

THE AI LINE | Board 1: concept, structure, land use

The AI Line overall structure: one spine, two streams, three stations, nine quarters

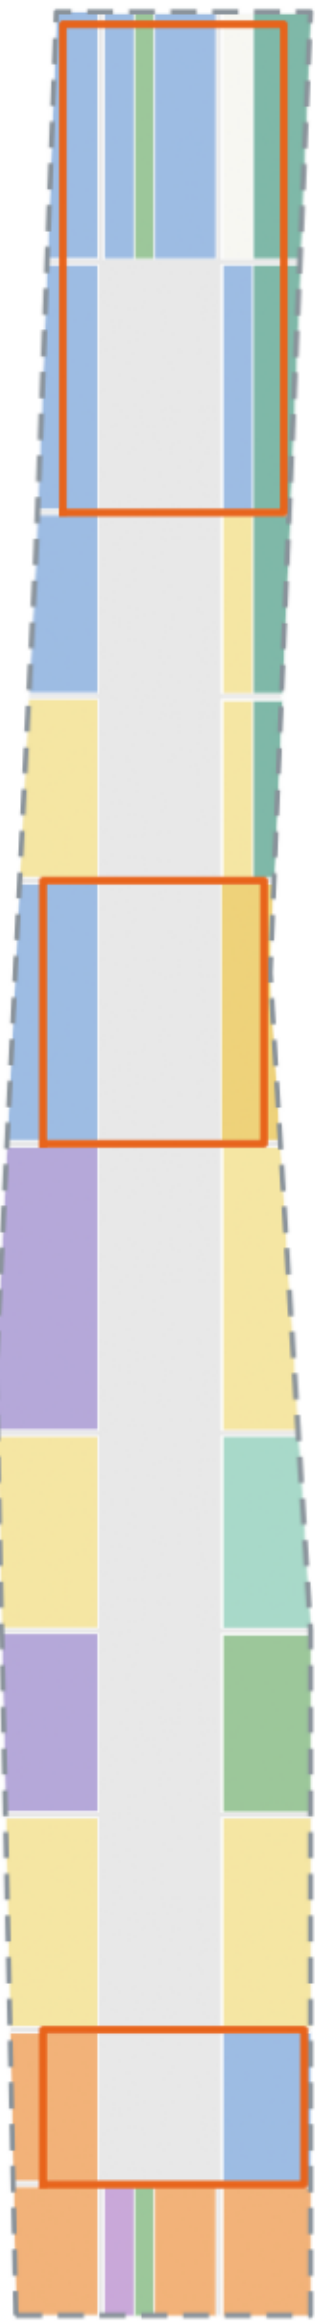

- AI R&D
- Commercial
- Residential
- Talent housing
- Culture
- Education
- Health
- Parks
- Blue-green
- Plazas
- Streets
- Reserved
- Key area (provisional)
- Design boundary (provisional)
- Ren Walk
- Transit link

Evidence chain: every panel derives from the same submitted data

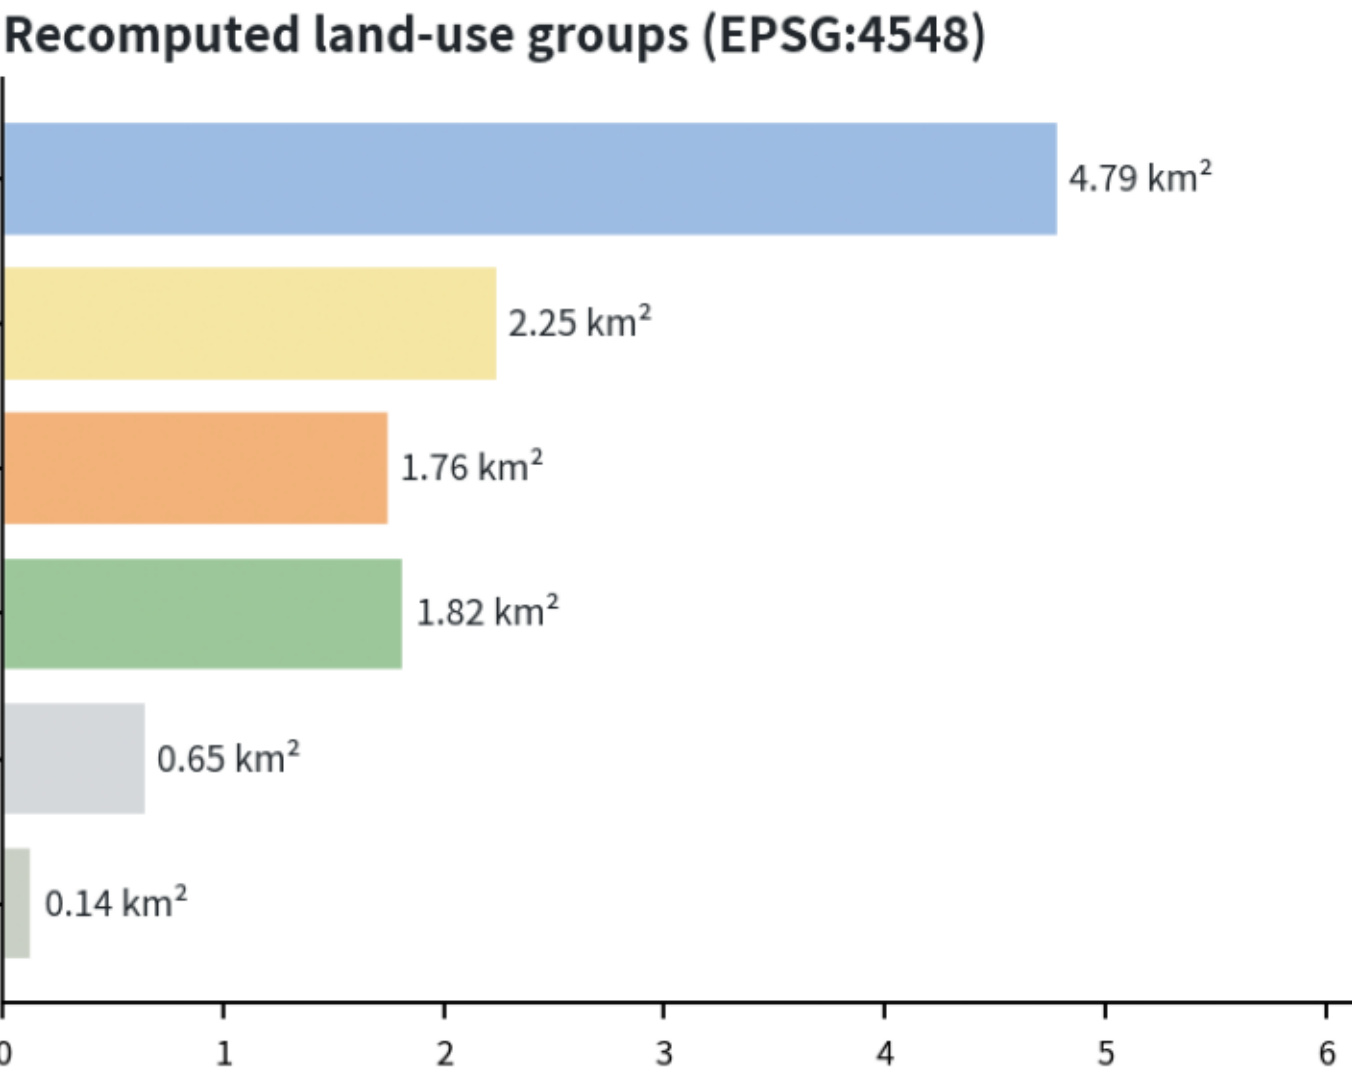

Provisional constraint boundary, concept design only; official announced areas prevail | Data: submitted GeoJSON recomputed in EPSG:4548 | AI-generated

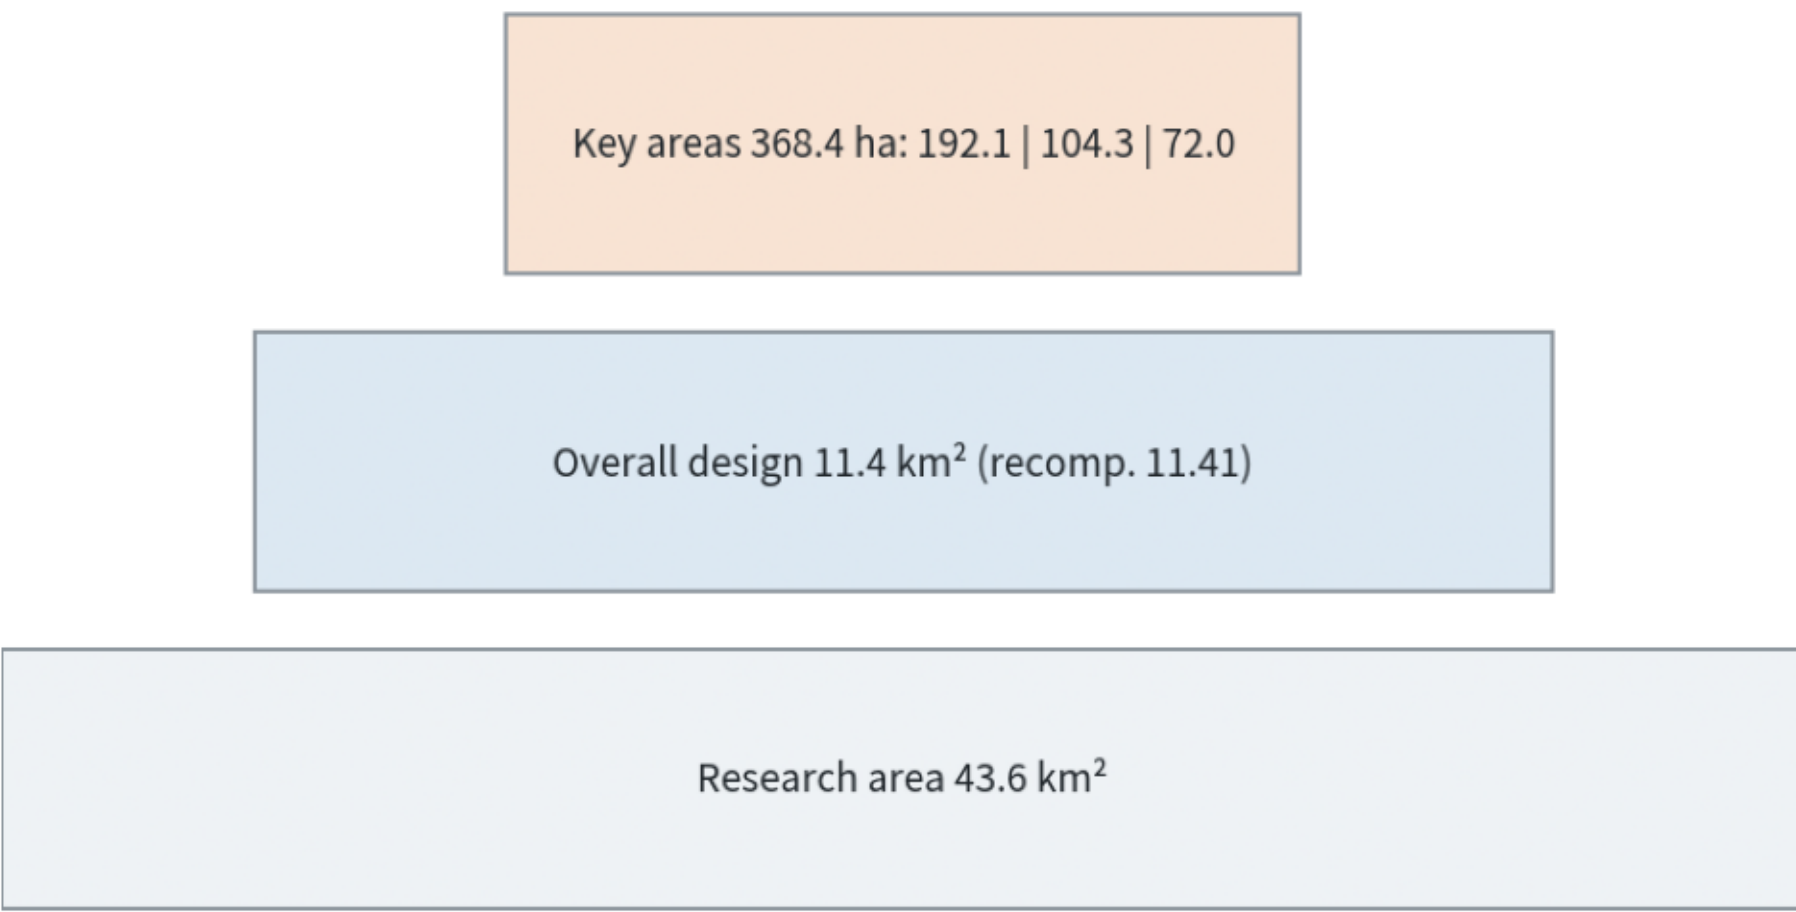

Land-use structure: research-based mixed quarters

Provisional constraint boundary, concept design only; official announced areas prevail | Data: submitted GeoJSON recomputed in EPSG:4548 | AI-generated

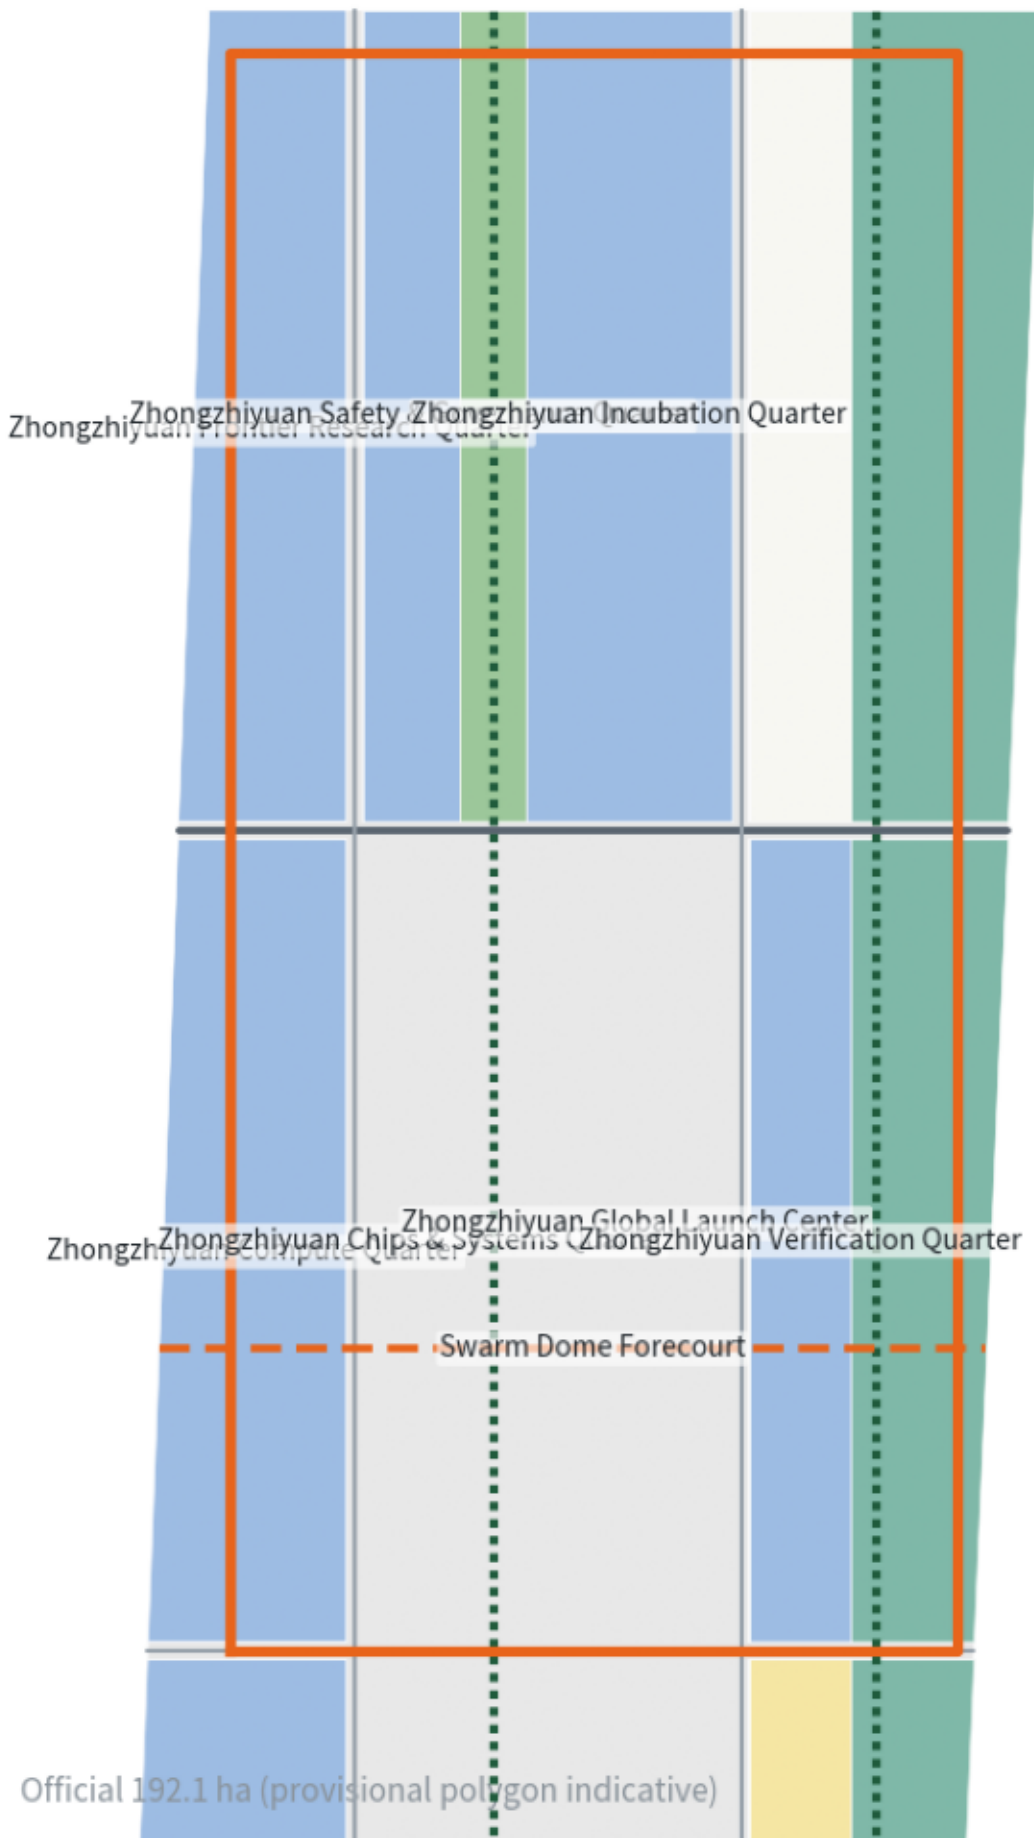

Three-level scope framework (official areas)

Provisional polygons deviate; official values prevail

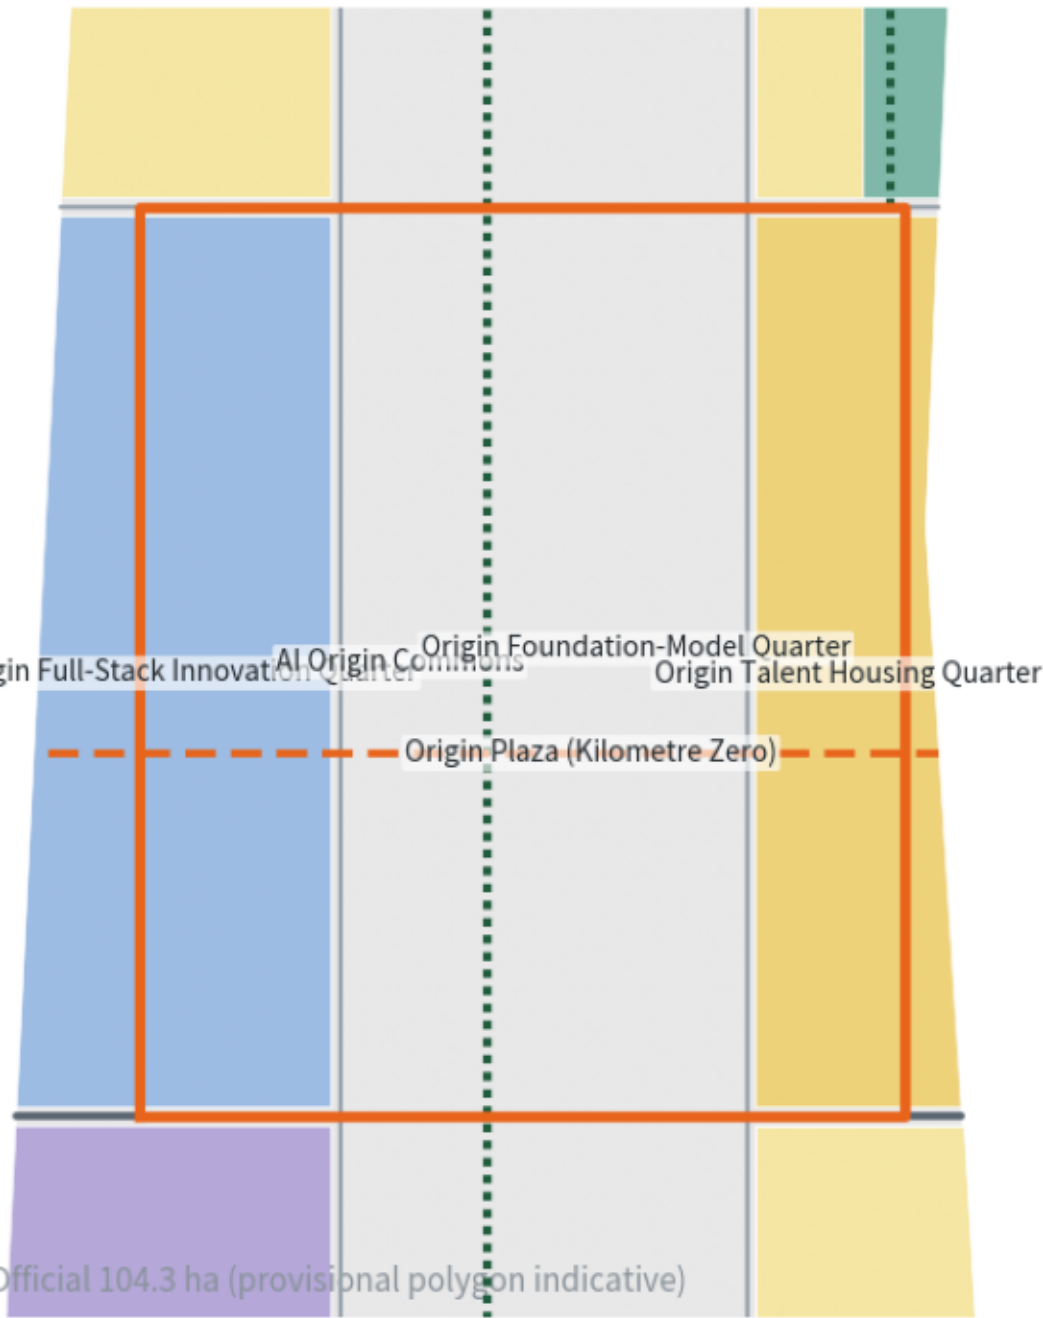

Index of the three station designs (directional, implementation-scheme depth)

Zhongzhi Station | full-stack + governance
Four quarters: compute, chips, frontier, safety

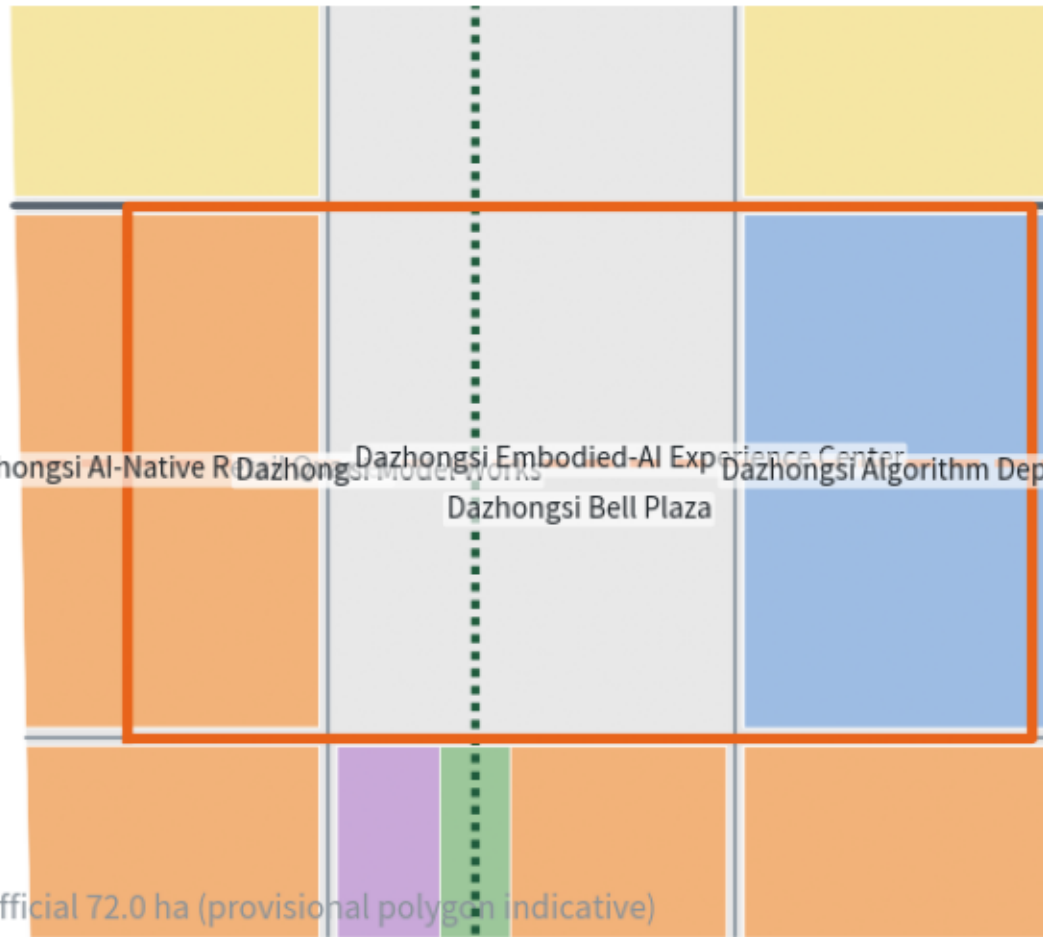

Provisional constraint boundary, concept design only; official announced areas prevail | Data: submitted GeoJSON recomputed in EPSG:4548 | AI-generated

Origin Station | world-class ecosystem
Commons + full-stack + LLM + talent housing

Dazhongsi Station | AI-native business
Retail + Model Works + Embodied Center
