

schematic / not parcel geometry

CITY PULL REQUEST

Validation + Open Innovation + Deployment / Global Exchange

Three mission-critical cores form an end-to-end pipeline from research to trusted urban deployment.

schematic / not parcel geometry

VALIDATION CORE
Model safety, embedded AI, robotics and edge-cloud validation.

OPEN INNOVATION CORE
Open source, talent, research translation and civic co-design.

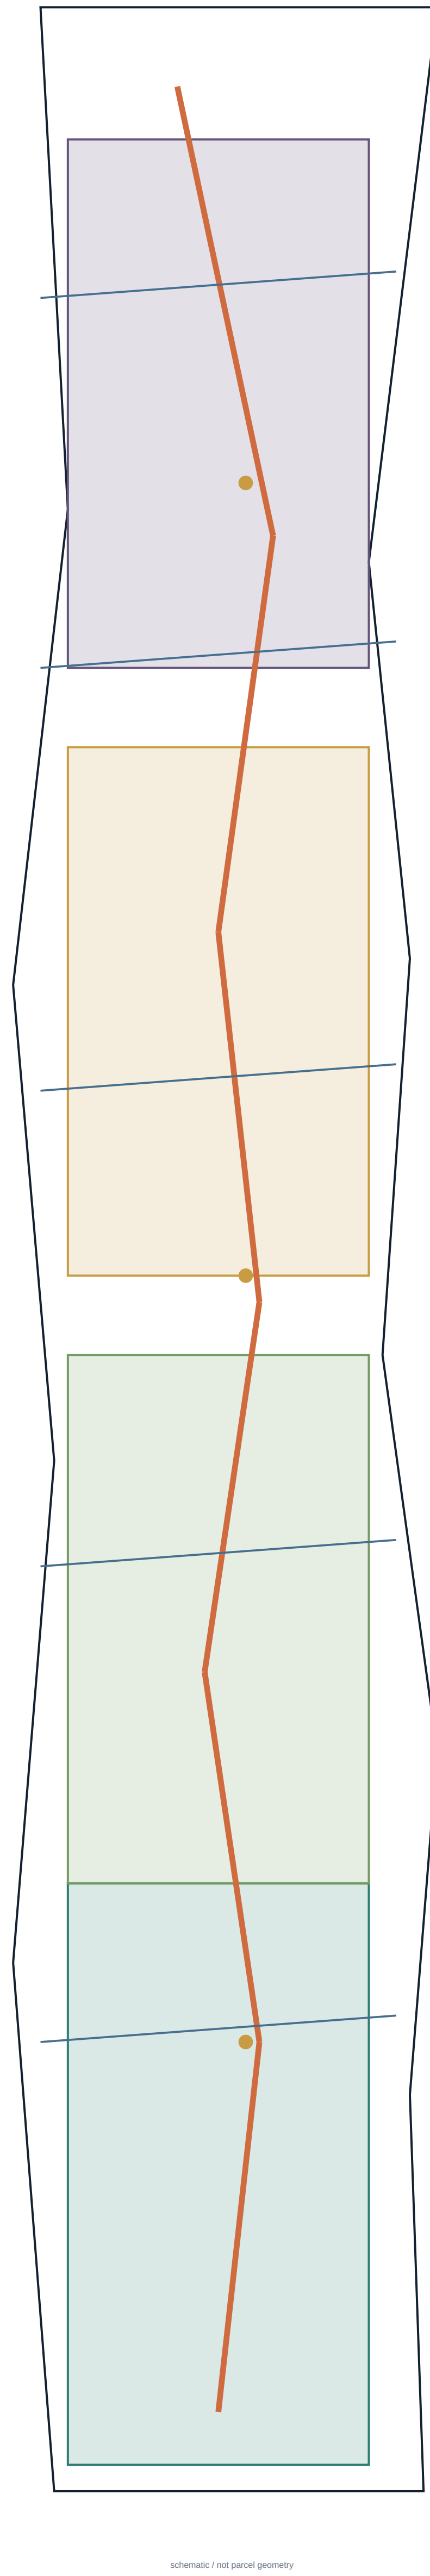

DEPLOYMENT + GLOBAL EXCHANGE CORE
Urban deployment, industry exchange, global events and AI-native services.

12 scenarios | 3 industry validations | 6 personas | 3 pilgrimage + honor nodes

Recognition is project/team based; no passive personal behavior ranking.

Versioned renewal: reversible first, irreversible only after evidence

The package separates known metrics, provisional constraints and unresolved professional controls.

01 / REVERSIBLE

Evidence cleanup, identity, public-space prototypes, bounded scenario pilots.

02 / CONNECT

Replace official geometry, recompute, connect slow mobility and key-area programs

03 / DEEPEN

Institutionalize commons and larger renewal only after engineering and governance review

KNOWN != UNKNOWN

FAR / height / road redline / ownership / utilities / fire / heritage remain pending professional data.
