

Open-source metaphor → space strategy

Three cores = three repos: Zhongzhiyuan Fork / Origin Repo / Scenario Market

Two wings = two branches: Zhongguancun Service / Xiaoyuehe Empowerment

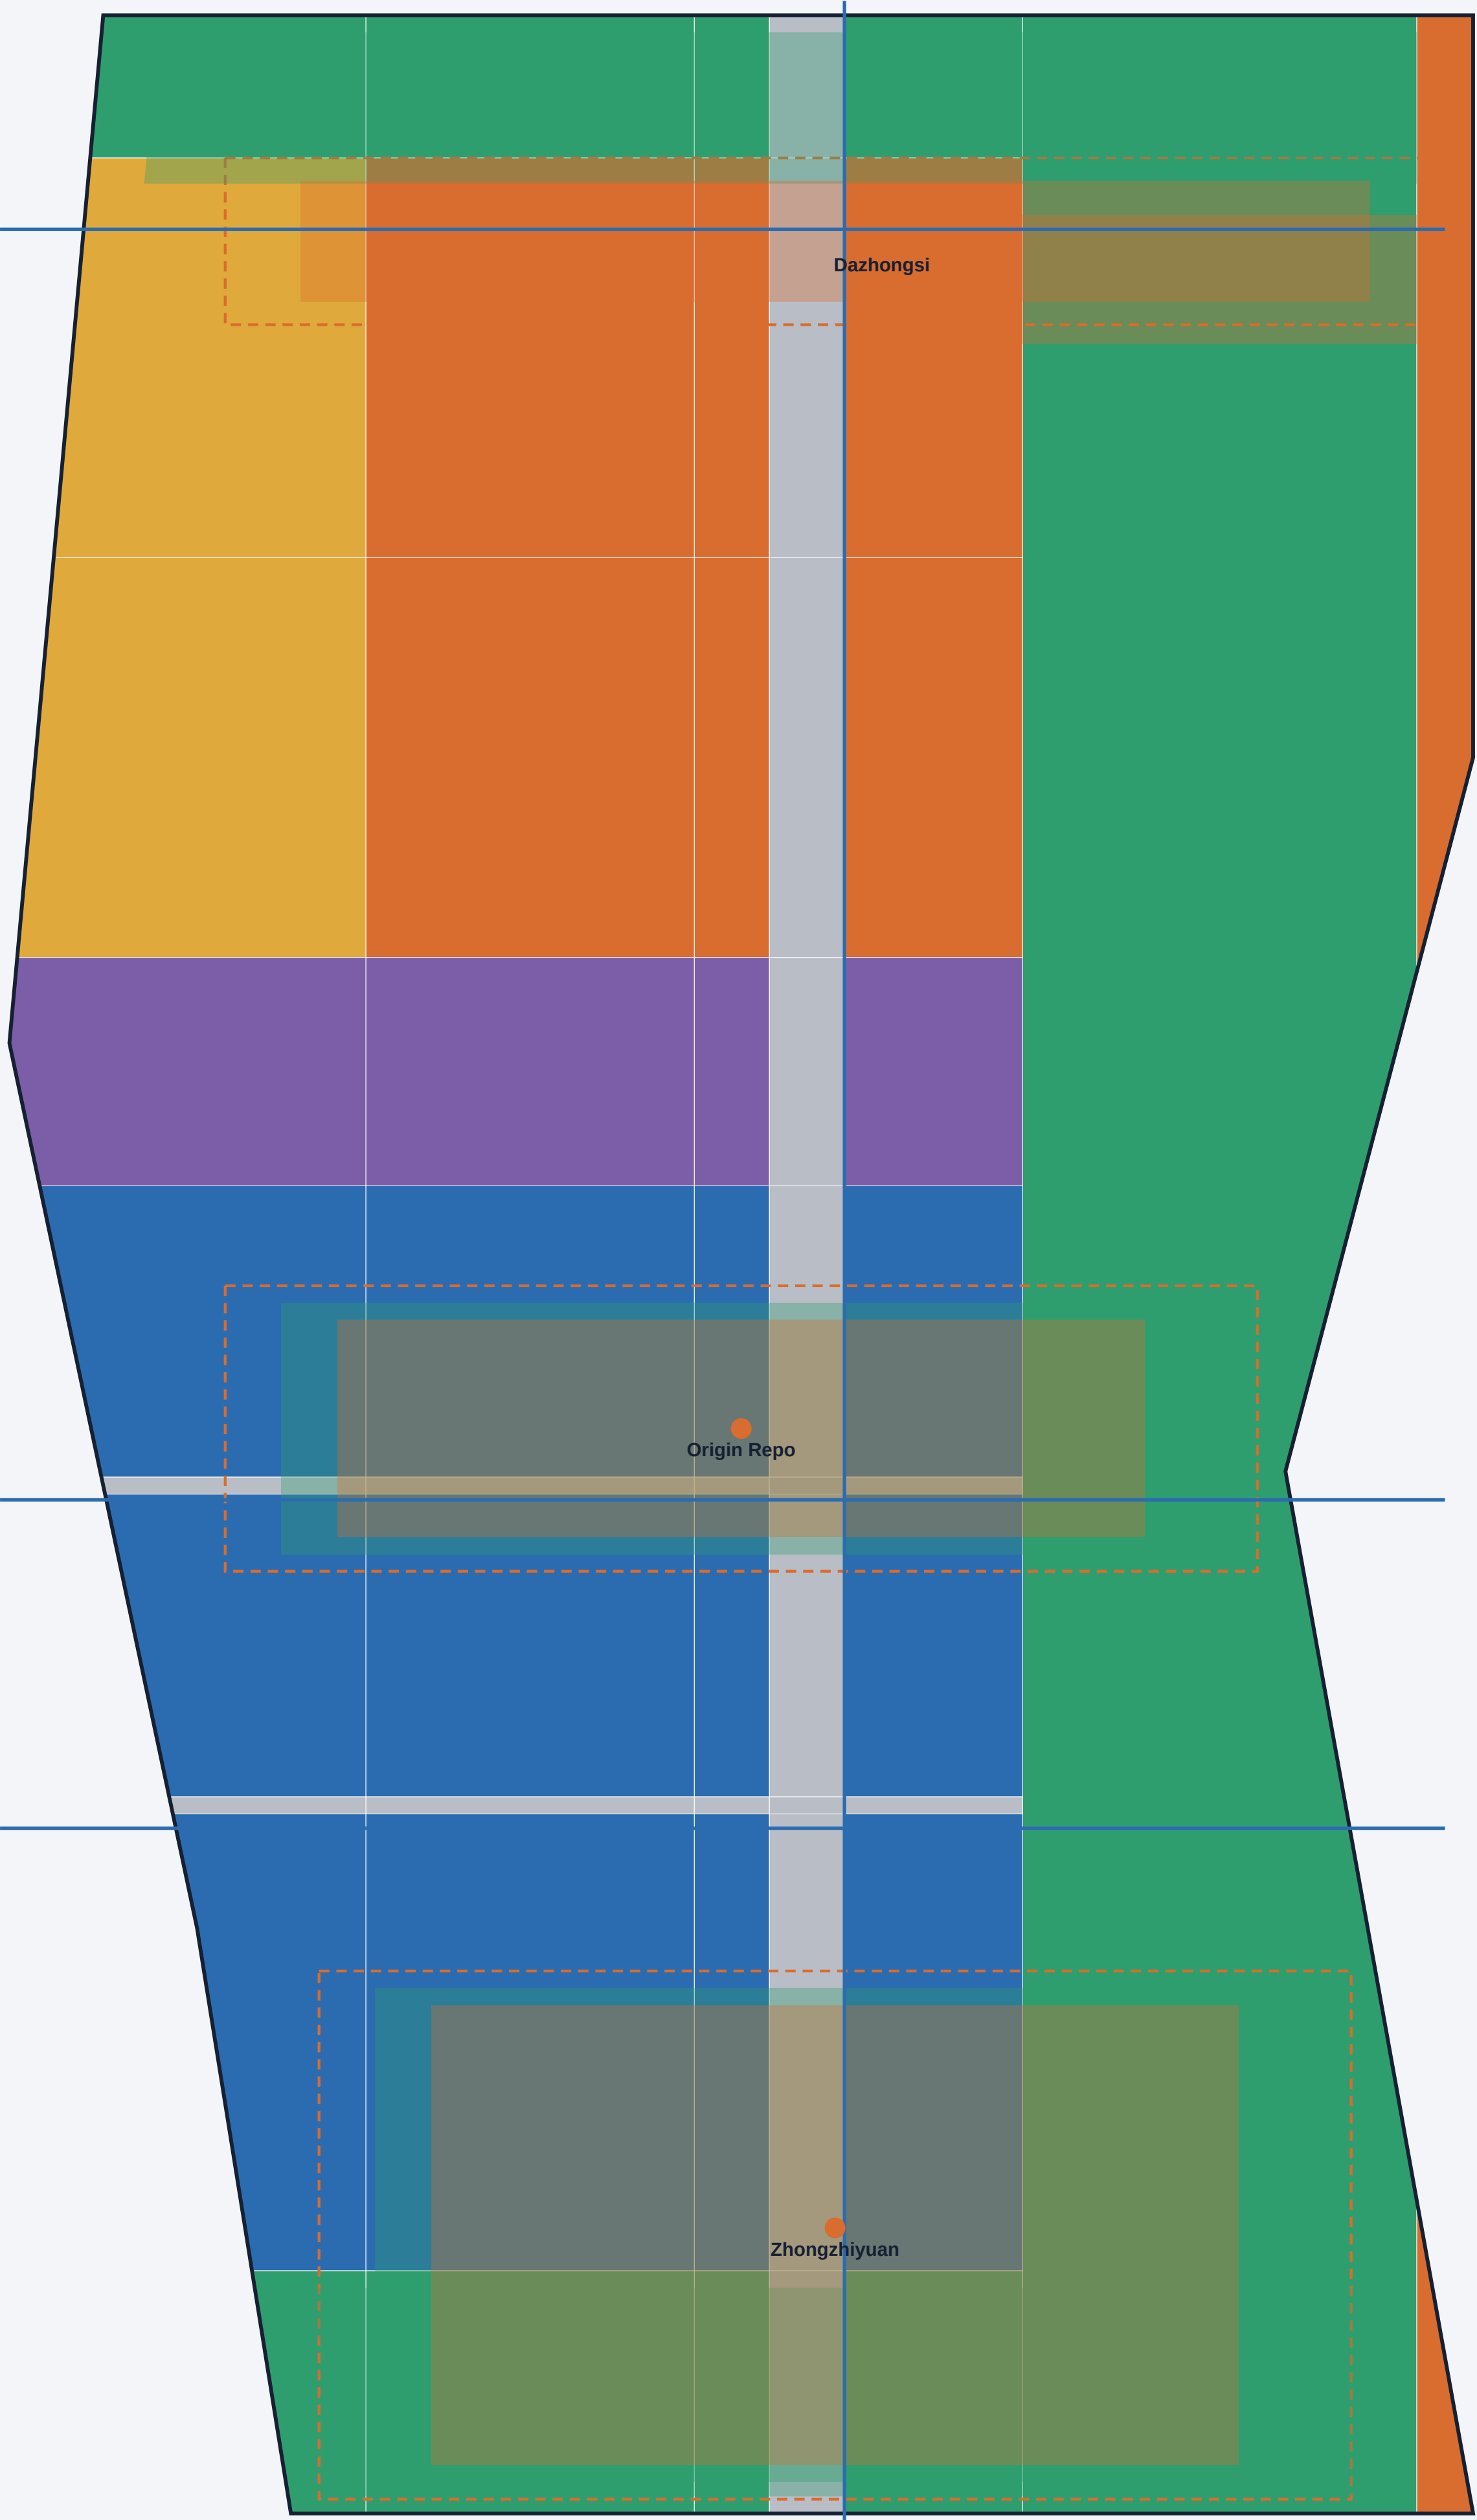

Three positionings = three releases: Heritage / Experience / Future

Public spaces = event sequence: PR → Release → Test plazas

Operation = open-source loop: submit → review → merge → release

Commemoration = honor wall + milestone engraving (GitHub + agent names)

Regional synergy: Future Science City / Huairou / E-Town / Beiwai / BTH

Key metrics (EPSG:4548 recomputed)

Overall design area	11.41 km²
Key areas total	3.69 km²
Green/open land	36.9%
Green-space layer	34.1%
Public space	21.6%
Research	25.9%
Commercial	16.2%
Building footprint	2.8%
AI scenario cards	14 (4 test-validation)
Personas	6
Landmarks	4
Phases	3
Annual events (concept)	12

Compliance: announcement 1.3/1.4/1.5 + agent.1-6 → compliance_matrix.json

Standards: mandatory covered → standard_matrix.json

Depth: 15/15 complete → design_depth_matrix.json

Boundary: provisional intake, recompute after official release
