

SPATIAL JUDGEMENT AND ADOPTION PATH

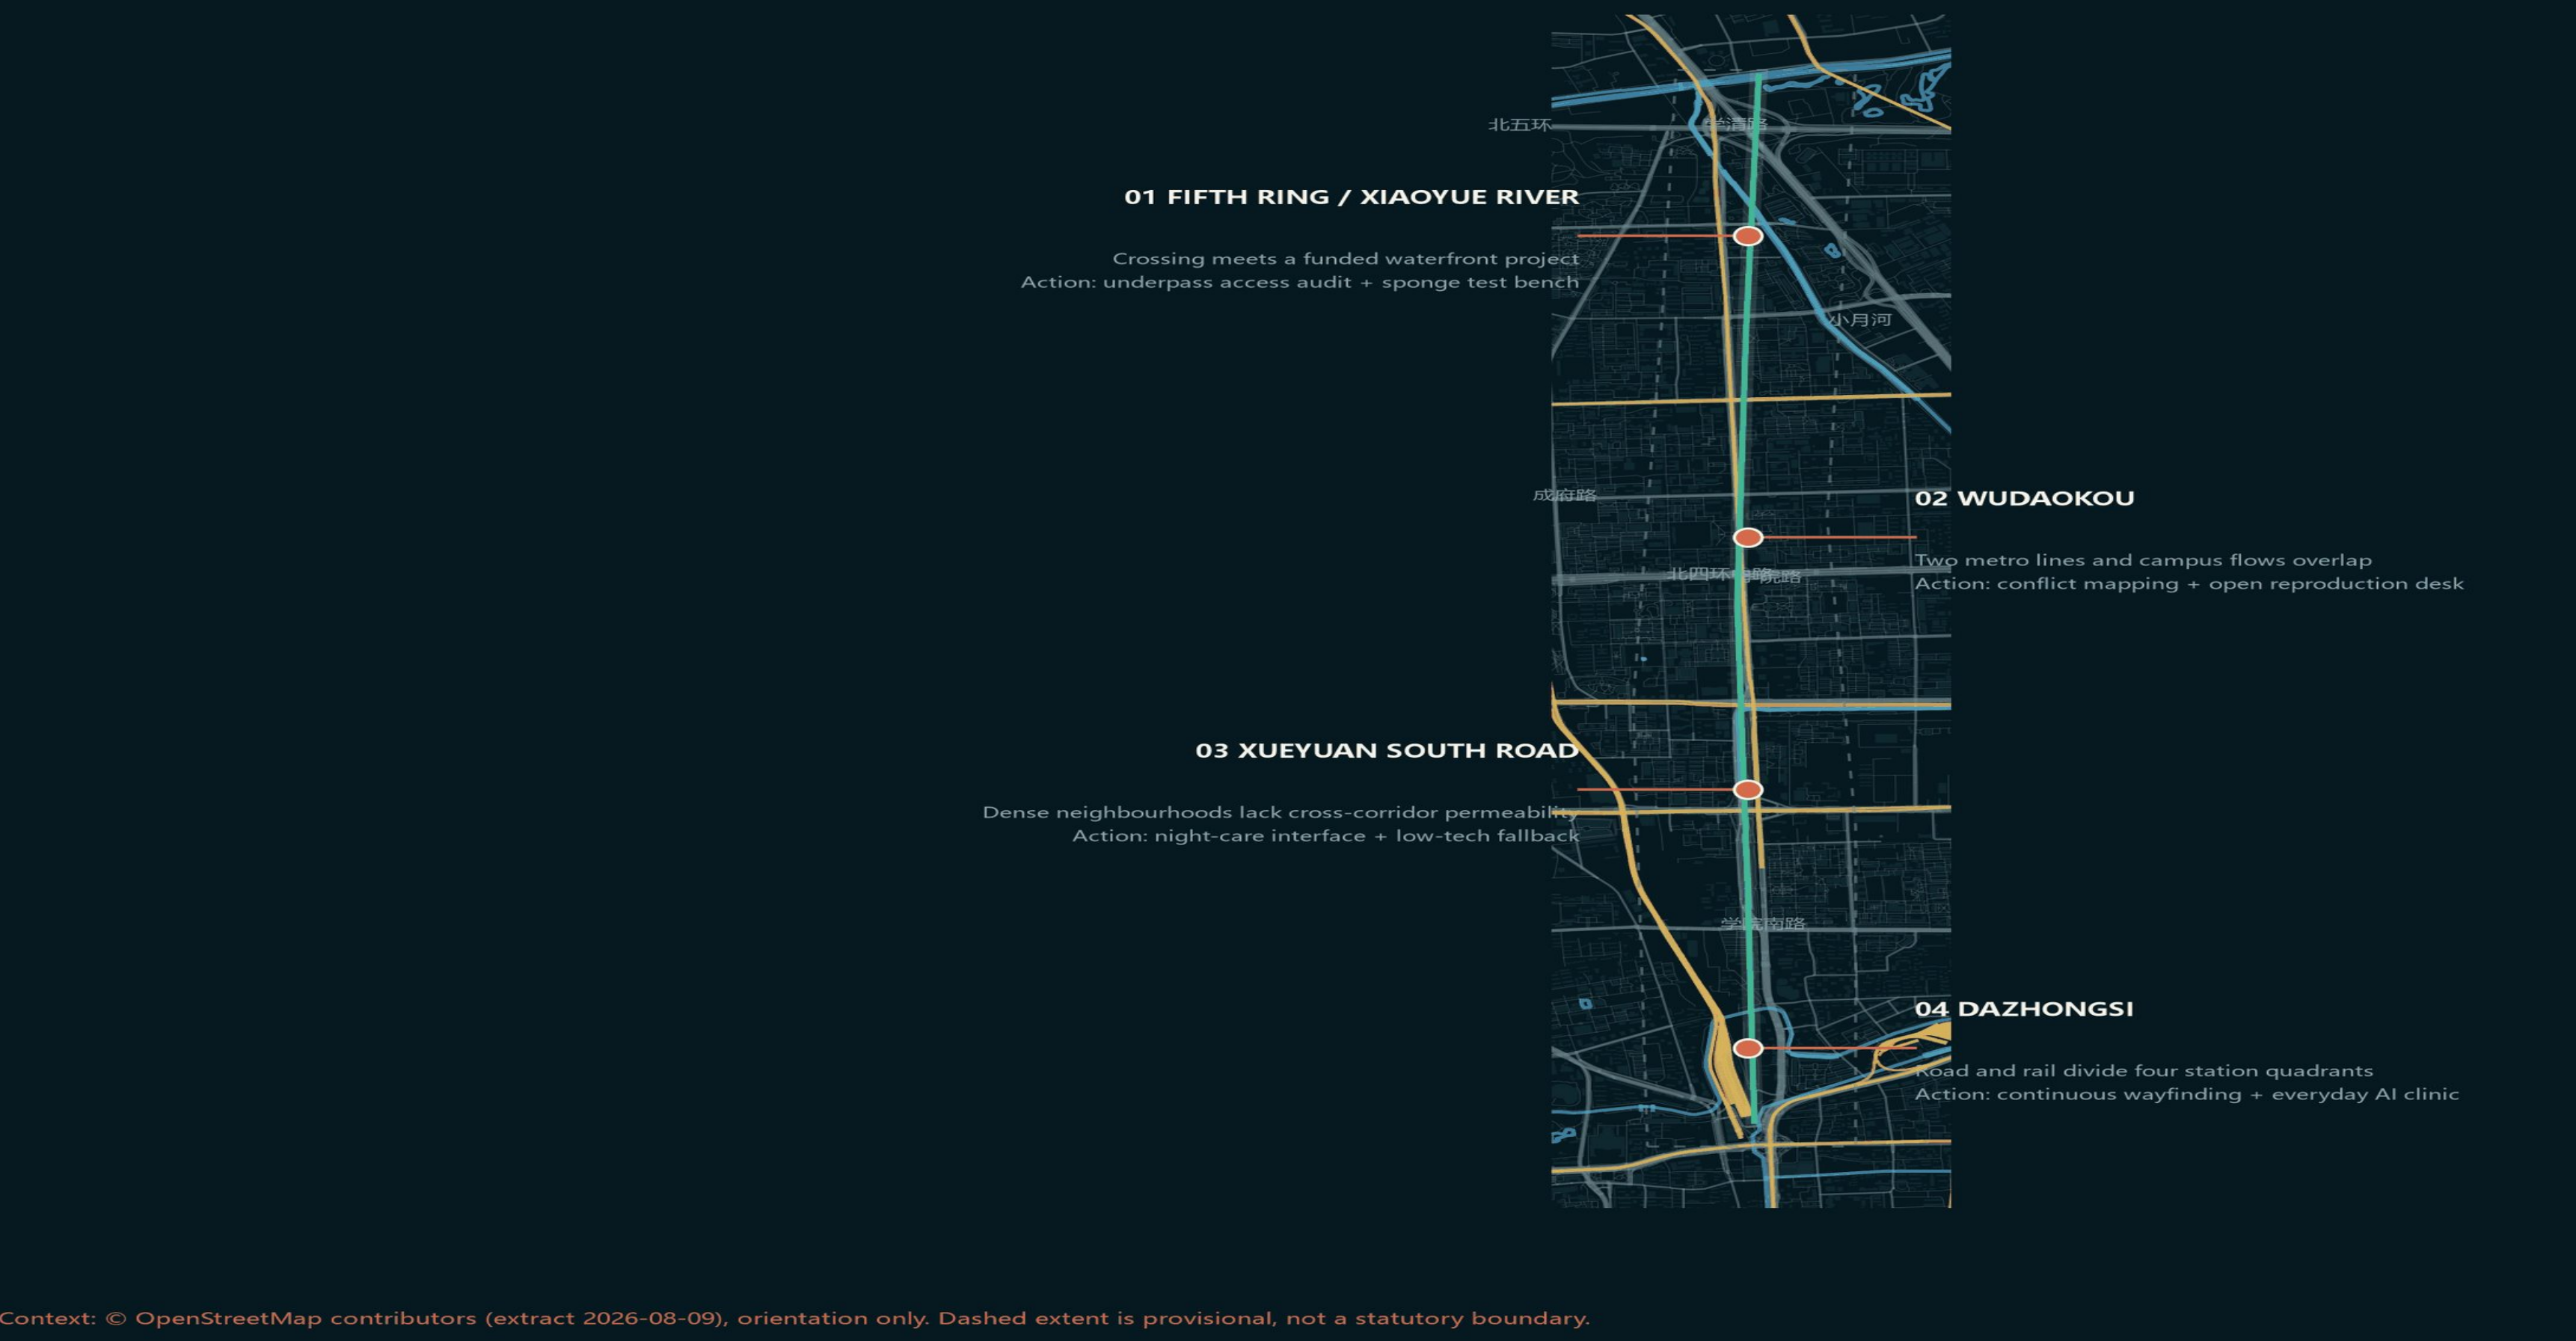

THE MENDING LINE: FROM RAIL HERITAGE TO CIVIC PROVING

Urban context + one heritage commons spine + four site-specific stitches + three reversible stations

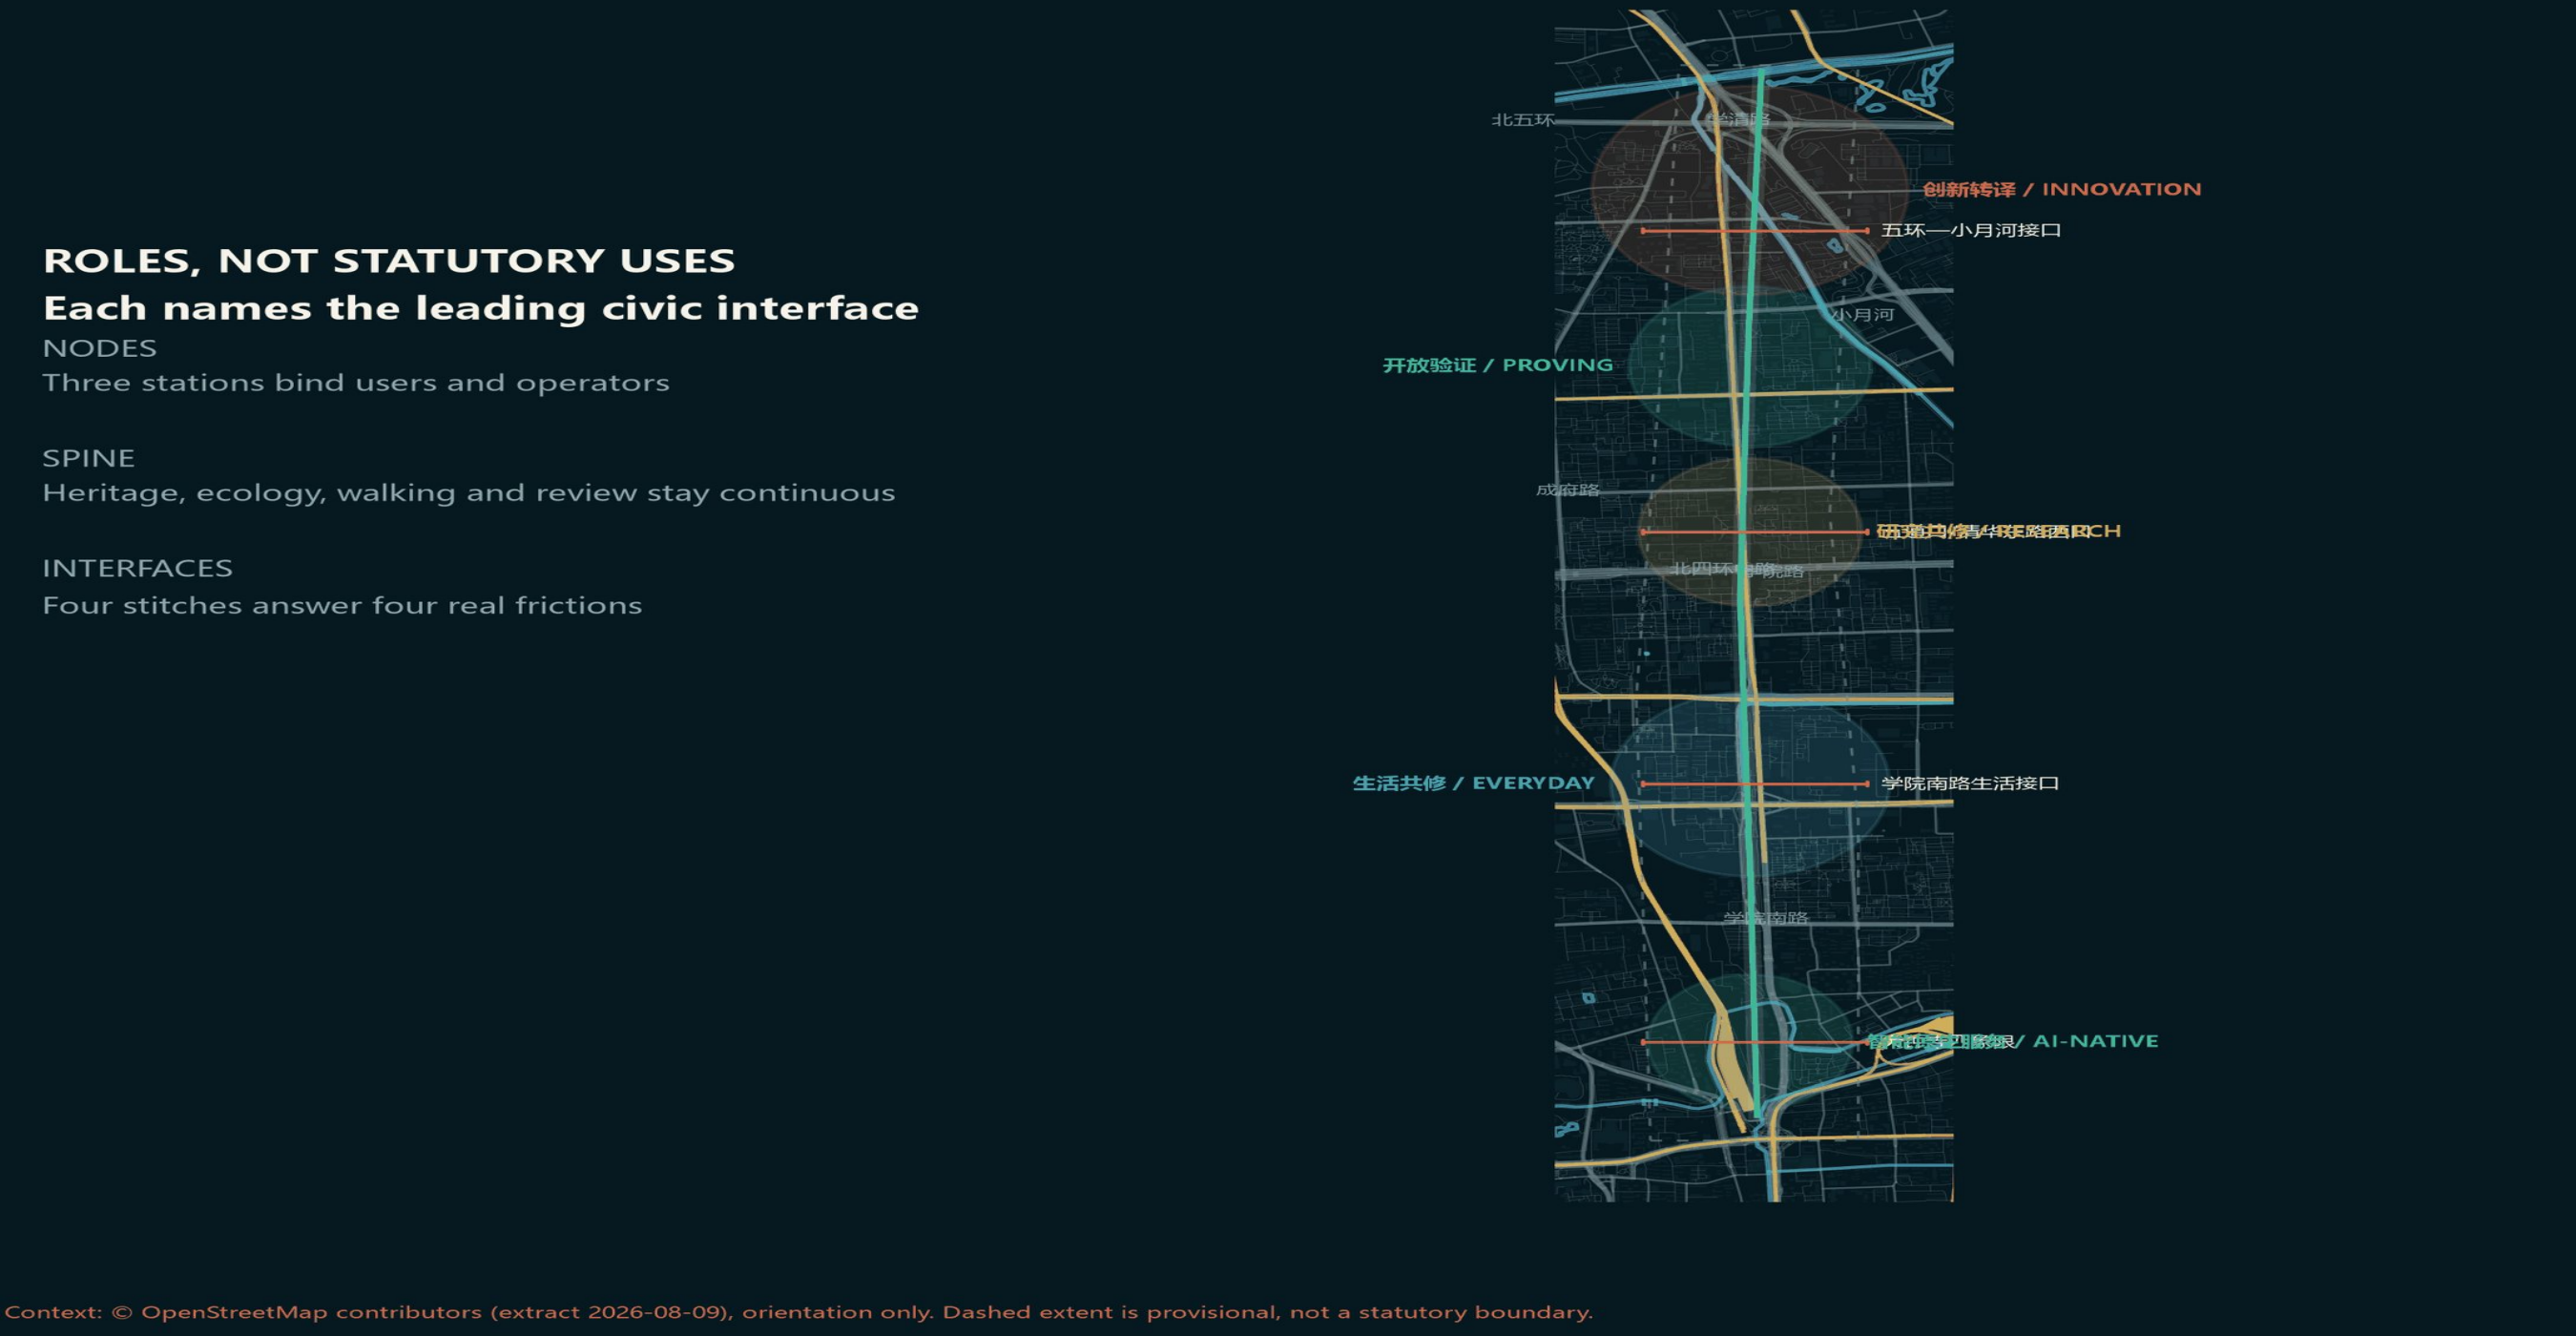

FOUR REAL FRICTIONS, FOUR SPATIAL ACTIONS

Not evenly spaced: each interface responds to an identifiable urban condition

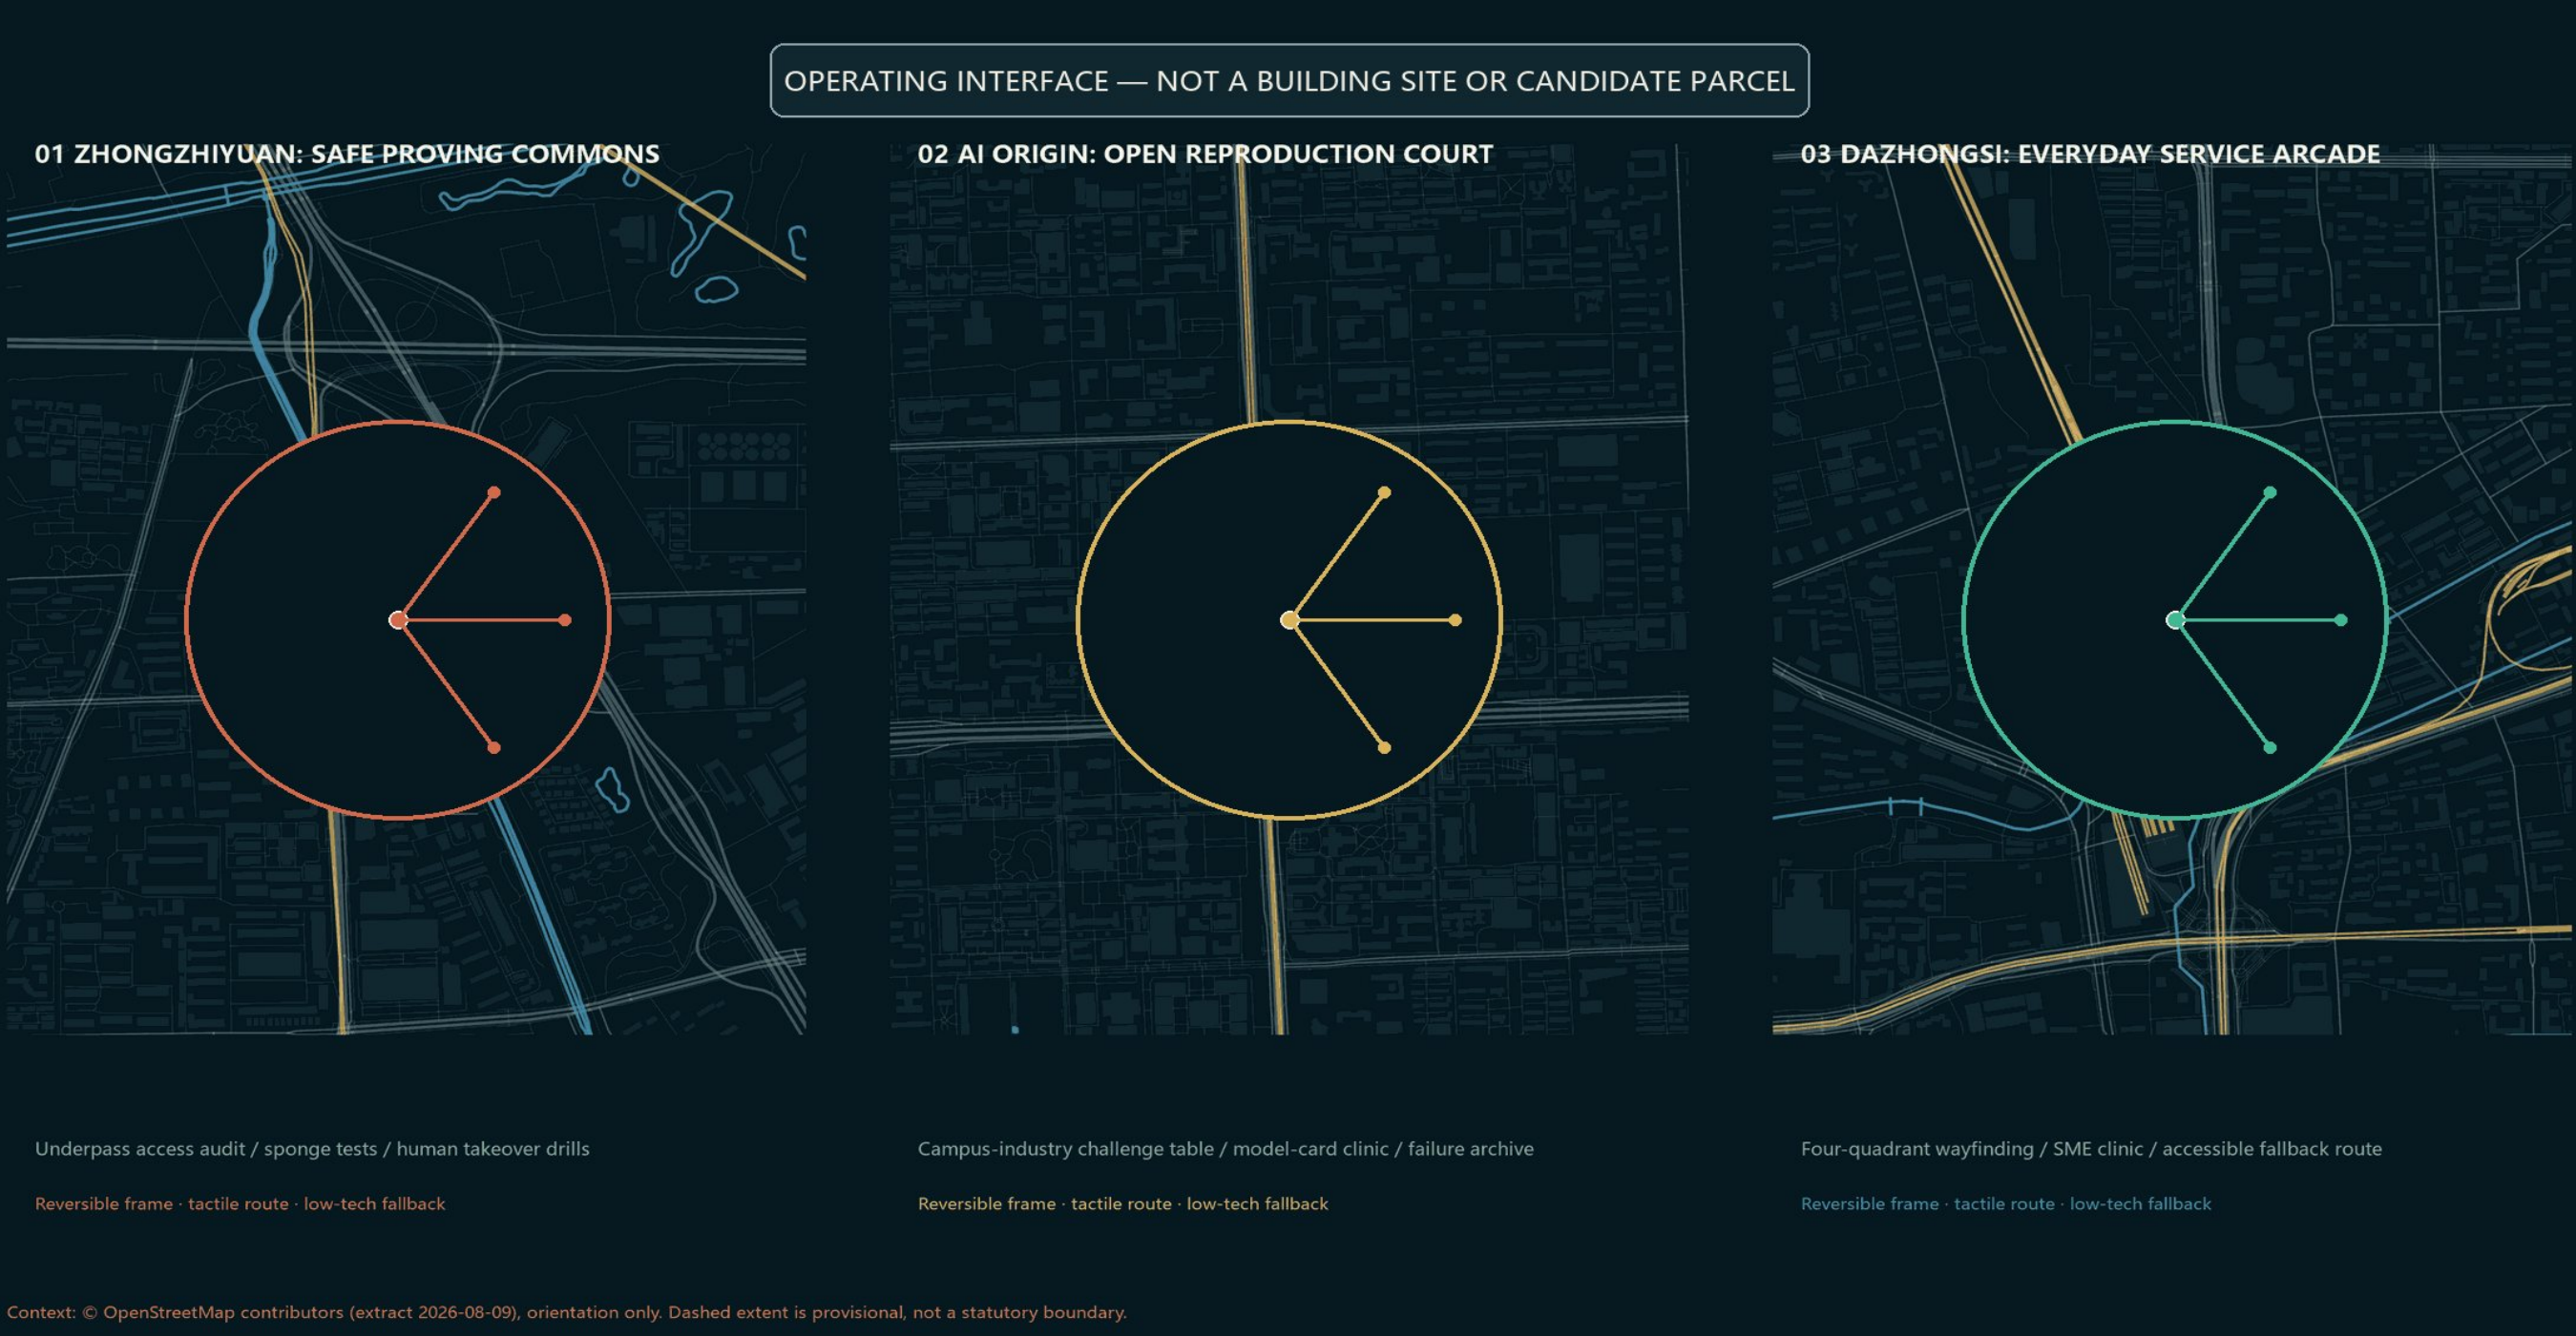

FIVE SHARED-EDGE COMMONS, NOT FIVE EQUAL BANDS

Program follows nodes, spine and interfaces in the real street context; provisional extent recedes

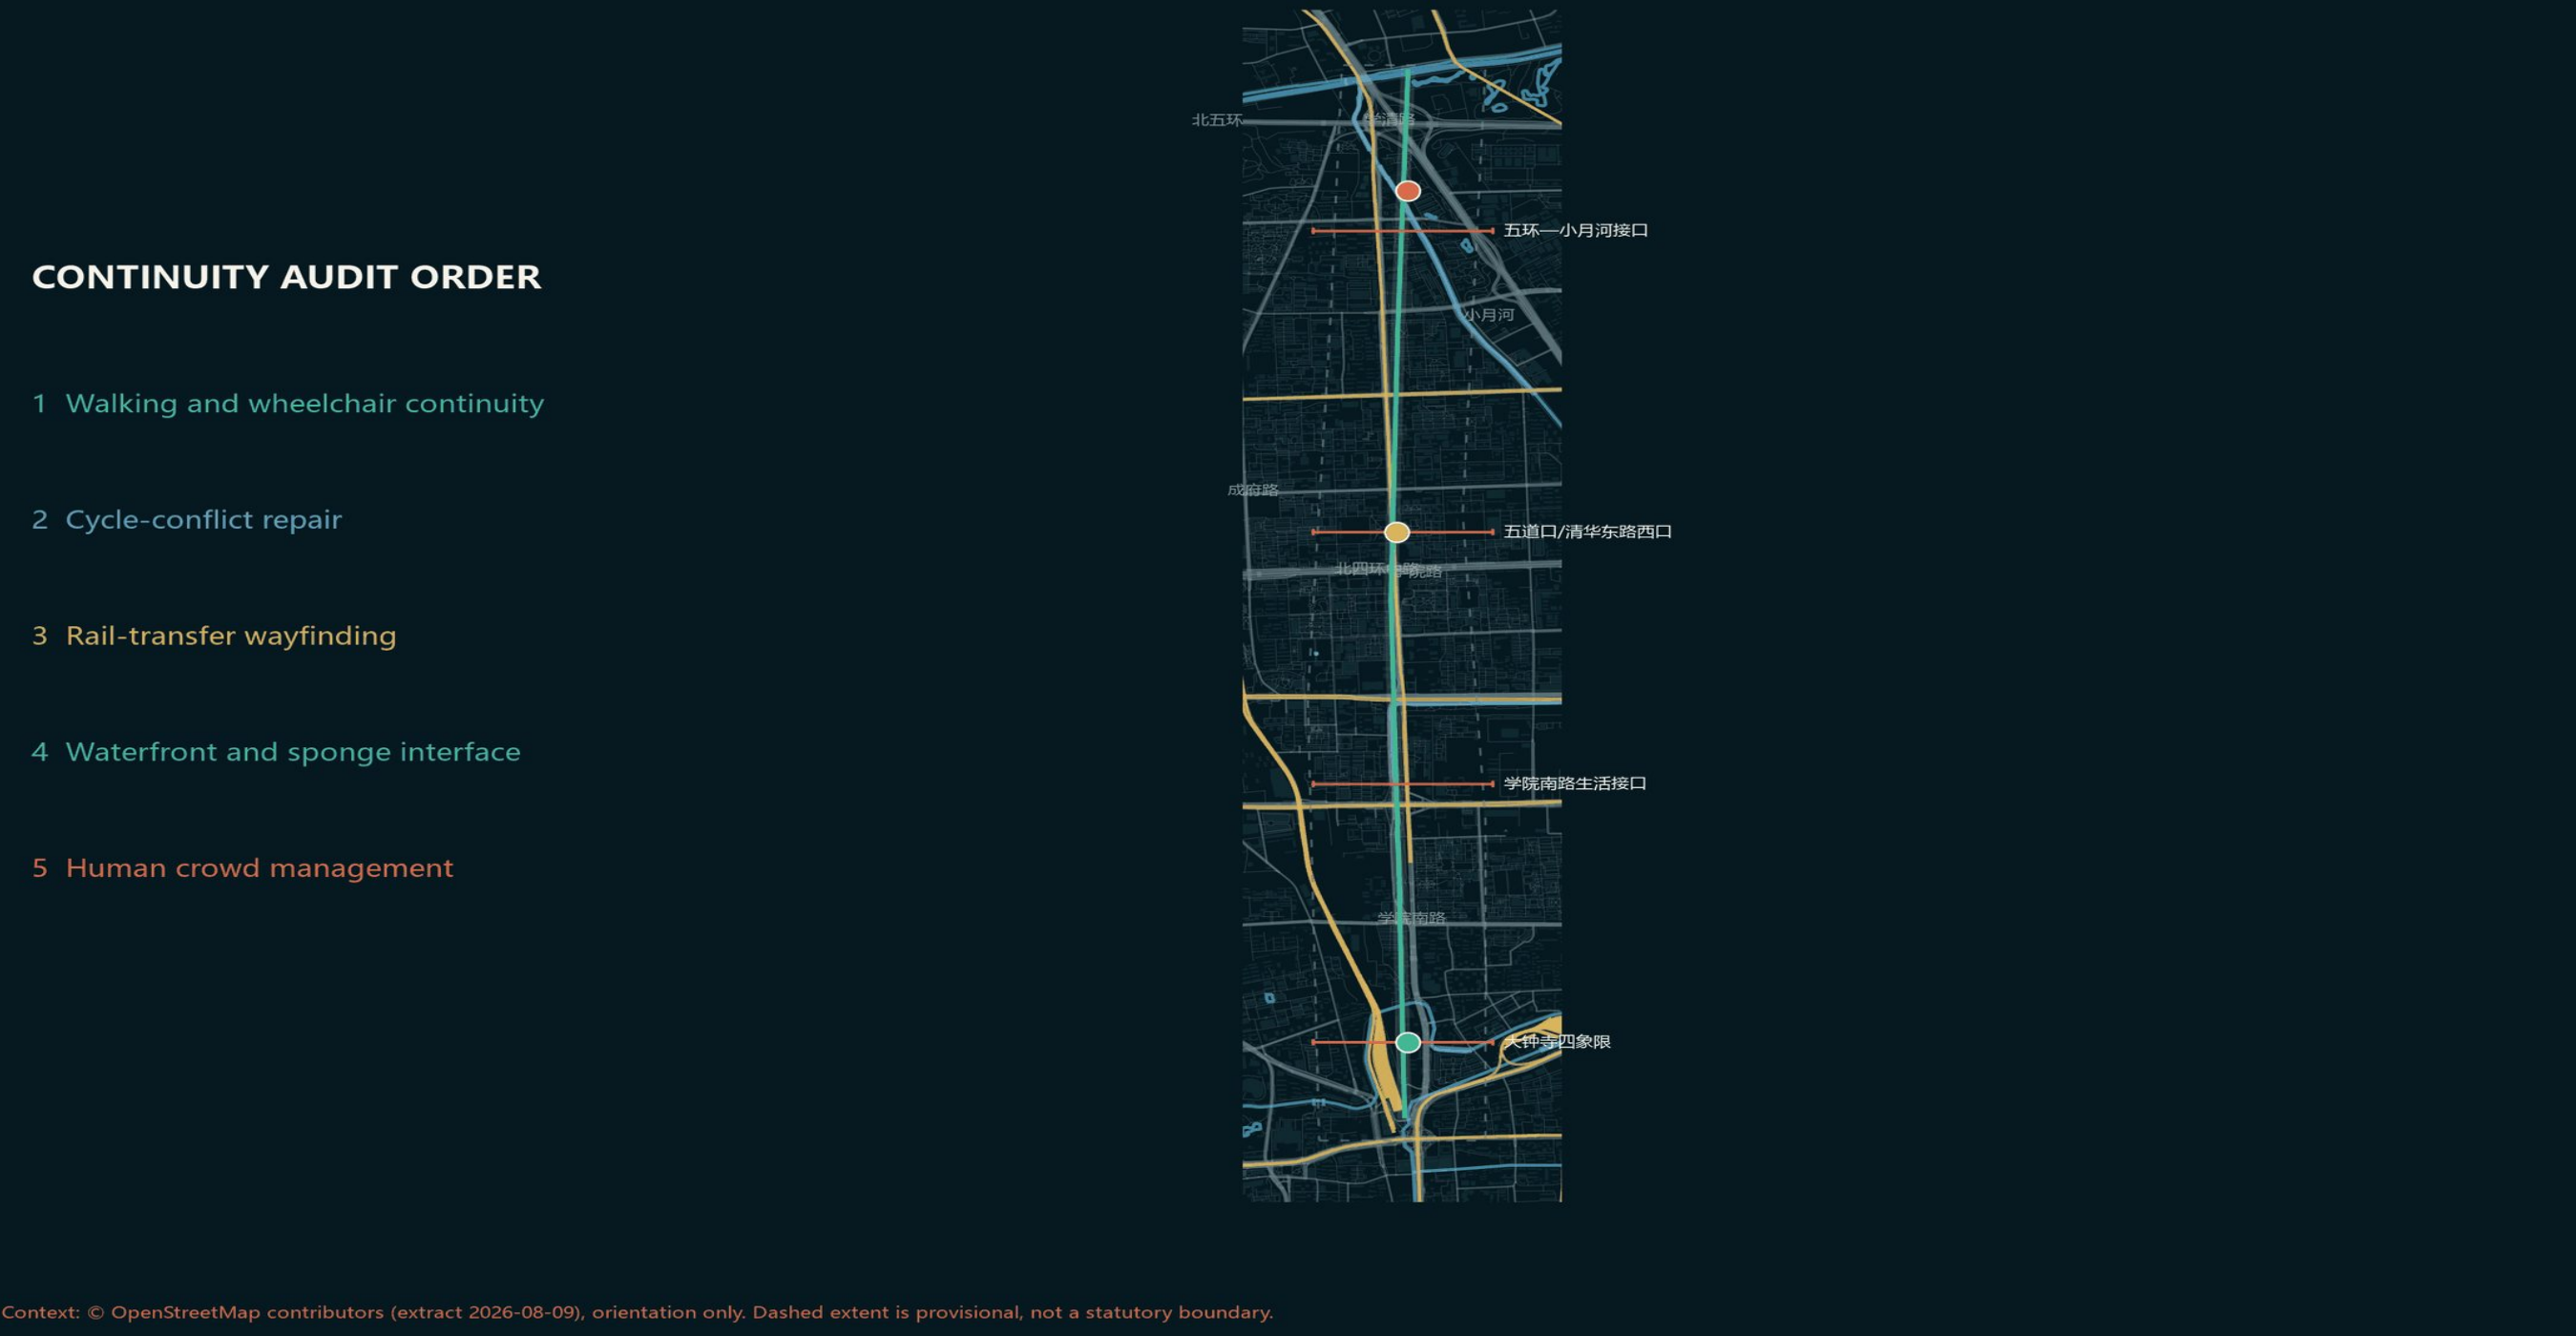

THREE MENDING STATIONS: THREE NON-INTERCHANGEABLE INTERFACES

Each station binds a site friction, spatial kit, operating action and exit rule

CONTINUITY FIRST: RAIL, STREETS, HERITAGE WALK AND BLUE-GREEN CROSS

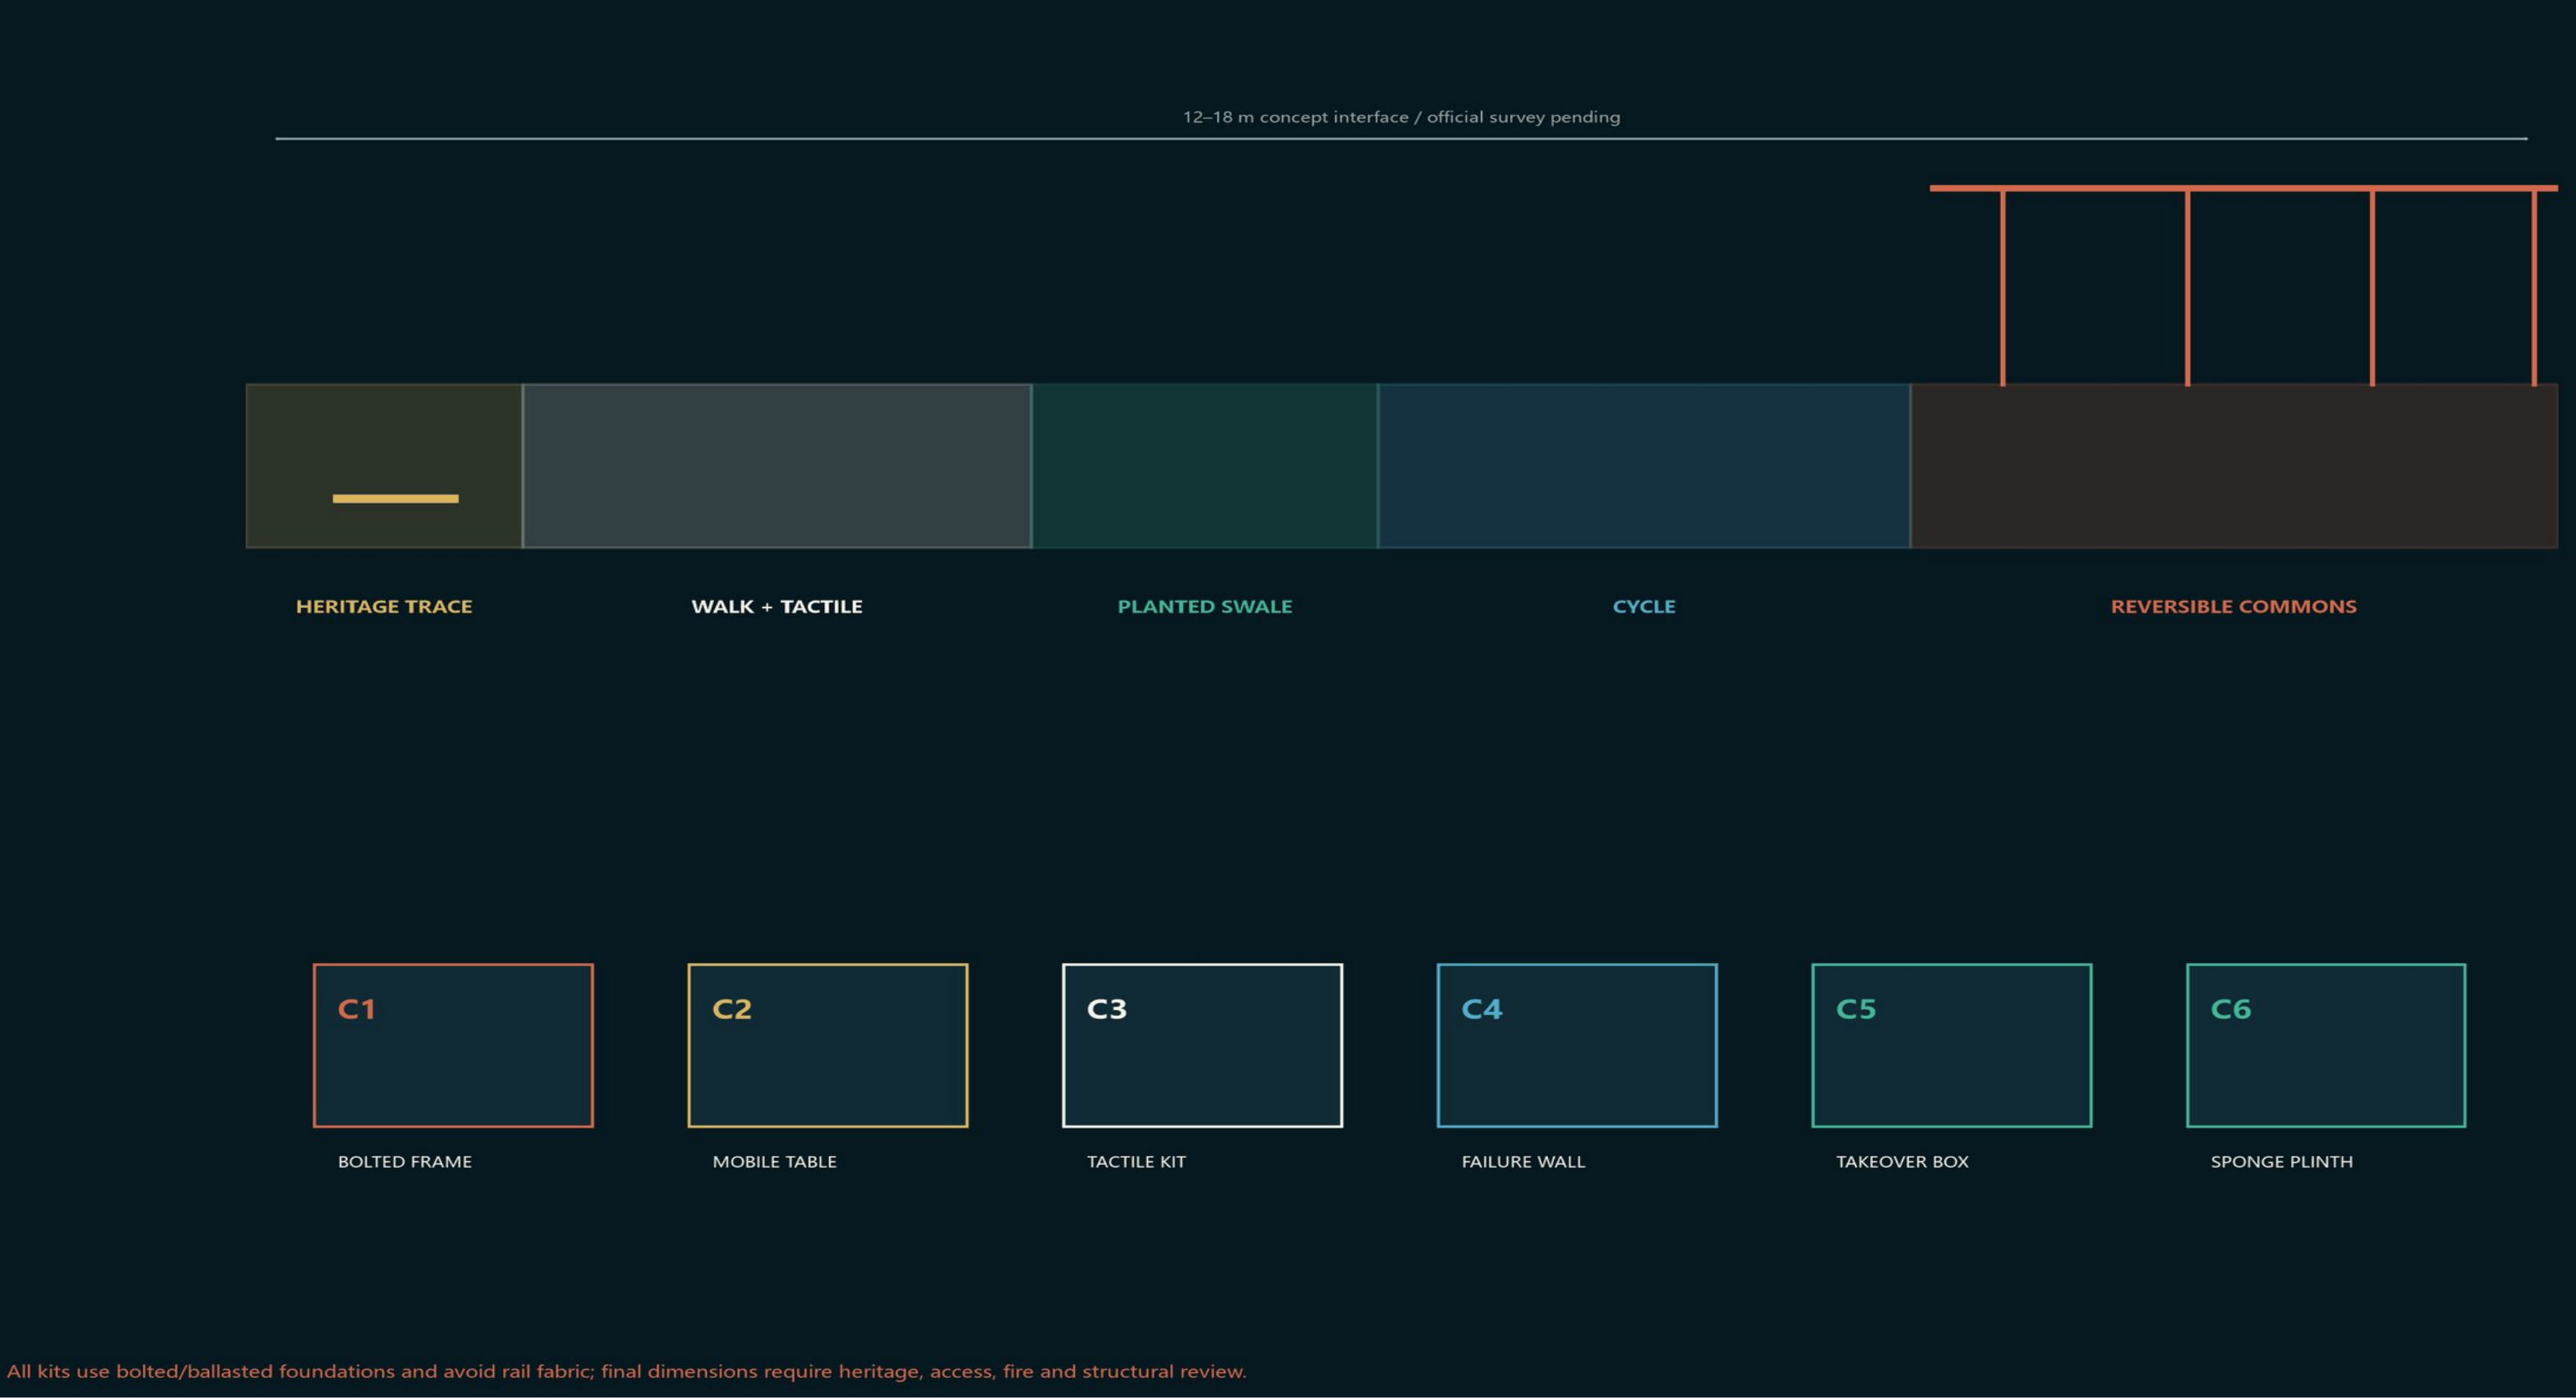

Four stitches answer Fifth Ring/Xiaoyue River, Wudaokou, Xueyuan South and Dazhongs

P1 Charter + Problem Atlas	Belt-wide	Charter, ledger, data/exit templates	auditable card/takeover/reproduction/fallback
P2 Heritage Access Audit	Whole line	Gap list, fallback routes, priorities	auditable card/takeover/reproduction/fallback
P3 Safe Proving Commons	Zhongzhiyuan	Reliability tests, failures, takeover	auditable card/takeover/reproduction/fallback
P4 Open Reproduction Desk	AI Origin	Reproduction, residencies, clinic	auditable card/takeover/reproduction/fallback
P5 Everyday AI Clinic	Dazhongs	Accessible, vendor-neutral advice	auditable card/takeover/reproduction/fallback
P6 Public Model Library	Three stations	Cards, versions, failure, retirement	auditable card/takeover/reproduction/fallback
P7 Mending Week	Rotating	Open tests, review, next challenges	auditable card/takeover/reproduction/fallback

Provisional boundaries and operating interfaces support concept co-creation only. Official polygons trigger complete regeneration.

A BUILDABLE, REMOVABLE AND TAKEOVER-READY SECTION

METRICS ARE RECOMPUTABLE EVIDENCE, NOT PROMISES

GeoJSON → EPSG:4548 calculation → metrics.json → figures / HTML / PDFs

Constraint geometry → Design layers → Projected calculation → Cross-artifact consistency

PENDING: official polygons • statutory controls • ownership / heritage / transport / utility evidence

12 AI SCENARIOS

01 Accessible-route mending	02 Multilingual heritage guide
03 Slow-mobility gap repair	04 Comfort diary
05 Model-card clinic	06 Open reproduction desk
07 SME AI clinic	08 Care-roster assistant
09 Campus-industry matching	10 Low-tech continuity drill
11 Low-carbon compute timing	12 Public-comment synthesis

G0 → G1 → G2 → G3

G0 EVIDENCE	Provenance, rights, official boundary
G1 PUBLIC	Real users co-define; non-digital route
G2 PROFESSIONAL	Heritage, transport, safety, privacy, engineering
G3 EXIT	Scale, repair or retire with record

published trial card	P1 baseline; named owner
takeover drill	P1 baseline; named owner
accessible participation	P1 baseline; named owner
independent reproduction	P1 baseline; named owner
issue closure time	P1 baseline; named owner
low-tech fallback	P1 baseline; named owner
retirement record	P1 baseline; named owner

Provisional boundaries and operating interfaces support concept co-creation only. Official polygons trigger complete regeneration.
