

Overview: one Public Choice Line and three Headroom Stations

HEADROOM = KEEPING CHOICE

Treat AI pilots as reversible civic services:
digital, physical and staffed channels coexist.

- Public Choice Line: walking, cycling and staffed services
- Testing headroom: prove before expanding
- Daily-life headroom: life without a device
- Transfer headroom: verify station and industry relations first

PROVISIONAL BOUNDARY / NOT A REDLINE

Three Headroom Stations

□□□ / **Zhongzhiyuan**

Testing headroom: open proving, manual takeover and low-carbon shadow tests.

AI □□□□ / **AI Origin Community**

Daily-life headroom: open source, skills, night rest and staffed accessibility.

□□□ / **Dazhongsi**

Transfer headroom: Choice Clock, multilingual staff and station verification.

Core metrics and evidence: known, unknown and pending

11,412,825 m ² provisional site area	16.4% concept green ratio	2.2% concept public-space ratio
12 scenario cards	100% human fallback coverage	UNKNOWN resident-demand validation

G0 → G1 → G2

- G0 official geometry, field baseline, accountable role, public input and fallback
- G1 small shadow pilot with permission, insurance, accessibility and stop control
- G2 annual performance, equity, complaint, maintenance and budget review; otherwise expire

Opposition ledger: #1061 triggered plain-language contracts; #846/#1029 keep geometry uncertainty visible.

UNKNOWN is not a blank; it is a next responsibility
