P1 FOUR-QUADRANT PATCH

access + option comparison

STATUS

START-READY · NOT AUTHORISED · FIELD OUTCOMES UNKNOWN

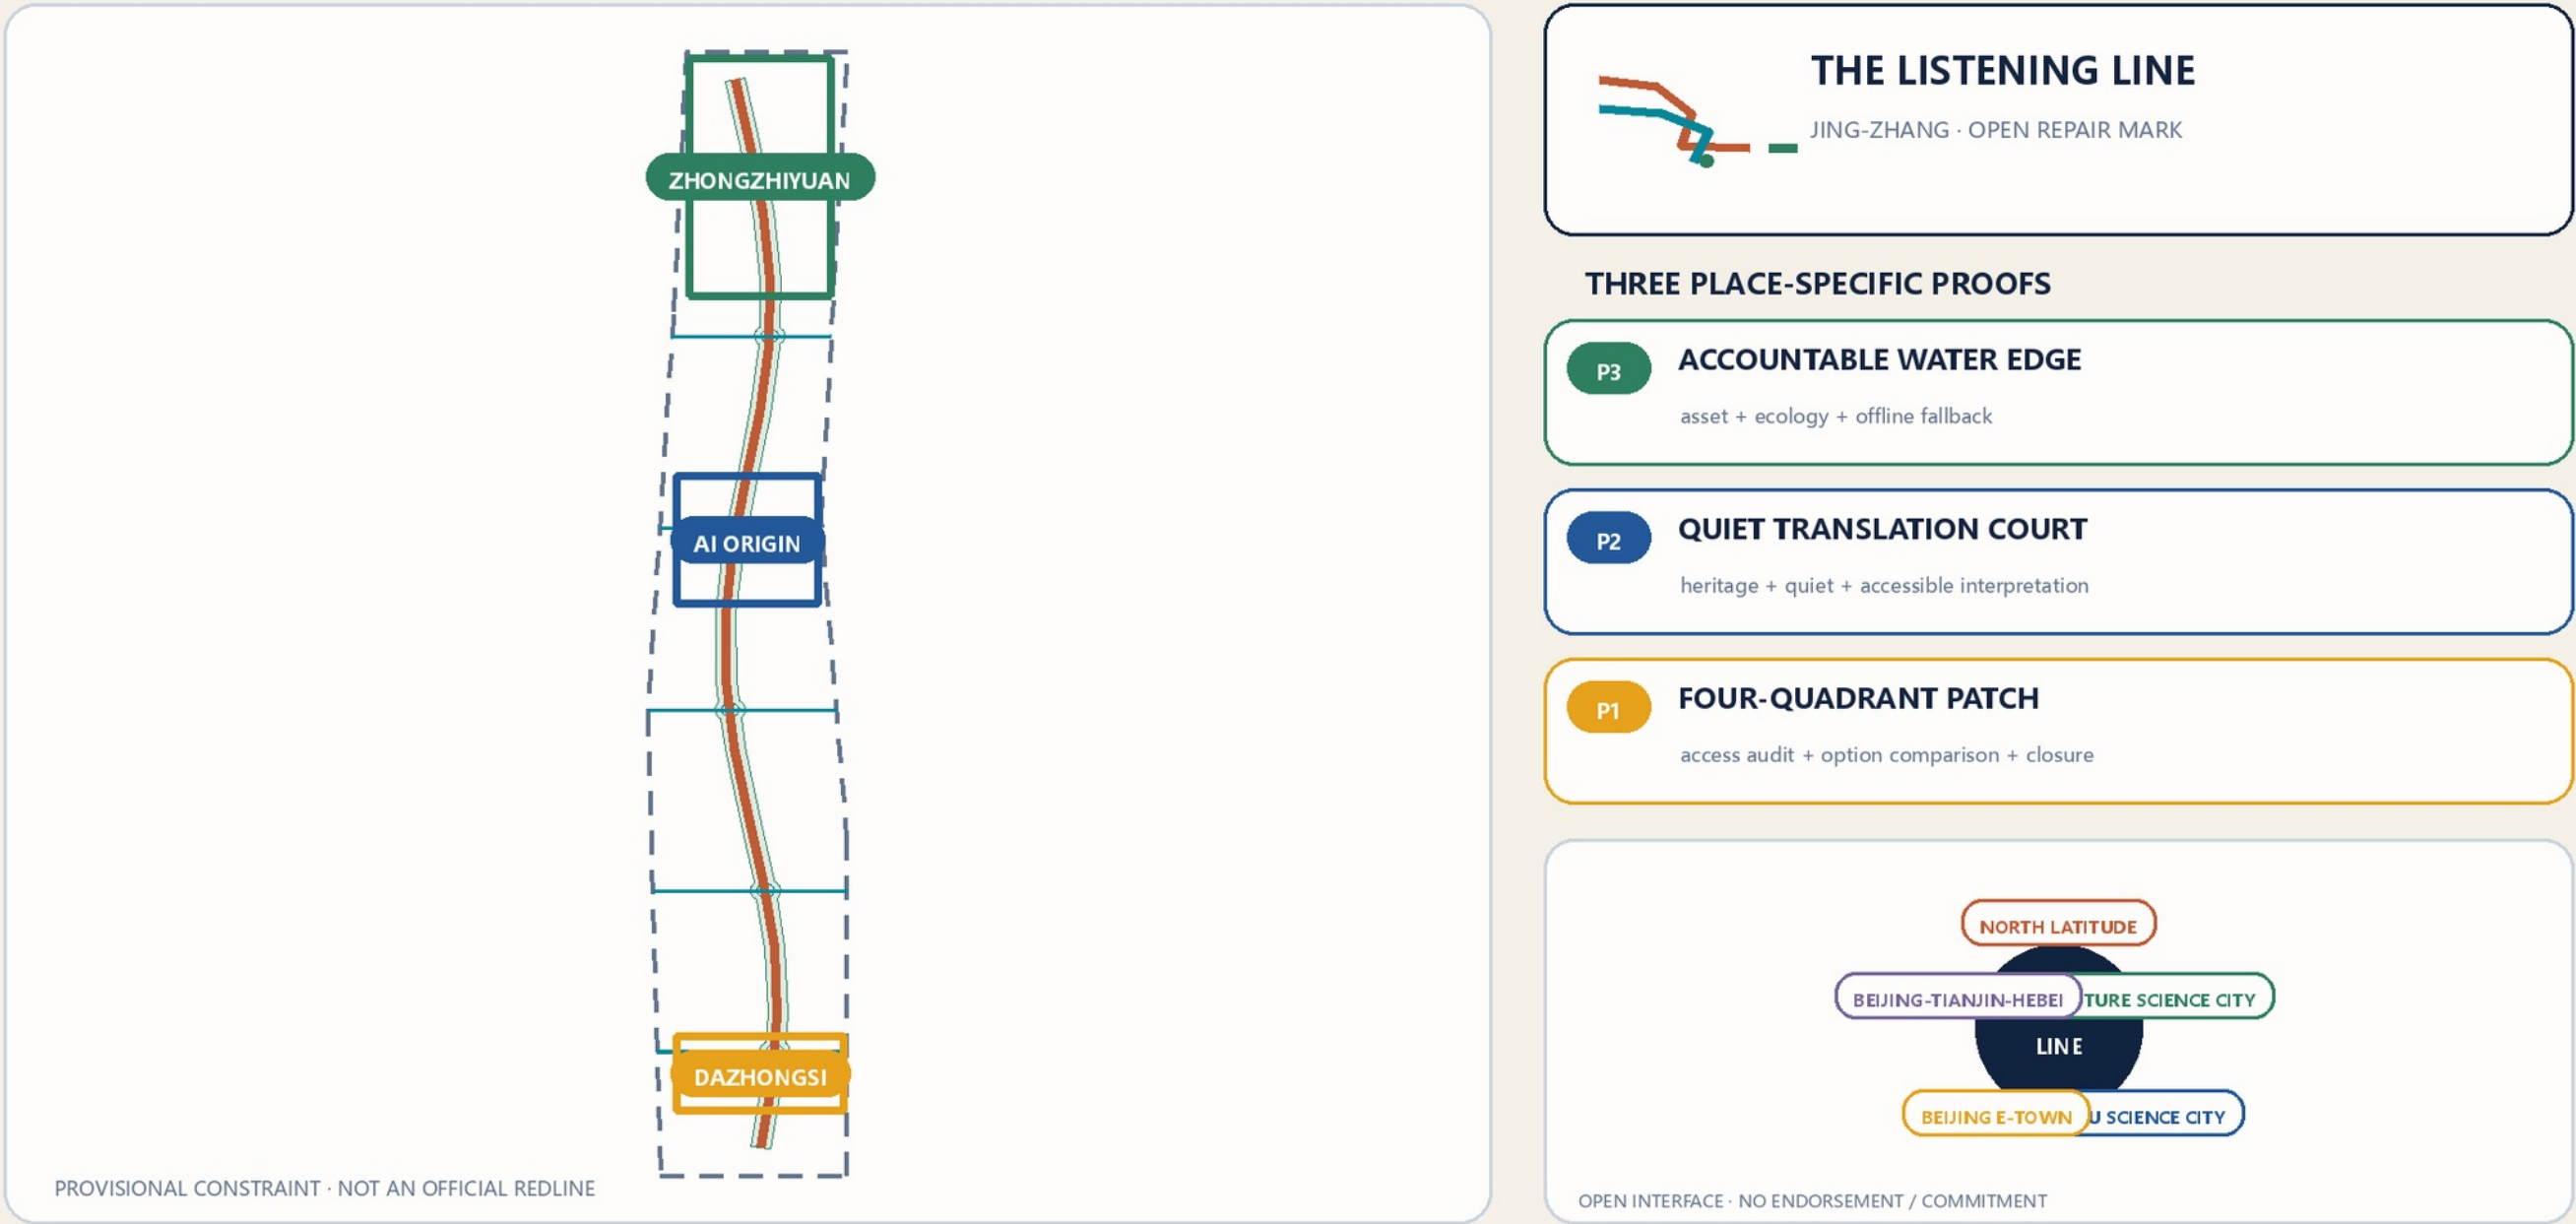

Overall structure and identity

One line, three proofs and five open regional interfaces.

01 / BELT IDENTITY + OPEN INTERFACES

One line, three spatial proofs

A real brand, distinct prototypes and five non-binding regional collaboration interfaces.

Three key-area spatial prototypes

Distinct plan-section languages, first evidence and professional handoff.

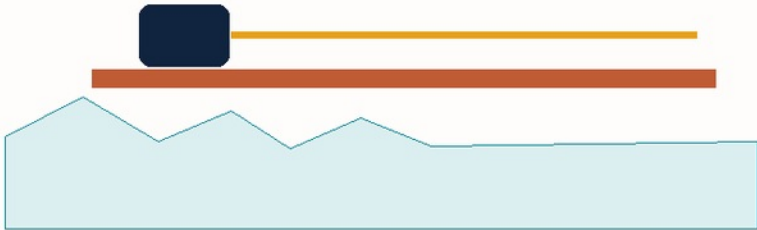

03 / THREE SPATIAL PROTOTYPES

Three sites, three plan-section languages

Each prototype has physical components, a professional handoff and an auditable first field-evidence path.

P3 ZHONGZHIYUAN | ACCOUNTABLE WATER EDGE

ACCOUNTABLE WATERSIDE SECTION

parts: eco-buffer / path / accountability cabinet / offline basics

first evidence: real asset-dependency-accountability register

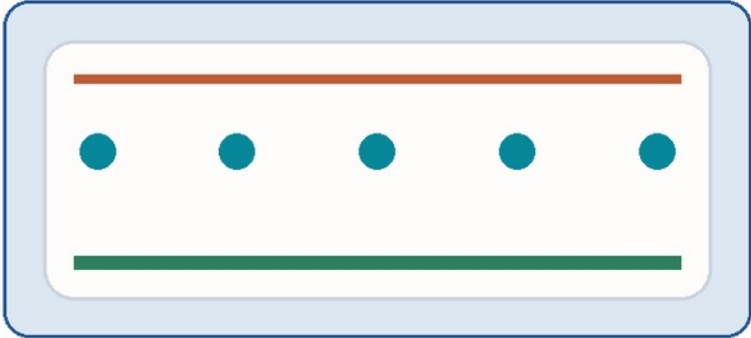

handoff: asset, water/ecology, electrical/network, procurement, data

pause: no owner / takeover failure / ecological or safety risk

E3 START-READY • NOT FIELD-PROVEN

P2 AI ORIGIN | QUIET TRANSLATION COURT

QUIET TRANSLATION COURT

parts: heritage trace / quiet edge / translation table / multimodal access

first evidence: device-content-rights-quiet-conflict map

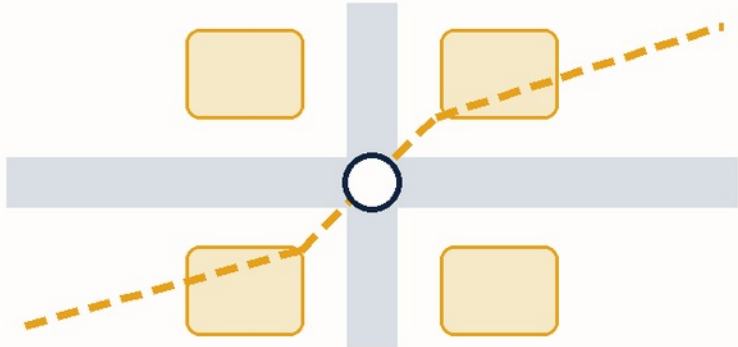

handoff: acoustics, heritage/oral history, access, rights, operations

pause: uncleared rights / forced exposure / no human explanation or off switch

E3 START-READY • NOT FIELD-PROVEN

P1 DAZHONGSI | FOUR-QUADRANT PATCH

FOUR-QUADRANT ACCESS LOOP

parts: four-quadrant loop / repair porch / physical signs / resting points

first evidence: 30 role-task walks and option matrix

handoff: transport, rail, parks, accessibility, safety, community

pause: unsafe route / unclear authority / no non-smartphone path

E3 START-READY • NOT FIELD-PROVEN

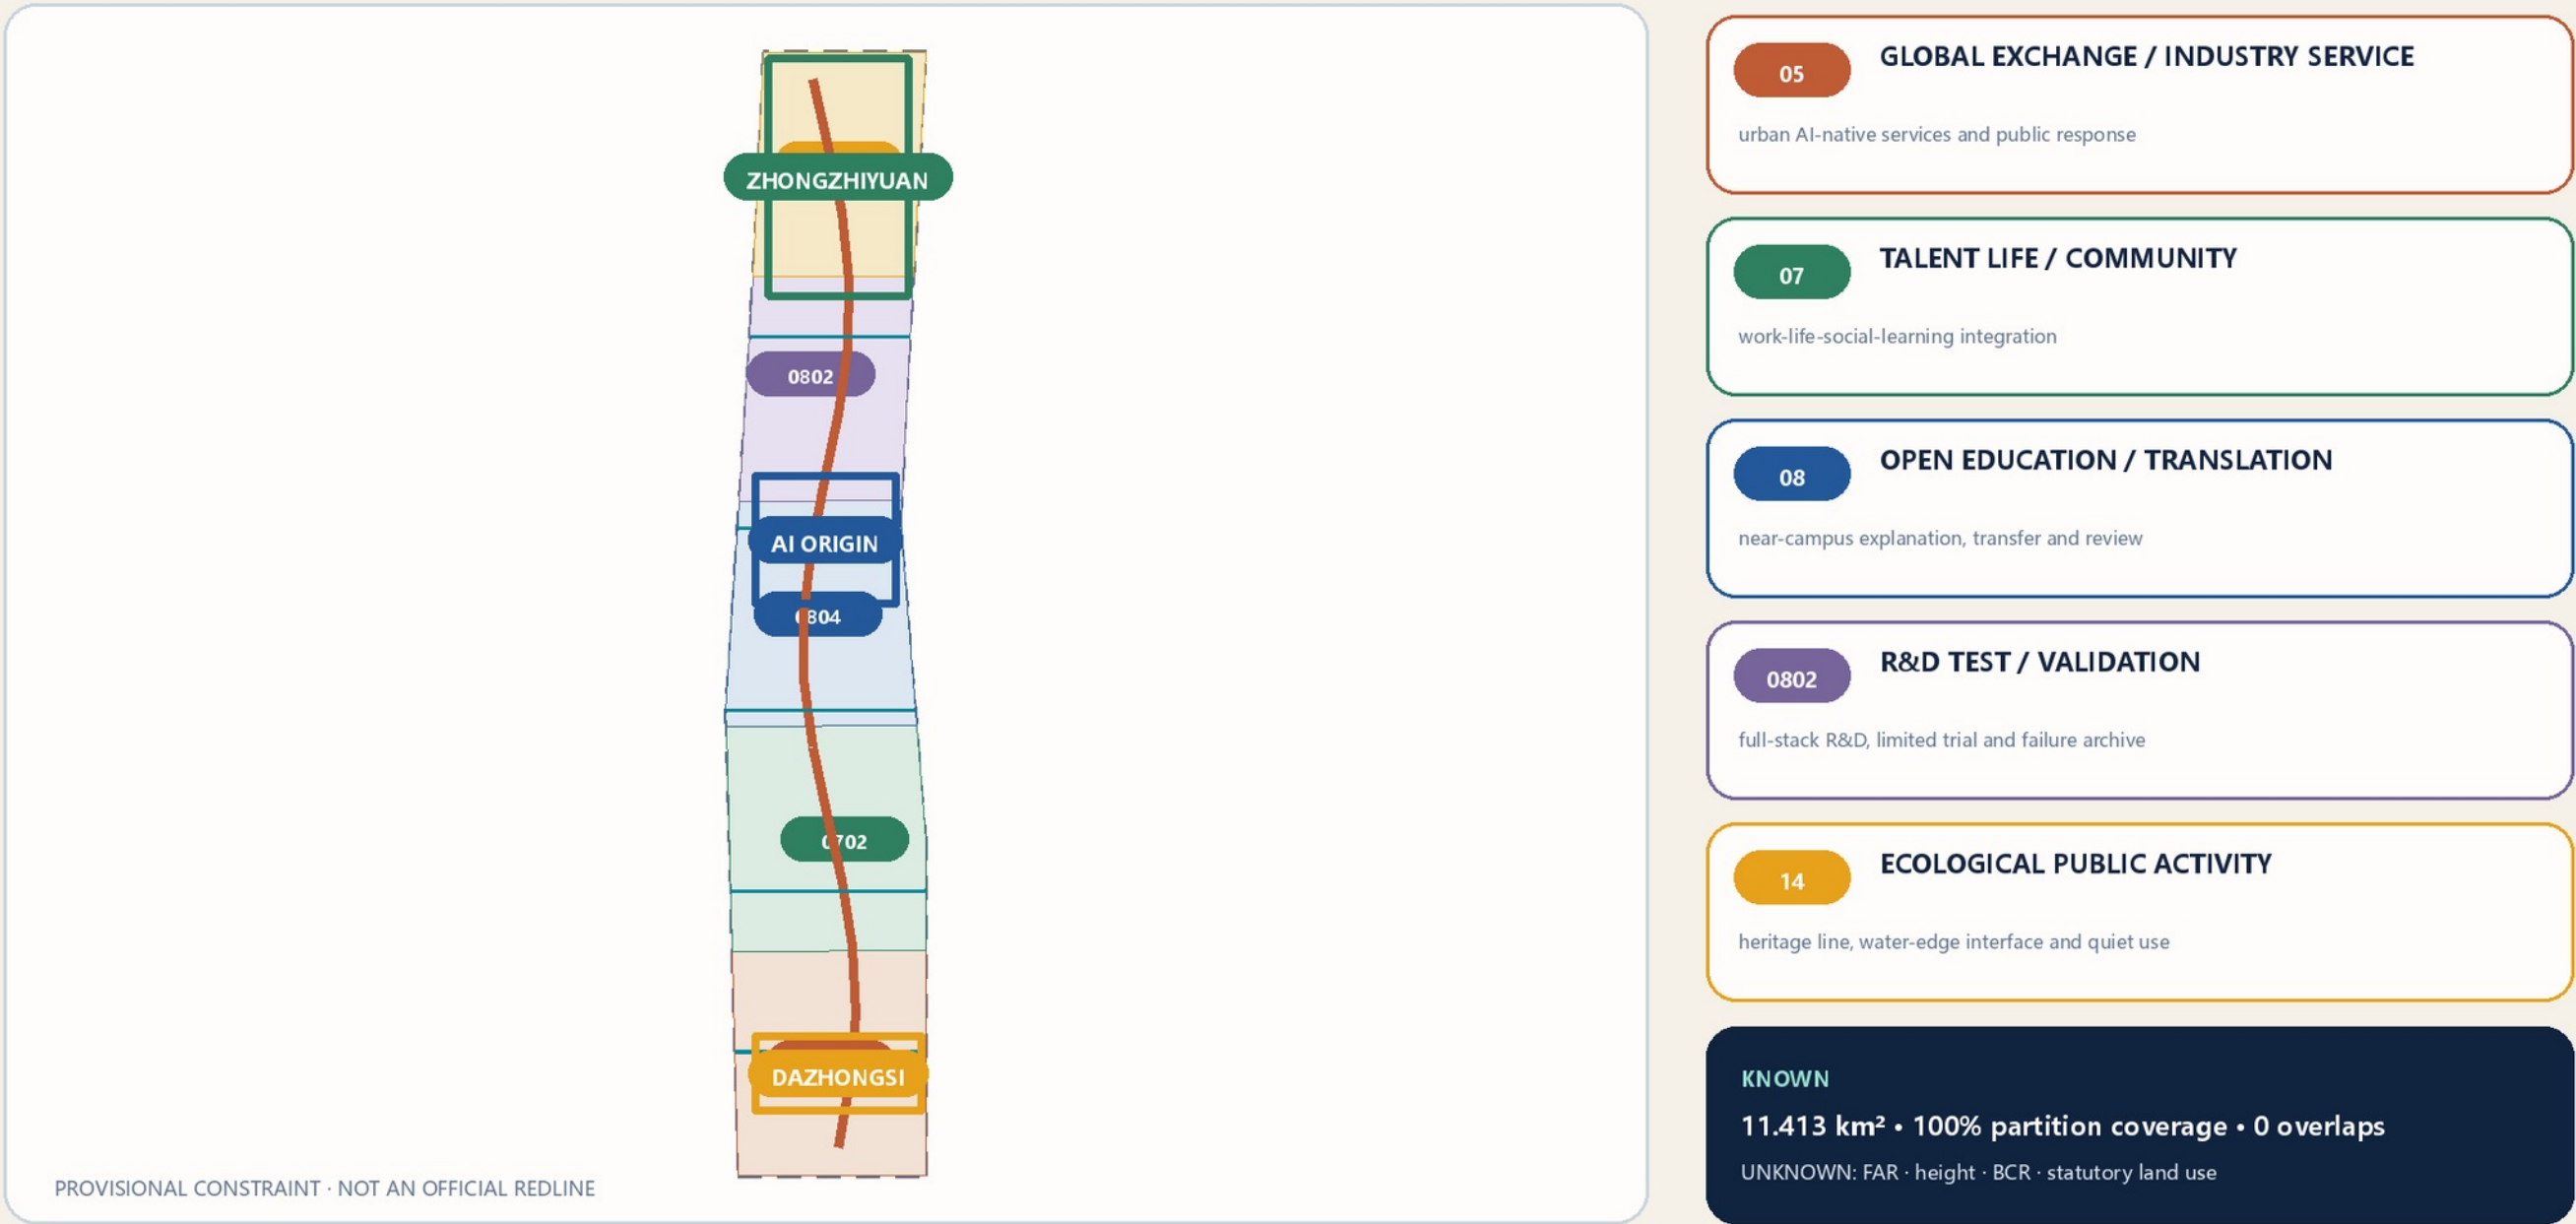

Land-use structure

Five functional bands share a topology-complete provisional boundary.

02 / LAND-USE + THREE-LEVEL TRANSMISSION

Five functional bands, one shared boundary

A complete provisional partition for discussion; statutory use and development controls remain pending.

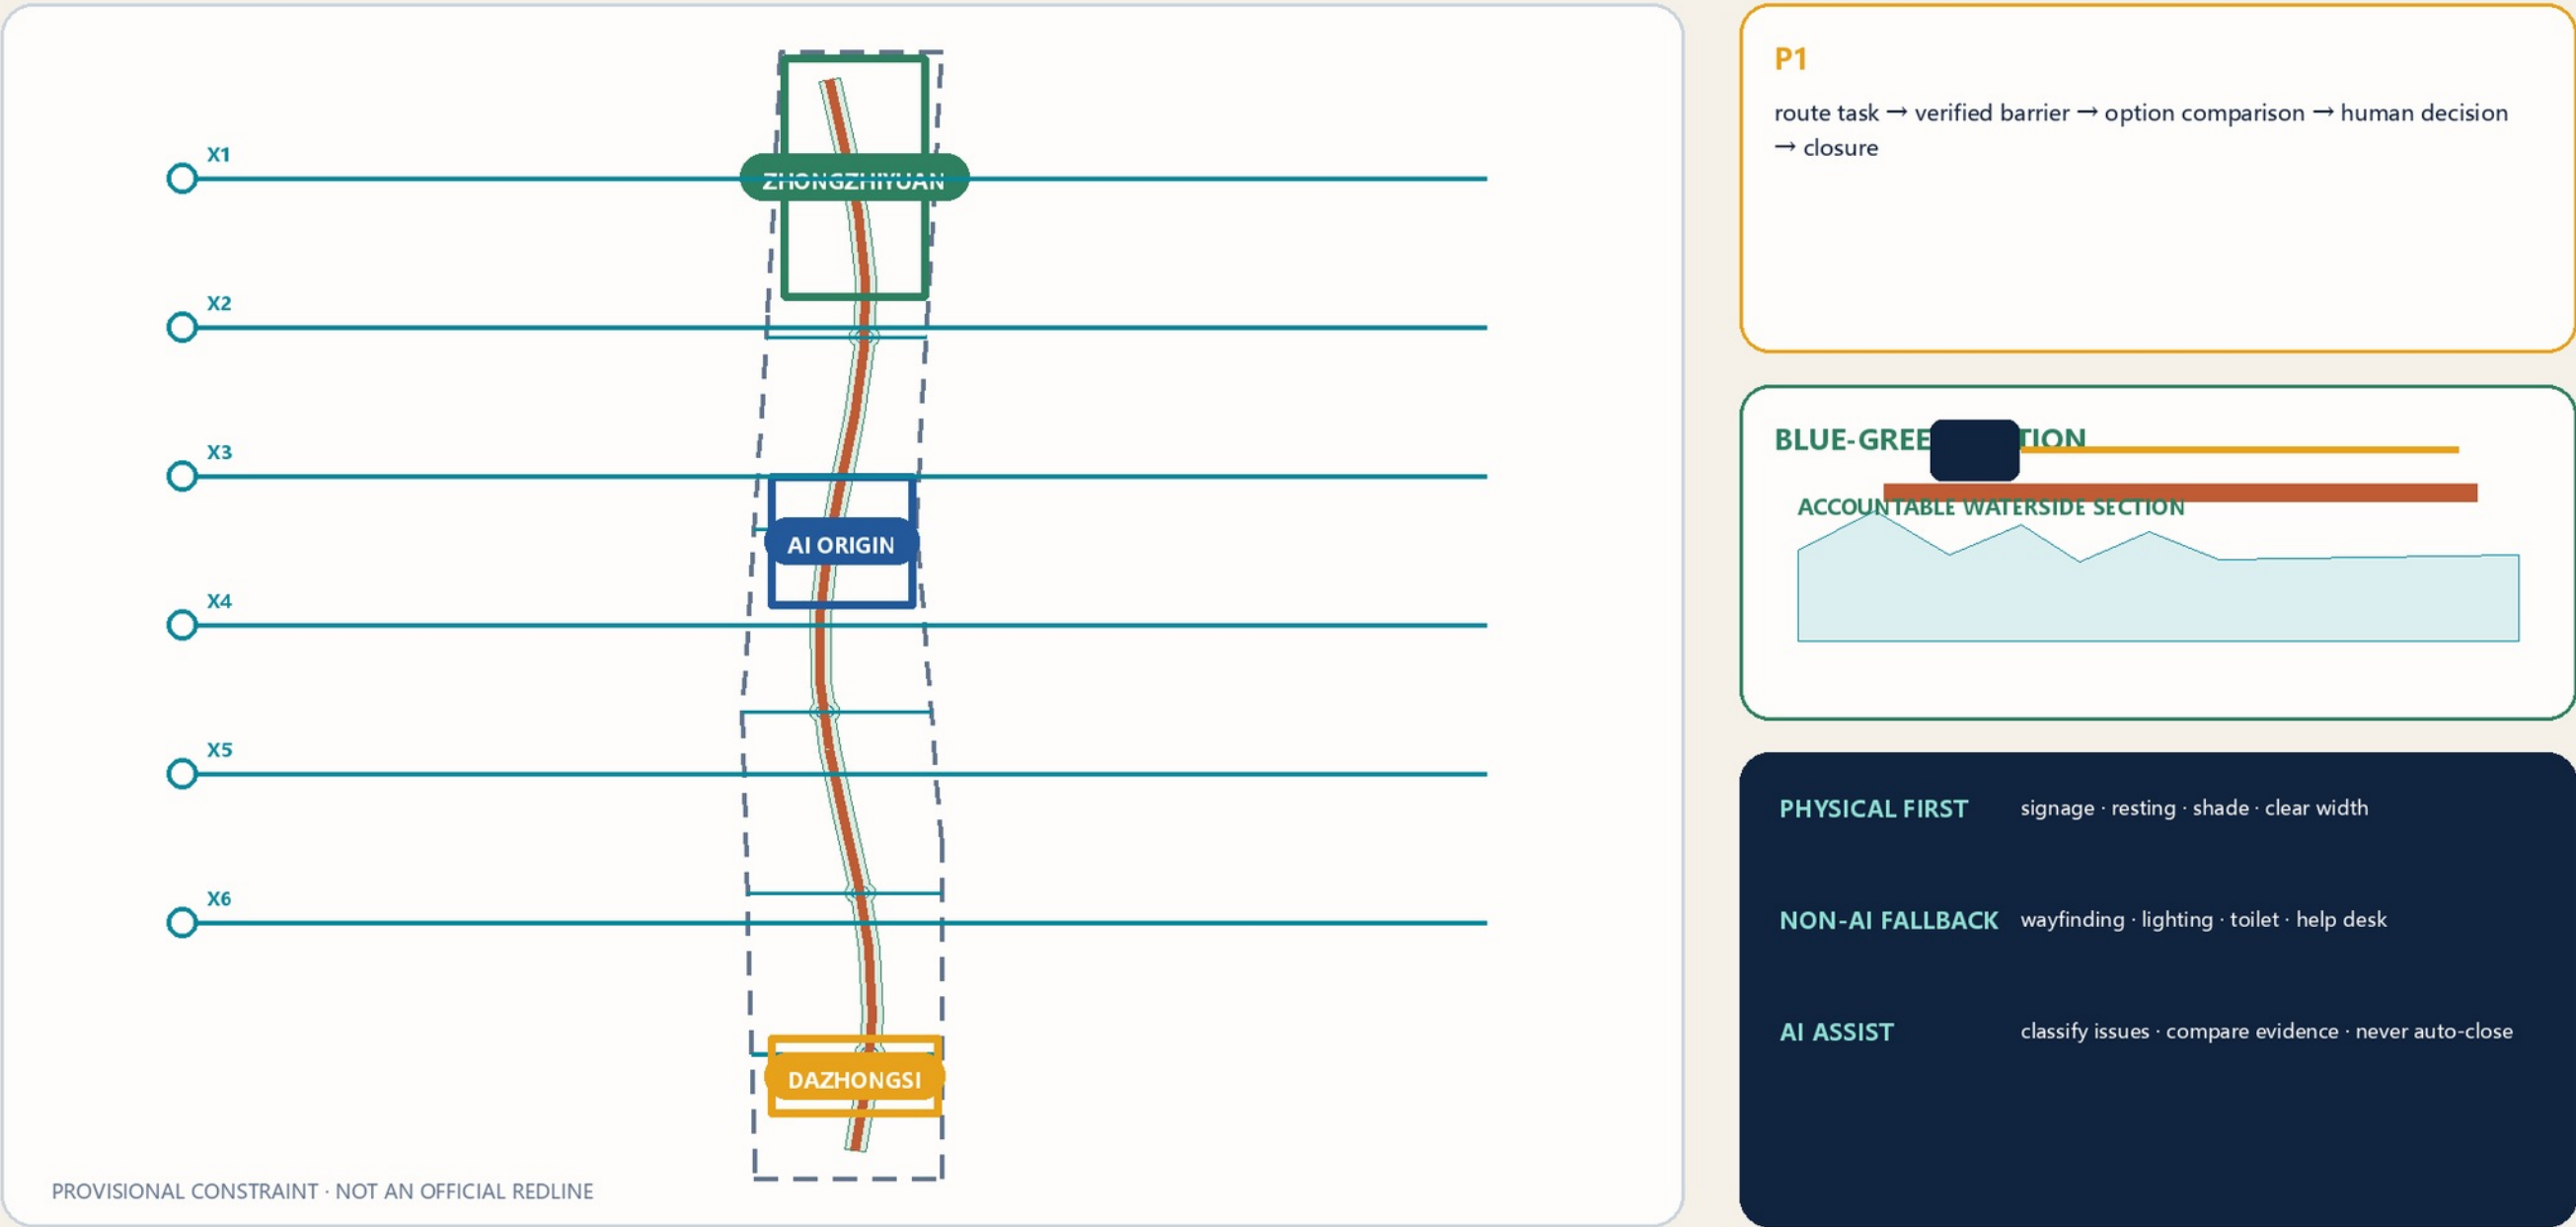

Walking-cycling and blue-green repair

Six conceptual cross-links and a continuous public-service line.

04 / WALKING-CYCLING + BLUE-GREEN REPAIR NETWORK

Six cross-links, one continuous public-service line

Design geometry shows priorities; official station exits, road redlines, blue lines and engineering remain pending.

AI-native planning and regional synergy

Agents structure evidence; named humans decide. Five open interfaces create no endorsement.

limited delivery robot test

edge-device offline drill

rights-cleared oral history

water-edge maintenance

bilingual model card

annual Listening Review

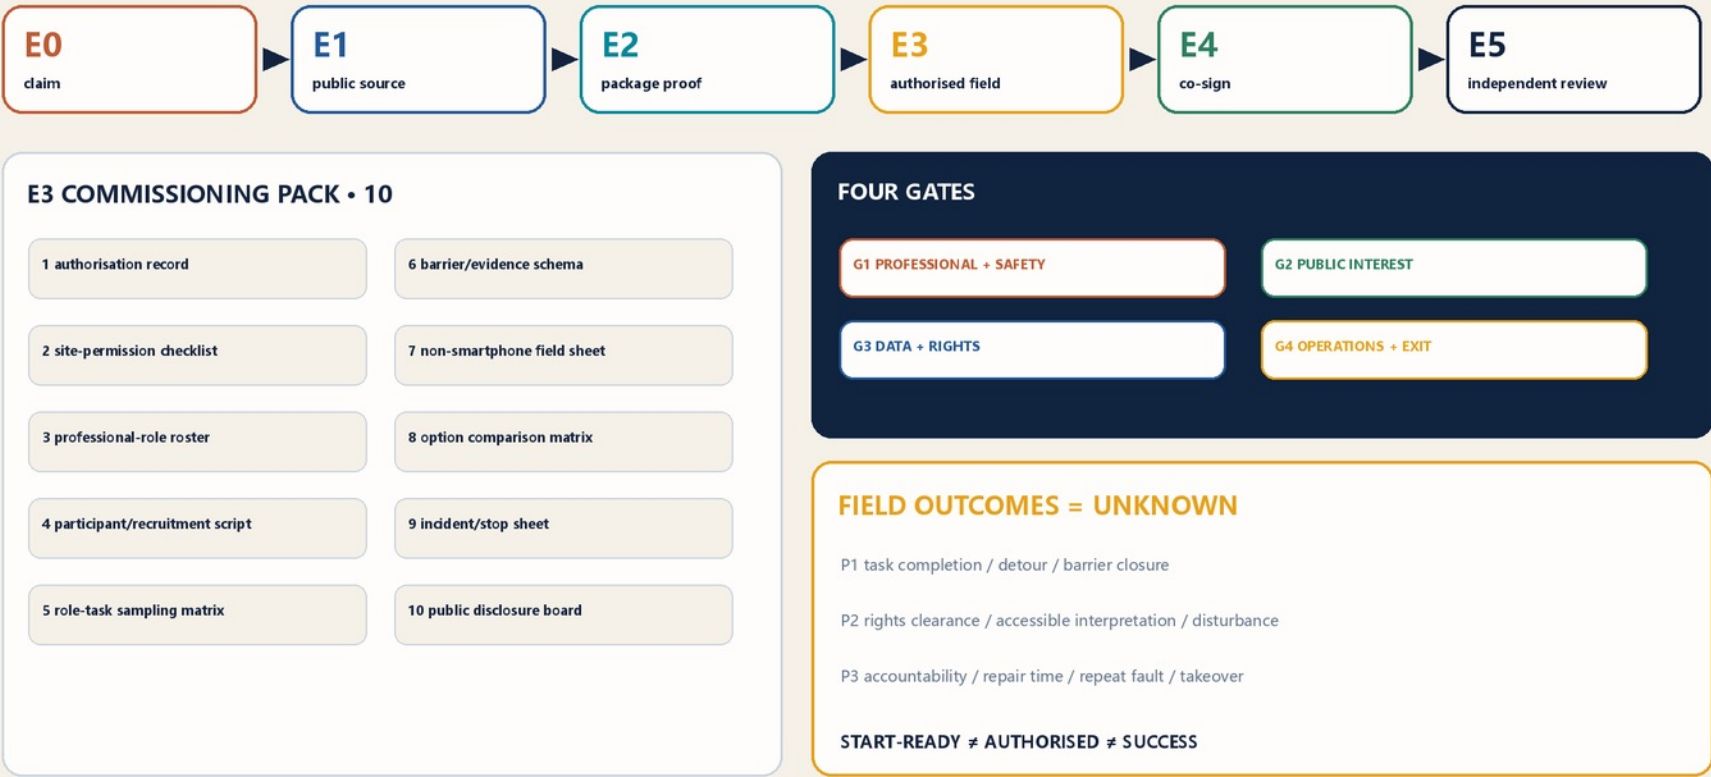

E3 commissioning and professional handoff

Ten artifacts and a ten-working-day start sequence do not fabricate field performance.

05 / AUDITABLE START PACKAGE

Move from E2 to E3 without inventing E3

Ten commissioning artifacts, four human gates and explicit unknown field outcomes.

FIRST 10 WORKING DAYS

v1.3 · 10 start artifacts · 4 gates · 13 honest unknowns · 0 fabricated field results

THREE HANDOFF PACKAGES

Metrics, risks and honest nulls

The package distinguishes computed structure, start-readiness and field outcomes.

27+6

known geometry / content / handoff metrics

13

unknown planning / field outcomes

23/23

mandatory requirements covered

15/15

design-depth items complete

RISK → CONTROL → STOP

provisional geometry

professional redraw after official data

listening misread as surveillance

no continuous audio/face/emotion/trajectory

regional names misread as endorsement

open_interface_no_commitment

start pack misread as results

start-ready ≠ authorised ≠ success

vendor or maintenance lock-in

open export + offline basics + retirement

average benefit hides burden

grouped evidence + no-deterioration gate

FIELD OUTCOMES

UNKNOWN

P1 completion / detour / closure

P2 rights / access / disturbance

P3 owner / repair / repeat / takeover

0 fabricated field results

Accountable organisations = null

gates = pending

performance_results = null

Professional handoff index

Every claim leads to geometry, metrics, a drawing, a receiving role and a pause condition.
