

Centennial Loop · AI Origin — Jing-Zhang Origin (A0 board)

Structure

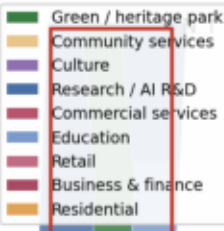

Centennial Loop · AI Origin — Overall Structure | Spine · 3 Key Areas · 2 Wings · Nodes

Sources: repository provisional rough boundaries (official_boundary=false) + design layers of this package; recalculation required once official data is published. Conceptual proposal, not an approved plan.

Land use

Land-use structure (conceptual, seamless partition, recomputed)

Sources: repository provisional rough boundaries (official_boundary=false) + design layers of this package; recalculation required once official data is published. Conceptual proposal, not an approved plan.

Key areas

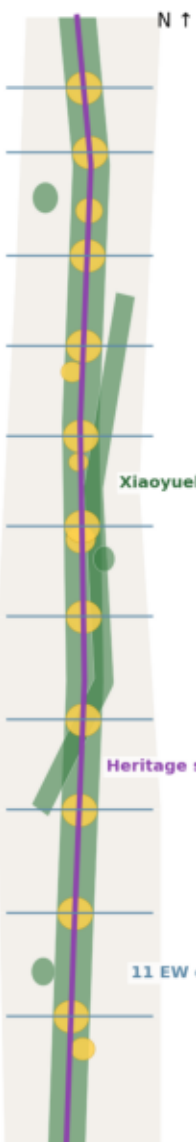

Three key areas detailed-design index (provisional geometry)

Sources: repository provisional rough boundaries (official_boundary=false) + design layers of this package; recalculation required once official data is published. Conceptual proposal, not an approved plan.

Mobility & blue-green

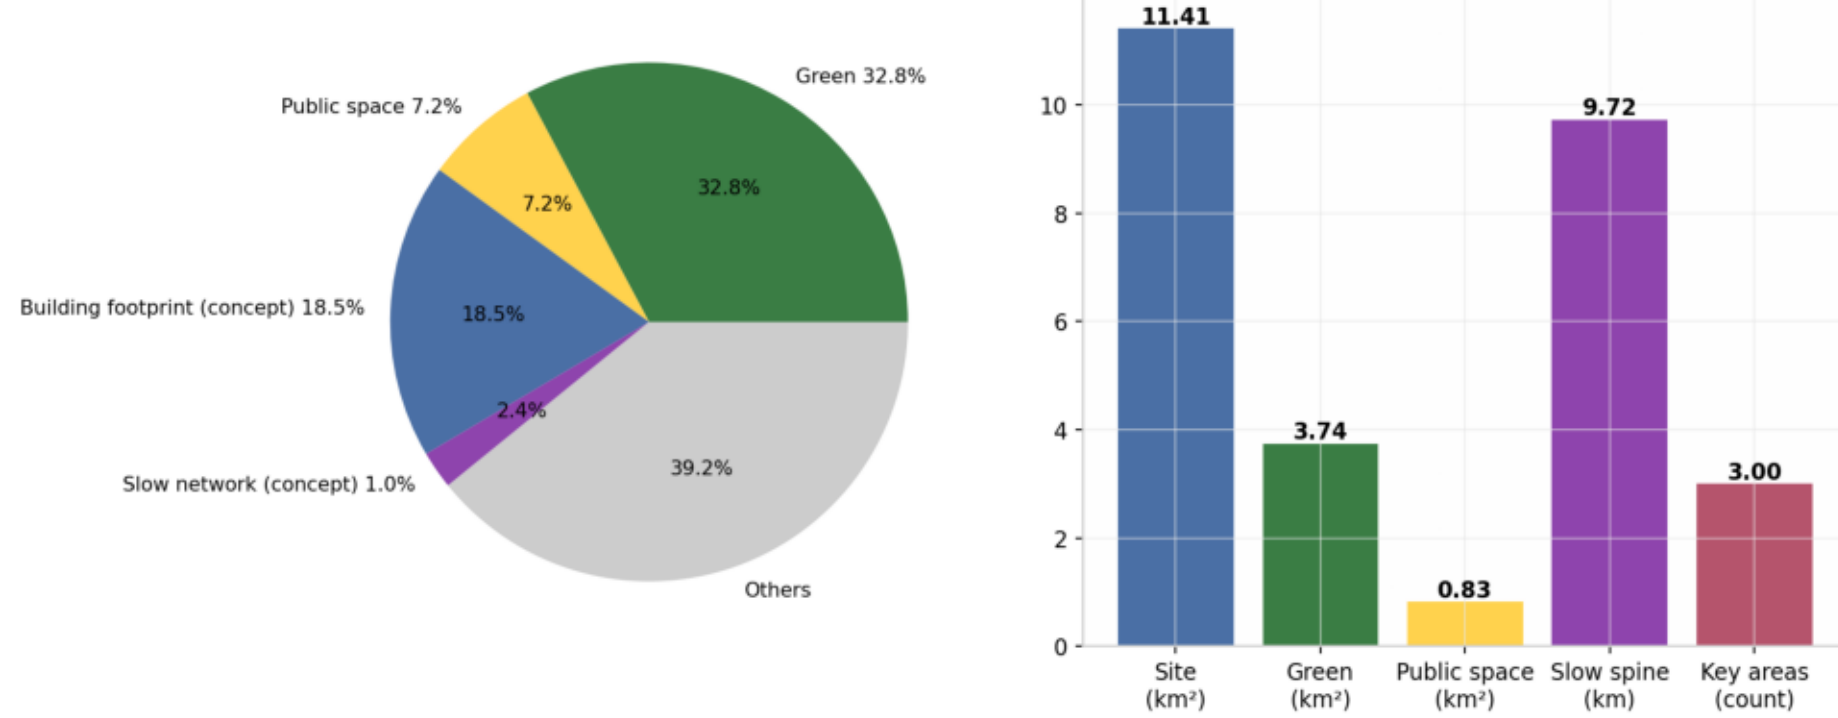

Slow-mobility & blue-green public-space composite system (conceptual)

Sources: repository provisional rough boundaries (official_boundary=false) + design layers of this package; recalculation required once official data is published. Conceptual proposal, not an approved plan.

Metrics

Metric composition (recomputed on provisional boundary) | recomputed metrics (EPSG:4548) | formulas in metrics.json

Sources: repository provisional rough boundaries (official_boundary=false) + design layers of this package; recalculation required once official data is published. Conceptual proposal, not an approved plan.

Name: Jing-Zhang Origin | Logo: herringbone geometry, rail teal-grey + spark orange

Scenarios: SCN-01~10 cards + T-01~03 validations | Personas: 5 groups

Landmarks: Origin Marker · Agent Honor Wall · Open-Source Gallery | Operation: annual system

Compliance: metrics recomputed in EPSG:4548; provisional boundary disclosed; conceptual only
