

PUBLIC THESIS A walkable acceptance line where urban AI earns trust before scale.

Evidence and site concept

Three areas, two wings, twelve scenarios

DELIVERY ORDER APO—AP3 evidence and public support precede P1—P3 digital trials.

THREE KEY AREAS

Place, project and daily operation

ORIGIN

- Problem Bank
- Open research courtyard
- Accessible co-testing

ZHONGZHIYUAN

- Transparent test gallery
- Safety sandbox
- Public defect review

DAZHONGSI

- Comparable service street
- Staffed civic room
- Algorithmic Receipt

Concept proposal · provisional geometry · human final judgment

Three bounded proving grounds

PUBLIC ACCESS + BLUE-GREEN SAFETY

Trials never displace movement, ecology or basic service

WALK

- Continuous accessible chain
- Shade, seating and water
- Verified crossings

ECOLOGY

- Ecological buffer first
- No trial in sensitive space
- Environment data only

ROBOT

- Bounded route and time
- Field safety officer
- Takeover + emergency stop

Concept proposal · provisional geometry · human final judgment

Walkability, blue-green base and test loop

EVIDENCE

E3 task authority / E2 repository inputs / E1 recomputable concept / E0 to investigate

PUBLIC FALLBACK

Staffed, paper, phone and offline service remains available when models or networks fail.

HARD STOP

Unclosed severe safety, rights, data or accessibility failure blocks scale.

PUBLIC EVIDENCE LOOP | FROM CONCEPT TO STOPPABLE TRIAL

v1.4 · PROOFLINE

EVIDENCE → CONTRACT → PILOT → RECEIPT → PUBLIC DECISION | PROTOCOL NOT RUN ≠ BUILT PROJECT

01 EVIDENCE READINESS

- E3

Task authority
Call / Taskbook / standards
- E2

Repository inputs
site pack / fact pack / registry
- E1

Recomputable concept
provisional geometry / diagrams
- E0

To investigate
controls / title / cost / baseline

Official inputs → replace + recalculate

02 FOUR MACHINE-READABLE CONTRACTS

- Delivery matrix

APO—AP7

dependency · owner · acceptance · stop
- Pilot protocols

P1—P3

baseline · control · metric · fallback
- Civic receipt

16 fields

version · evidence · human · appeal
- Rights ledger

per asset

author · media · licence · hash

03 THREE FALSIFIABLE FIRST PILOTS

- P1

Accessible route co-test

zero severe misdirection
- P2

Service-agent blind test

unclosed severe error = stop
- P3

Low-speed delivery sandbox

collision / blocked tactile path = stop

04 PUBLIC DECISION

- SCALE
- REPAIR
- PAUSE
- EXIT + RESTORE

Evidence: result card + civic receipt + minority statement. Exit can be a valid result.

FIRST 90 DAYS | LOW-REGRET PREPARATION, NOT CITYWIDE DEPLOYMENT

DAYS 0—30 VERIFY

- official-input replacement list
- stakeholder + non-AI baseline
- existing accessible task chain

DAYS 31—60 REPAIR + SUPPORT

- repair one continuous public chain
- staffed / paper / phone fallback
- synthetic-data isolated sandbox

DAYS 61—90 P1 ONLY

- G0—G2 evidence complete
- P2/P3 controlled rehearsal only
- unclosed severe issue = stop
