

LIGHT ENOUGH JING-ZHANG

An AI night commons without over-lighting or over-sensing

Three Night Prototypes

Zhongzhiyuan validates industry; AI Origin co-evaluates; Dazhongsi stewards night commerce.

Metrics and Evidence Chain

The first three are controlled industry tests; all scenarios are pausable and human-overridable.

Baseline → reversible pilots → three-zone linkage → maintained standards.

Known, Unknown and Evidence Chain

Only recomputable values are shown; lighting parameters await survey

12 □□ / scenarios

3 □□□□ / industry tests

7 □□ / personas

6 □□□ / light gates

4 □□□□ / light zones

3 □□ / landmarks

PENDING / FIELD SURVEY

Illuminance · luminance · glare · CCT · annual energy · ecology · satisfaction

Public sources → provisional geometry → design layers → metrics → figures/PDF/HTML → checks

PROVISIONAL GEOMETRY · CONCEPTUAL RECOMMENDATION · v1.0
