

THE PAUSE LINE

A3 城市设计文册 · A3 URBAN DESIGN BOOKLET

THE PAUSE LINE

Keep computation running while allowing the city to pause

PROVISIONAL CONSTRAINT · 非官方红线

ONE PAUSE SPINE

Continuous slow mobility and low-stimulation public interface; the provisional polygon stays a faint constraint.

THREE RHYTHM COURTS

Calm validation at Zhongzhiyuan, shared learning at AI Origin, civic reflection at Dazhongsi.

SIX + TWELVE

Six east-west transitions and twelve public stations with selectable quiet, social and event intensity.

AI BOUNDARY

Optimize space-level state only. Never infer attention, emotion, disability or mental state.

PROVISIONAL CONSTRAINT · NOT AN OFFICIAL REDLINE

THREE SCALES AND LAND USE

Same-source geometry, legal land-use codes, provisional disclosure

FIVE FUNCTIONAL BANDS ACROSS THREE SCALES

Pause is a public-space concept, not statutory land-use code 16

PROVISIONAL CONSTRAINT · 非官方红线

0802 Research

0702 Public service

1401 Green spine

0804 Learning transfer

05 Urban adoption

43.6 km2 COORDINATION

Sets common rules for innovation, talent district and the two supporting wings.

11.4 km2 OVERALL DESIGN

Uses one evidence chain for land use, mobility, blue-green space and phasing.

368.4 ha KEY AREAS

Three courts test before release, during creation and after adoption.

THREE RHYTHM COURTS

Calm validation • Shared-learning pause • Civic reflection

THREE RHYTHM COURTS

Calm before release • Pause during creation • Reflect after adoption

01 CALM VALIDATION

Zhongzhiyuan: silent red team, low-speed embodied tests and recovery garden.

GATE: official polygon + safety + ownership + operator

02 SHARED-LEARNING PAUSE

AI Origin: low-stimulation demo, lunch learning tables and open-source pause hall.

GATE: official polygon + safety + ownership + operator

03 CIVIC REFLECTION

Dazhongsi: public trial, complaint and exit desk, adoption and review ledger.

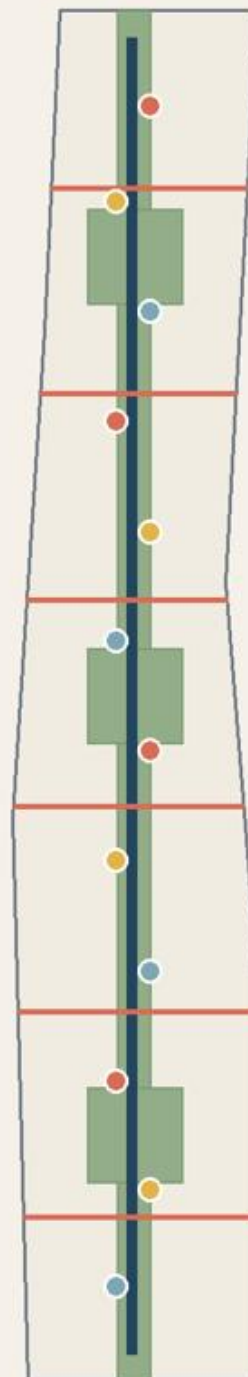

GATE: official polygon + safety + ownership + operator

MOBILITY AND PUBLIC SPACE

Selectable quiet / social / event intensity

MOBILITY, BLUE-GREEN SPACE AND SENSORY INTENSITY

One public line, three selectable states

PROVISIONAL CONSTRAINT · 非官方红线

QUIET

Low stimulation, slower response, non-digital signs

SOCIAL

Small-group exchange, learning encounters, bookable

EVENT

Public demos, cultural events, explicit time windows

AI reads space-level state only; it never identifies people or infers emotion, disability or attention.

PROVISIONAL CONSTRAINT · NOT AN OFFICIAL REDLINE

AI SCENARIOS AND RIGHTS

Space-level data; no individual-state inference

- 12 scenario cards, including 3 controlled industrial tests
- No inference of emotion, attention, disability or mental state
- Every scenario has a responsible human, exit and reflection route
- Five functions and three areas/two wings form a validation-learning-adoption loop

IMPLEMENTATION AND OPERATION

Measure rhythms · Connect spaces · Deepen construction

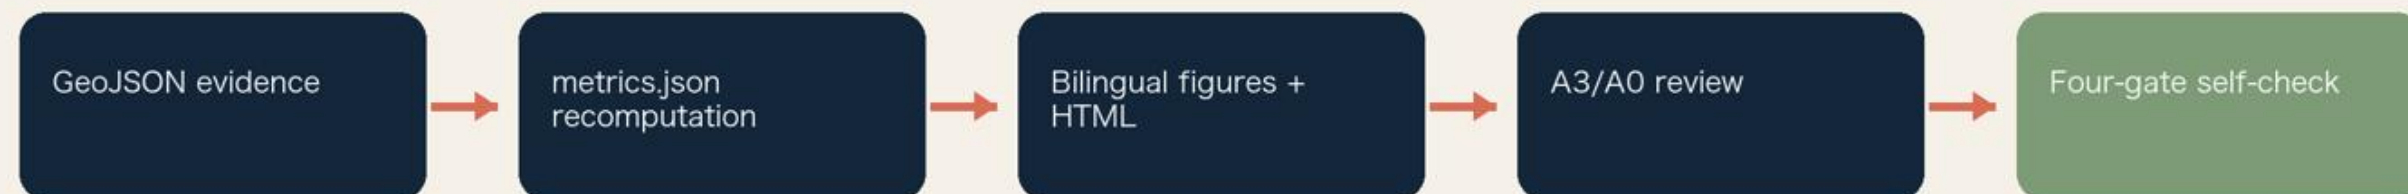

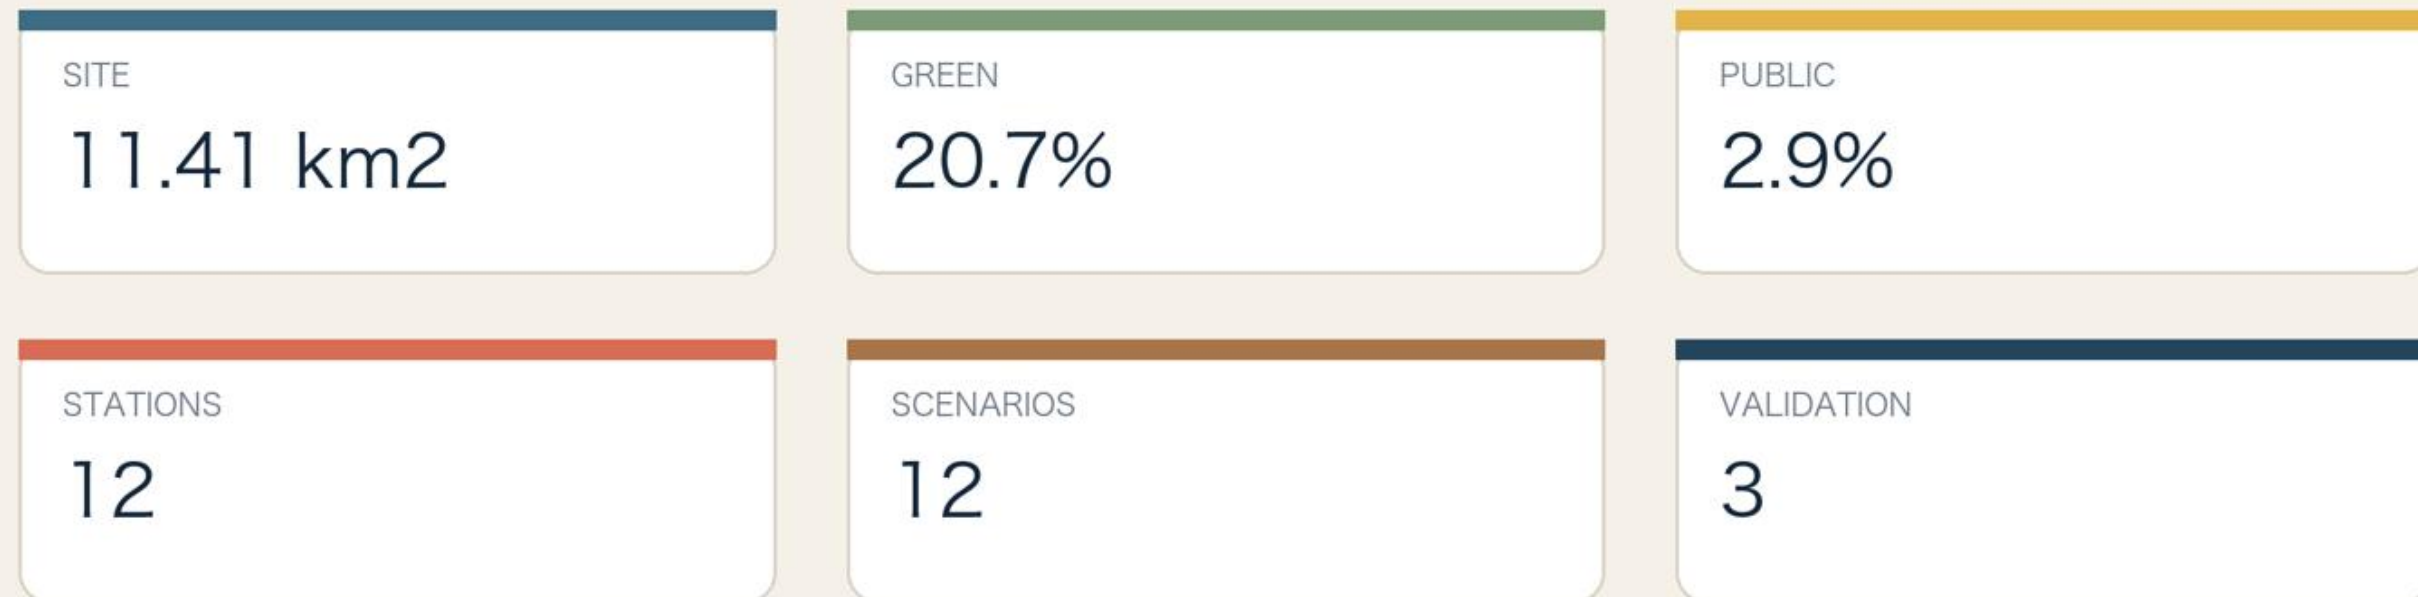

- Eight starter projects each have a gate before scaling
- Annual cycle: questions, controlled tests, civic adoption, public reflection
- Events, funding, organizers and construction timing remain reference proposals
- Regenerate the whole package when official polygons arrive

METRICS AND EVIDENCE

GeoJSON → metrics → bilingual figures/HTML → A3/A0 → self-check

METRICS AND EVIDENCE CHAIN

Known values come from same-source geometry; statutory and engineering controls remain pending

PENDING: official polygons, FAR, height, road redlines, ownership, utilities, heritage and engineering

RISKS AND COPYRIGHT

Provisional boundary, data gaps, privacy and operating responsibility

- No claim of official redline, adopted planning, ownership, engineering feasibility or government commitment
- Issue #846 is background risk only and does not replace the repository provisional polygon
- All visuals are original; no remote assets or commercial maps
- Official data trigger updates to geometry, metrics, matrices, figures and bilingual narrative
