

Evidence and site concept

JING-ZHANG CIVIC AI LOOP

Evidence → assumption → design → metric → review

PUBLIC SPINE

- Free everyday access
- Railway heritage narrative
- Non-digital service

VERIFICATION LOOP

- Problem discovery
- Bounded sandbox
- Public experience
- Evidence deliberation

TRUST BOUNDARY

- Minimal data
- Human appeal
- Independent evaluation
- Safe exit

Concept proposal · provisional geometry · human final judgment

Three areas, two wings, twelve scenarios

ONE BELT · THREE AREAS · TWO WINGS

A spatial operating model, not a branding diagram

THREE AREAS

- AI Origin Community
- Zhongzhiyuan test stack
- Dazhongsi civic market

TWO WINGS

- Zhongguancun services
- Xiaoyuehe scenarios
- Task passport connects duties

THREE LAYERS

- Accessible public layer
- Reversible trial layer
- Urban service layer

Concept proposal · provisional geometry · human final judgment

Three bounded proving grounds

THREE KEY AREAS

Place, project and daily operation

ORIGIN

- Problem Bank
- Open research courtyard
- Accessible co-testing

ZHONGZHIYUAN

- Transparent test gallery
- Safety sandbox
- Public defect review

DAZHONGSI

- Comparable service street
- Staffed civic room
- Algorithmic Receipt

Concept proposal · provisional geometry · human final judgment

Walkability, blue-green base and test loop

PUBLIC ACCESS + BLUE-GREEN SAFETY

Trials never displace movement, ecology or basic service

WALK

- Continuous accessible chain
- Shade, seating and water
- Verified crossings

ECOLOGY

- Ecological buffer first
- No trial in sensitive space
- Environment data only

ROBOT

- Bounded route and time
- Field safety officer
- Takeover + emergency stop

Concept proposal · provisional geometry · human final judgment

Public evidence contract and first 90 days

PUBLIC EVIDENCE LOOP | FROM CONCEPT TO STOPPABLE TRIAL

EVIDENCE → CONTRACT → PILOT → RECEIPT → PUBLIC DECISION | PROTOCOL NOT RUN ≠ BUILT PROJECT

v1.4 · PROOFLINE

01 EVIDENCE READINESS

- E3** Task authority
Call / Taskbook / standards
 - E2** Repository inputs
site pack / fact pack / registry
 - E1** Recomputable concept
provisional geometry / diagrams
 - E0** To investigate
controls / title / cost / baseline
- Official inputs → replace + recalculate

02 FOUR MACHINE-READABLE CONTRACTS

- Delivery matrix**
APO—AP7
dependency · owner · acceptance · stop
- Pilot protocols**
P1—P3
baseline · control · metric · fallback
- Civic receipt**
16 fields
version · evidence · human · appeal
- Rights ledger**
per asset
author · media · licence · hash

03 THREE FALSIFIABLE FIRST PILOTS

- P1** Accessible route co-test
zero severe misdirection
- P2** Service-agent blind test
unclosed severe error = stop
- P3** Low-speed delivery sandbox
collision / blocked tactile path = stop

04 PUBLIC DECISION

- SCALE**
- REPAIR**
- PAUSE**
- EXIT + RESTORE**

Evidence: result card + civic receipt + minority statement. Exit can be a valid result.

FIRST 90 DAYS | LOW-REGRET PREPARATION, NOT CITYWIDE DEPLOYMENT

DAYS 0—30 VERIFY

- official-input replacement list
- stakeholder + non-AI baseline
- existing accessible task chain

DAYS 31—60 REPAIR + SUPPORT

- repair one continuous public chain
- staffed / paper / phone fallback
- synthetic-data isolated sandbox

DAYS 61—90 P1 ONLY

- G0—G2 evidence complete
- P2/P3 controlled rehearsal only
- unclosed severe issue = stop

Boundary · title · statutory controls · cost · operator · real performance remain UNKNOWN / PENDING

PROVISIONAL GEOMETRY · CONCEPT REVIEW ONLY · NOT STATUTORY CONTROL
