

Building intelligence as the fourth utility · Centennial Jingzhang AI Innovation Belt urban design concept · miaotony

Thesis

A century ago, cities modernized by turning water, power, gas and heat into household utilities. Today, plug intelligence into the city network.

One Duct

iDUCT smart utility tunnel: energy + compute + pipeline chambers; waste heat up-supply; access hatches as show windows

Three Plant-Station

Source Plant · Zhongzhi Park 192.1 ha
Transformer · AI Origin Community 104.3 ha
Metering District · Dazhongsi 72.0 ha

Three Service Halls

Dazhongsi: four-quadrant connection
Wudaokou: talent first stop
Qinghua East Rd W.: campus stitching

Three Ledgers

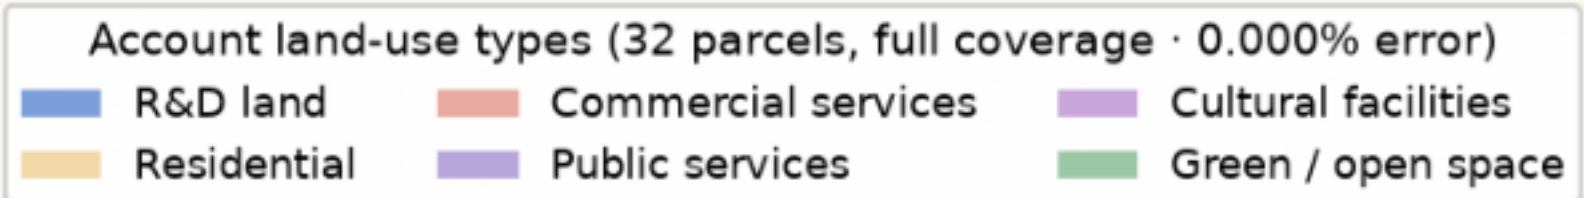

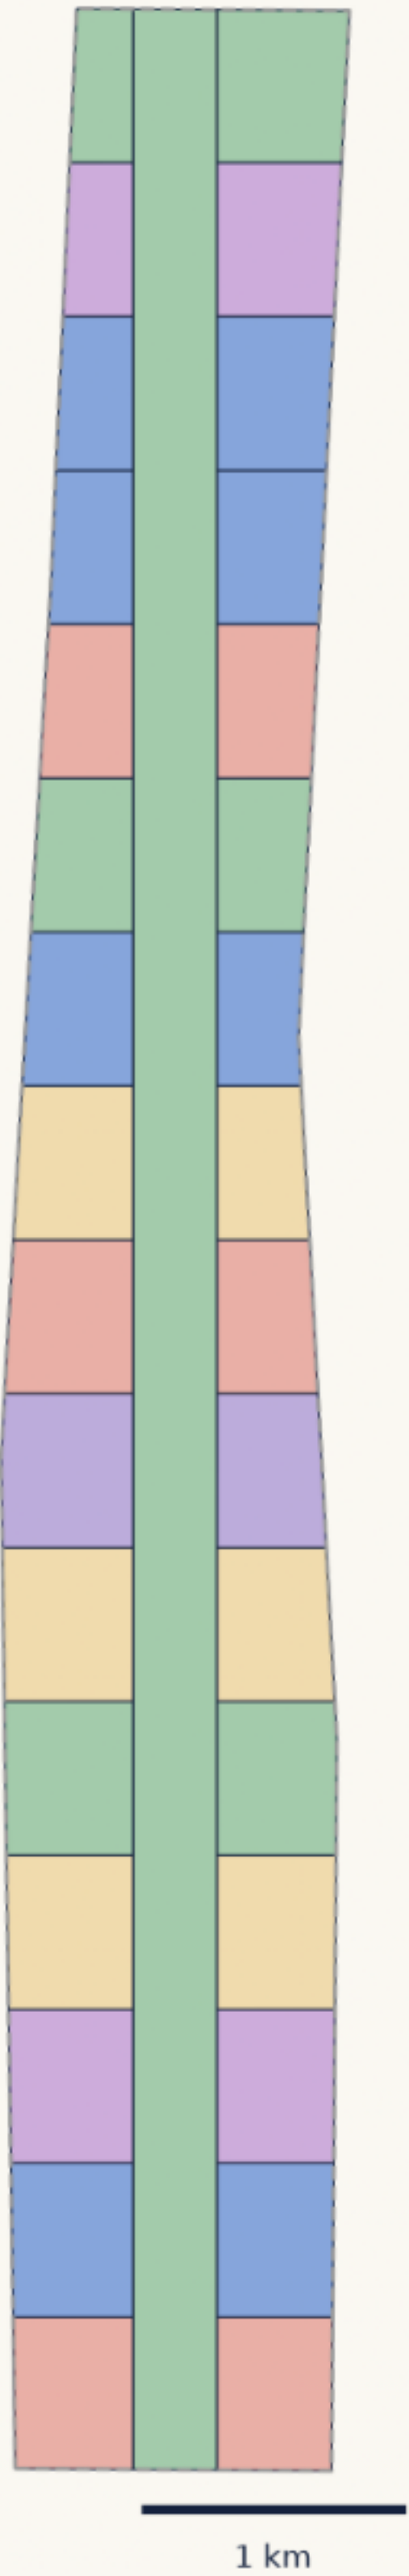

Space · Watt-Token · Data
quarterly public reconciliation
= city financial report

Universal service

Three-tier pricing: affordable free / standard metered / industrial market-price cross-subsidy

Space Ledger · 32 Parcel Accounts

Each renewal parcel = one account: land-use type × demolish/retrofit/retain × rent tier;
official anchor = 1,000,000 m² of usable renewal floor area

JINGZHANG UTILITY · Fig.2 Space Ledger parcel accounts

Provisional boundary, not official red line; statutory plans prevail

Three City Ledgers · Metrics Evidence Chain

SPACE LEDGER			
Total site area	11.413 km²	announced 11.4 km² · dev. 0.1%	known
Key areas total	3.693 km²	announced 3.684 km² · dev. 0.2%	known
Green / open ratio	41.2 %	central green corridor + stitching parks	known
Usable renewal floor area	1,000,000 m²	official public figure (news) · account-based allocation	anchor

WATT-TOKEN LEDGER			
Public space ratio	14.6 %	9 nodes · plant-station plazas + Service Halls	known
Anchor building footprint	5.8 ha	6 conceptual anchors	known
Waste-heat recovery scale	conceptual estimate	heating / snow melt / greenhouse · see assumptions	assume

DATA LEDGER			
FAR	not set	official regulatory conditions missing · no assertion made	unknown
Height limit	not set	official limit missing · recompute upon release	unknown
Data-trading venue	Dazhongsi Metering District	district names data-element circulation mechanism	anchor

Evidence chain: geometry/*.geojson (recomputed in EPSG:4548) → metrics.json → three matrices → self_check.json
All areas based on provisional boundary; quarterly "city financial report" = public reconciliation of the Three Ledgers (proposed mechanism, pending organizer confirmation)

JINGZHANG UTILITY · Fig.5 Three Ledgers metrics evidence chain

Provisional boundary, not official red line; statutory plans prevail

Ten door-to-door smart services (universal-service obligation)

Smart commuting · Neighborhood care · Boundless learning paths · Smart shop books · Job-seeking origin · Repair everything · Green-corridor stewards · Legal beacon · Silver companionship · Emergency line guard

Three-tier pricing: affordable (free, fund-covered) | standard (pay-as-you-go) | industrial (market price, cross-subsidy) — all proposed mechanisms, pending organizer confirmation

11.413 km²

total site area
announced 11.4 · dev. 0.1%

3.693 km²
