

CROSSING×INTERFACE

Jingzhang AI Suture Belt Urban Design · A0 Boards · Board 1/3 Overall Structure & Land Use

■ CROSSING×INTERFACE: turn centennial crossings into urban interfaces

■ One axis · twelve crossings · three interfaces · two wings

■ 75 cells: research+industry ~30% / housing ~25% / green ~15% (concept)

■ 39 concept footprints: retain 30% · renovate 30% · new 40% (intent)

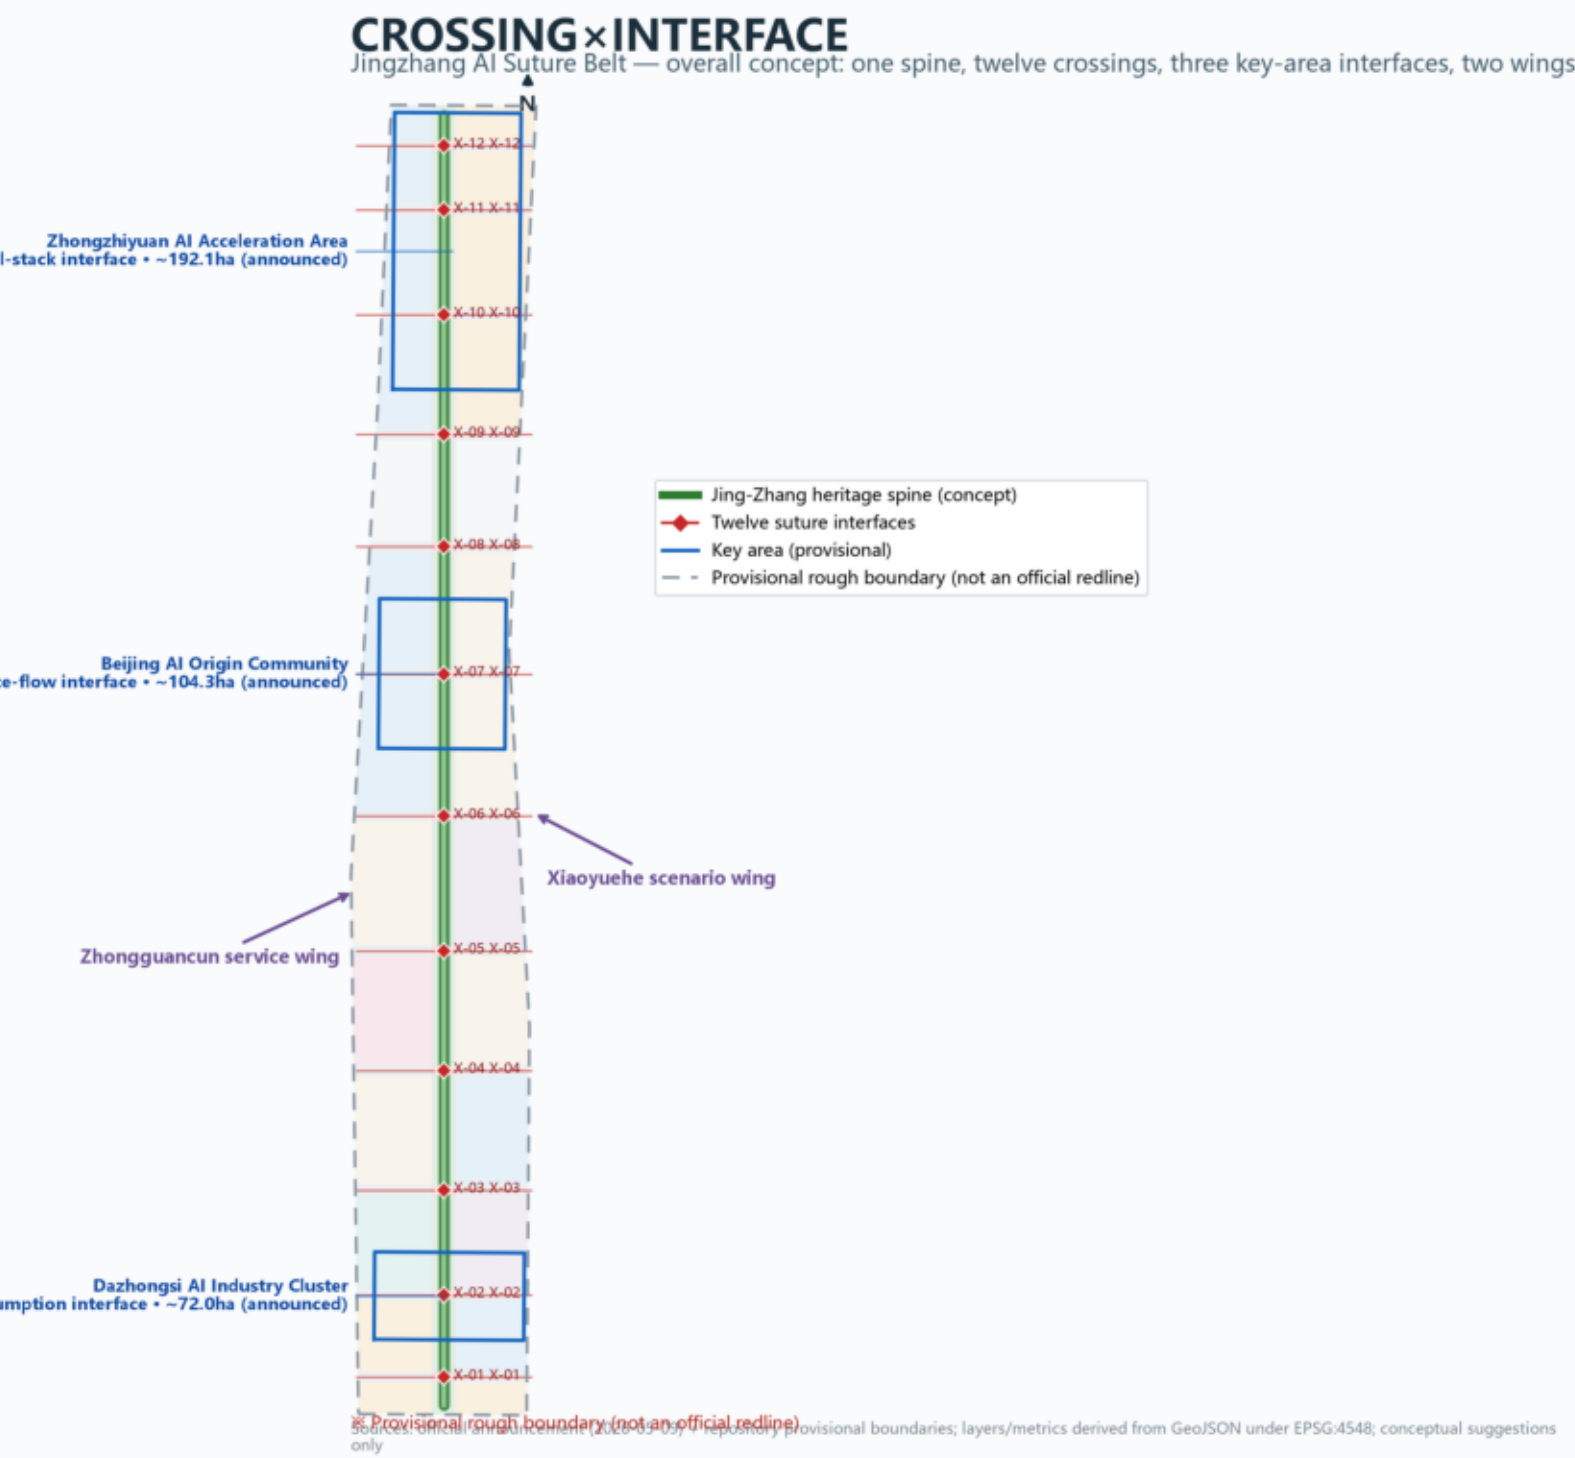

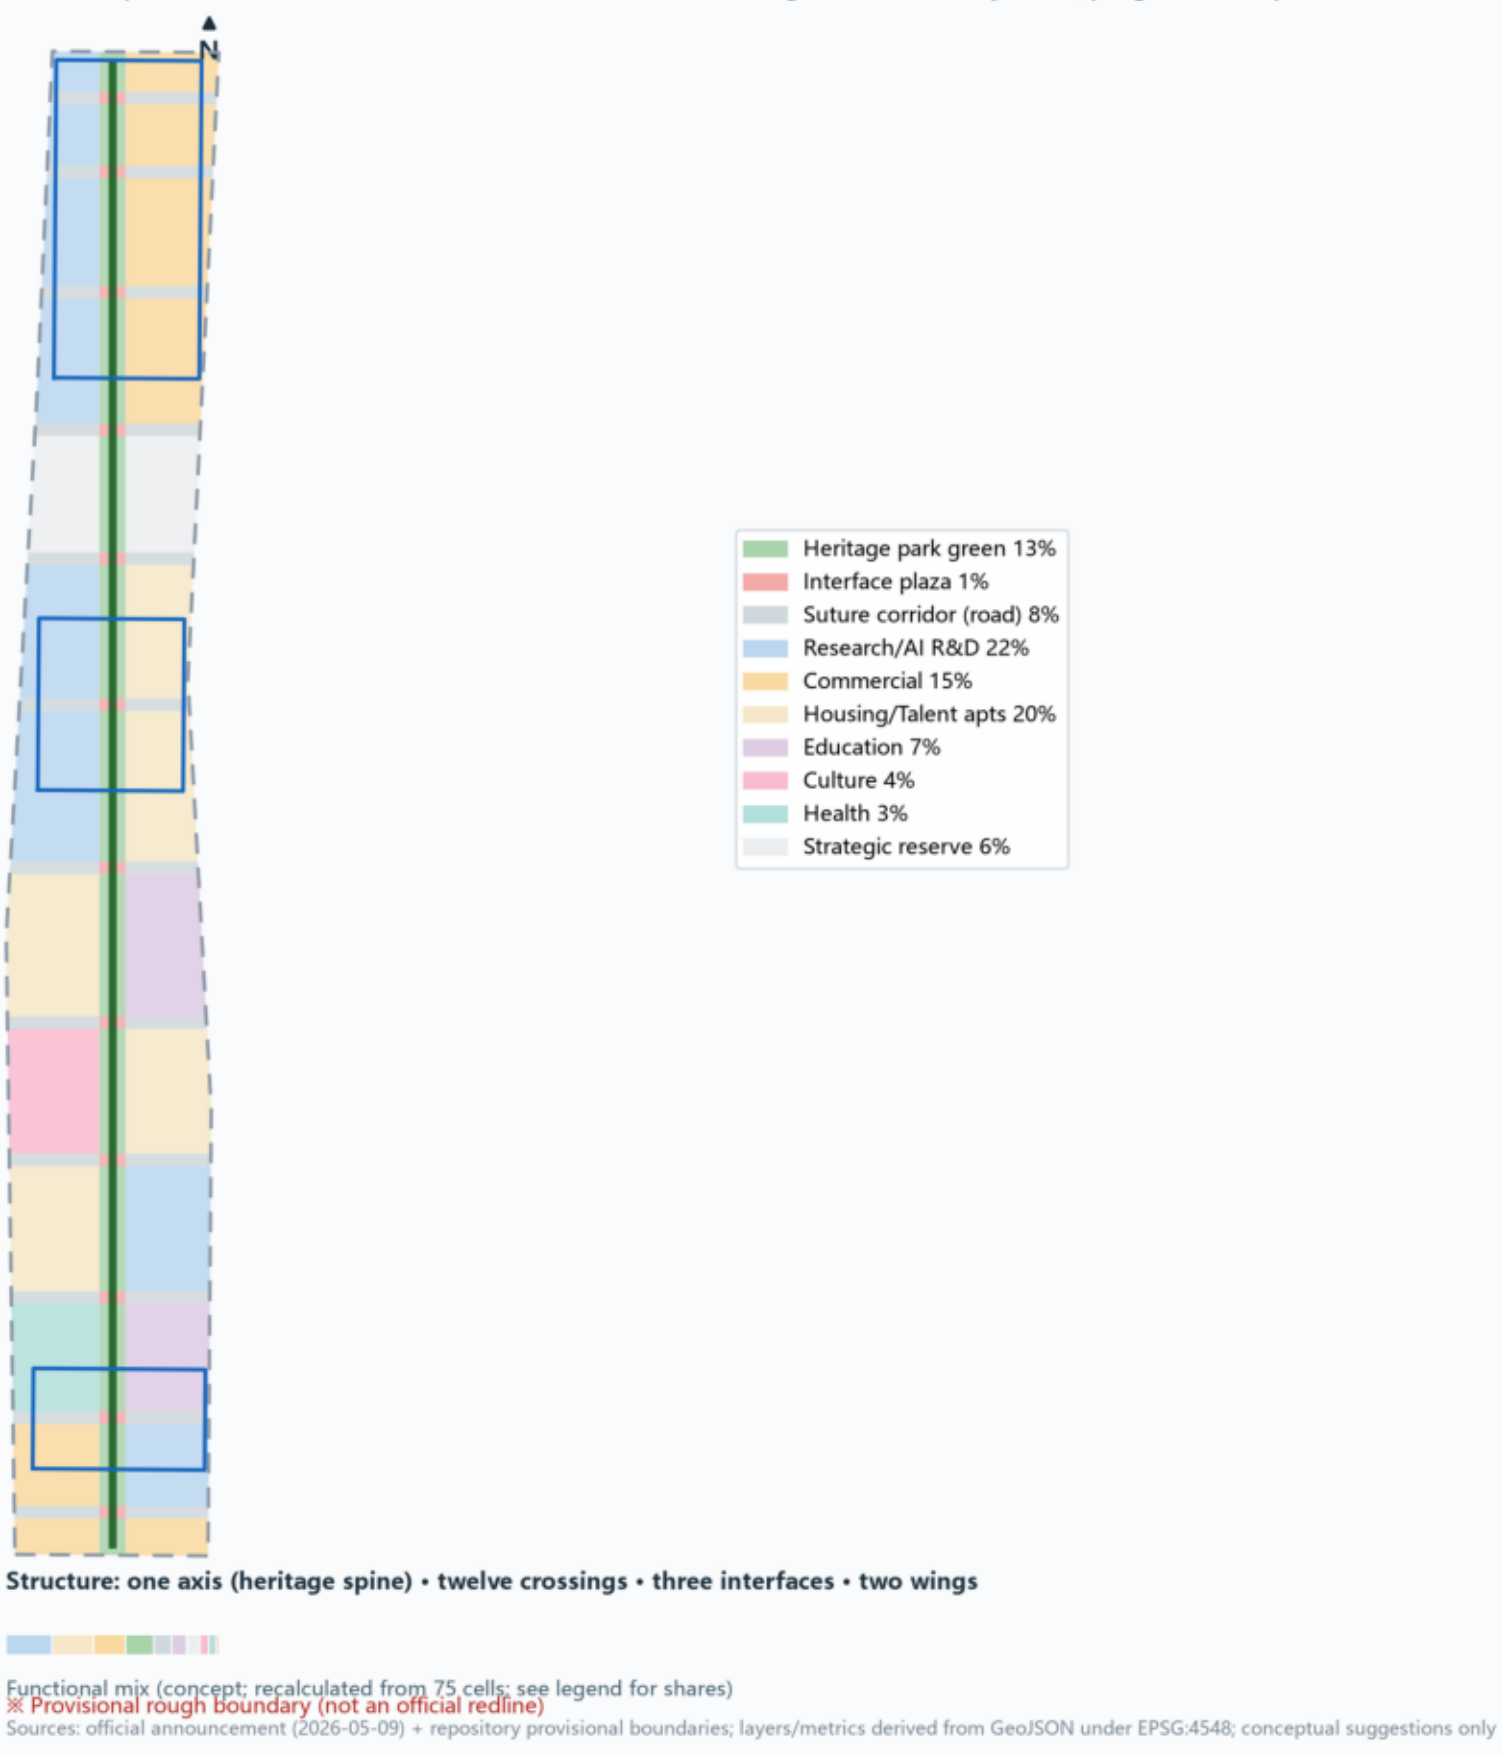

■ Renewal: spine edges / campus fusion / industry zones / community repair

■ Scopes: 43.6km² research → 11.4km² overall → 368.4ha key areas

■ Boundaries: provisional; full-chain recalculation after official release

Land-Use Structure and Functional Organization

Three scopes cascade: 43.6km² research → 11.4km² overall design → 368.4ha key areas, programmatic partition with shared edges

CROSSING×INTERFACE

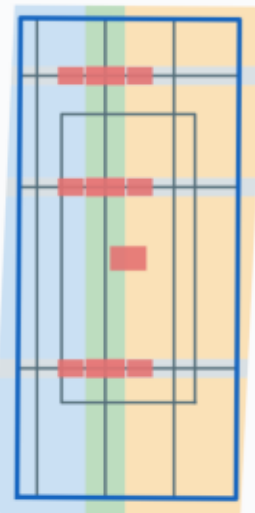

Jingzhang AI Suture Belt Urban Design · A0 Boards · Board 2/3 Mobility, Blue-Green & Key Areas

- Two flank roads + 12 suture corridors + 9.7km greenway + 3 transit links (concept)
- Blue-green: one axis, two concept link belts, twelve crossings
- Green 13.0% · public space 3.7% (concept recalculation)
- Zhongzhiyuan = full-stack interface: garden ring + honor wall + testbed
- Origin Community = source-flow: Wudaokou interface + Kilometer-Zero + conversion blocks
- Dazhongsi = consumption: four-quadrant ring + Mingzhong plaza + first-store corridor
- Landmark concepts: memory hall / marker / honor wall / beacon

Detailed Design Index of the Three Key Areas

North to south: full-stack → source-flow → consumption interfaces; extents unpublished, provisional rectangles only; directional concepts

北 Zhongzhiyuan AI Acceleration Area

Zhongzhiyuan · Full-stack Interface

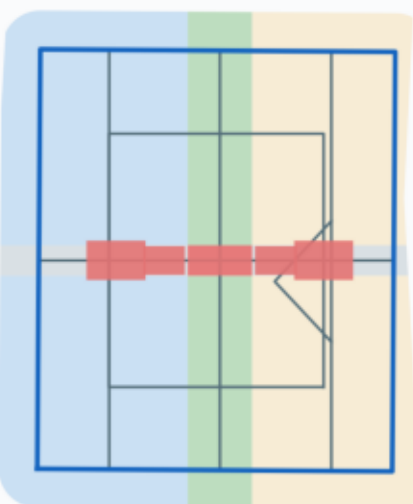

- Role: full-stack self-reliance system & AI-governance voice

- Structure: garden ring + Qinghe corridor + honor-wall plaza

- Levers: full-stack testbed, benchmark scenario, industry gallery

- Risk: graded data-compliance opening, human review (concept)

Beijing AI Origin Community

AI Origin Community · Source-flow Interface

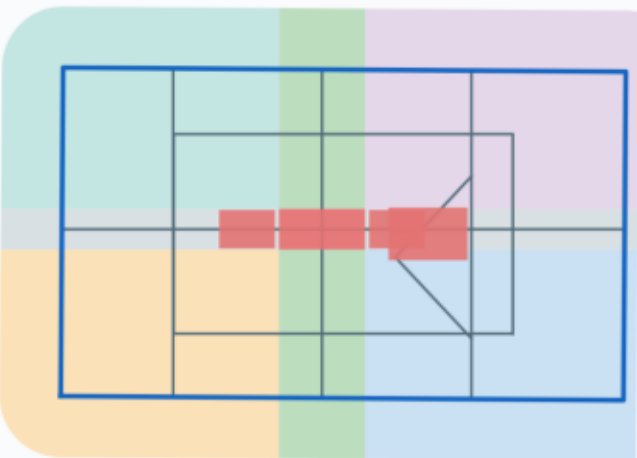

- Role: university invention & conversion community

- Structure: Wudaokou origin interface + Kilometer-Zero plaza + loop

- Levers: conversion blocks, talent-apartment mix, edu scenarios

- Risk: complex ownership; low-disturbance renewal (concept)

Dazhongsi AI Industry Cluster

Dazhongsi · Consumption Interface

- Role: AI-native business & urban consumption frontage

- Structure: four-quadrant ring + Mingzhong plaza + first-store corridor

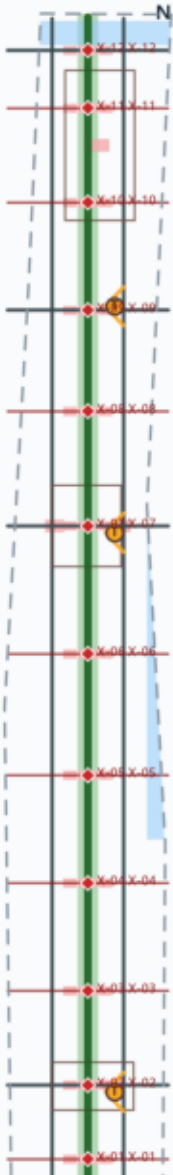

- Levers: transit integration, city balcony, agent debuts

- Risk: peak crowds & parking need assessment (concept)

⚠ Provisional rough boundary (not an official redline)
Sources: official announcement (2024-05-05) + repository provisional boundaries; layers/metrics derived from GeoJSON under EPSG:4546; conceptual suggestions only

Mobility & Slow Traffic × Blue-Green Public System

Two flank roads + 12 suture corridors + 9.7km greenway + 3 transit links + 12 suture corridors + 9.7km greenway + 3 transit links + 12 suture corridors + 9.7km greenway + 3 transit links

- Central greenway (heritage park)
- Secondary roads
- Branch suture corridors
- Transit links (T)
- Key area pedestrian rings
- Heritage park green
- Interface to pocket plazas
- Blue-green link belts (concept)

⚠ Provisional rough boundary (not an official redline)
Sources: official announcement (2024-05-05) + repository provisional boundaries; layers/metrics derived from GeoJSON under EPSG:4546; conceptual suggestions only

CROSSING×INTERFACE

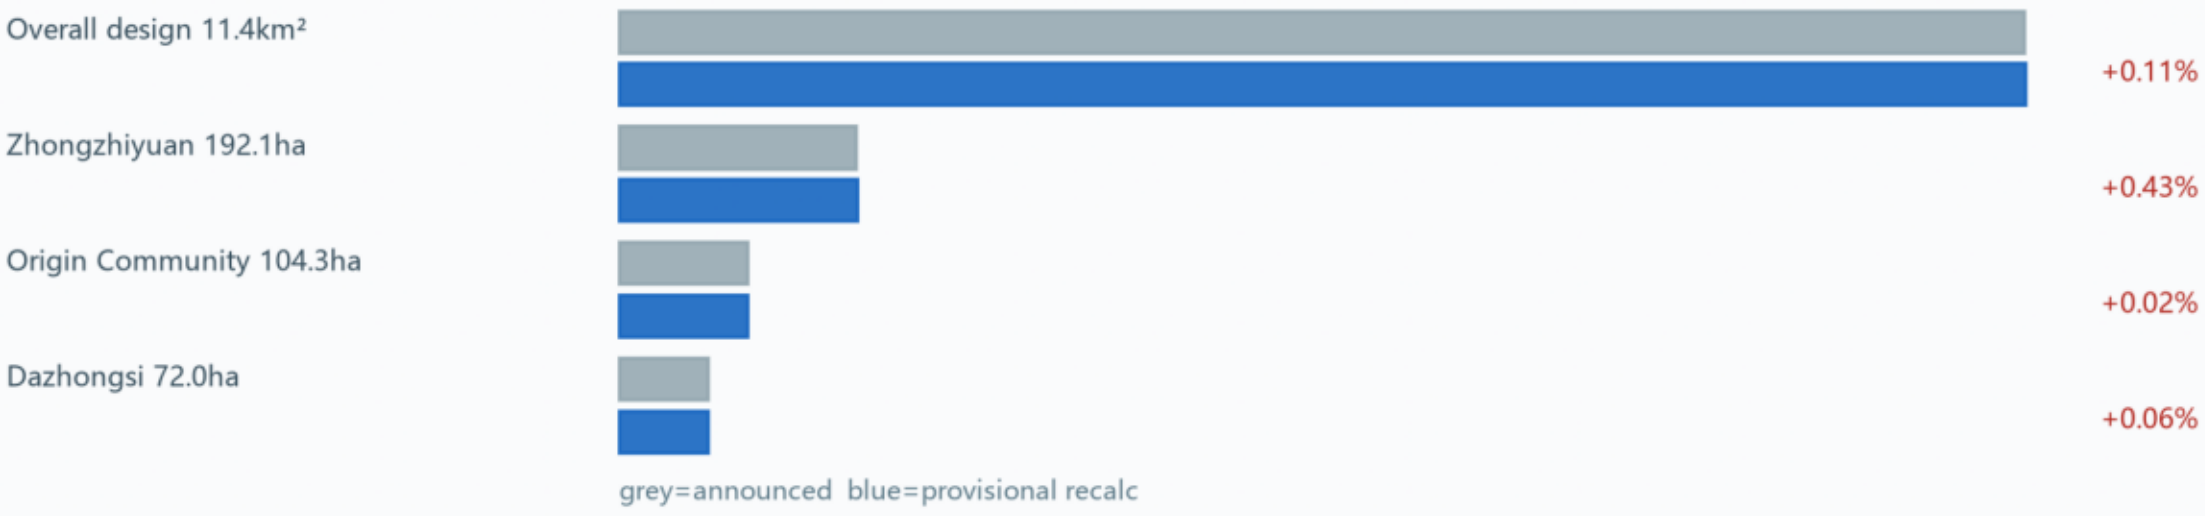

Jingzhang AI Suture Belt Urban Design · A0 Boards · Board 3/3 Scenarios, Operation & Metrics

Core Metric Recalculation and Evidence Chain

All known metrics recalculated from GeoJSON under EPSG:4548; unknowns await official sources; organizer data gaps do not block content scoring

Overall design area (prov.) 1,141.3 ×10⁴ sqm announced ~11.4km² · dev +0.11%	Green ratio (concept) 13.0% green_space/site	Public-space ratio 3.7% public_space/site	Concept footprints 11.2 ×10⁴ sqm 39 concept masses
Suture interfaces 12 twelve crossings · 14.4km	Central greenway 9.7 km north-south spine	AI scenario cards 12 incl. 3 industrial test scenarios	Landmark concepts 4 hall / marker / honor wall / beacon

Area recalculation check (announced vs provisional recalc)

Evidence chain: official announcement → provisional boundary → design layers (GeoJSON) → metric recalculation (EPSG:4548) → figures/visuals → four-tier self-check

Pending regulatory controls (honestly marked unknown — no conclusions) · floor_area_ratio — needs approved regulatory plan · building_height_control_m — needs plan/aviation/heritage limits · building_density_control — needs approved regulatory plan · talent_capacity_estimate — needs baseline + controls	Self-check status ✓ Deterministic: PASS ✓ Visual packaging: PASS ✓ Boundary disclosure: provisional labeled ✓ Spatial topology: PASS ✓ Professional evidence: PASS ✓ Wording audit: concept-only
Task coverage: 17 announcement items (1.3/1.4/1.5) + 6 taskbook items (agent.1–6) = 23 fully registered	

Sources: official announcement (2026-05-09) + repository provisional boundaries; layers/metrics derived from GeoJSON under EPSG:4548; conceptual suggestions only

12 AI scenario cards (★ = industrial test):

01 slow-mobility · 02 heritage guide · 03 enterprise copilot · 04 health navigation

05 safety review · 06 AV shuttle★ · 07 robot delivery★ · 08 model benchmark★

09 double-teacher · 10 honor wall tour · 11 low-carbon · 12 multilingual service

Operation: Conference / Maker Festival / Scenario Challenge / Annual Honor List

Phasing: near = southern six crossings · mid = Origin Community · long = Zhongzhiyuan + reserves

Metrics & compliance:

· Overall design 1,141.3×10⁴sqm (provisional +0.11%)

· Green 13.0% · public space 3.7%

· unknown: FAR / height / density / talent capacity — pending official sources

· Coverage: 17 announcement + 6 taskbook = 23 registered

· Four-tier self-check all PASS (deterministic/spatial/visual/professional)

Bottom line: concept-only wording audited; no invented promises; testing ≠ approved operation

Sources: all officially public or cleared; no personal data or unauthorized material
