

The AI Line · Ren-Form (人) 2.0

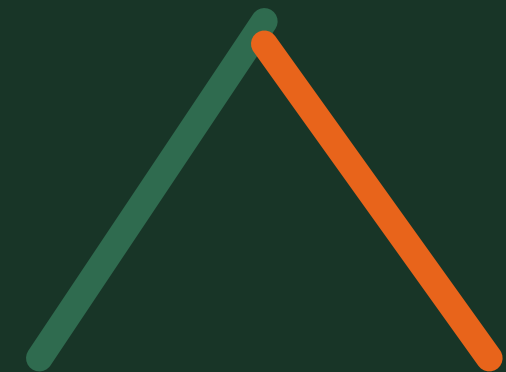

Urban design proposal for the Centennial Jing-Zhang AI Innovation Belt

One stroke for culture · one stroke for innovation · people at the crossing

One Line: the Jing-Zhang Railway Heritage Park greenway spine (timeline 1909 → future)

Three Stations: Dazhongsi (AI-native retail) · Origin (innovation community) · Acceleration (full-stack R&D)

Two Wings: Zhongguancun Technology Services Wing · Xiaoyue River Scenario Enablement Wing

Centennial Jing-Zhang AI Innovation Belt Open Call for Urban Design | formal submission A3 booklet

[submissions/Grayker007/jingzhang-ai-line](#) | 2026-08

Provisional rough boundary (not an official red line); all content is a concept proposal for professional teams to develop.

Design Concept | From a Self-Built Railway to Self-Reliant Intelligence

Why this line

In 1909 Zhan Tianyou completed the Jing-Zhang Railway, China's first self-designed and self-built railway; the 'Ren' (人)-shaped switchback at Qinglongqiao outwitted the steep grade and became the origin symbol of China's independent engineering innovation. After the railway moved underground, the surface corridor became the roughly 9 km Jing-Zhang Railway Heritage Park, running south to north through the three key areas: Dazhongsi, the Beijing AI Origin Community and Zhongzhiyuan.

One Line · Three Stations · Two Wings

Main name 'Jing-Zhang AI Line', in English The AI Line. Dazhongsi = Dazhongsi Station (AI-native retail); the AI Origin Community = Origin Station (innovation ecosystem); Zhongzhiyuan = Acceleration Station (full-stack R&D). The Zhongguancun Technology Services Wing and the Xiaoyue River Scenario Enablement Wing form the two rails. Synergy loop: R&D → incubation → retail showcase → scenario feedback → capital reinvestment, closing a 15-minute innovation chain.

Logo direction

A 'Ren' (人)-shaped rail symbol: sleeper lines morph south-to-north into neural-network pulses; palette of locomotive green + signal orange + rail silver. Naming extension rules: nodes are 'stations / pavilions / greenways', events follow the 'Timetable system'. All are original concept descriptions using no copyrighted material.

Ren-Form (人) 2.0

Facing compute and technology constraints, China's AI today follows the road of full-stack independent innovation — a re-enactment of the spirit of 1909. The proposal re-reads the 'Ren' form as spatial structure: one stroke is the centennial culture axis (the heritage park linear cultural belt), the other is the AI innovation axis (the Three Zones and Two Wings industry belt), and the crossing point is people — AI augments people, and humans make the final judgment.

Three 'independences' in the cultural narrative

1909 self-built railway (engineering) → 1980s Zhongguancun Electronics Street (industry) → 2020s full-stack independent AI innovation (intelligence). The AI Line is one of the few places where all three chapters of this history can be touched in a single physical space. One-line international pitch: Beijing's High Line, where China's first self-built railway becomes its AI corridor.

AI pilgrimage landmarks (concept)

1) Ren-Form (人) Plaza + Commit Wall open-source honor wall (Origin Station); 2) Model Bell — rung to salute open-source model releases (Dazhongsi Station; a new node kept away from protected heritage fabric); 3) Origin Stele — a timeline of China's AI milestones (Acceleration Station). Three-tier honor system: honor wall — platform honor screens — summit honor roll.

Brand Identity System | Ren-Form (人) 2.0 Visual Direction

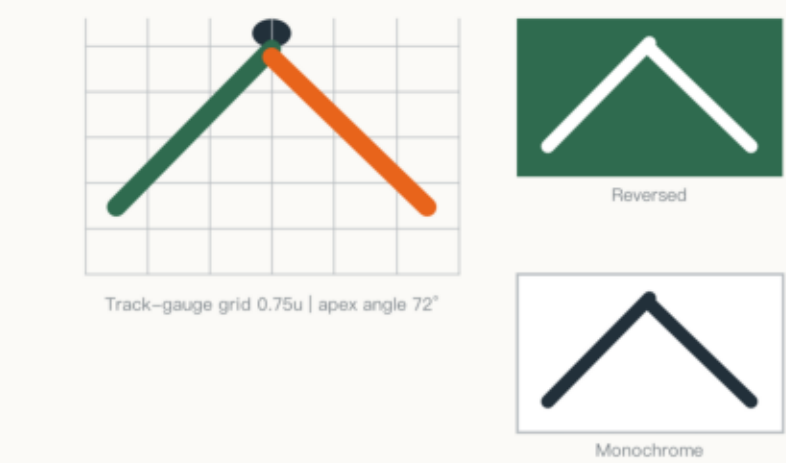

Brand Identity System | Ren-Form (人) 2.0 Visual Direction

Logo direction, colors, wayfinding, landmarks and naming extensions are original concept descriptions (agent.1 / agent.4 / agent.5); no copyrighted material used; formal VI requires professional design development

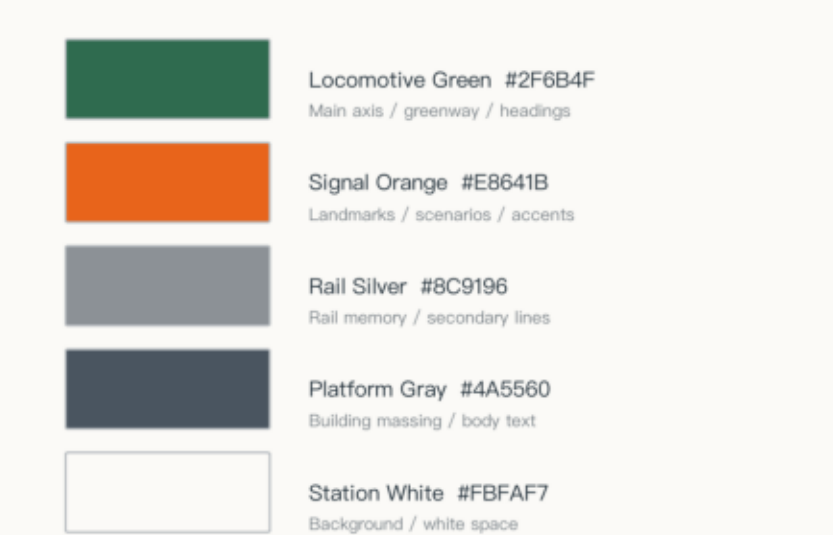

A | Logo master form (design direction)

B | Construction grid & reversed / monochrome

C | Color system

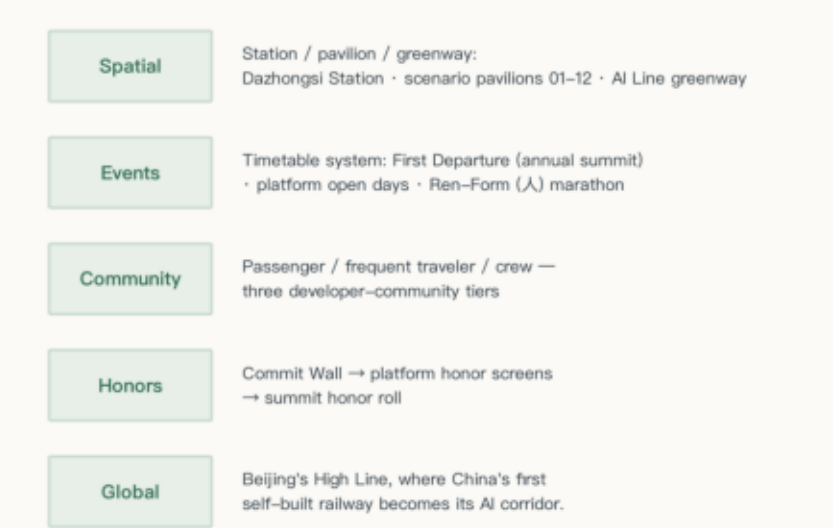

D | Station wayfinding (concept)

E | Three AI pilgrimage landmarks (concept elevations)

F | Naming & extension system

Provisional rough boundary (not an official red line) | All content is an open co-creation concept proposal, not statutory planning or government-approved conclusions | Areas recomputed in EPSG:4548

The AI Line · Ren-Form (人) 2.0 | Grayker007 · generated by AI agent

Logo master form and construction grid, color system, station wayfinding, three pilgrimage-landmark concept elevations and naming extensions; original concept descriptions — formal VI requires professional development.

Overall Spatial Structure | One Line · Three Stations · Two Wings

Overall Spatial Structure | One Line · Three Stations · Two Wings

The AI Line (Jing–Zhang): the heritage park greenway as the spine, three key areas as 'stations', two wings as 'rails'; banner layout, north to the right (read south–to–north along the line)

The AI Line · Ren–Form (人) 2.0 | Grayker007 · generated by AI agent

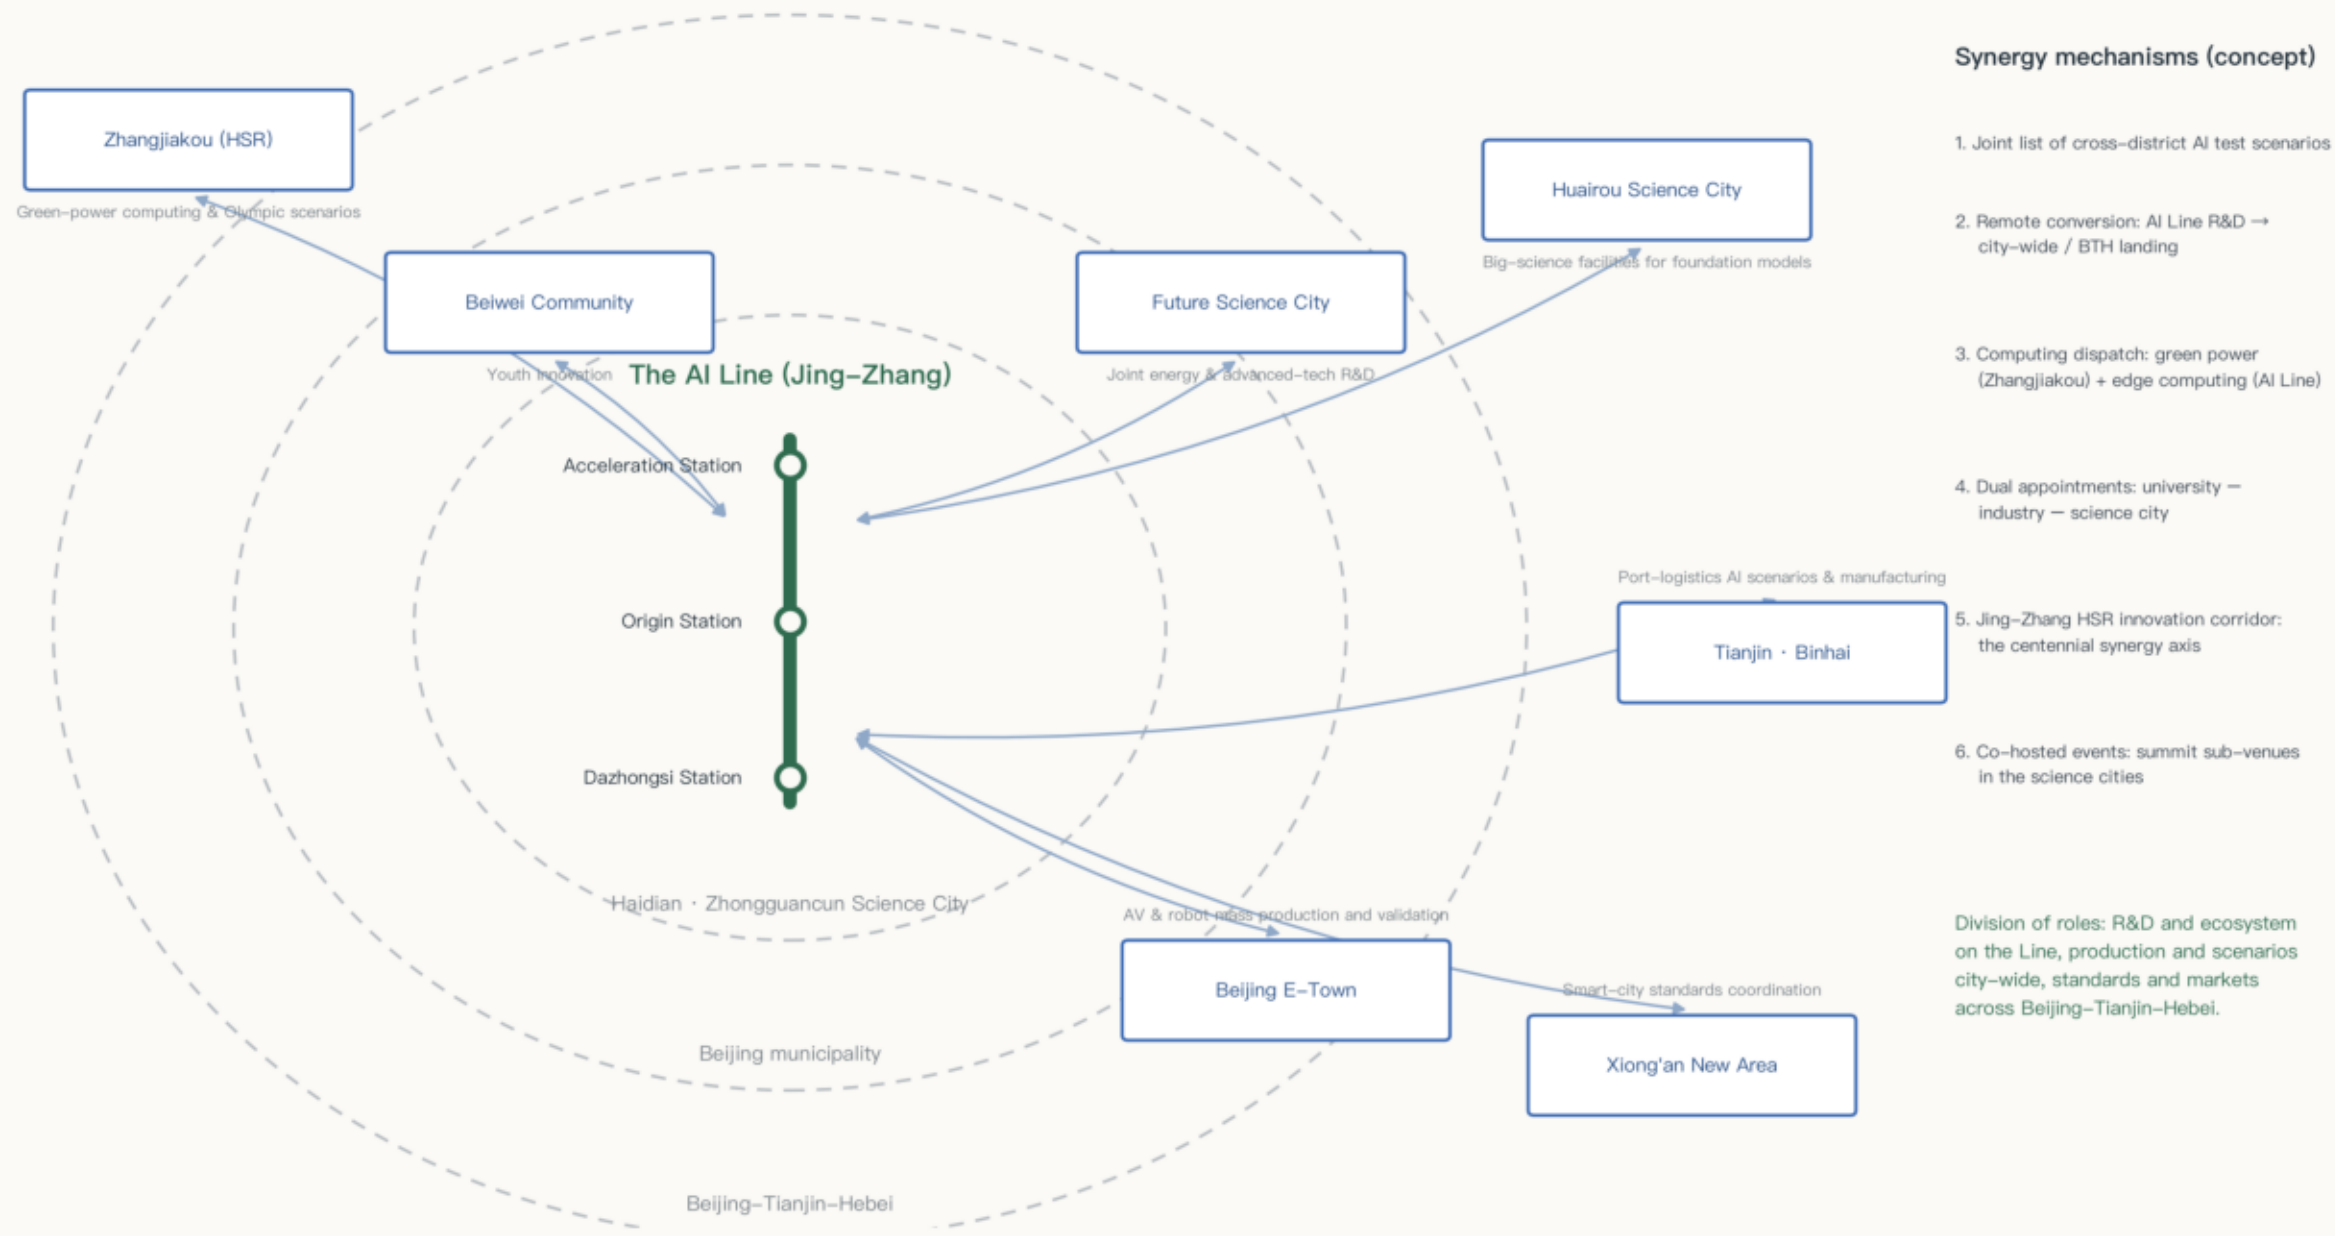

Provisional rough boundary (not an official red line) | All content is an open co–creation concept proposal, not statutory planning or government–approved conclusions | Areas recomputed in EPSG:4548 | Context basemap: © OpenStreetMap contributors (ODbL), for locational reference only

Banner layout with north to the right; existing roads / rail / water from the OSM reference basemap; the provisional boundary is drawn as a low–contrast dashed line.

Regional Innovation Synergy Network

Regional Innovation Synergy Network | R&D on the Line · Conversion City-wide · Synergy across BTH

Functional division and synergy mechanisms with Beiwei Community, Future Science City, Huairou Science City, Beijing E-Town and the Beijing–Tianjin–Hebei region (concept proposals, no cross–district policy commitments); diagrammatic relations, not geographic positions

Provisional rough boundary (not an official red line) | All content is an open co-creation concept proposal, not statutory planning or government-approved conclusions | Areas recomputed in EPSG:4548

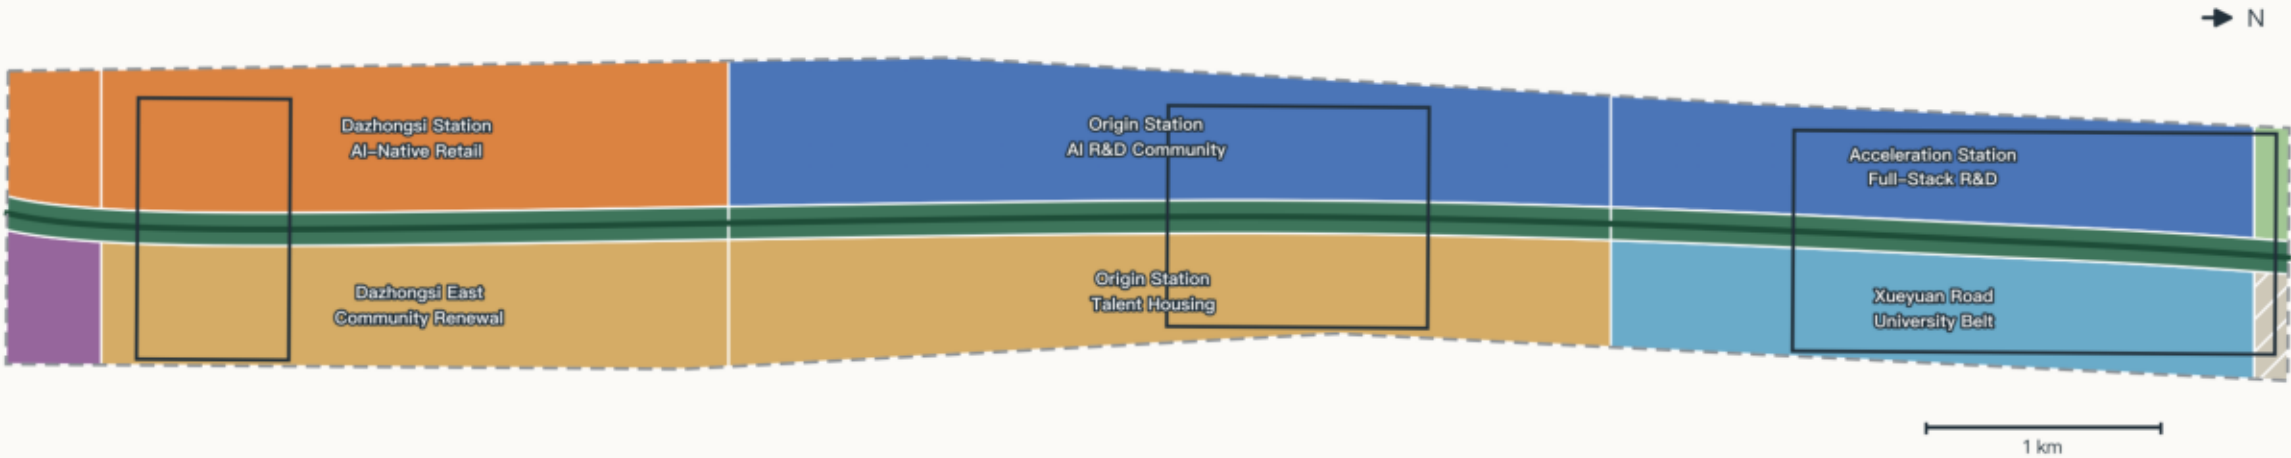

The AI Line · Ren-Form (人) 2.0 | Grayker007 · generated by AI agent

R&D on the Line, conversion city-wide, synergy across Beijing–Tianjin–Hebei: seven partner nodes and six mechanisms (concept proposals, no cross–district policy commitments).

Land-Use Structure | Seamless Concept Zoning (recomputed)

Concept land-use for AI-driven new productive forces: a continuous greenway with R&D / housing / retail / campus bands on both sides; codes follow the national land-use classification (project subset); north to the right

1401 Park green space (heritage park greenway) 136.1 ha	0804 Educational 126.7 ha	16 Strategic reserve land 6.5 ha
0802 Research & development 336.4 ha	0803 Cultural facilities 21.9 ha	Key-area boundary (provisional)
05 Commercial & business services 188.1 ha	1402 Protective green buffer 7.1 ha	Overall Design Area (provisional boundary)
0701 Urban residential 318.4 ha		

Provisional rough boundary (not an official red line) | All content is an open co-creation concept proposal, not statutory planning or government-approved conclusions | Areas recomputed in EPSG:4548

The AI Line · Ren-Form (人) 2.0 | Grayker007 · generated by AI agent

13 zones seamlessly cover the provisional boundary; land-use codes follow the national territorial land-use classification (project subset); areas recomputed in EPSG:4548.

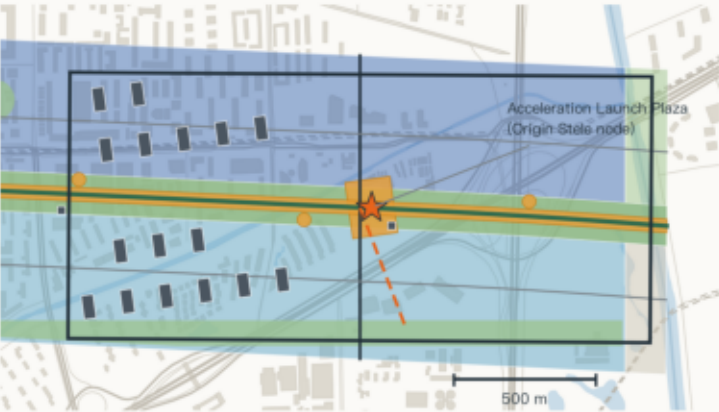

Key–Area Detailed Design Index | Three Stations

Key–Area Detailed Design Index | Three Stations

North to south: Acceleration Station (Zhongzhiyuan), Origin Station (AI Origin Community), Dazhongsi Station; panels north–to–right; concept scheme for professional development; light gray = existing fabric (OSM ref.)

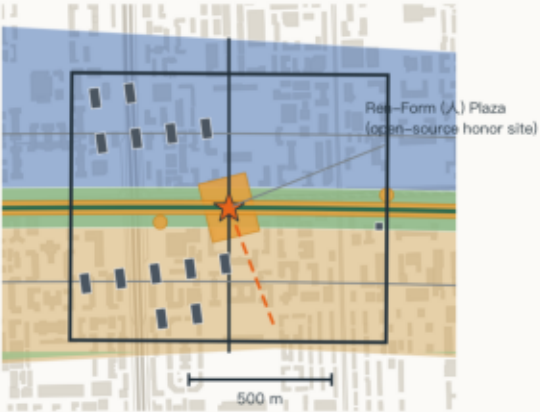

P3 | Acceleration Station · Zhongzhiyuan AI Independent Innovation Acceleration Area

Full-stack R&D clusters + launch plaza (Origin Stele) + northern experience greenway | announced approx. 192.1 ha | recomputed 192.9 ha (*not an official precise area)

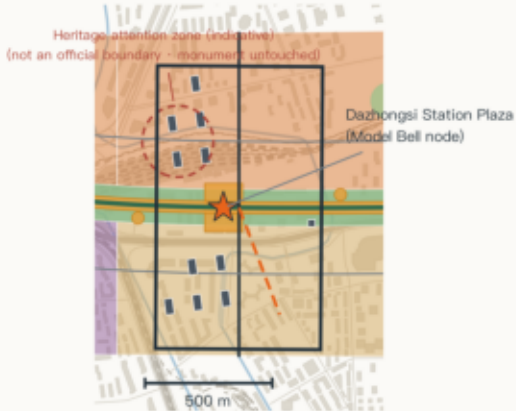

P2 | Origin Station · Beijing AI Origin Community

R&D community + Ren-Form (人) Plaza (Commit Wall) + talent housing | announced approx. 104.3 ha | recomputed 104.3 ha (*not an official precise area)

P1 | Dazhongsi Station · Dazhongsi AI Industry Cluster

AI-native retail + Model Bell node + heritage-sensitive setback | announced approx. 72.0 ha | recomputed 72.0 ha (*not an official precise area)

The AI Line · Ren-Form (人) 2.0 | Grayker007 · generated by AI agent

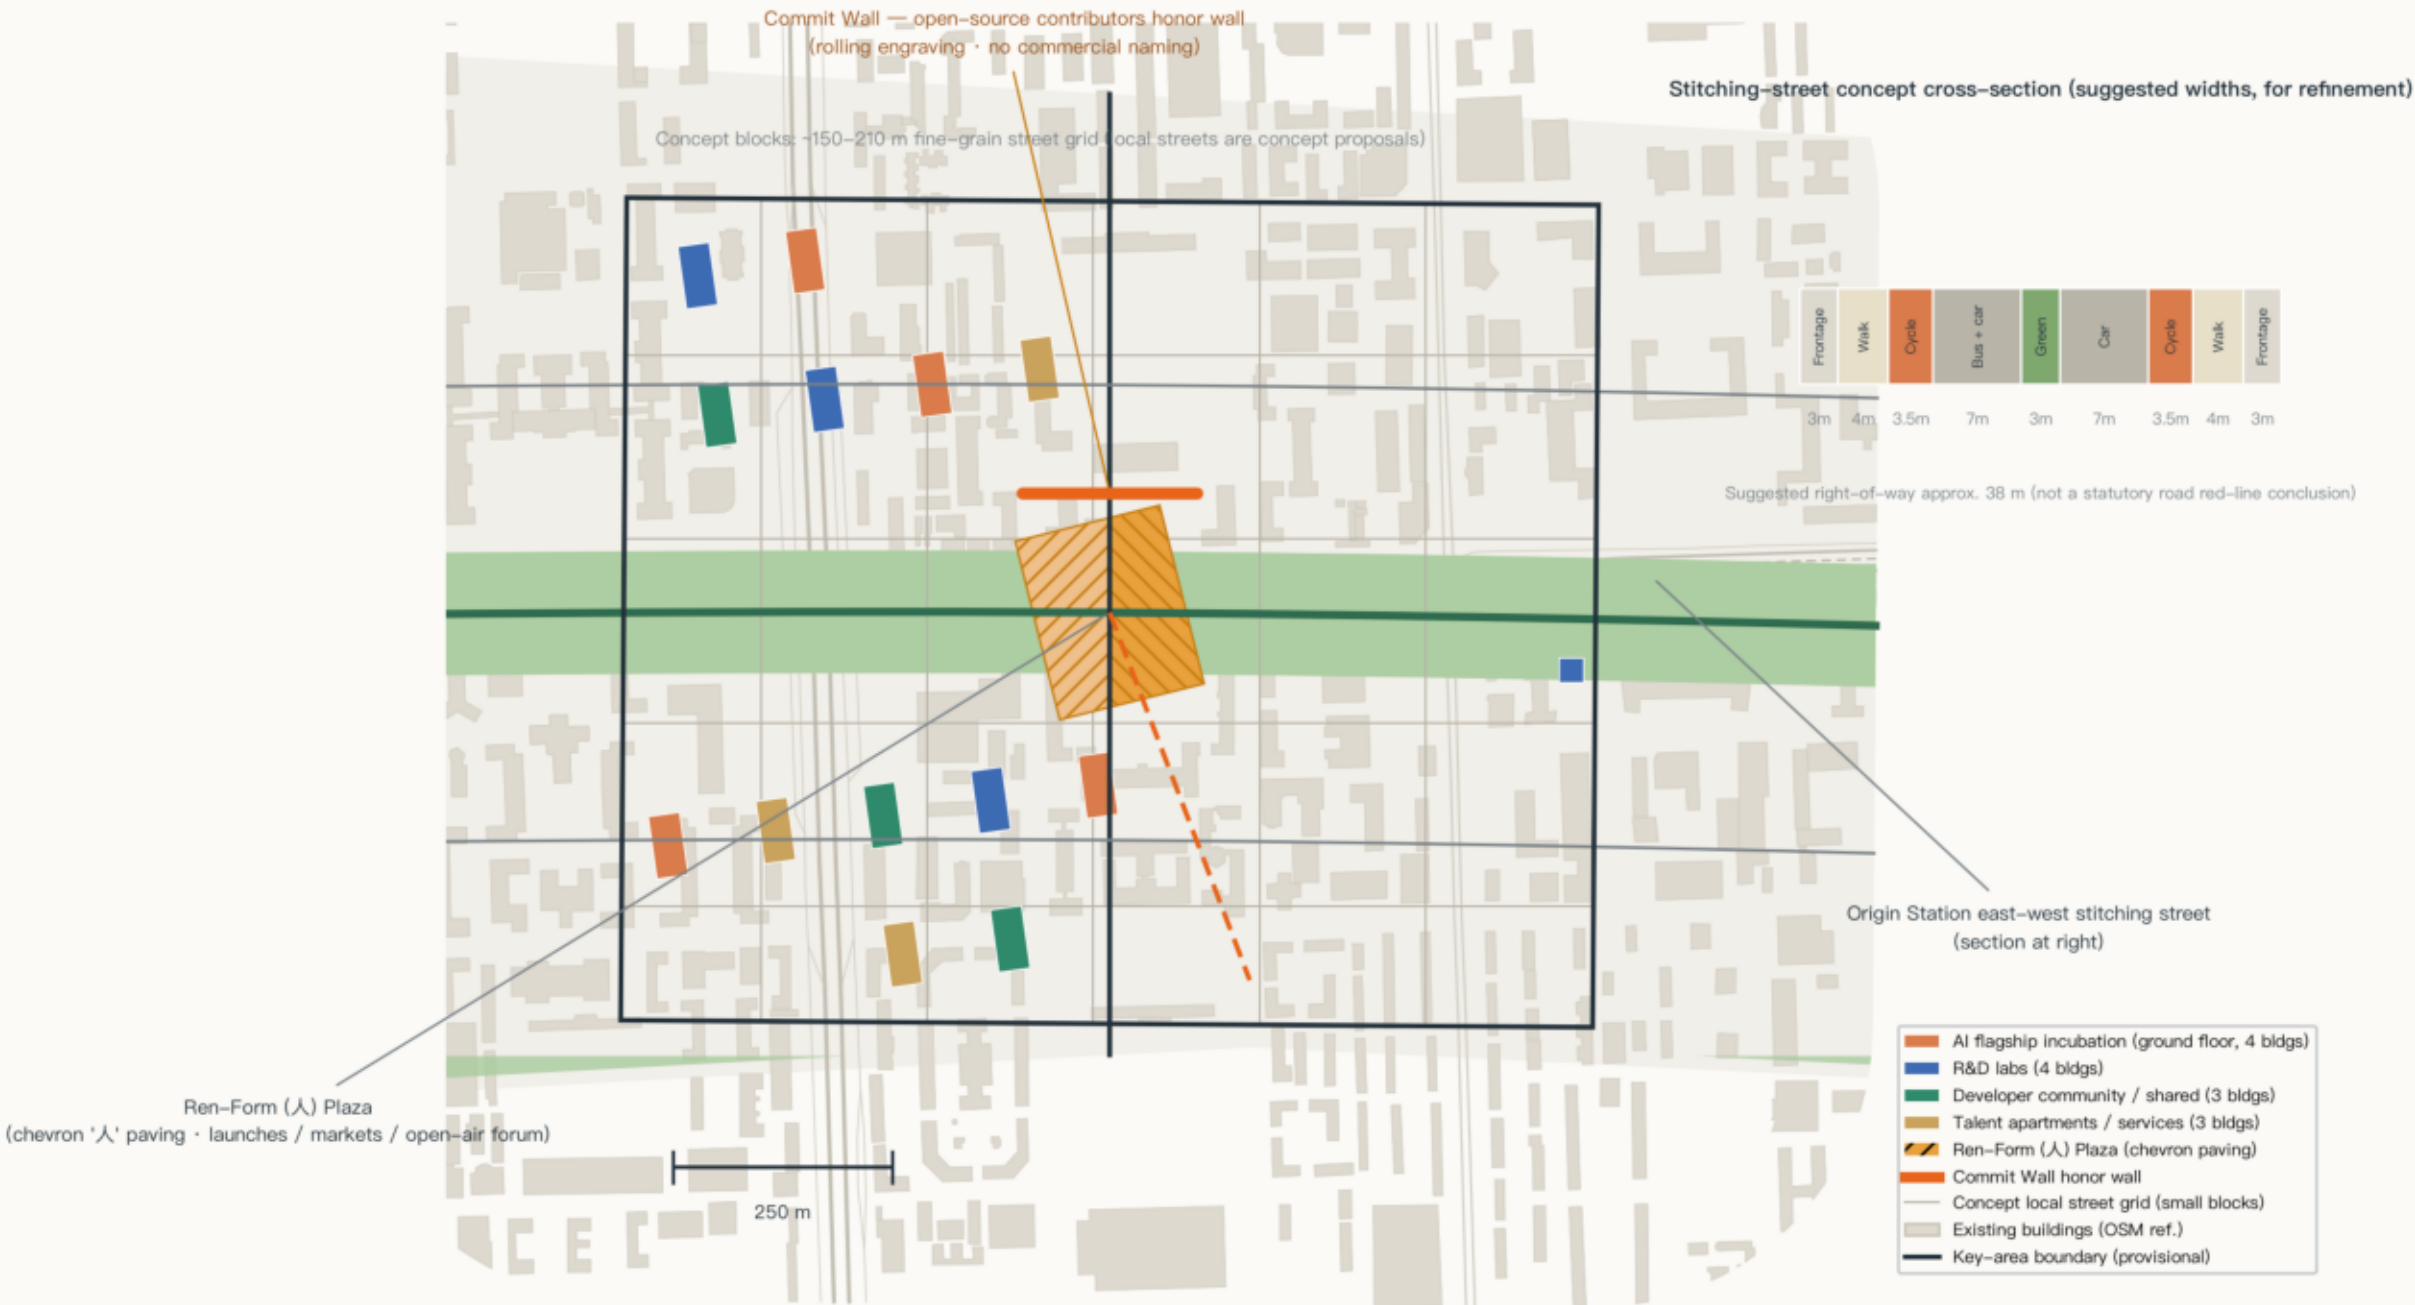

Provisional rough boundary (not an official red line) | All content is an open co-creation concept proposal, not statutory planning or government-approved conclusions | Areas recomputed in EPSG:4548 | Context basemap: © OpenStreetMap contributors (ODbL), for locational reference only

Spatial structure, concept building clusters, plazas, landmarks and heritage setback for the Acceleration, Origin and Dazhongsi station areas; light gray shows existing fabric (OSM reference).

Origin Station Detailed Plan (Concept)

Origin Station Detailed Plan (Concept) | Beijing AI Origin Community Core

Fine-grain street grid + Ren-Form (人) Plaza + Commit Wall + ground-floor programme; buildings are concept massing and local streets concept proposals — no demolish-renovate-retain or red-line conclusions; north to the right

The AI Line · Ren-Form (人) 2.0 | Grayker007 · generated by AI agent

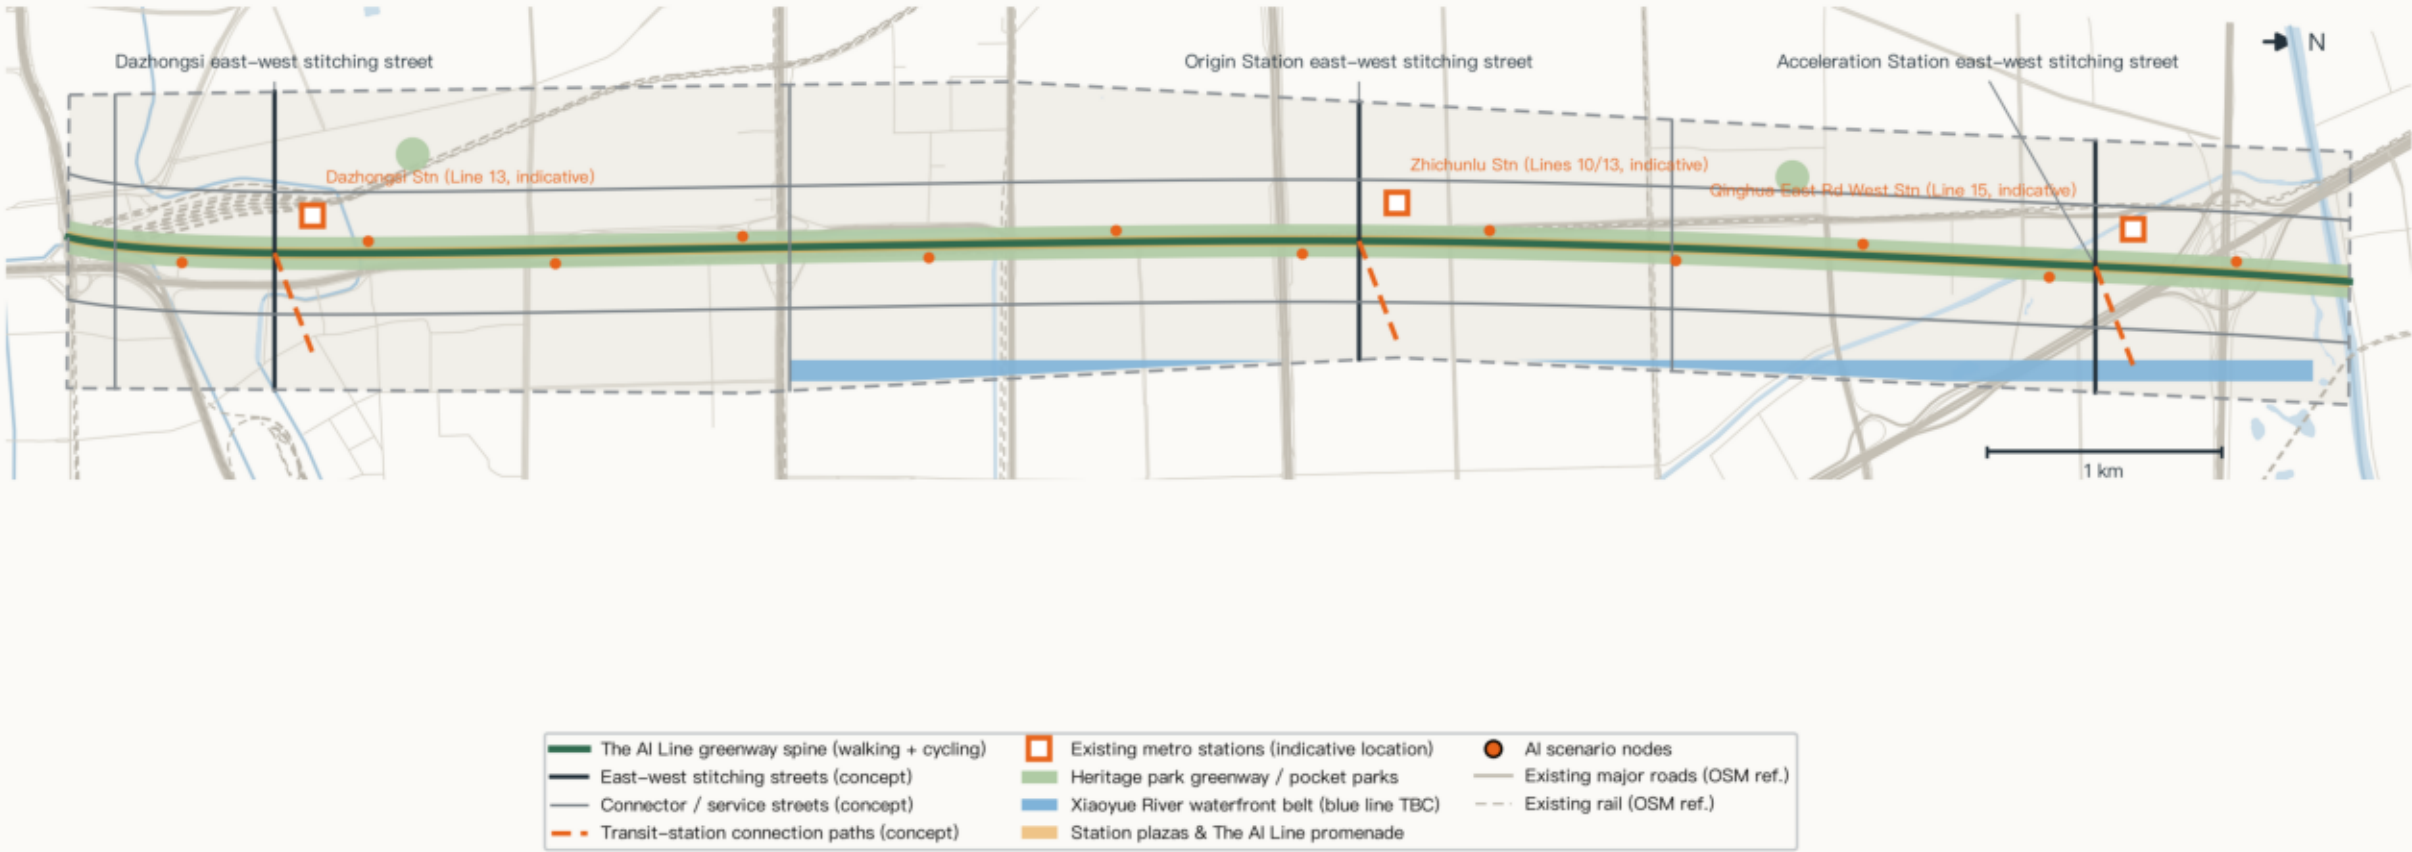

Provisional rough boundary (not an official red line) | All content is an open co-creation concept proposal, not statutory planning or government-approved conclusions | Areas recomputed in EPSG:4548 | Context basemap: © OpenStreetMap contributors (ODbL), for locational reference only

Fine-grain street grid, Ren-Form (人) Plaza paving, Commit Wall, ground-floor programme and a concept cross-section of the stitching street (suggested values, for refinement).

Mobility, Walking–Cycling and Blue–Green System

Mobility, Walking–Cycling and Blue–Green Public Space System

Stitch east–west, connect north–south: the greenway spine links the three stations, stitching streets bridge both sides of the rail corridor, metro stations connected nearby; blue–green and slow mobility in one composite map; north to the right

The AI Line · Ren–Form (人) 2.0 | Grayker007 · generated by AI agent

Provisional rough boundary (not an official red line) | All content is an open co–creation concept proposal, not statutory planning or government–approved conclusions | Areas recomputed in EPSG:4548 | Context basemap: © OpenStreetMap contributors (ODbL), for locational reference only

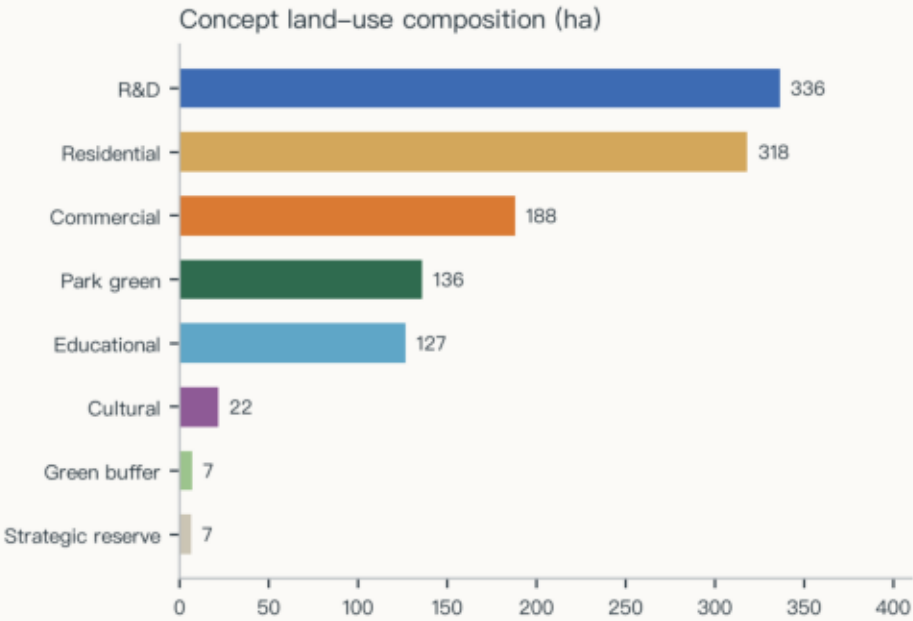

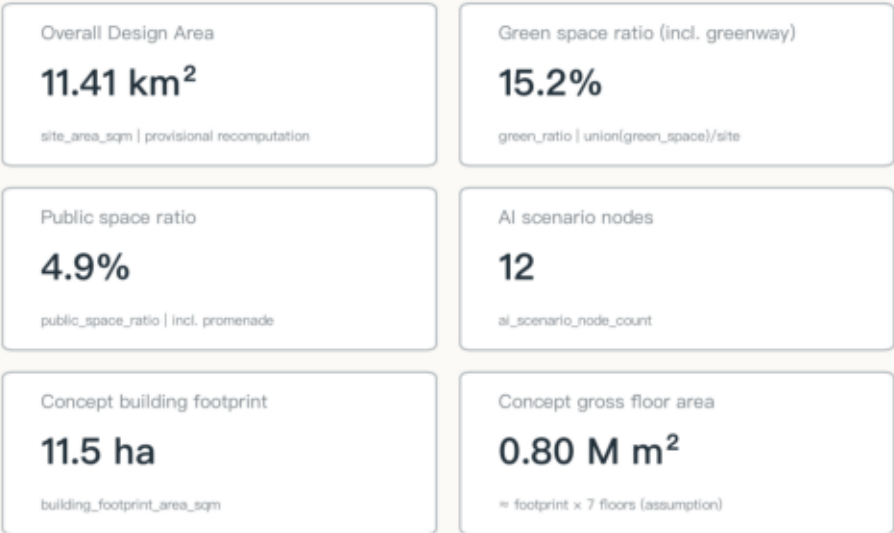

The greenway spine runs the full line, three east–west stitching streets bridge the corridor breakpoints, metro stations (indicative locations) connected nearby; existing network from the OSM reference.

Core Indicator Recomputation & Evidence Chain

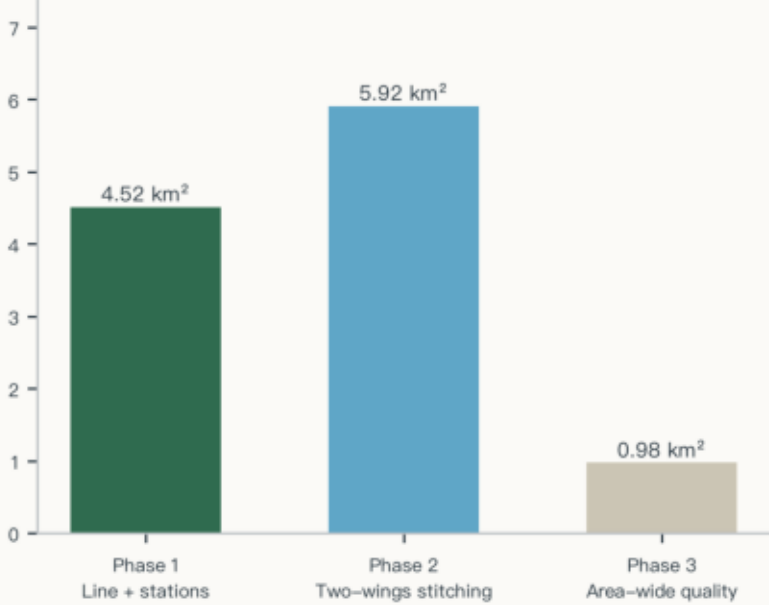

Core Indicator Recomputation & Evidence Chain

A traceable loop of indicators, layers, matrices and self-checks; concept indicators (floor area, phasing) carry explicit assumptions; the north-to-right convention does not apply to this diagram

Core indicators (all recomputed from GeoJSON in EPSG:4548)

Concept phasing area (km², suggestion not commitment)

Evidence chain & self-check status

Evidence chain: every conclusion in the text traces back to layer features and recomputed indicators; figures derived from the provisional boundary are not claimed as official precise areas and will be recomputed with the same pipeline once official polygons are released.

12 scenario cards

Jing–Zhang story AI guide / accessible smart service points / developers' open–air forum / AI gardening lab corner / multilingual conversation pavilion / computing wayside station / AI health kiosk / robot delivery pilot point (testing) / AI art installation points / reassuring night path / youth AI workshop / age–friendly smart service points. All anchored to public–space nodes, using only public or authorized data, with no facial identification and human review throughout.

6 user personas

AI researchers & PhD students / startup founders / international open–source developers / existing community residents (elderly & families) / teenagers & students / urban visitors & AI pilgrims. Scenario cards map to personas one–to–one with 'spatial anchor + operator + data boundary + review mechanism'.

Three–tier developer community

Registered passengers (online members) — frequent travelers (resident teams) — crew (community volunteer governance); suggested model of 'government guidance + professional operating company + community co–governance'. Scenario access: quarterly scenario lists and data–interface whitelists, venue–fee–free testing periods, openly reproducible results.

3 industry testing & validation scenarios

T1 autonomous micro–shuttle test corridor (Acceleration Station stitching street to the metro station, closed and time–sliced); T2 low–speed robot delivery test lane (east service street, simulation before street trials); T3 AI traffic–signal optimization pilot (around Dazhongsi Station, offline replay validation before limited online runs). All require statutory approval before implementation and do not constitute approved operations.

Annual events: the Timetable system

First Departure (the annual AI Line summit: releases + honors + investment attraction); monthly platform open days (three stations in rotation: community markets + tech demos); the Ren–Form (人) marathon (a biannual open–source hackathon whose tasks come from the scenario–access list).

Conversion path

Event traffic → scenario testing → business landing → building space; brand equity accrues to the 'AI Line' IP. International outreach: an English site, a global developer residency program, and twinning with international linear parks and innovation districts. All of the above are concept proposals, not established government arrangements or funding commitments.

Three phases (concept proposal)

Phase 1 'line and stations start-up', approx. 4.52 km²: through greenway, three station plazas and landmarks, stitching streets, developer community, computing wayside stations. Phase 2 'two-wings stitching and expansion', approx. 5.92 km²: R&D clusters, retail streets, community upgrading, Xiaoyue River green belt. Phase 3 'area-wide quality refinement', approx. 0.98 km²: northern protective belt and strategic-reserve activation.

Key risks and data gaps

Official boundary and key-area polygons missing (all areas are of provisional precision); statutory regulatory-planning conditions missing (all intensity conclusions pending confirmation); Dazhongsi heritage-protection boundary missing (the design avoids the monument and marks an indicative attention zone); ownership and existing-building data missing (demolish-renovate-retain is directional logic only).

Core indicators (provisional-boundary recomputation)

Total area 11.41 km²; green space ratio 15.2%; public space ratio 4.9%; concept building footprint 11.5 ha (45 buildings); concept gross floor area approx. 803,000 m² (7-storey average assumption); concept street network 37.6 km; 12 AI scenario nodes. Floor Area Ratio and height controls: pending official regulatory detailed planning conditions (unknown).

Copyright and compliance
