

Bilingual: Chinese primary (proposal.md) with complete English counterpart (proposal.en.md);
A3/A0, HTML and figures are bilingual.

Key risks:

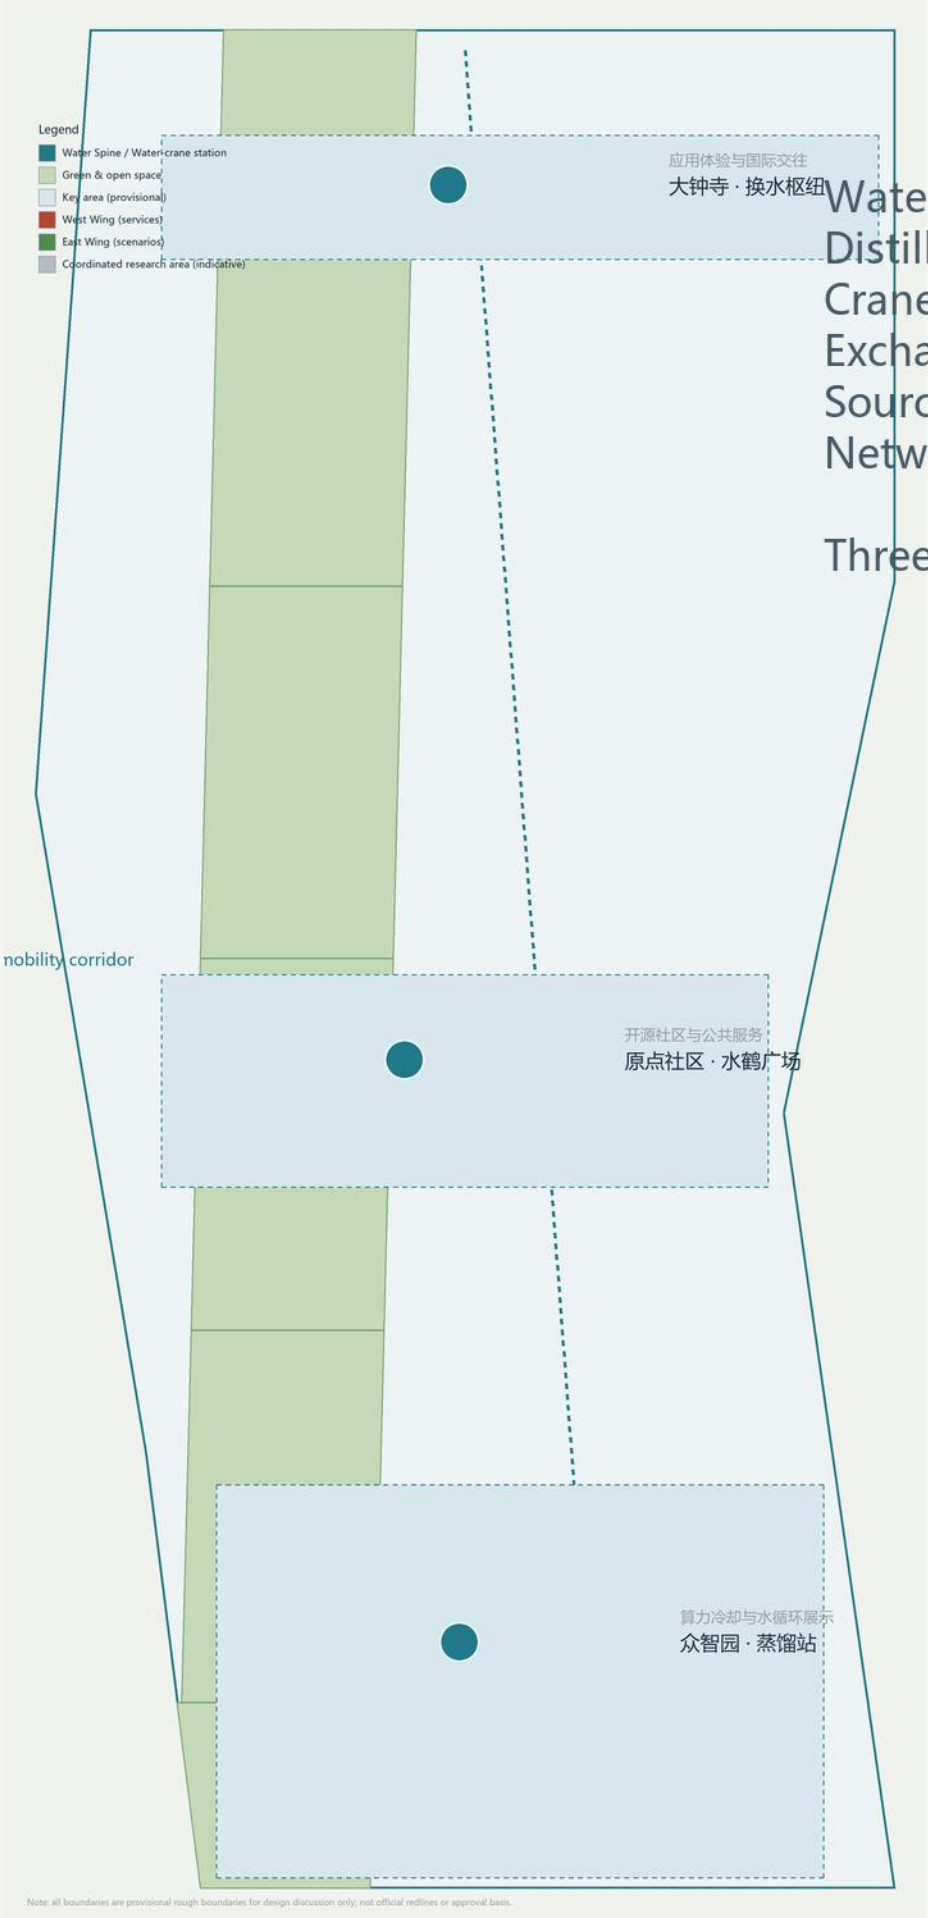

1. Official boundary & key-area polygons missing - content scoring unaffected; full recalculation when released;
2. Regulatory conditions, redlines, ownership, municipal, fire, heritage & engineering data missing - pending official data;
3. Water-crane heritage remains require professional verification; cooling & energy data require measured operation data;
4. Six international cases are background analogies only, not replication commitments.

Copyright & boundary:

- No claim of official approval, approved regulatory plan, final ownership, final scale or guaranteed implementation;
- All spatial content is conceptual, based on provisional boundaries;
- No third-party copyrighted fonts, images, trademarks or portraits used;
- Structured data is authoritative; figures/PDFs/HTML are presentation layers.

Overall Concept: One Spine, Three Stations, Two Wings

From the steam-era water crane to the AI-era cooling exchange station - water is the century-long cycle of this corridor

Water Spine: blue-green slow-mobility corridor along the heritage culture belt

Distillery Station (Zhongzhiyuan): train-distill-evaluate-governance

Crane Plaza (Origin Community): open-source publishing & community

Exchange Hub (Dazhongsi): applications, consumption & international exchange

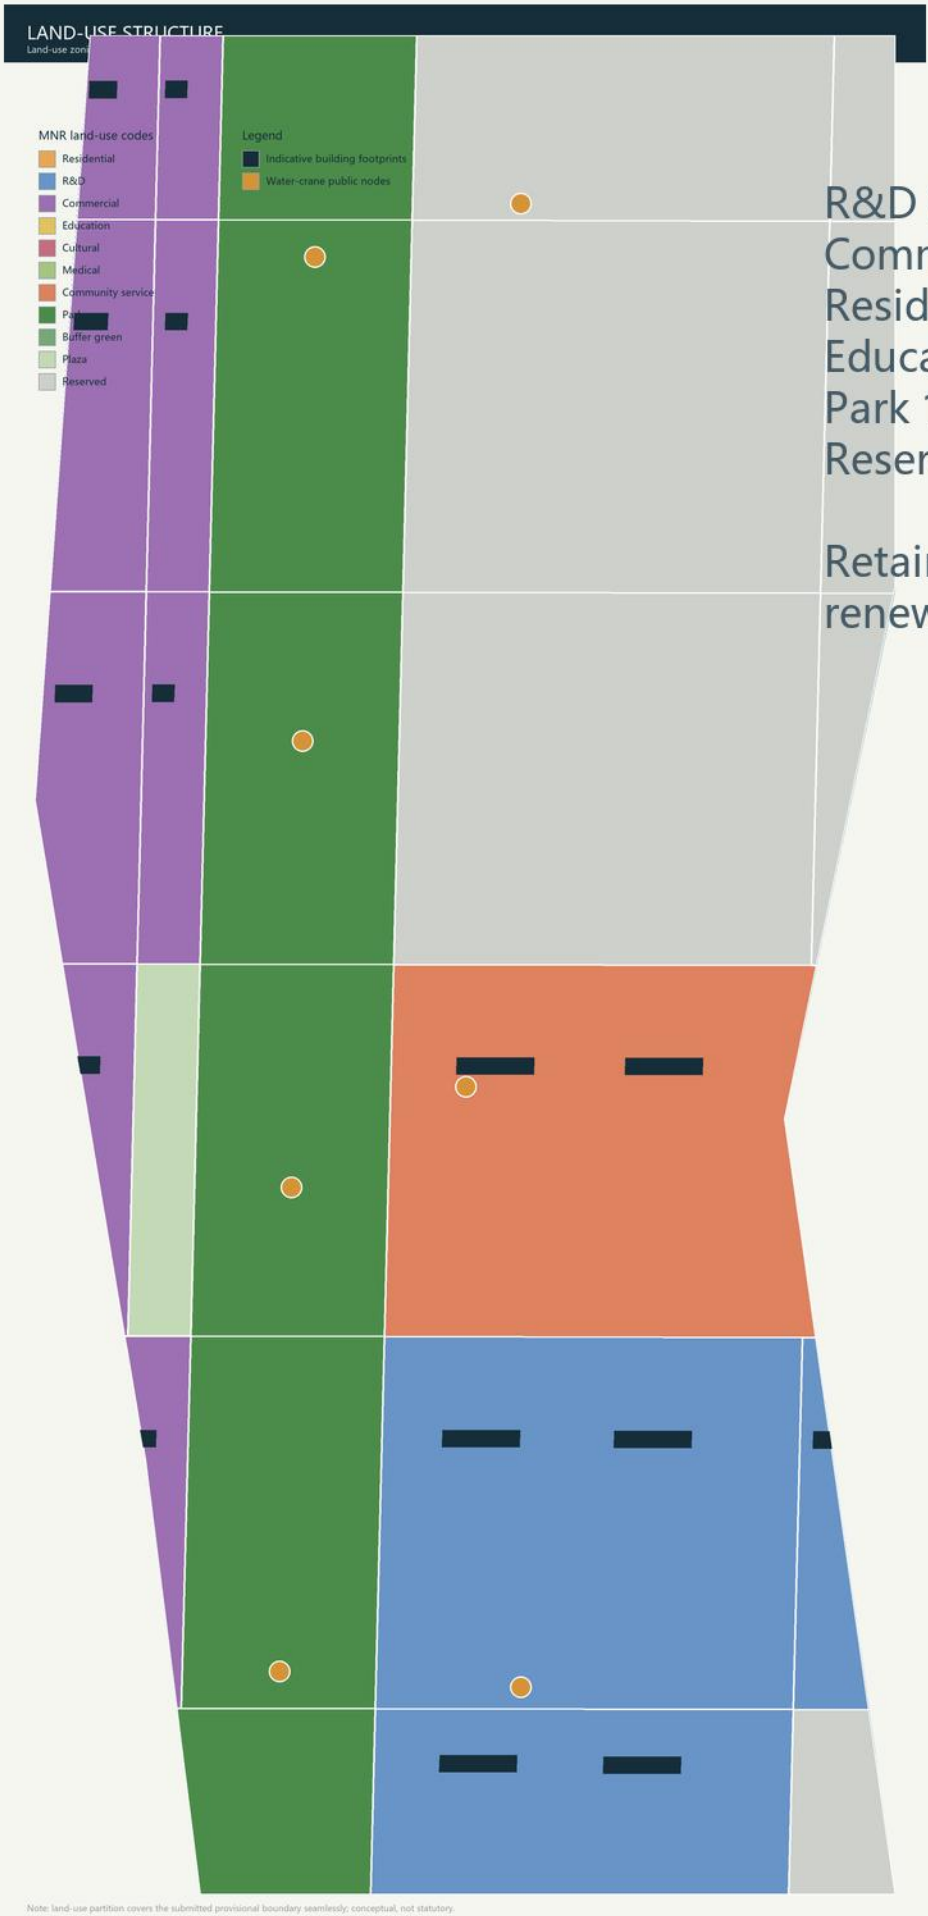

Source Wing (west): Zhongguancun science-service wing - fact-based innovation

Network Wing (east): Xiaoyue River scenario wing - scenarios & digital innovation

Three positions: heritage culture belt / urban AI living-experience corridor

Land-Use Structure (MNR classification)

26 conceptual parcels seamlessly cover the submitted boundary - R&D core, blue-green network, reserved flexibility

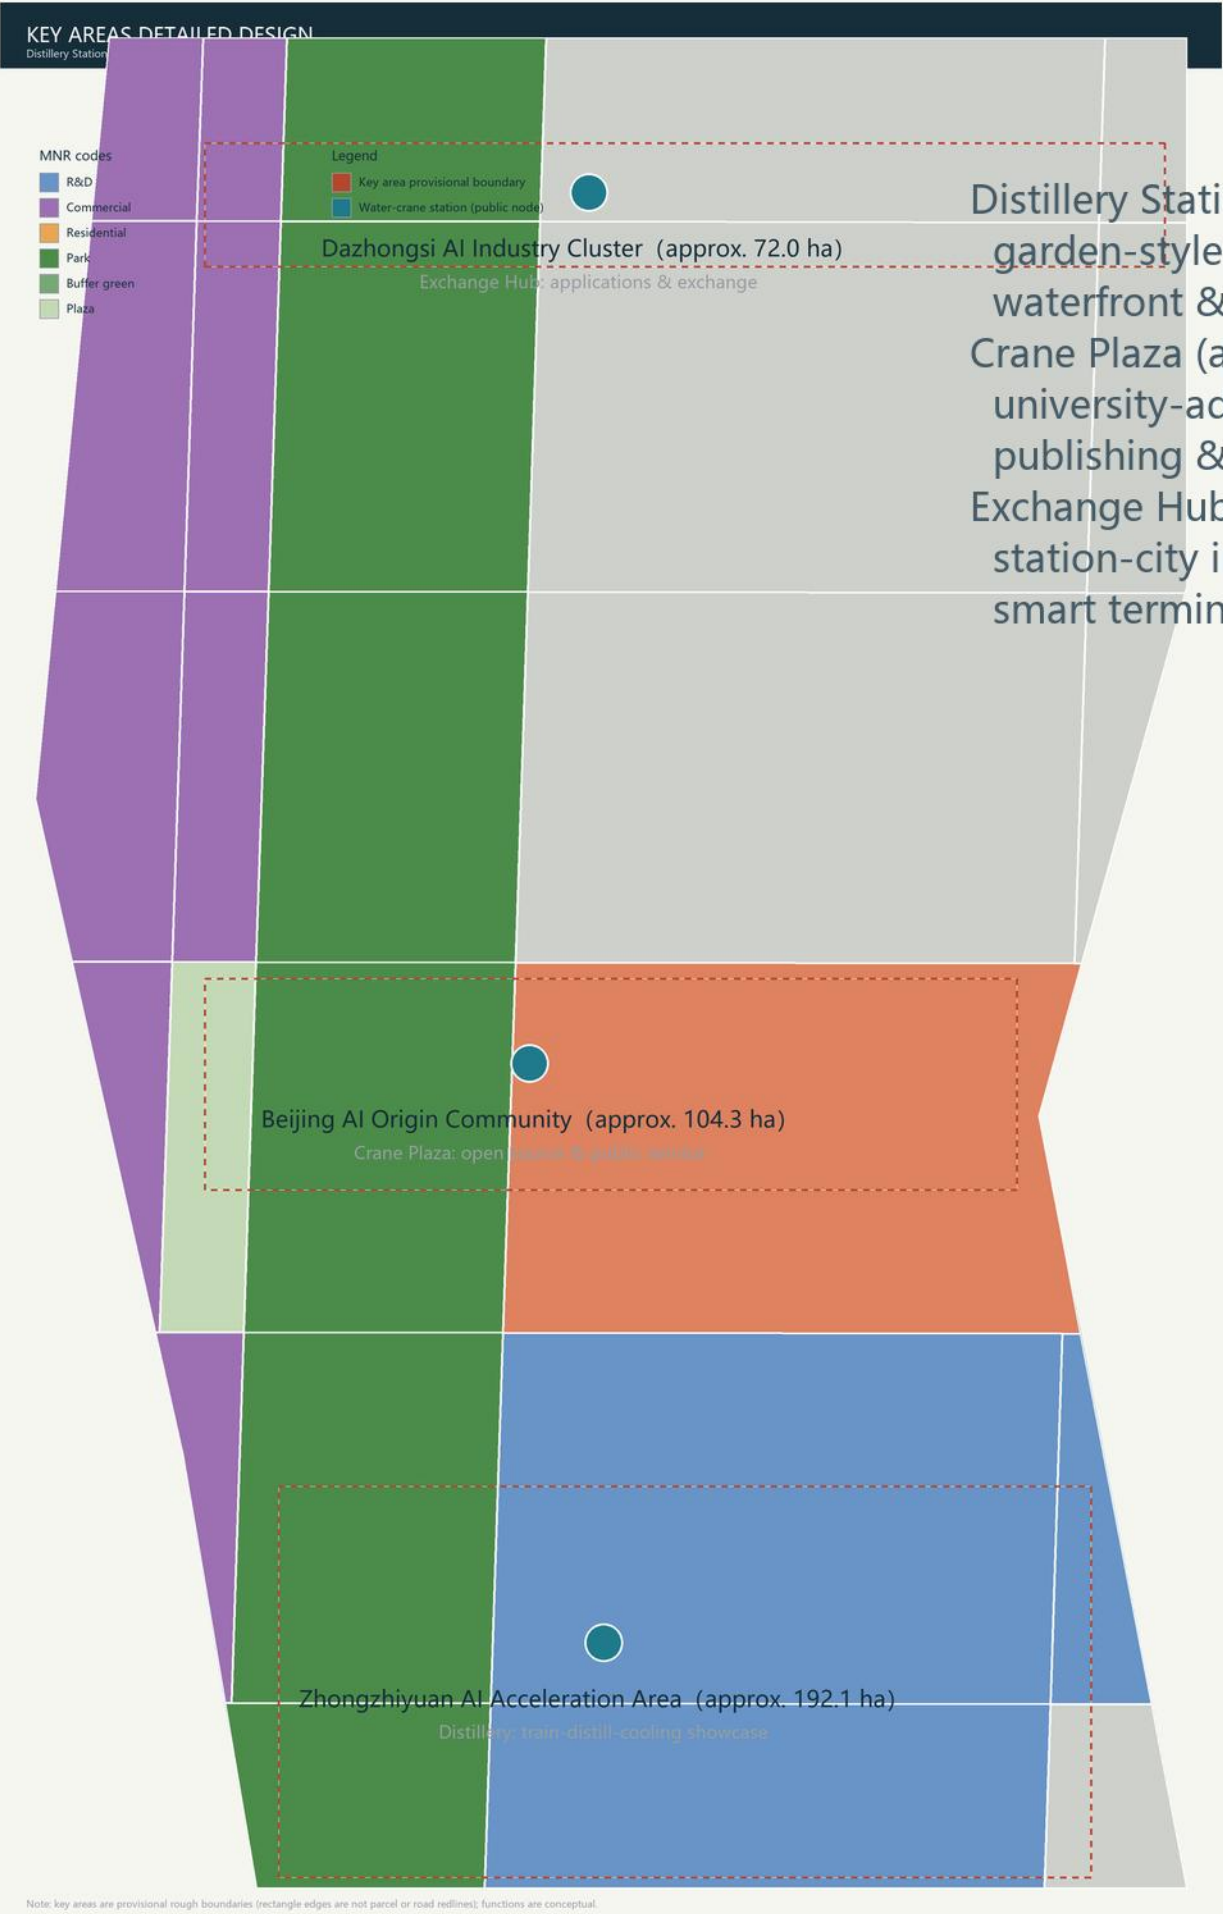

R&D 0802: distillery research & full-stack autonomy
Commercial 05: exchange hub & wing services
Residential 0701 / Community 0702: work-housing balance
Education 0804 / Culture 0803 / Medical 0806: public services
Park 1401 / Buffer 1402 / Plaza 1403: Water Spine blue-green
Reserved 16: flexibility for compute & water-cycle facilities

Retain-renovate-new logic: keep/renovate along the heritage line
renew-new around the three stations (method indicative)

Three Key Areas - Detailed Design

Distillery Station - Crane Plaza - Exchange Hub (conceptual, provisional boundary)

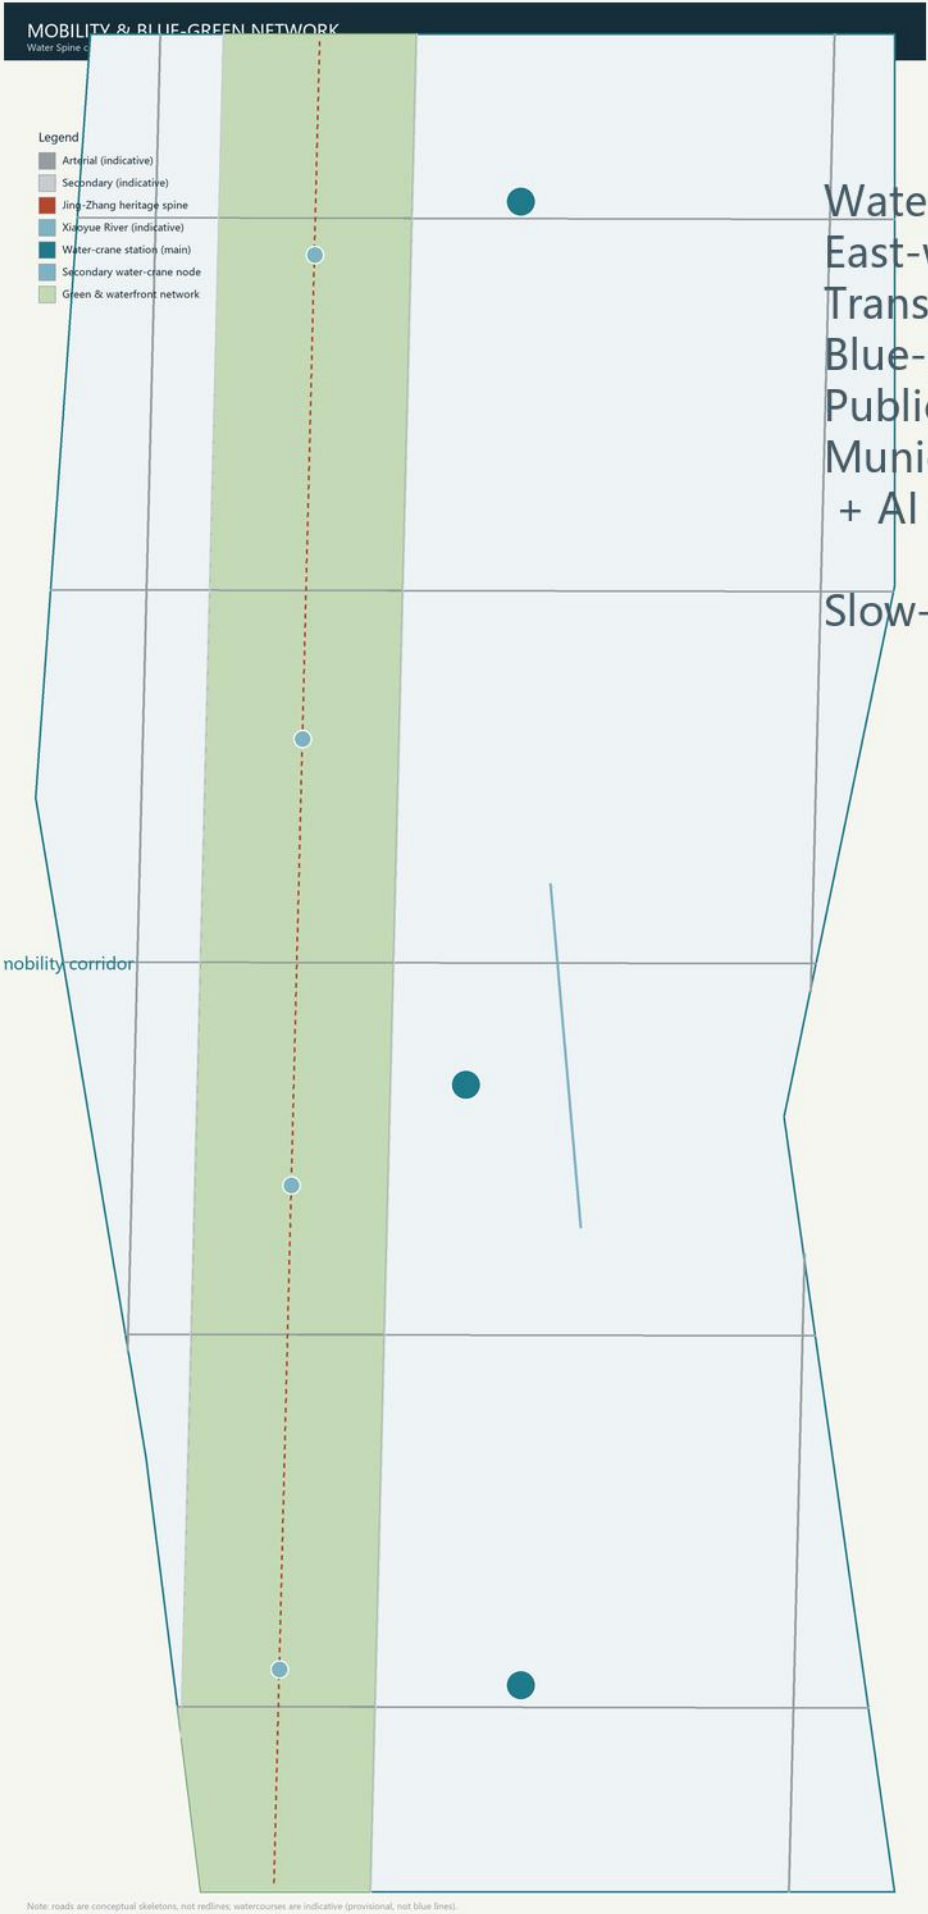

Distillery Station (approx. 192.1 ha) Zhongzhiyuan: garden-style full-stack innovation district; Qinghe waterfront & low-carbon corridor; compute-cooling test field
Crane Plaza (approx. 104.3 ha) Origin Community: university-adjacent commercialization; open-source publishing & talent services; campus-park stitching
Exchange Hub (approx. 72.0 ha) Dazhongsi: station-city integration & four-quadrant walkability; smart terminals, content consumption, international roadshows

Note: key areas are provisional rough boundaries (rectangle edges are not parcel or road redlines); functions are conceptual.

Key areas are provisional rough boundaries; rectangle edges are not parcel or road redlines.

Mobility & Blue-Green Public Space System

Spine-first - transit-integrated - microcirculation stitching - cooling-water reuse

Water Spine corridor: north-south walking + cycling
East-west stitching: connections to communities & enterprises
Transit: three stations integrated; four-quadrant walkability at L
Blue-green: green space approx. 2.90 million m2 (25.4%)
Public space: 3 main + 4 secondary water-crane nodes
Municipal cycle: cooling-water reuse + stormwater
+ AI water digital twin (conceptual)

Slow-mobility gaps and cross-ring-road nodes listed in the pro

Core Metrics Recalculation

All spatial metrics recalculated from submitted GeoJSON under EPSG:4548

METRICS & EVIDENCE

All spatial metrics recalculated from submitted GeoJSON under EPSG:4548

Overall design area

11,412,825 m2

Formula: polygon_area(site_boundary)

Source: geometry/site_boundary.geojson

Green & open space

2,900,815 m2 - 25.4%

Formula: green_area / site_area

Source: geometry/green_space.geojson

Public space

91,587 m2 - 0.8%

Formula: public_area / site_area

Source: geometry/public_space.geojson

Indicative building footprint

95,122 m2

Formula: sum(building_footprint)

Source: geometry/buildings.geojson

Water-crane public nodes

7 (3 main + 4 secondary)

Formula: count(public_space)

Source: geometry/public_space.geojson

Key areas

3 (approx. 368.4 ha)

Formula: count(key_areas)

Source: geometry/key_areas.geojson

Land-use parcels

26, gap-free

Formula: unary_union(land_use)=site

Source: geometry/land_use.geojson

Phasing coverage

Phase 1 / 2 / 3

Formula: sum(phasing_area)

Source: geometry/phasing.geojson

Note: areas recalculated under the provisional boundary; full recalculation required when official boundaries are released; regulatory indicators pending official data.

Overall design area: 11,412,825 m2

Formula: polygon_area(site_boundary)

Green & open space: 2,900,815 m2 - 25.4%

Formula: green_area / site_area

Public space: 91,587 m2 - 0.8%

Formula: public_area / site_area

Regulatory indicators (FAR/height/density/setback/redline/facility standards) pending official data.

Phasing & Renewal Project List

Phase 1 pilot - Phase 2 stitching - Phase 3 full cycle (distinct from the call period)

Phase 1 (pilot): Distillery Station, Crane Plaza, Exchange Hub + Water Spine pilot segment
Phase 2 (stitching): Xiaoyue River Network Wing, water-history trail, node component library
Phase 3 (full cycle): peripheral renewal + district-wide water-cycle municipal + AI water digital twin

ID	Project	Type	Phase
JZ-01	Water Spine slow-mobility stitching	Public space/transport	Phase 1
JZ-02	Distillery Station & cooling showcase hall	Blue-green/industry display	Phase 1
JZ-03	Crane Plaza, Origin Community	Urban renewal/public space	Phase 1
JZ-04	Exchange Hub & four-quadrant walkability	Transit integration	Phase 1
JZ-05	Xiaoyue River Network Wing waterfront	Blue-green/scenario testing	Phase 2
JZ-06	Water-crane node component library	Public space/brand	Phase 2
JZ-07	Jing-Zhang water-history trail	Culture/slow mobility	Phase 2
JZ-08	AI water digital twin platform	New infrastructure	Phase 3
Policy: urban-renewal coordination, space supply, operation mechanisms, industrial services, public participation, data governance and property synergy (conceptual, not commitments)			
Items involving ownership, funding, implementation bodies and approvals are preconditions only			

Bilingual: Chinese primary (proposal.md) with complete English counterpart (proposal.en.md);
A3/A0, HTML and figures are bilingual.

Key risks:
