

schematic / not parcel geometry

CITY PULL REQUEST

AI Commons
Compute + data + testbeds + people + governance become one public interface.

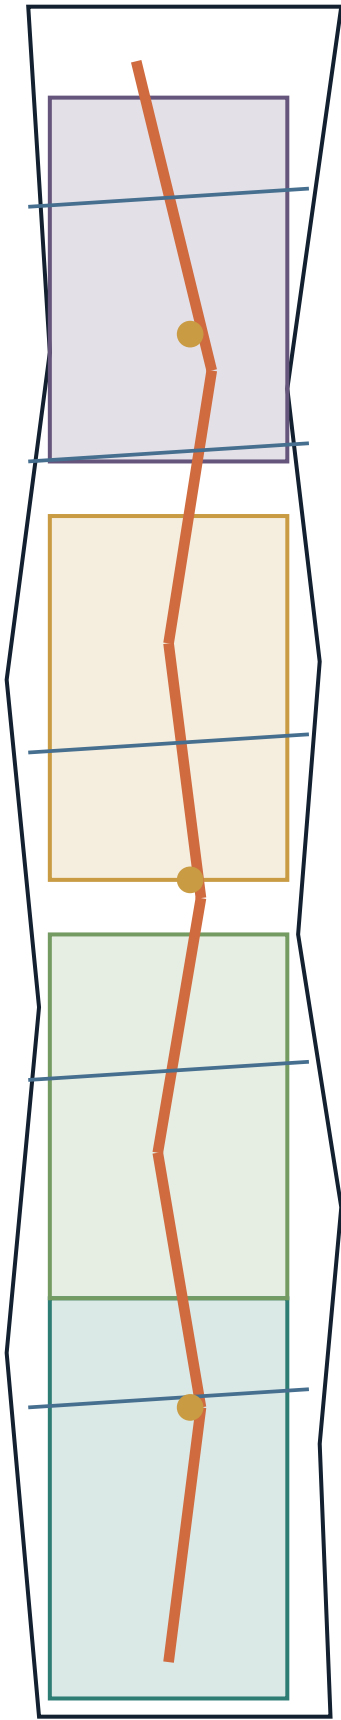

Century Rail Memory
The Jing-Zhang legacy is treated as a civic innovation ethic: build, test, document, share.

Public First
Walking, accessibility, ecology and daily services have priority over exhibition technology.

Reversible by Default
Small pilots include metrics, safety conditions, human review and a rollback path.

From provisional constraints to an auditable design version

Known is recomputed; unknown is never invented

schematic / not parcel geometry

11.413 km2

provisional site area

17.50%

concept green ratio

4.00%

explicit public-space ratio

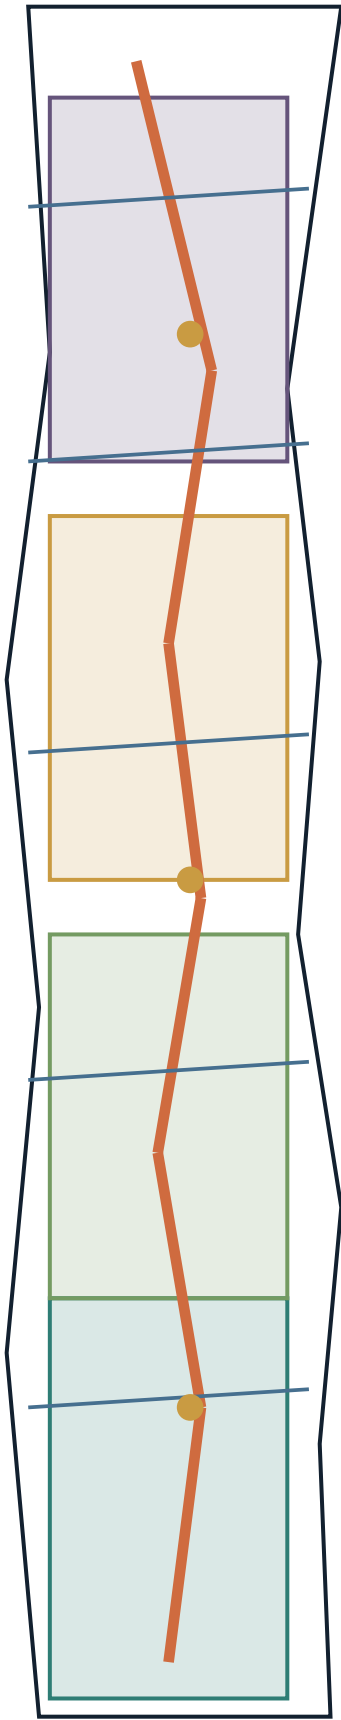

PUBLIC TASK	CONSTRAINT	DESIGN GEOJSON	METRICS	SELF CHECK
official announcement + taskbook	explicit provisional polygons	9 structured spatial layers	EPSG:4548 recomputation	schema + topology + evidence

UNKNOWN IS NOT ZERO

FAR, height, road redlines, ownership, utilities, fire, heritage and existing-building actions remain pending formal data and professional confirmation.

One Kernel Bus, five I/O links, three core processors, two wings

A city-scale operating layer for validation, translation, deployment and governance

schematic / not parcel geometry

KERNEL BUS

The north-south urban AI bus: heritage, public life, evidence and system-wide connectivity.

FIVE I/O LINKS

East-west interfaces that plug research, industry, neighborhoods, transit and public services into the kernel.

THREE CORE PROCESSORS

Validation Core / Open Innovation Core / Deployment & Global Exchange Core each holds a different innovation mechanism.

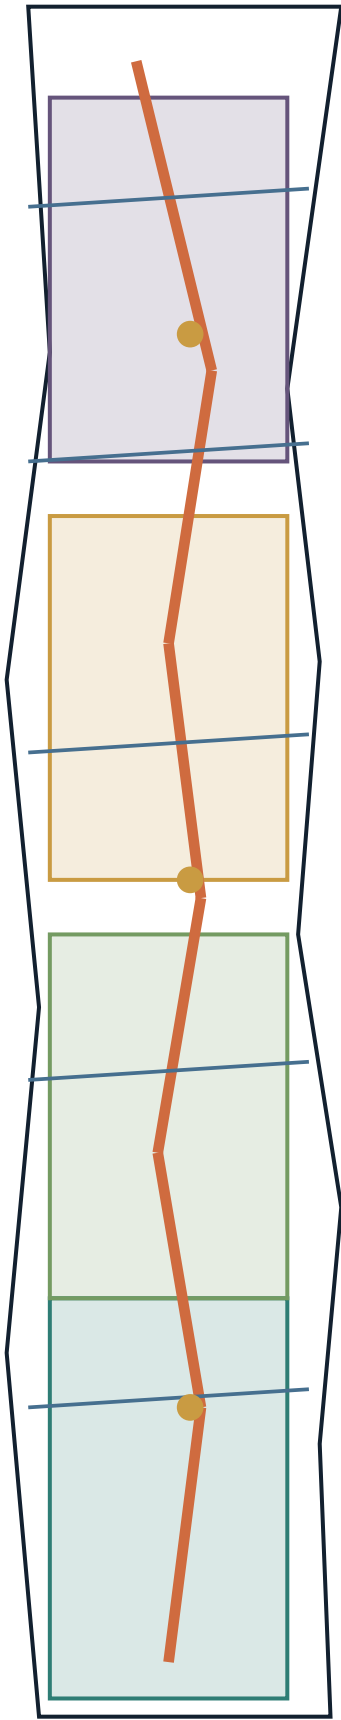

TWO WINGS

Directional knowledge and living interfaces, deliberately not fake polygons.

COMMONS NETWORK

Distributed learning, testing, data, events and contribution-display nodes keep the belt useful on ordinary days.

Three core processors, three mission-critical roles

schematic / not parcel geometry

VALIDATION CORE

model safety / embodied AI / robotics / edge-cloud validation

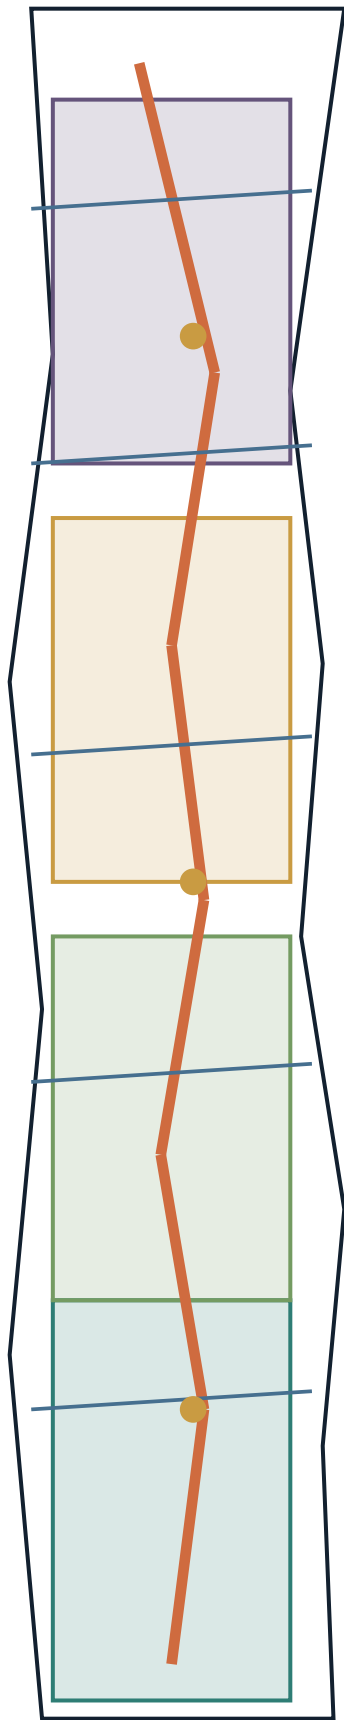

OPEN INNOVATION CORE

open source / talent / research translation / civic co-design

DEPLOYMENT + GLOBAL EXCHANGE CORE

urban deployment / industry exchange / global events / AI-native services

Three honor nodes record knowledge origin, validation work and public merge - not individual tracking.

schematic / not parcel geometry

WALK + CYCLE

Continuous slow links make the three cores legible without requiring technology.

BLUE-GREEN

Shade, permeability, retention and planting are performance infrastructure.

ROBOT TESTING

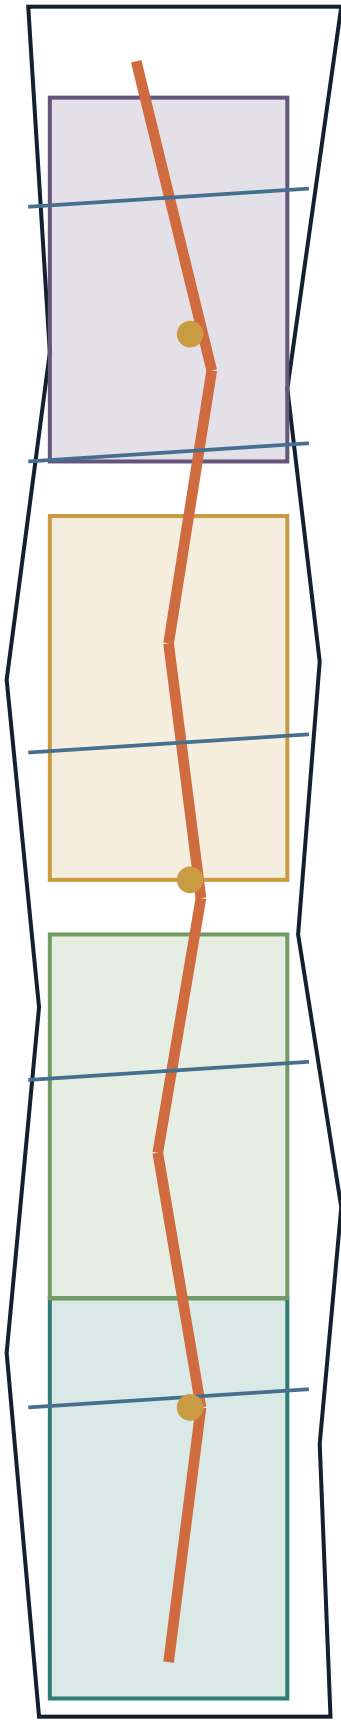

Time-bounded, geofenced, safety-staffed, emergency-stop enabled.

AI WAYFINDING

No default identity recognition; accessible non-AI and human fallback remain.

PUBLIC SPACE AS VALIDATION GROUND

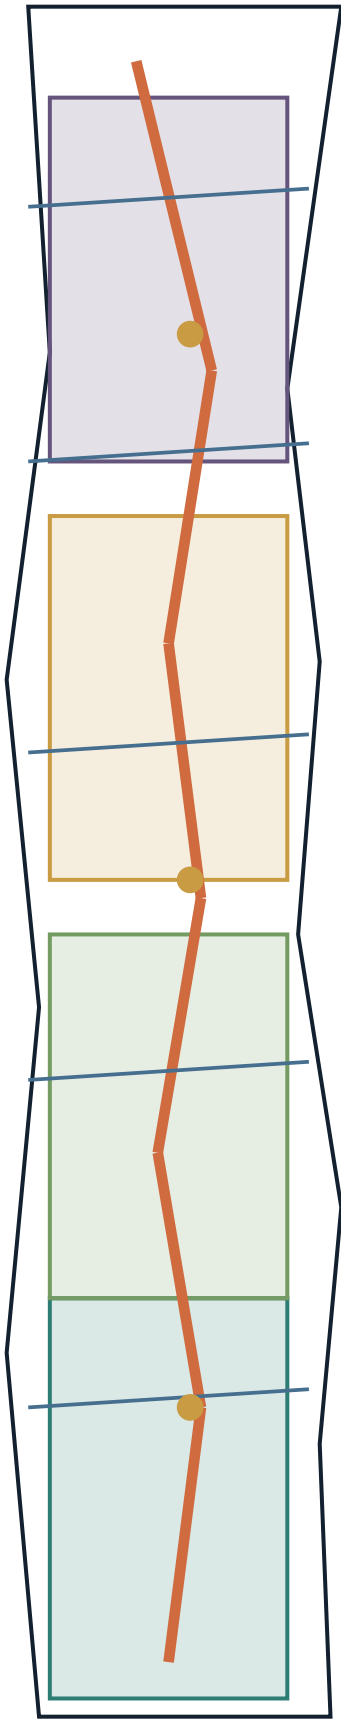

Success means safer, clearer, cooler and more inclusive daily use - not maximum technology exposure.

schematic / not parcel geometry

01 MODEL RED TEAM	02 ROBOT LAST-MILE	03 EDGE AI SERVICE
04 OPEN-SOURCE HALL	05 RAIL TIME NARRATIVE	06 ACCESSIBLE WAYFINDING
07 CIVIC CO-DESIGN AGENT	08 DATA CONSENT COMMONS	09 EVIDENCE WALK
10 MAKER MARKET	11 COMPUTE TRANSPARENCY	12 YOUTH AI PARK

Industry validations = 01 / 02 / 03. Every scenario includes user, data, metric, risk and rollback.

schematic / not parcel geometry

ORIGIN ZERO

Knowledge origin: datasets, methods, open-source releases and learning contributions.

MODEL YARD

Validation process: benchmarks, safety work, prototypes and reproducible test evidence.

MERGE BELL

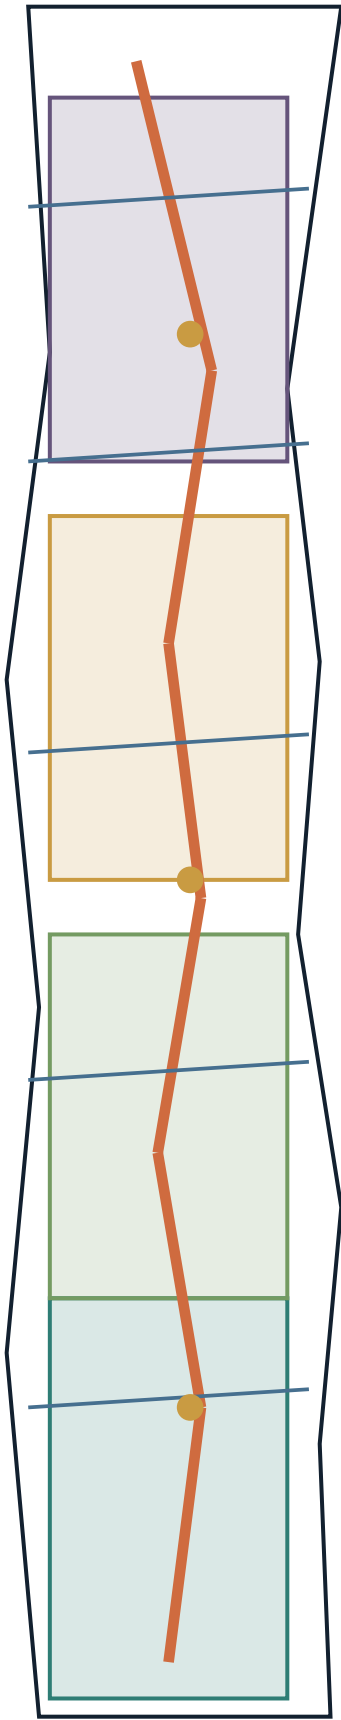

Public merge: community benefit, interoperable tools, urban change and public feedback.

KERNEL BUS WEEK

Issue call -> Urban Eval -> Demo Walk -> public review -> annual changelog.

HONOR WITHOUT SURVEILLANCE

Recognition defaults to projects and teams. The system must not become a behavior-ranking infrastructure.

schematic / not parcel geometry

PHASE 1 / REVERSIBLE

identity, governance templates, events, lightweight commons, bounded pilots

PHASE 2 / CONNECT

official-data recalculation, slow links, key-area renewal, expanded validations

PHASE 3 / INSTITUTIONALIZE

commons operations, international network, deeper capital works after review

Rule: no statutory claim, demolition conclusion, engineering promise or investment commitment is inferred from provisional data.
