

JING-ZHANG AI PULSE · JZ·PULSE

Centennial Jing-Zhang AI Innovation Belt Open Call · Concept Booklet (A3)

One Track, Three Stations, Two Wings, One Loop: turning the century-old railway heritage into open innovation infrastructure for global developers.

JZ·PULSE · Overall Concept Map

One Track · Three Stations · Two Wings · One Loop (provisional boundary)

Data: geometry/*.geojson in submission package; boundary is provisional

Concept and Naming System

Primary name: Jing-Zhang AI Pulse (JZ·PULSE), using a station metaphor: Origin Station (AI Origin Community), Acceleration Station (Zhongzhiyuan), Scenario Station (Dazhongsi); JZ TRACK and JZ LOOP for public space; JZ PULSE WEEK for the annual event. The logo direction combines two rail lines and a signal pulse into a double reading of JZ and infinity, in railway red, AI blue, and urban grey with rights-cleared fonts.

Spatial Structure

The Track runs north-south; three key areas cover origination, acceleration, and conversion; the Zhongguancun service wing and Xiaoyuehe scenario wing supply capital, services, and scenarios; the blue-green loop links the heritage park, Qinghe, Xiaoyuehe, and university green networks.

Use Structure • High Mix along the Track

Key Area Detailed Design Index

areas

① Acceleration Station • Evaluation & Safety Governance

② Origin Station • Open Source & Community

Zhongzhiyuan • Evaluation, red-team testing, standards, compute, Qinghe corridor

Origin Community • Open-source publishing, transfer talent housing

v loop

③ Scenario Station • Dazhongsi • AI-native industry, roadshow lounge, station-city integration

Mobility and Blue-Green System

Phasing area (ha)

Renewal and Phasing

Near-term pilots (2026–2028) start with lightweight operations, public space, and publishing nodes; mid-term renewal (2029–2032) advances function replacement; long-term deepening (2033–2037) delivers reserved and structural projects.

Boundary and Compliance

The proposal uses provisional boundaries, not official redlines; regulatory controls, redlines, ownership, and utilities await official data; all spatial conclusions are conceptual and do not constitute government approval.
