JING-ZHANG NEAR-MISS LINE

LET THE CITY LEARN BEFORE HARM

ONE SPINE · THREE YARDS · TWO WINGS · TWELVE POSTS
REPORT · TRIAGE · REPRODUCE · CORRECT · RECOVER · PUBLISH

PROVISIONAL GEOMETRY

NOT A REDLINE · FULL RECALCULATION REQUIRED

WHY NEAR MISS

Weak signals often precede urban harm: wrong routes, disconnect, repeated commands, rising human workload, or automated appeal closure. The proposal makes a credible pathway to harm a public learning object instead of promising zero error.

ADJACENT WORK

Proving Line focuses predeployment; After Go-Live on ownership and exit; Choice Line on equivalent AI/non-AI access; Leveling Line on retesting. Near-Miss Line makes reporting, identity separation, public review, recurrence, and change ledgers its product.

SEVEN METHOD CASES

OECD AIM and common reporting framework, NIST AI RMF, EU AI Act 72–73, NASA ASRS, NHS LFPSE, and Singapore AI Verify. Their reporting, testing, and recovery methods are not presented as Beijing law.

JZ//NM

ONE SPINE · THREE YARDS · TWO WINGS · TWELVE POSTS

A public learning infrastructure that turns weak failure signals into report, reconstruction, correction, and recovery

PROVISIONAL GEOMETRY · NOT A REDLINE · FULL RECALCULATION REQUIRED

NEAR-MISS LEARNING LOOP

Source: submission GeoJSON / metrics.json / sources.json · EPSG:4548 recalculation · 2026-08-09

COMMUNITY-DISPLAY-ONLY

PROVISIONAL GEOMETRY · NOT A REDLINE · FULL RECALCULATION REQUIRED

JZ//NM

TOPOLOGY COMPLETE · STATUTORY PRECISION WITHHELD

Seven zones encoded as edge-aligned cells cover the provisional polygon; known means reproducible, not officially controlled

TOPOLOGY CHECK

PROVISIONAL AREA	11.41 km ²
LAND-USE GAP	0.0000
LAND-USE OVERLAP	0.0000
CONCEPT GREEN	18.2%

REMAIN UNKNOWN

- 官方范围 / OFFICIAL AREA
- 容积率与总建面 / FAR + FLOOR AREA
- 高度、密度、退线 / HEIGHT + DENSITY + SETBACK
- 道路红线与市政 / REDLINES + UTILITIES

REPRODUCIBLE NUMBER ≠ AUTHORITATIVE BOUNDARY

THREE YARDS · ONE LEARNING LOOP

Zhongzhiyuan reconstructs and stress-tests | Origin receives reports and appeals | Dazhongsi rehearses recovery and adoption

PROVISIONAL GEOMETRY · NOT A REDLINE · FULL RECALCULATION REQUIRED

SHARED MINIMUM LOOP

HARMFUL OR LEGALLY REPORTABLE MATTERS MOVE TO RESPONSIBLE CHANNELS; PUBLIC ARCHIVE SHOWS REVIEWED, DE-IDENTIFIED SUMMARIES

01 ZHONGZHIYUAN | RECONSTRUCTION + STRESS TEST

SCENARIOS

NM-01 ROBOT · NM-02 EDGE DISCONNECT · NM-03 AGENT INTEROP

SPACE KIT

- ISOLATED TEST COURT
- OBSERVATION + TAKEOVER
- REPLAY WORKSHOP
OWNER + PAUSE + RECOVERY + EXIT

02 AI ORIGIN | PUBLIC REPORTING + APPEAL

SCENARIOS

ACCESSIBLE REPORT · IDENTITY SEPARATION · RECURRENCE SEARCH

SPACE KIT

- HUMAN-SIGNED CLOSURE
- FOUR-PART CORRECTION LOG
- CAREGIVER ASSISTANCE
OWNER + PAUSE + RECOVERY + EXIT

03 DAZHONGSI | RECOVERY DRILL + ADOPTION

SCENARIOS

OFFLINE + DEGRADE · VENDOR EXIT · HUMAN HANDOVER

SPACE KIT

- SIMULATED CONTROL ROOM
- NON-AI COUNTER
- REPAIR WORKSHOP
OWNER + PAUSE + RECOVERY + EXIT

COMMUNITY-DISPLAY-ONLY

NM-01

Low-Speed Robot Crossing

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-02

Edge Disconnect Cell

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-03

Agent Interoperability Sandbox

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-04

Accessible Multilingual Wayfinding

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-05

Transit-to-Slow-Mobility Handover

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-06

Health Resource Navigation

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-07

Jing-Zhang Cultural Guide

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-08

Event Crowd Assistant

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-09

Public-Space Maintenance

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-10

Energy and Thermal Control

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-11

Anonymous Retail Queue

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

NM-12

Appeal and Correction Station

TRIGGER: credible path to harm, no known realized harm.
RESPONSE: human takeover, minimum record, reproduce.
RECOVERY: regression check, non-AI fallback, exit.

JZ//NM

HUMAN-FIRST ROUTES BEFORE AI SERVICES

Walking spine, cycle continuity, wing connectors, transit-link tasks, and recovery network share one human-first rule

PROVISIONAL GEOMETRY · NOT A REDLINE · FULL RECALCULATION REQUIRED

WHEN SIGNALS CONFLICT

- 1 FIELD OBSERVATION + EMERGENCY AUTHORITY
- 2 HUMAN TAKEOVER + PHYSICAL SIGNS
- 3 STATIC ROUTE + NON-AI COUNTER
- 4 AI ASSISTANCE

ROBOTS NEVER OCCUPY THE ONLY ACCESSIBLE ROUTE
AI DOES NOT REPLACE STATUTORY UTILITY OR EMERGENCY DUTIES

COMMUNITY-DISPLAY-ONLY

All figures support intake and concept review only; official polygons trigger full regeneration.

PHASE 1 · 0–18 M

Three temporary report desks; NM-01/02/04 pilots; minimum event schema; identity separation; takeover signs; offline/stop recovery drill; official geometry and surveys. No public pilot without owner, fallback, pause, recovery, minimum data, and exit.

PHASE 2 · 18–36 M

Expand to twelve posts, open three yards, and build a de-identified recurrence index by version, scenario, failure mode, and affected group. Local legal and professional review defines anti-retaliation, vendor logs/exit, escalation, and public correction.

PHASE 3 · AFTER 36 M

Independent review, transfer, and exit. Systems that stay unreviewable, low-value, or too burdensome are downgraded or retired. Leading risks are misplaced provisional geometry and overread governance promises; no approval, investment, construction, or absolute safety is promised.
