

JINGZHANG: THE SILICON-CARBON CITY

THE FIRST URBAN BELT WHERE HUMANS AND INTELLIGENT AGENTS COEXIST

formal package · provisional boundary · 2026-08-29

01 Overview & Three Linear Spaces

Silicon-Carbon City — Overall design area & three linear spaces

Source: provisional boundary from announcement text; three linear spaces are conceptual; shown in EPSG:4326

1 Zhongzhiyuan: computing lighthouse (★ = tower public anchor)

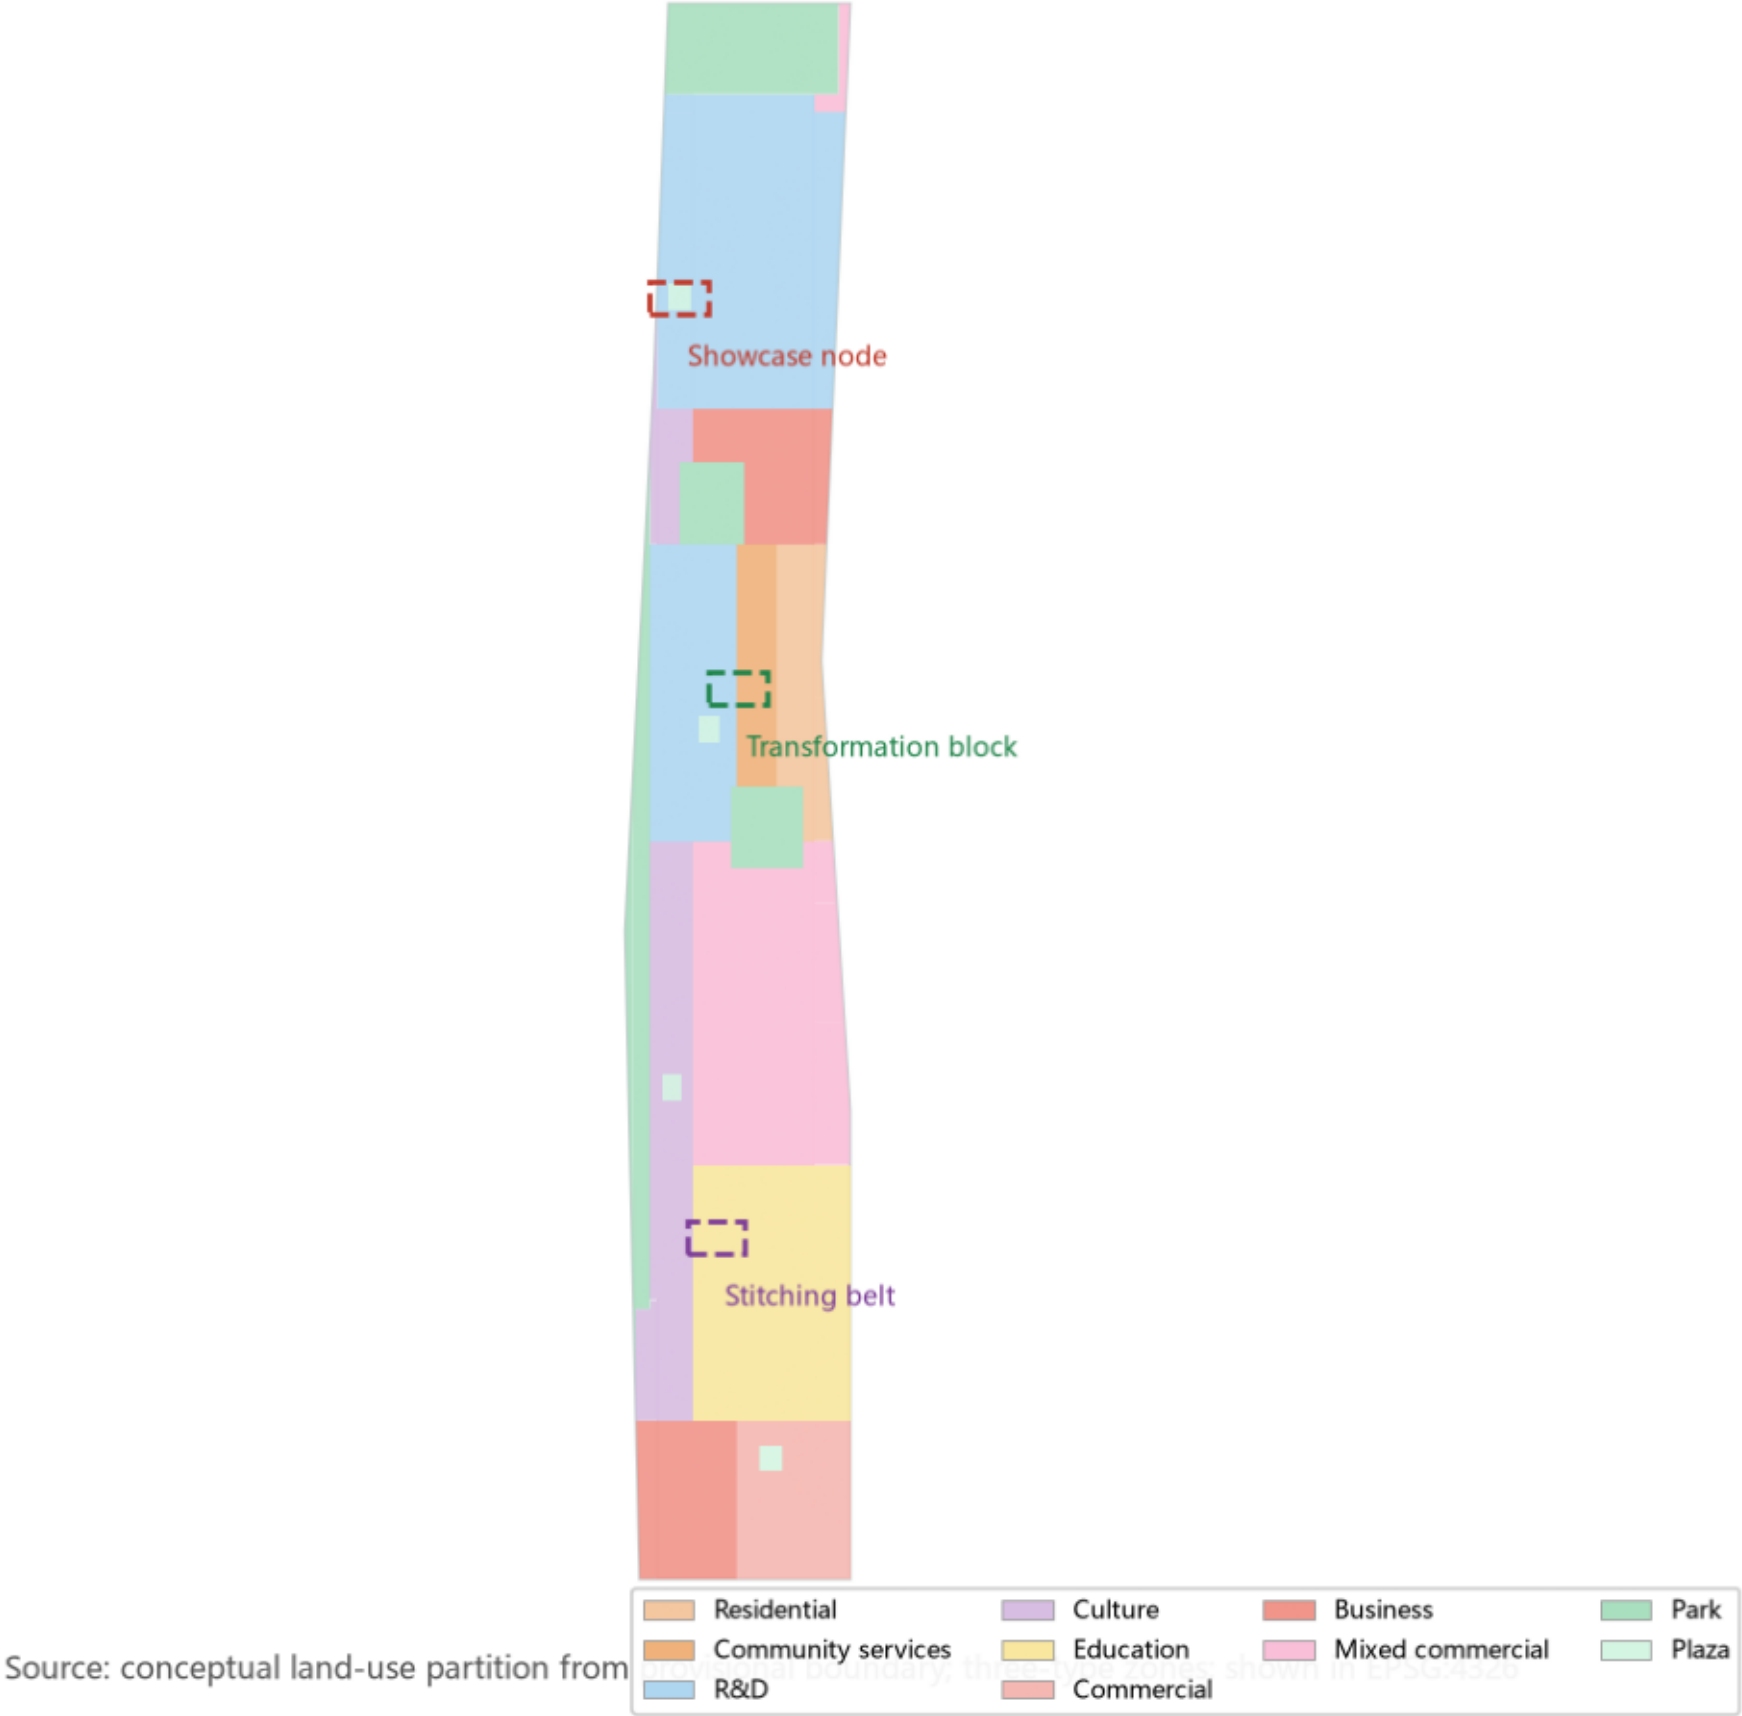

PROVISIONAL • not an official redline • recalculate when official data arrives

2 AI Origin: OPC live-work community

3 Dazhongsi: native-intelligent consumption street

— Jing-Zhang tech axis (conceptual) | Cables: talent, energy, market, cloud | Expansion ring = ride-shed suggestion

Land-use structure & three-type control framework

PROVISIONAL • not an official redline • recalculate when official data arrives

03 Key Areas (Dual Perspective, with renderings)

Three key areas — dual-perspective scenario battlefield

Source: provisional key-area polygons; each with positioning and dual-perspective scene points

- 1

Zhongzhiyuan: tower = dual-foundation anchor (device) / 500m low-latency zone / tower-park symbiosis; dual view: body in tower, interface at plaza; night tower alive
- 2

AI Origin OPC community: zum interaction ring / interaction boxes / world corpus stations / night harvesting; dual view: behavior-locked vs cloud-stream; campus-adjacent
- 3

Dazhongsi native-intelligent street: four-quadrant connectivity / immersive belt / data-element circulation (conceptual); dual view: companionship vs cloud memory; agent baby
- 4

interaction boxes (booth style) — schematic points

04 Mobility, Blue-Green & Tiered Compute (with night scenes)

Mobility, blue-green network & tiered compute carriers

Source: conceptual design layers; L1-L4 tiered compute carriers; shown in EPSG:4326

1.1 Universal token points (public space)

PROVISIONAL • not an official redline • recalculate when official data arrives

42 Community compute cards (community outlets)

3.3 500m low-latency special zone (professional)

4.4 Tower direct connect (frontier)

- Time-shared ROW: day pedestrian peak / night robot delivery & ops peak (time folding)

Green = blue-green space | Red = public-space plazas | Grey = road centerlines (conceptual)

Night scene · conceptual

05 Brand Direction: Logo/VI, Honor, Signage, Components

Brand direction: Logo/VI • honor display • signage • public-space component library

Conceptual direction for professional brand teams; distinct from the cultural signage system

01 Logo direction

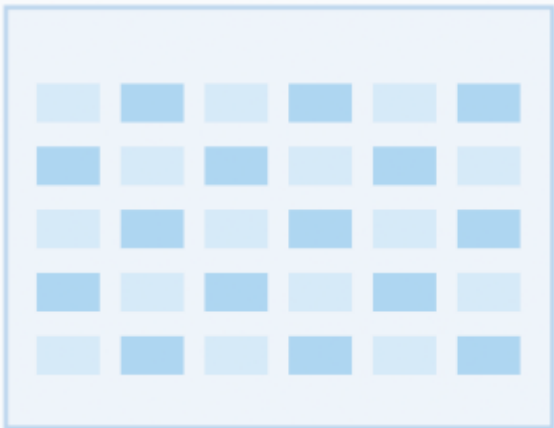

Silicon-carbon rings × zigzag rail

02 Tower-park-street palette

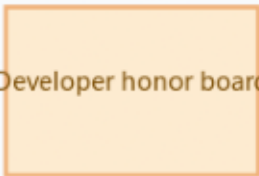

塔 Silicon 园 Carbon 街 Dual-interface

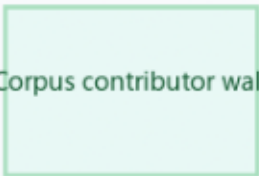

03 Honor-display direction

Open-source contribution wall

Developer honor board

Corpus contributor wall

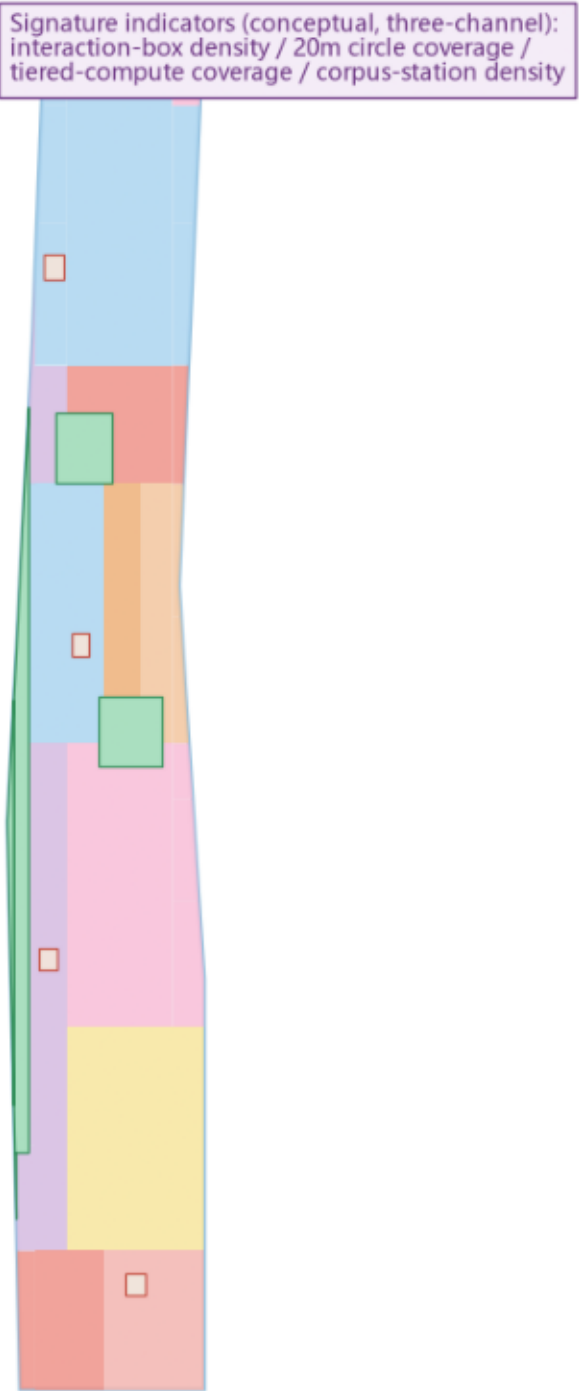

04 Signage & component direction

Brand direction and cultural signage are distinct: Logo/VI serves belt-wide identity; cultural signage serves the Jing-Zhang heritage narrative; both require professional deepening and rights clearance

PROVISIONAL • conceptual direction only, not formal brand adoption

Core metrics recalculation & evidence chain

Source: recomputed from submitted geometry in EPSG:4548; signature indicators follow the three-channel route

PROVISIONAL • not an official redline • recalculate when official data arrives
