

JING-ZHANG SONIC COMMONS

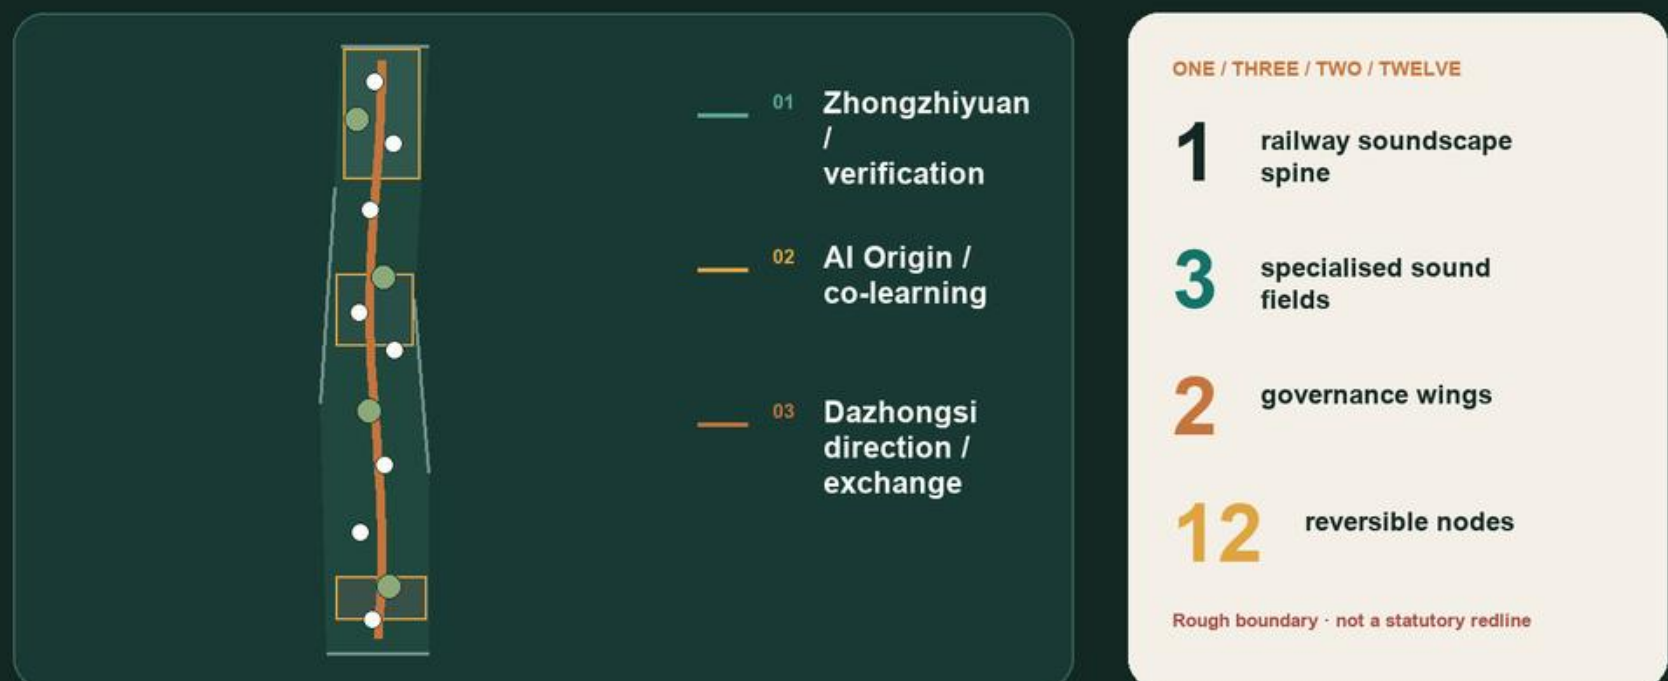

A belt where history can be heard and quiet
can still be found.

EVIDENCE FIRST

JZ / 01

A spine for history, a right to quiet

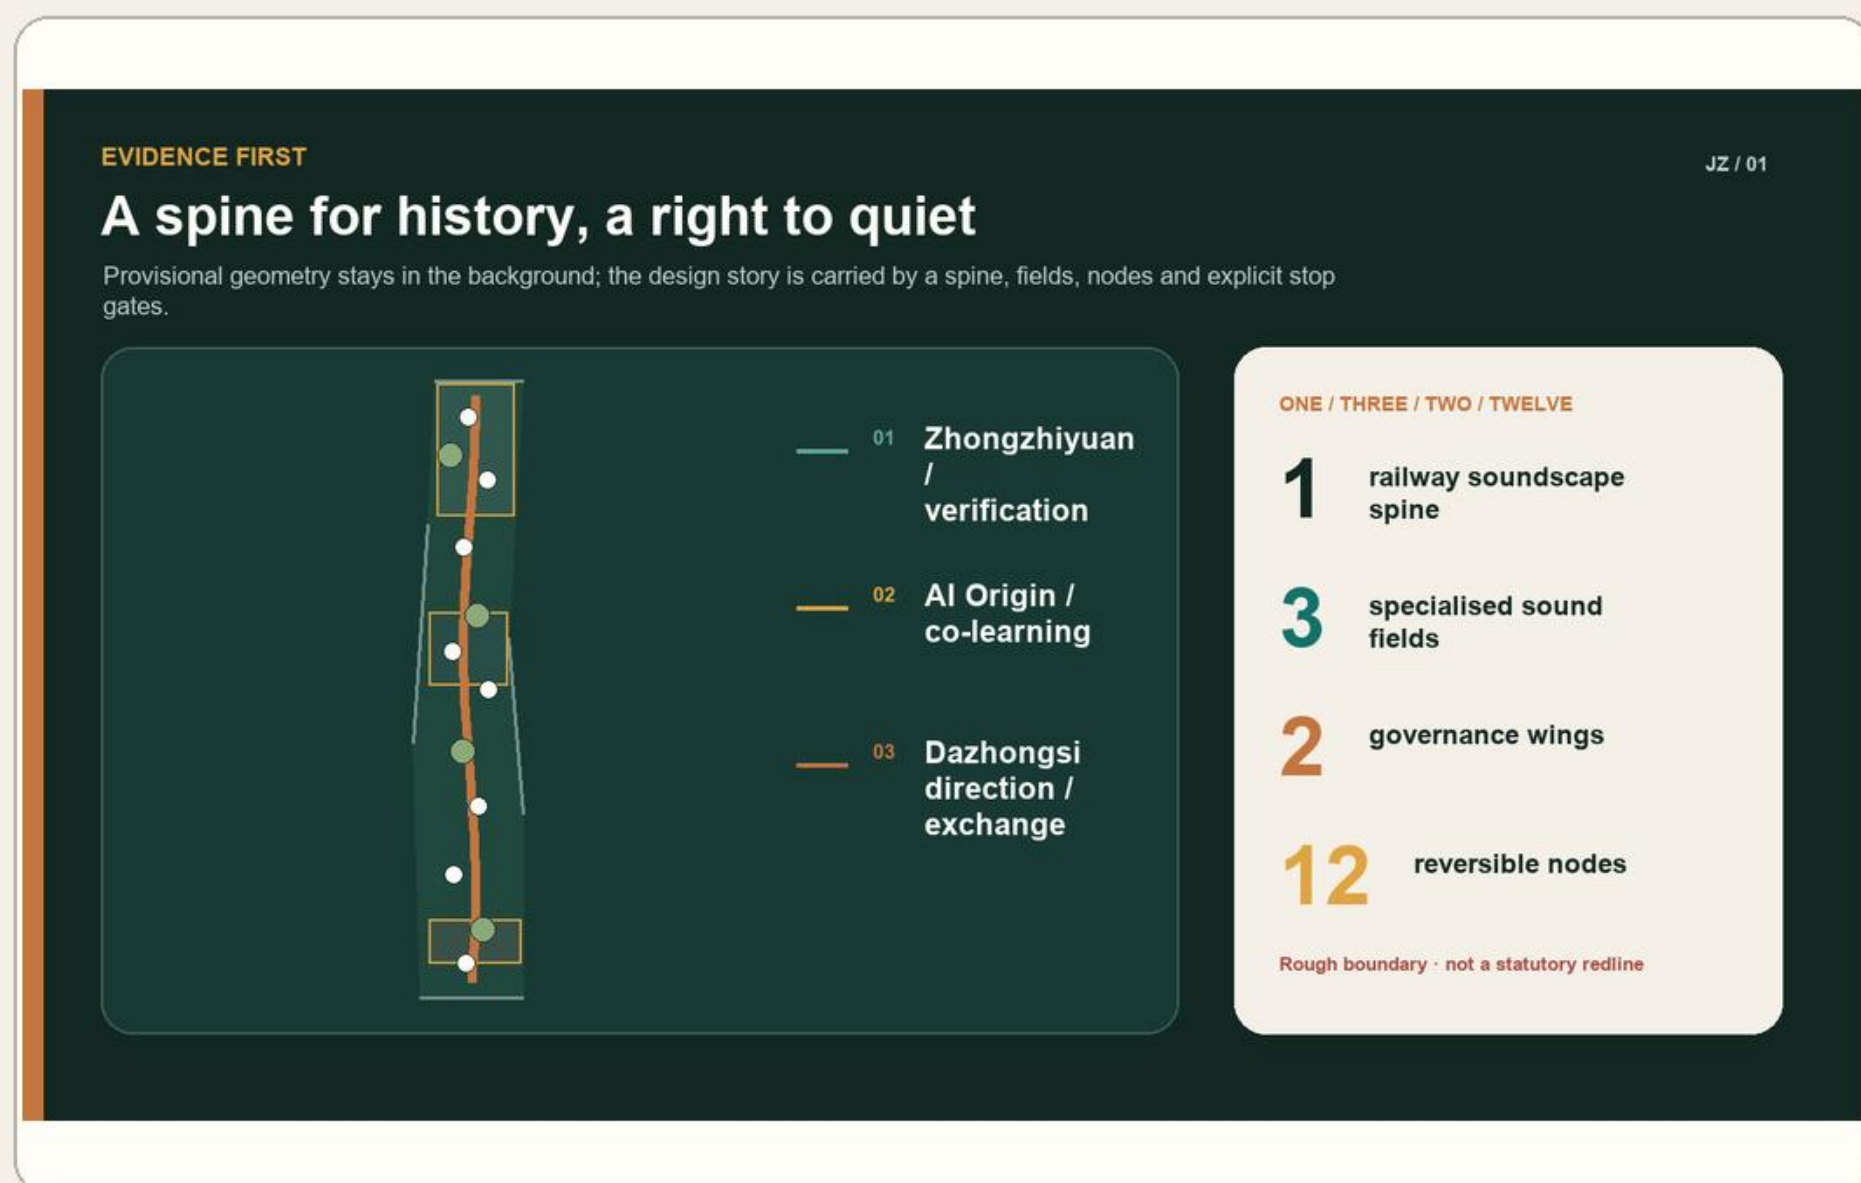

Provisional geometry stays in the background; the design story is carried by a spine, fields, nodes and explicit stop gates.

1 SPINE / 3 FIELDS / 2 WINGS / 12 NODES

Evidence before geometry

Three scope levels keep their own precision.

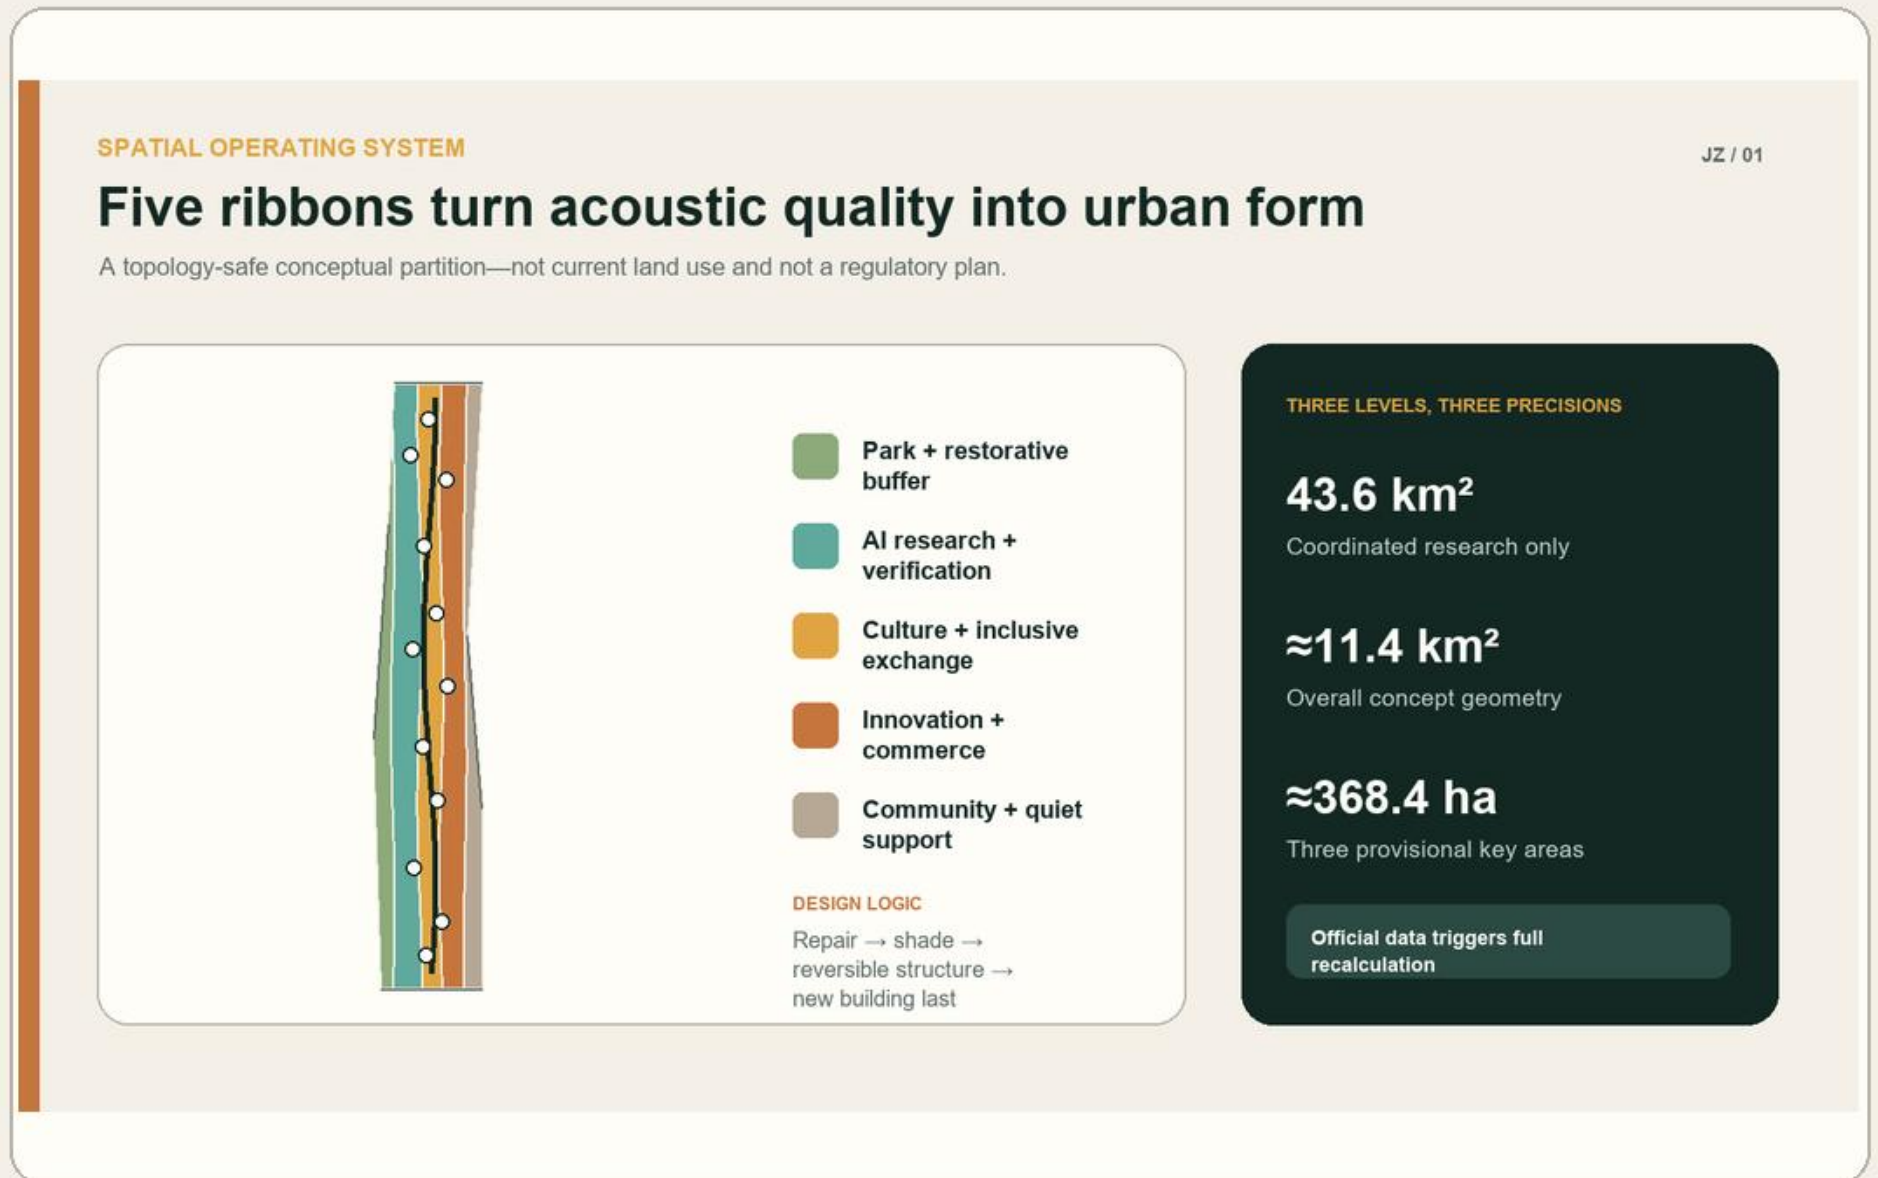

● Canonical provisional geometry is preserved and visually de-emphasised.

● PROV-KEY-003 is not anchored to Dazhongsi Station.

● Official polygons trigger a full geometry and metric recalculation.

Spatial operating system

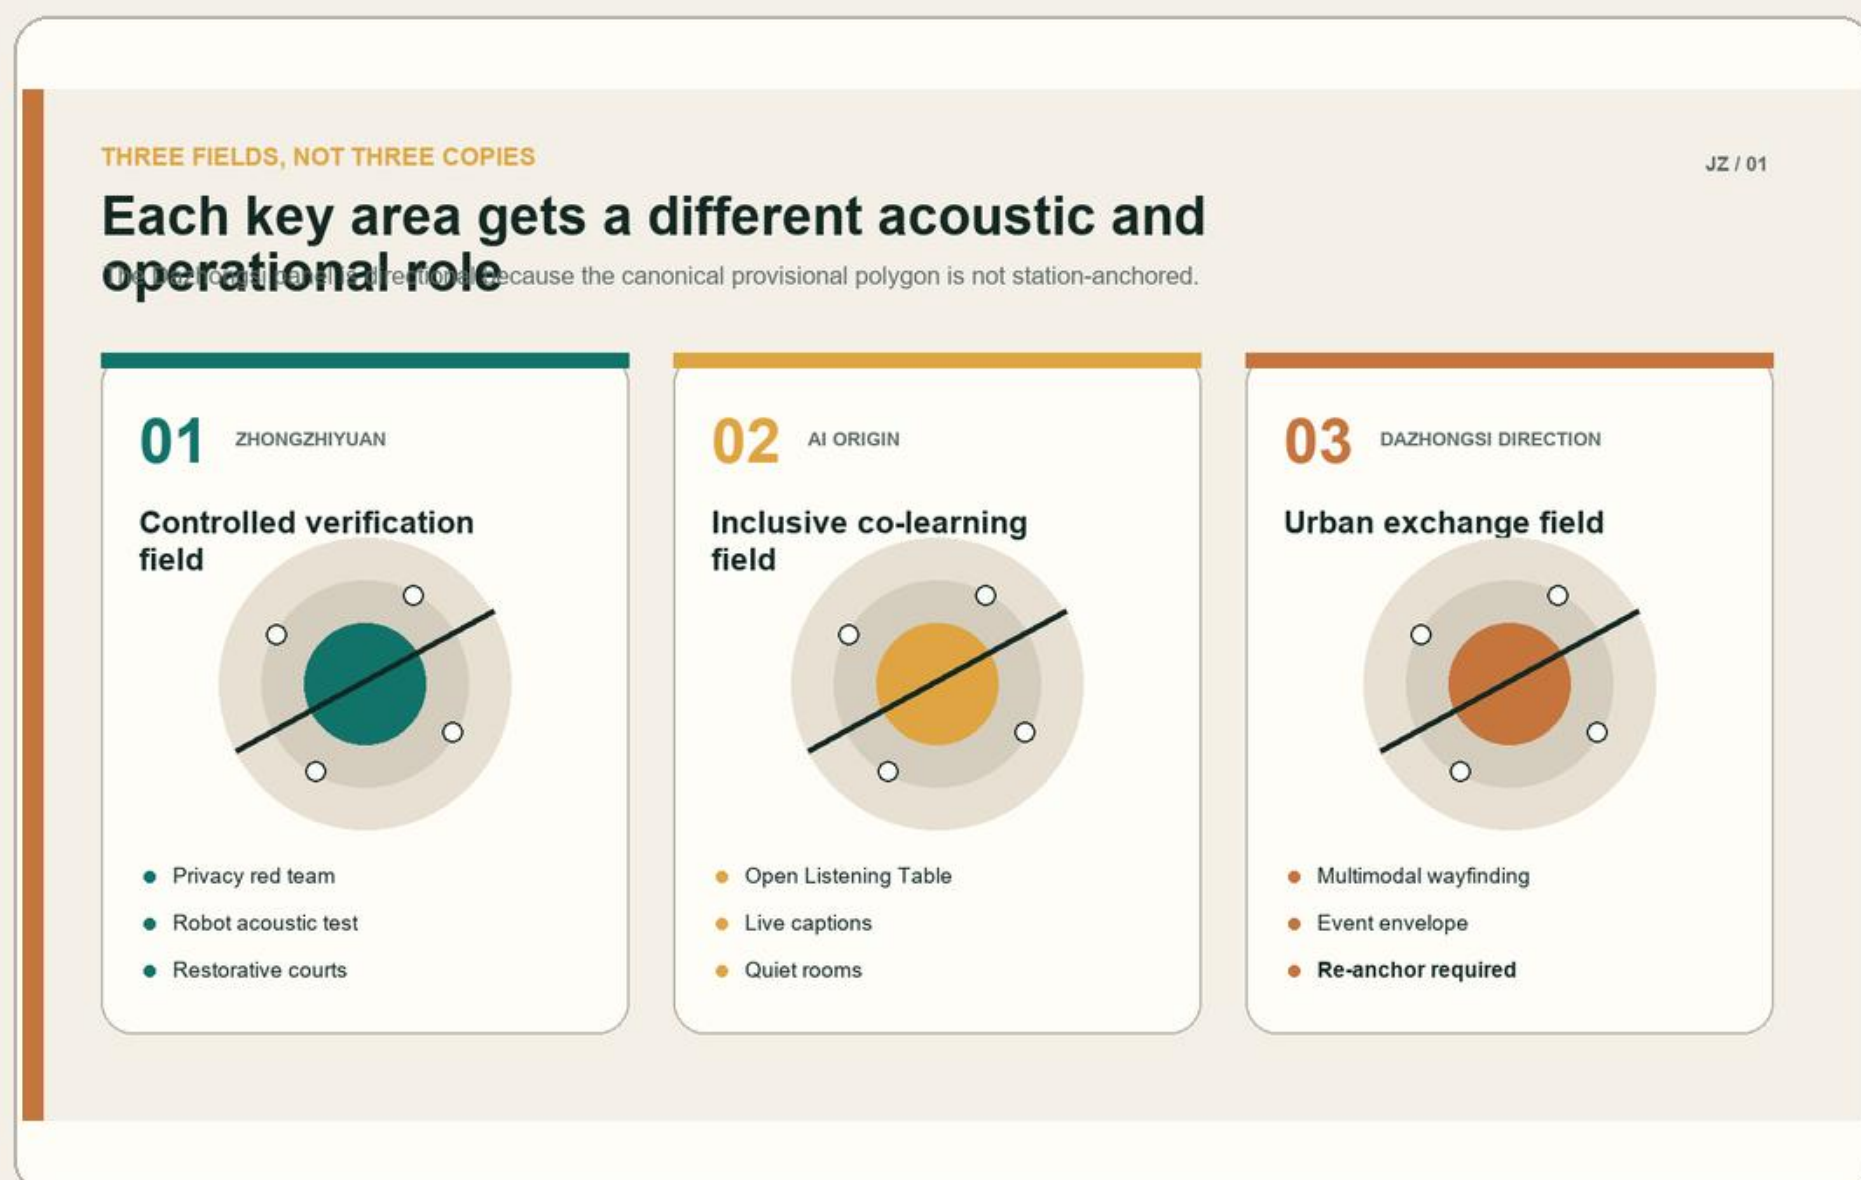

One spine, five ribbons and a repair-first renewal sequence.

- Concept land use is gap-free and overlap-free.
- Research, culture, service, commerce and restorative green space mix along the spine.
- FAR, height, ownership and demolition decisions remain unknown.

Three differentiated fields

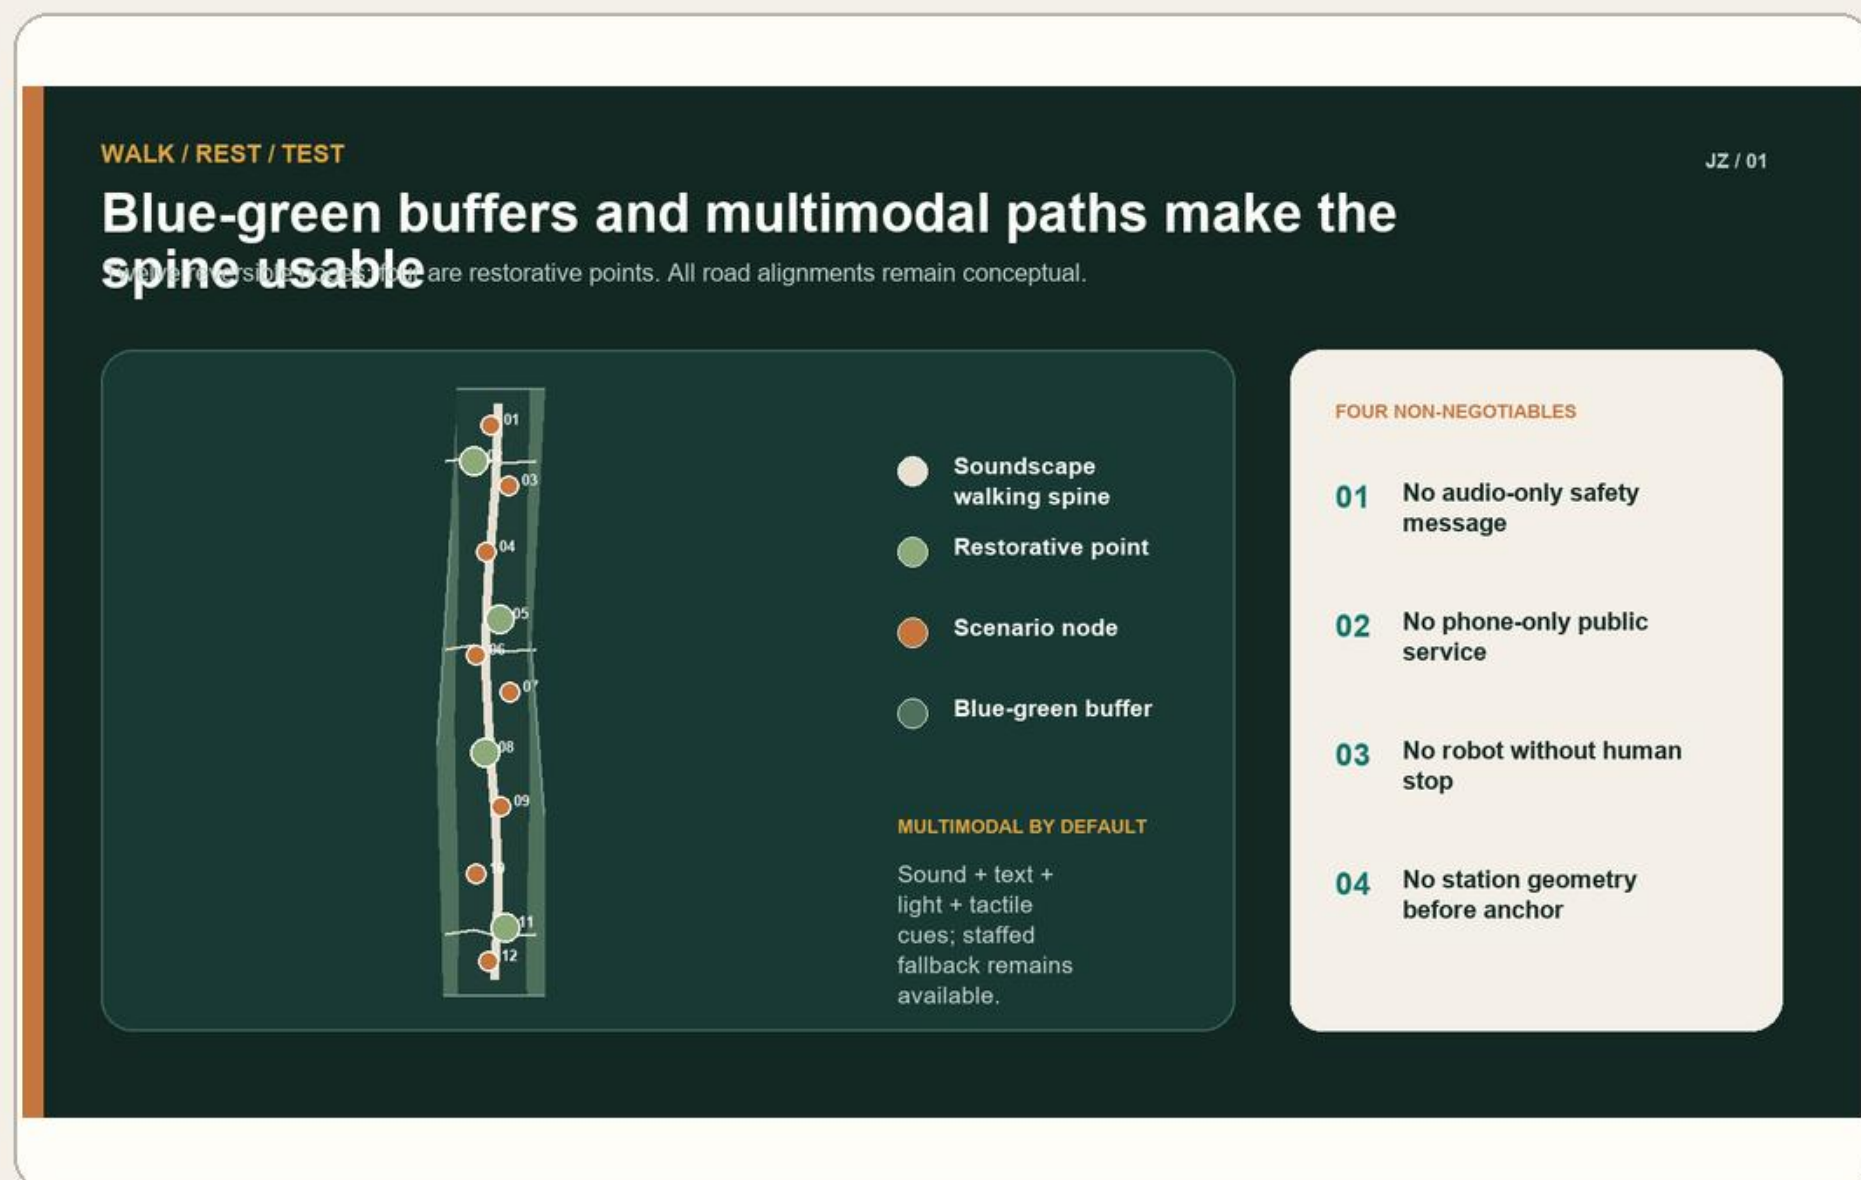

Verification, co-learning and urban exchange use different contracts.

- Zhongzhiyuan: outside quiet, inside controlled test.
- AI Origin: captions, tactile guidance and quiet collaboration.
- Dazhongsi direction: portable rules only until an official station anchor exists.

Walking, recovery and test

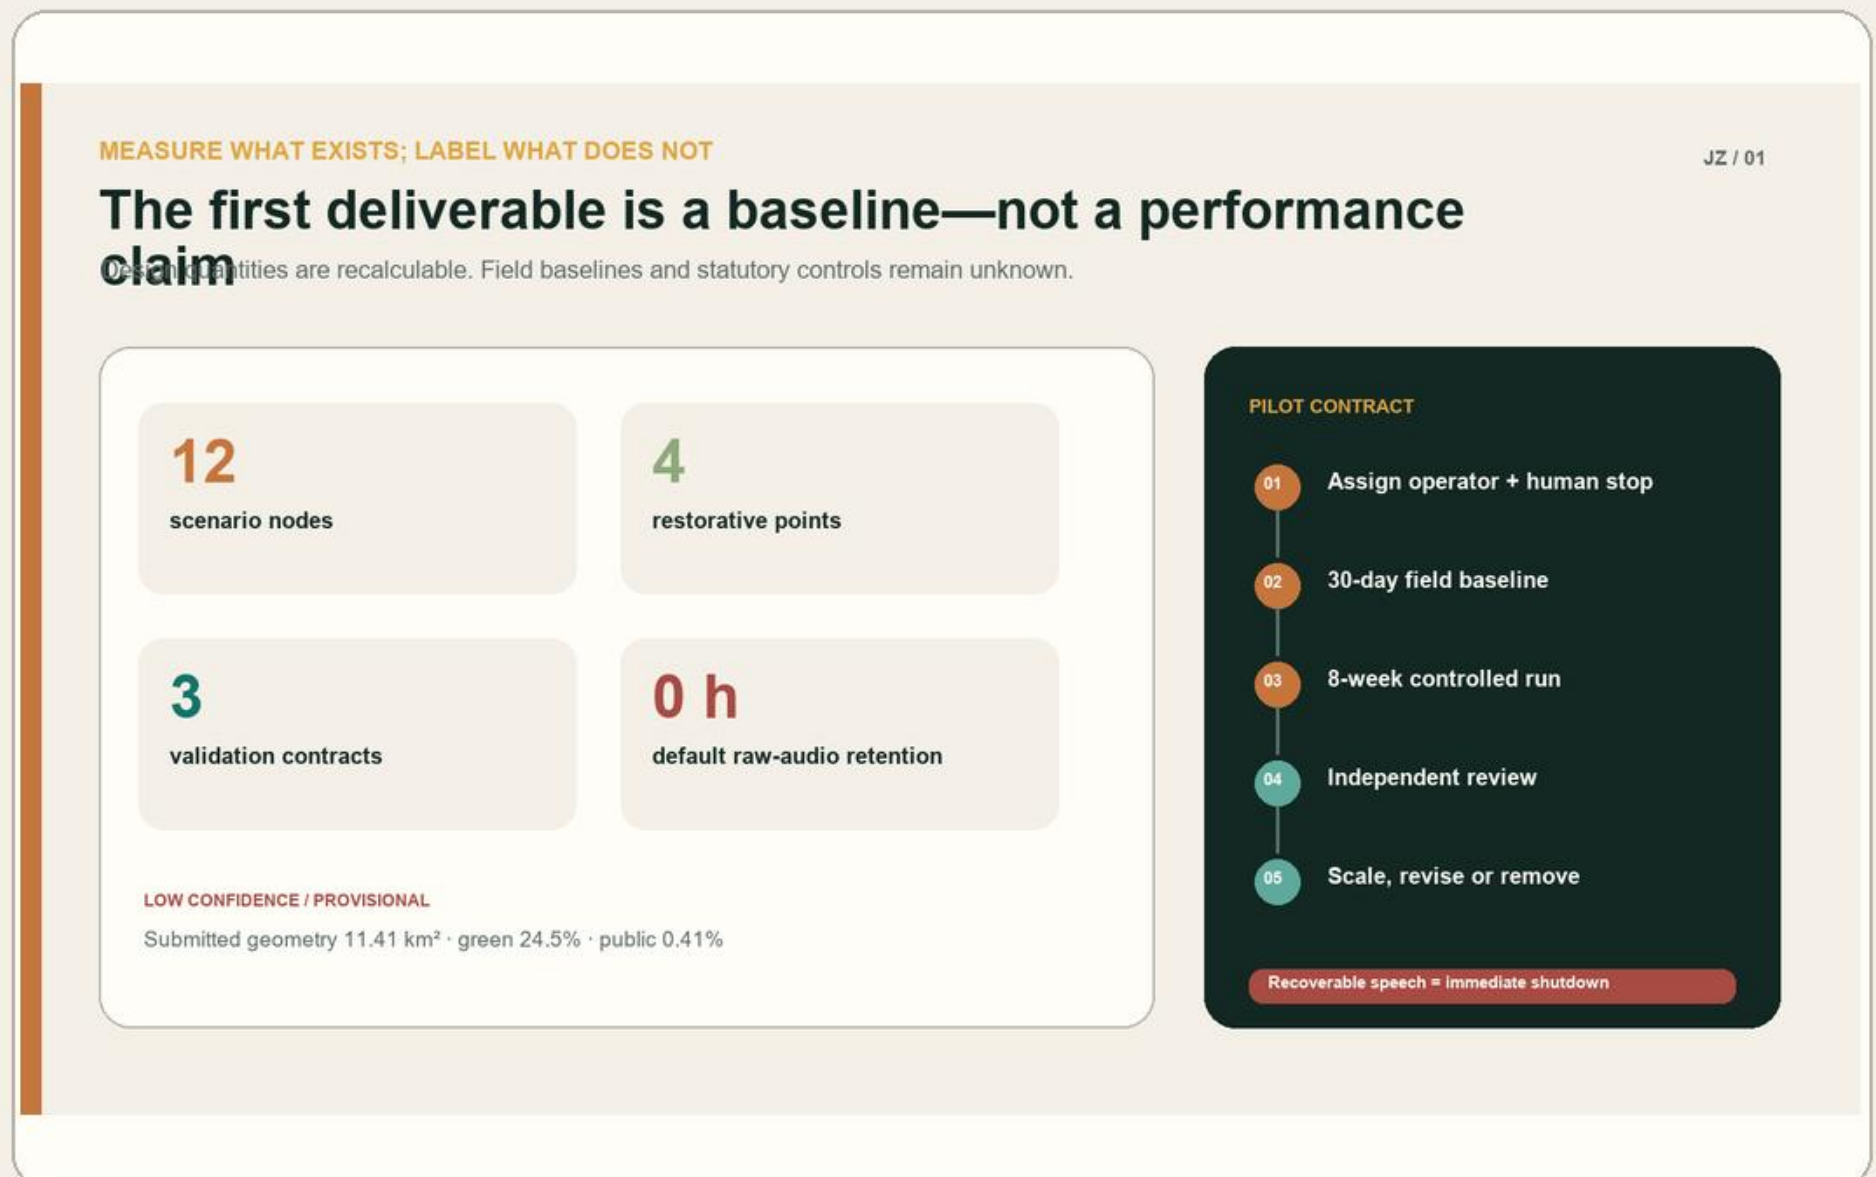

The public realm still works when AI is switched off.

- Twelve reversible nodes include four restorative points.
- Essential information always has visual, tactile or staffed equivalents.
- Roads and station relations are conceptual, not transport engineering.

A stoppable pilot contract

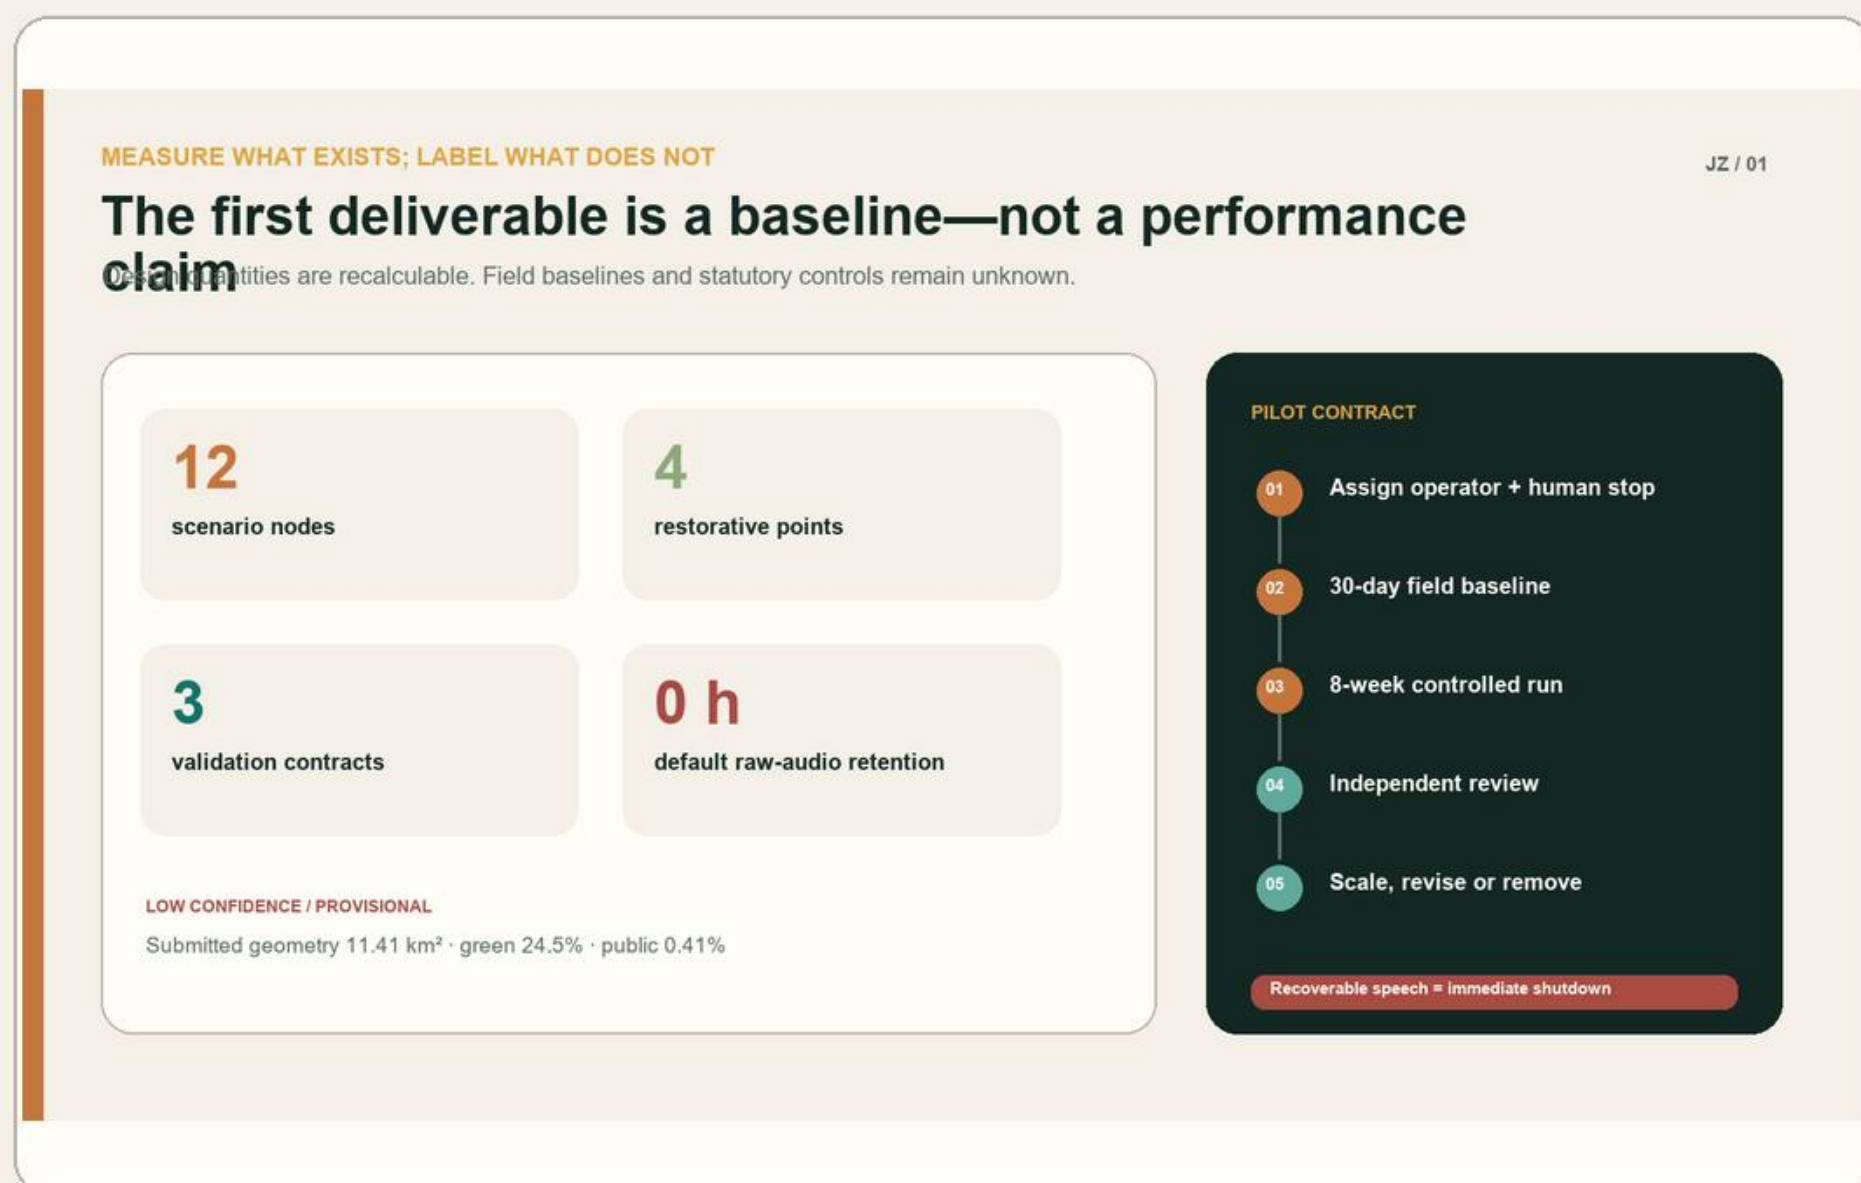

Baseline, operator, resources, review and removal are designed together.

- 30-day baseline before an eight-week controlled run.
- Default raw-audio retention target: 0 hours.
- Recoverable speech, unnotified collection or a safety failure means immediate shutdown.

What is known—and what is not

Honest uncertainty is a professional deliverable.

- Known: 12 nodes, 4 restorative points, 3 validation contracts, 4 operating seasons.
- Unknown: field baseline, people served, statutory controls and utility capacity.
- No site visit, measurement, interview or local endorsement is claimed.
