

Centennial Jing-Zhang AI Innovation Belt Open Call

JINGZHANG AI POST

Last-Mile AI Service Belt Urban Design Proposal · A3 Booklet

Overall concept: One Belt · Three Posts · Two Wings · Multi-Station | Blue-Green Composite Ring

Three positionings: Jing-Zhang cultural belt / AI living experience belt / AI convergence belt

Three posts: Zhongzhiyuan Testing Post (delivery/robot) · Origin Health-Education Post (AI+health/education) · Dazhong

Key scenarios: low-speed delivery pilots · robot inspection · health navigation · education science · cultural guide

Deliverables: 12 scenario cards · 6 personas · 5 pilgrimage landmarks · 4 test scenarios

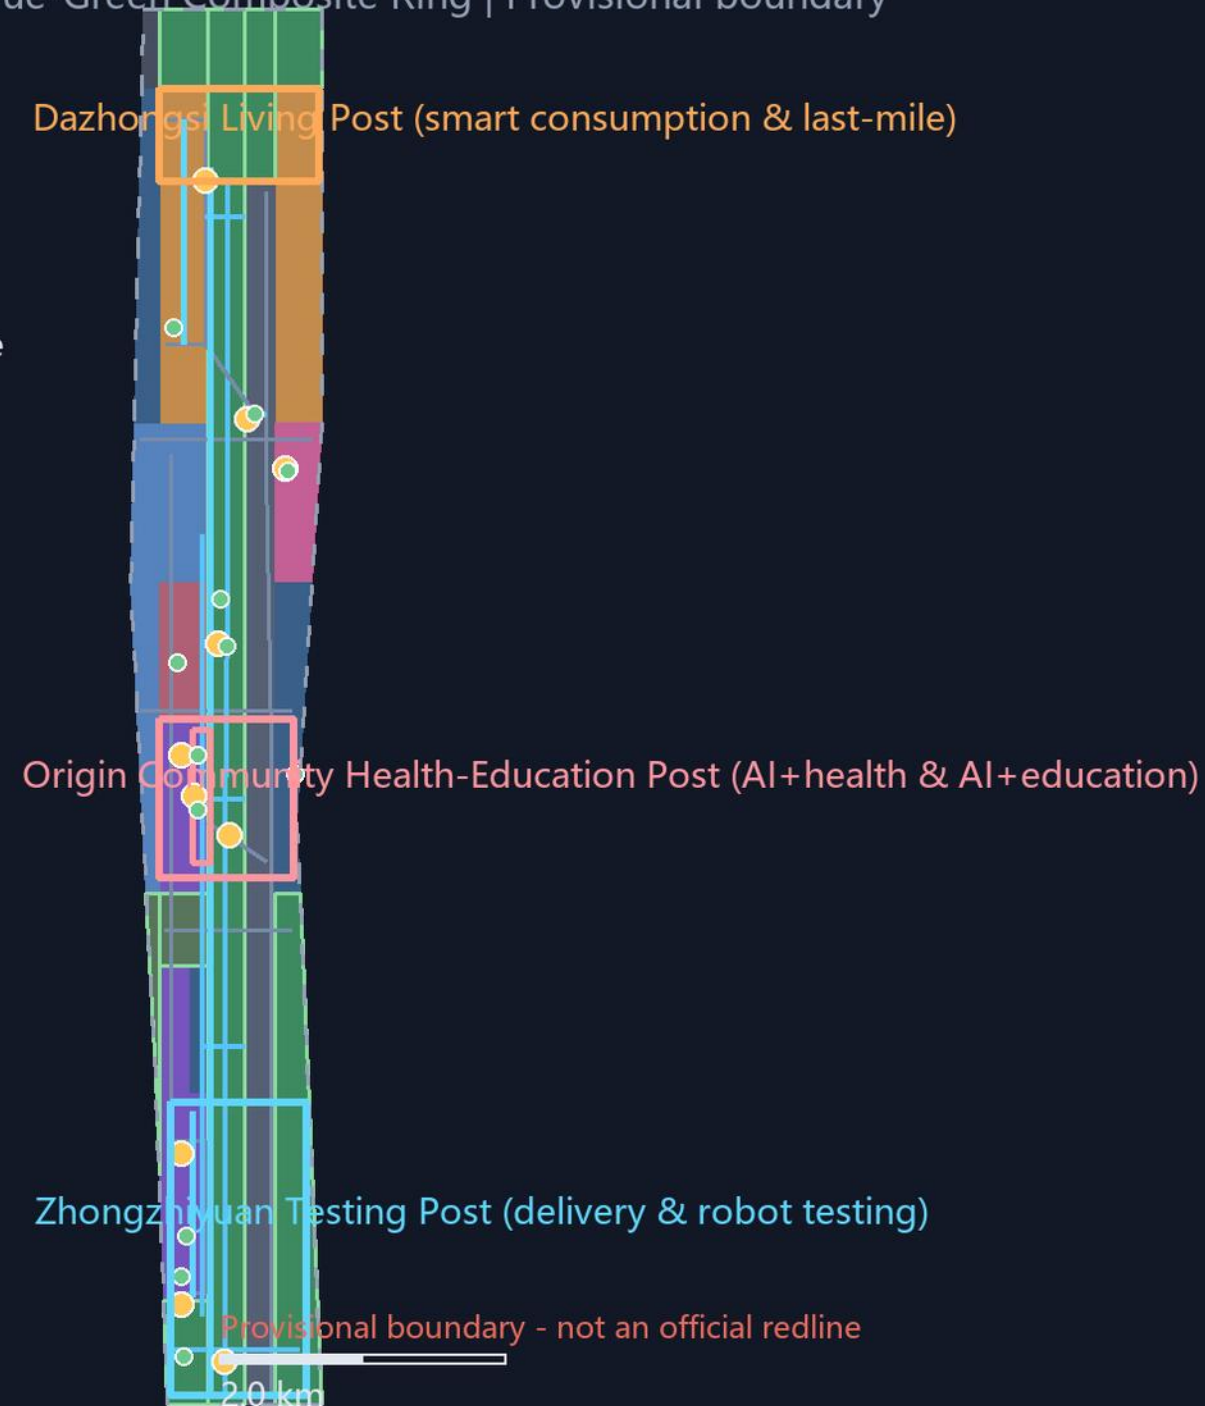

Boundary note: provisional constraint; to be recalculated on official data

JINGZHANG AI POST — Last-Mile AI Service Belt Overview

One Belt · Three Posts · Two Wings · Multi-Station | Blue-Green Composite Ring | Provisional boundary

Legend

- | | |
|-----------------------------|---------------------------|
| Green/Open Space 14 | Low-speed delivery route |
| Research 0802 | Health walking loop |
| Medical 0806 (health posts) | Post plaza / public node |
| Commercial 05 | Three posts (provisional) |

Source: provisional_boundaries.geojson; design layers generated by AI (agent_generated_design).

JINGZHANG AI POST — Land-Use Structure

24 seamless parcels · MNR land-use classification · full coverage without overlap

Land-use classification (MNR guide)

 Residential 0701	 Medical 0806
 Commercial 05	 Road & plaza 1207
 Research 0802	 Park green 1401
 Culture 0803	 Buffer green 1402
 Education 0804	 Reserved 16

Source: geometry/land_use.geojson (agent_generated_design, partitioned on provisional boundary); MNR classification.

JINGZHANG AI POST — Core Metrics Recalculation & Evidence Chain

Recalculable · Traceable · Auditable (area in EPSG:4548)

Spatial recalculation metrics (known)

• Overall design area	1141.28 ha	confidence: high
• Green & open-space ratio	39.2%	confidence: medium
• Public-space ratio	3.8%	confidence: medium
• Building footprint area	43.76 ha	confidence: medium
• Land-use parcel count	24	confidence: high
• Road centerline length	0.00 km	confidence: medium
• Low-speed delivery routes	0.00 km	confidence: medium
• Key-area count	3	confidence: high
• AI scenario cards	12	confidence: high
• User personas	6	confidence: high
• AI pilgrimage landmarks	5	confidence: high
• Industry test scenarios	4	confidence: high

Pending official data (unknown)

- Floor-area ratio (FAR)Approved FAR controls and official site boundary are not p
- Building heightOfficial height controls pending; height guidance remains
- Statutory green ratioStatutory green ratio pending from approved regulatory pla

Evidence chain: GeoJSON layers → projection (EPSG:4548) → metrics.json → figures/HTML/A3·A0

Source: geometry/*.geojson (agent_generated_design, provisional boundary); unknown metrics per planning_limits.json.
