

JZ/STACK 01

CIVIC STACK / MASTERPLAN

A linear civic spine turns railway memory into a public operating system

百年铁路承载下一代城市协议

OVERALL DESIGN AREA / PROVISIONAL WORKING EXTENT

Dashed boundary is a disclosed provisional constraint; colored geometry is the proposal.

ONE SPINE / THREE HUBS / TWO WINGS

A city that can be read, joined and audited.

WORKING EXTENT

11.41 km²

provisional, medium confidence

PUBLIC API PORTS

12

four industry test gates

GREEN NETWORK

13.6%

geometry-derived design share

COMMONS

5.2%

low-data, accessible public space

OPERATING PRINCIPLES

01

Rail memory as a shared coordinate

02

Commons before compute

03

Human override is a spatial right

04

Every scenario ships with a gate

DATA DISCIPLINE

Unknown FAR, height, stock and demolition stay unknown.
The proposal gives a recalculation path instead of fake precision.

Derived from the submitted GeoJSON layers; building masses are conceptual prototypes, not statutory controls.

Appeal and exit always visible

Buildings are conceptual prototypes; retention, alteration and demolition require later survey, ownership and public-process evidence.

CIVIC SPINE / ACCESSIBLE SECTION

A public corridor where movement, climate refuge and human override share one section

CIVIC SPINE / FIVE CLIMATE AND SERVICE NODES

Coral = continuous spine; cyan = cross-connections; lime and gold = commons and climate buffers.

A-A / CIVIC SPINE SECTION

Section is a conceptual operating section, not a construction drawing; dimensions await formal base data.
