

CROSSING×INTERFACE

Jingzhang AI Suture Belt Urban Design · A3 Booklet

Turn centennial crossings into urban interfaces.

One spine · twelve crossings · three interfaces · two wings

12 scenario cards · 6 personas · 4 landmark concepts · 14 renewal projects · 3 phases

Overall design ~11.4km² (provisional recalc 11.413km²) · green 13.0% · public space 3.7% (concept)

01 • Design Basis & Data Discipline

formal-ready vs background vs provisional separation

- Controlling: official pre-announcement (2026-05-09) + cleared agent taskbook (2026-05-18)
- Standards: MOHURD urban design measures / regulatory planning measures / MNR land-use classification
- Provisional boundaries fitted to announcement text & areas, EPSG:4548 deviation 0.02%–0.43%
- Gaps: official redlines, key-area extents, regulatory controls, road redlines, ownership, utilities, baselines
- Response: provisional geometry labeled; controls registered unknown; all landings are concepts
- Replacement: full-chain recalculation once official geometry arrives

02 • Three-Level Scope Framework

research 43.6km² → overall 11.4km² → key areas 368.4ha

Land-Use Structure and Functional Organization

Three scopes cascade: 43.6km² research → 11.4km² overall design → 368.4ha key areas; programmatic partition with shared edges

Structure: one axis (heritage spine) • twelve crossings • three interfaces • two wings

Functional mix (concept; recalculated from 75 cells; see legend for shares)
※ Provisional rough boundary (not an official redline)
Sources: official announcement (2026-05-09) + repository provisional boundaries; layers/metrics derived from GeoJSON under EPSG:4548; conceptual suggestions only

- Research area: 'three areas two wings' region, strategy & future-city research
- Overall design: 1–2km around heritage park, regulatory-depth urban design
- Key areas: Zhongzhiyuan / AI Origin Community / Dazhongsi detailed design
- Cascade: strategy → structure → levers
- Boundary status: all provisional, labeled with recalculation list registered

03 • Overall Concept & Spatial Structure

one spine × twelve crossings × three interfaces × two wings

- Concept: crossing→interface — the crossing's notice–negotiate–pass grammar as AI governance syntax
- Naming: spine (heritage vitality belt) / twelve crossings (historic sequence) / interfaces (AI touchpoints)
- Logo: crossbuck 'X' × Chinese '口'; rail teal-grey + signal red + sleeper wood
- Loop: research Zhongzhiyuan · conversion Origin Community · application Dazhongsi · services wings · display spine

04 • Land Use & Urban Renewal

75 land-use cells · gapless · shared edges

- All land-use codes follow the MNR classification (05/07/08/12/14/16)
- Mix guidance: research+industry ~30%, housing+community ~25%, green ~15% (concept)
- Renewal objects: underused spine edges / campus fusion / industry zones / community repair
- Retention: 39 concept footprints marked ~30/30/40 retain-renovate-new as intent only
- Reserves: north & middle strategic reserves for long-term uncertainty

05 • Key-Area Detailed Design

full-stack — source-flow — consumption

Detailed Design Index of the Three Key Areas

North to south: full-stack → source-flow → consumption interfaces; extents unpublished, provisional rectangles only; directional concepts

北 Zhongzhiyuan AI Acceleration Area

Zhongzhiyuan • Full-stack Interface

- Role: full-stack self-reliance system & AI-governance voice
- Structure: garden ring + Qinghe corridor + honor-wall plaza
- Levers: full-stack testbed, benchmark scenario, industry gallery
- Risk: graded data-compliance opening, human review (concept)

Beijing AI Origin Community

AI Origin Community • Source-flow Interface

- Role: university invention & conversion community
- Structure: Wudaokou origin interface + Kilometer-Zero plaza + loop
- Levers: conversion blocks, talent-apartment mix, edu scenarios
- Risk: complex ownership; low-disturbance renewal (concept)

Dazhongsi AI Industry Cluster

Dazhongsi • Consumption Interface

- Role: AI-native business & urban consumption frontage
- Structure: four-quadrant ring + Mingzhong plaza + first-store corridor
- Levers: transit integration, city balcony, agent debuts
- Risk: peak crowds & parking need assessment (concept)

※ Provisional rough boundary (not an official redline)

Sources: official announcement (2026-05-09) + repository provisional boundaries; layers/metrics derived from GeoJSON under EPSG:4548; conceptual suggestions only

※ All spatial content uses provisional rough boundaries and is conceptual only; not an approved conclusion; full recalculation follows official geometry.

■ Zhongzhiyuan (~192.1ha): ring-corridor-wall; full-stack testbed; garden district

■ Origin Community (~104.3ha): Wudaokou interface + Kilometer-Zero; low-disturbance renewal

■ Dazhongsi (~72.0ha): four-quadrant ring + Mingzhong plaza; AI-native first-store corridor

■ Extents unpublished: provisional rectangles only; all directional concepts

06 • Transport & New Infrastructure

two north-south + twelve east-west + greenway + 3 transit links (concept)

- Concept network ~47km: suture corridors ~15.9km, greenway ~9.7km
- Strategy: east-west for walking/cycling, north-south for public slow mobility
- Links: Dazhongsi / Wudaokou / Qinghua East Rd West transit interfaces (concept)
- Parking: bicycle stations at corridor ends; four-quadrant pedestrian ring
- New infra: distributed energy + edge compute at plazas; pipe capacity pending

07 • AI Scenario Cards & Personas

12 cards (3 industrial tests) · 6 personas

01 Slow-mobility pilot — anonymous · one-button takeover

02 Heritage guide — public material · editorial review

03 Enterprise copilot — public policy · officer review

04 Health navigation — minimized data · navigation only

05 Safety ops review — traceable · manager backstop

06 AV shuttle test★ — bounded low-speed · onboard officer

07 Robot delivery test★ — limited routes · remote takeover

08 Open model benchmark★ — cleared data · committee review

09 Double-teacher class — data on campus · human option

10 Honor wall & open tour — voluntary · appeal & correction

11 Low-carbon coordination — anonymous · advisory only

12 Multilingual visitor service — no ID retention · human confirm

★=industrial test scenarios (testing ≠ approved operation) Personas: researchers / students & young scholars / developers & founders / residents & seniors / international visitors / city operators

08 • Metric Recalculation & Compliance

only recalculable numbers; the rest honestly unknown

Core Metric Recalculation and Evidence Chain

All known metrics recalculated from GeoJSON under EPSG:4548; unknowns await official sources; organizer data gaps do not block content scoring

Area recalculation check (announced vs provisional recalc)

Evidence chain: official announcement → provisional boundary → design layers (GeoJSON) → metric recalculation (EPSG:4548) → figures/visuals → four-tier self-check

Pending regulatory controls (honestly marked unknown — no conclusions)

- floor_area_ratio — needs approved regulatory plan
- building_height_control_m — needs plan/aviation/heritage limits
- building_density_control — needs approved regulatory plan
- talent_capacity_estimate — needs baseline + controls

Self-check status

✓ Deterministic: PASS

✓ Spatial topology: PASS

✓ Visual packaging: PASS

✓ Professional evidence: PASS

✓ Boundary disclosure: provisional labeled

✓ Wording audit: concept-only

Task coverage: 17 announcement items (1.3/1.4/1.5) + 6 taskbook items (agent.1–6) = 23 fully registered

Sources: official announcement (2026-05-09) + repository provisional boundaries; layers/metrics derived from GeoJSON under EPSG:4548; conceptual suggestions only

■ Overall design 1,141.3×10⁴sqm (provisional; announced ~11.4km², +0.11%)

■ Green 13.0% · public space 3.7% (concept)

■ Key areas total 369.3×10⁴sqm (provisional)

■ unknown: FAR / height / density / talent capacity — pending official sources

■ Coverage: 17 announcement + 6 taskbook = 23 registered

■ Four-tier self-check: deterministic / spatial / visual / professional all PASS

09 • Renewal Projects, Phasing & Operation

14 concept projects · 3 phases · conference-festival-challenge-list

- Near (2026–2028): southern spine, Dazhongsi ring, X-01–X-06 first openings
- Mid (2028–2031): campus-community fusion, Wudaokou interface, honor wall, test expansion
- Long (2031–2035): Zhongzhiyuan full-stack, X-10–X-12, northern reserve activation
- Events: Interface Conference / Crossing Maker Festival / Scenario Challenge / Annual Honor List
- Marshalling-yard mechanism: urban problems as claimable 'cars', marshalled after review
- Funnel: participate–test–settle–co-build (mechanism proposals, not commitments)
- Participation: exhibitions — interface open days — annual scenario hearings

10 • Risk, Copyright & Compliance

eight-dimension risk self-assessment · boundary clauses enforced

- High: data privacy / policy uncertainty / implementation complexity — mitigations & review paths stated
- Mid-low: technology maturity / spatial dispute / public acceptance / operations cost / equity
- Bottom line: no invented rosters, investments, output or fiscal promises; testing ≠ approved operation
- Concept landmarks never described as approved construction; provisional ≠ official redline
- Sources: all officially public or cleared; no non-public drawings, personal data or unauthorized material
- IP: per announcement Article 8.1; attribution to applicant; see report/copyright_statement.md
