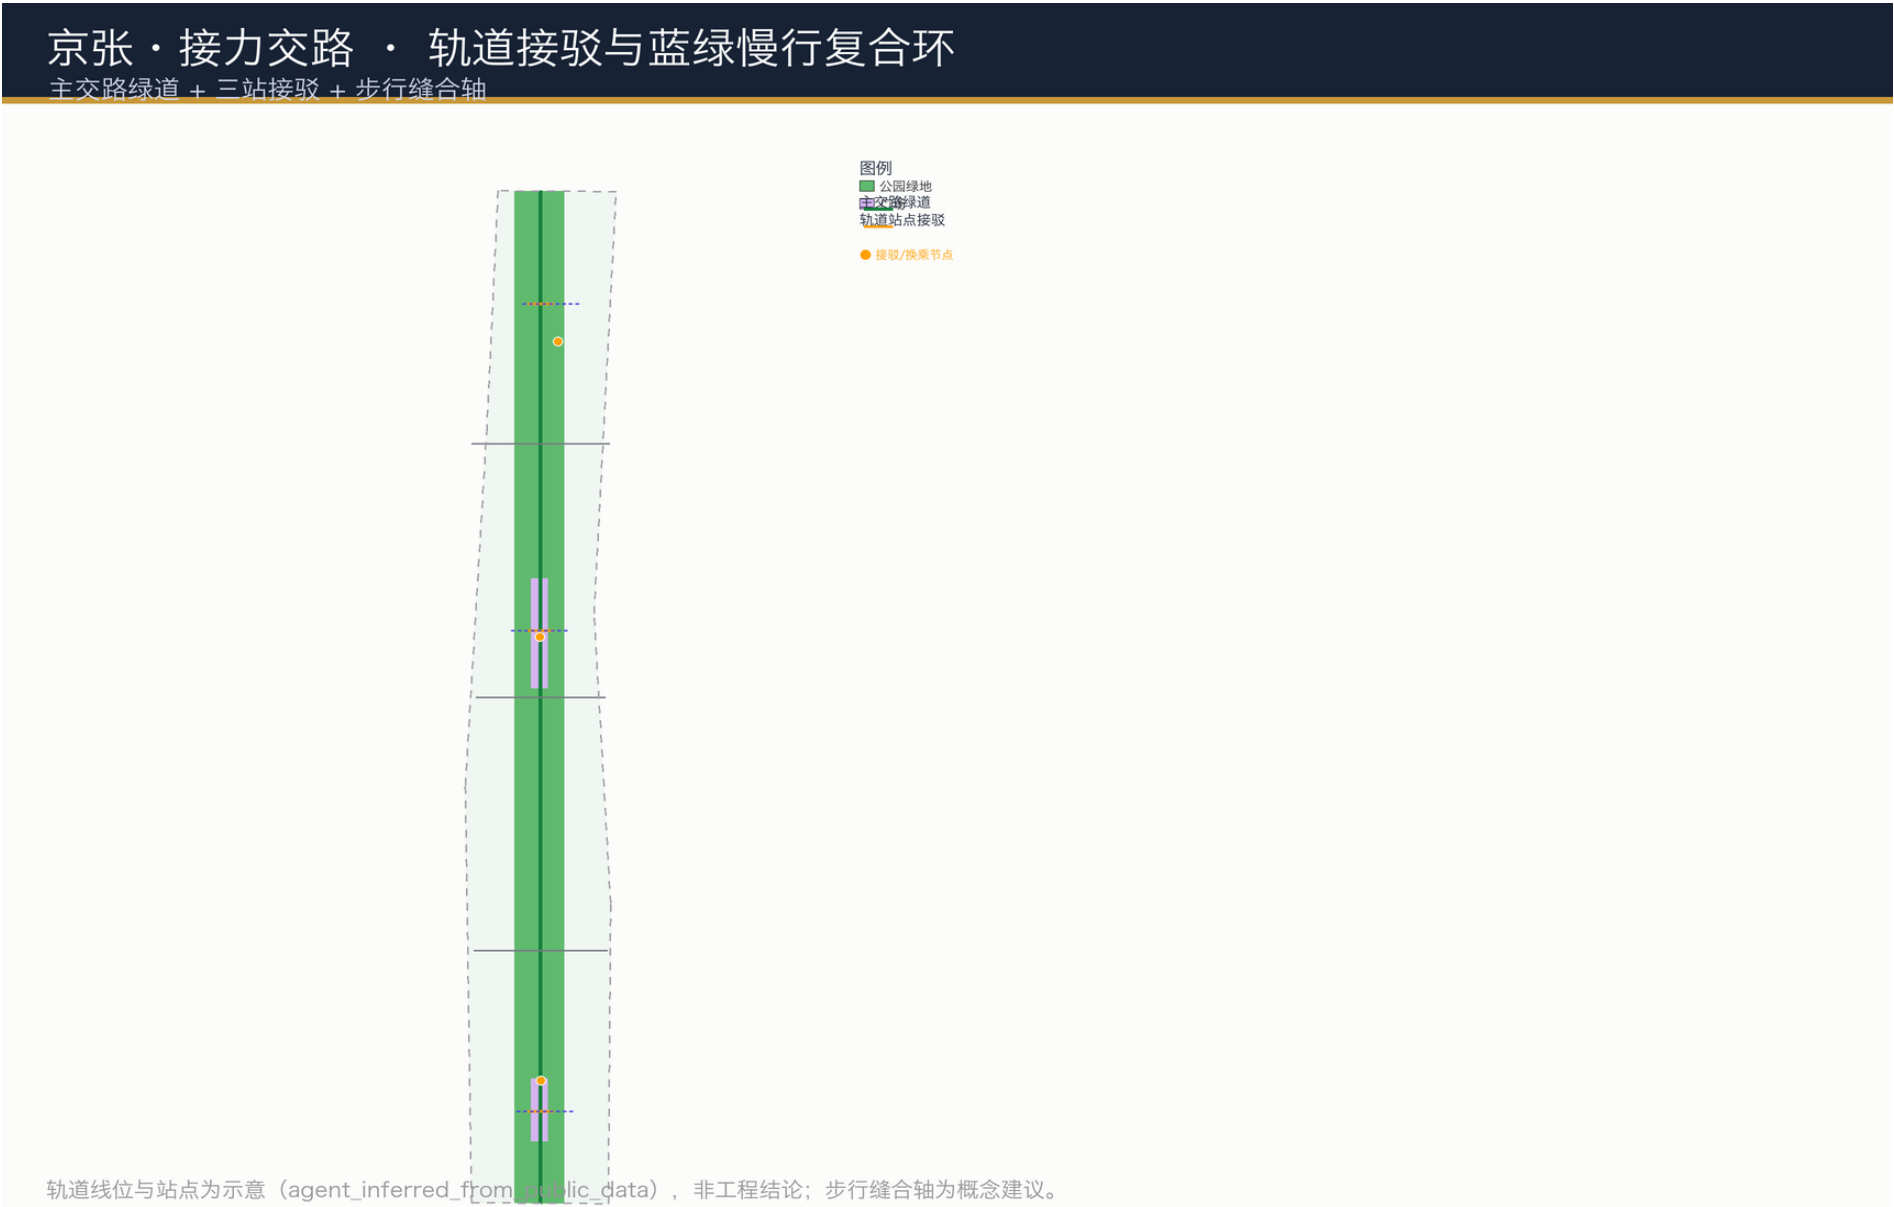

Positioning: Deliver handoff point · smart economy and international exchange. Spatial moves: Dazhongsi station integration, four-quadrant pedestrian connectivity, commercial services, and public-environment renewal around anchor enterprises. AI scenarios: agent/terminal display, content consumption, data factors, international roadshows.

This drawing is an AI concept proposal using provisional_constraint temporary boundaries (official_boundary=false), for generation, display and self-check discussion only; all geometry and metrics must be recalculated once official redlines are available. All spatial suggestions are conceptual / reference schemes for professional teams to deepen; they are not statutory plans, approvals, ownership, or engineering conclusions.

Mobility & Blue-Green Network

Main handoff-rail greenway + three-station connection + pedestrian stitching

This drawing is an AI concept proposal using provisional_constraint temporary boundaries (official_boundary=false), for generation, display and self-check discussion only; all geometry and metrics must be recalculated once official redlines are available. All spatial suggestions are conceptual / reference schemes for professional teams to deepen; they are not statutory plans, approvals, ownership, or engineering conclusions.

AI Scenarios, Pilgrimage Landmarks & Honor System

12 scenario cards, 4 test scenarios, 6 personas, 4 landmarks

Ecosystem cases: King's Cross (rail→knowledge quarter), Kendall Square (university-anchored), one-north (city-as-campus), Station F (operation-as-brand), Zhangjiang (platform urbanization), Shenzhen Nanshan (test beds), Yunqi (event brand), Zhongguancun (reference frame). 12 AI scenario cards, 4 industry test/validation scenarios, 6 user personas; 4 pilgrimage landmarks and an honor-display system; a three-source cultural narrative (railway / Zhongguancun / AI new culture); an annual event system (Jing-Zhang Relay Handoff Festival, Scenario Open Days, Developer Week, International Rail-Handoff Prize).

This drawing is an AI concept proposal using provisional_constraint temporary boundaries (official_boundary=false), for generation, display and self-check discussion only; all geometry and metrics must be recalculated once official redlines are available. All spatial suggestions are conceptual / reference schemes for professional teams to deepen; they are not statutory plans, approvals, ownership, or engineering conclusions.

Renewal Projects, Phasing & Metrics

Six renewal projects, three phases, recomputed metrics

Renewal projects: slow-mobility gap stitching, Qinghe innovation interface, campus translation street, Dazhongsi four-quadrant connectivity, AI public services & edge-compute nodes, global AI event-week route. Three phases: near-term pilot / mid-term linkage / long-term depth. Metrics: overall design area about 11.4 km², green ratio about 36.1%, public-space ratio about 2.2%, conceptual building footprint about 398,000 m², road/greenway mileage about 15.6 km.

This drawing is an AI concept proposal using provisional_constraint temporary boundaries (official_boundary=false), for generation, display and self-check discussion only; all geometry and metrics must be recalculated once official redlines are available. All spatial suggestions are conceptual / reference schemes for professional teams to deepen; they are not statutory plans, approvals, ownership, or engineering conclusions.
