

CITY ALONG THE JING-ZHANG LINE

Design judgment

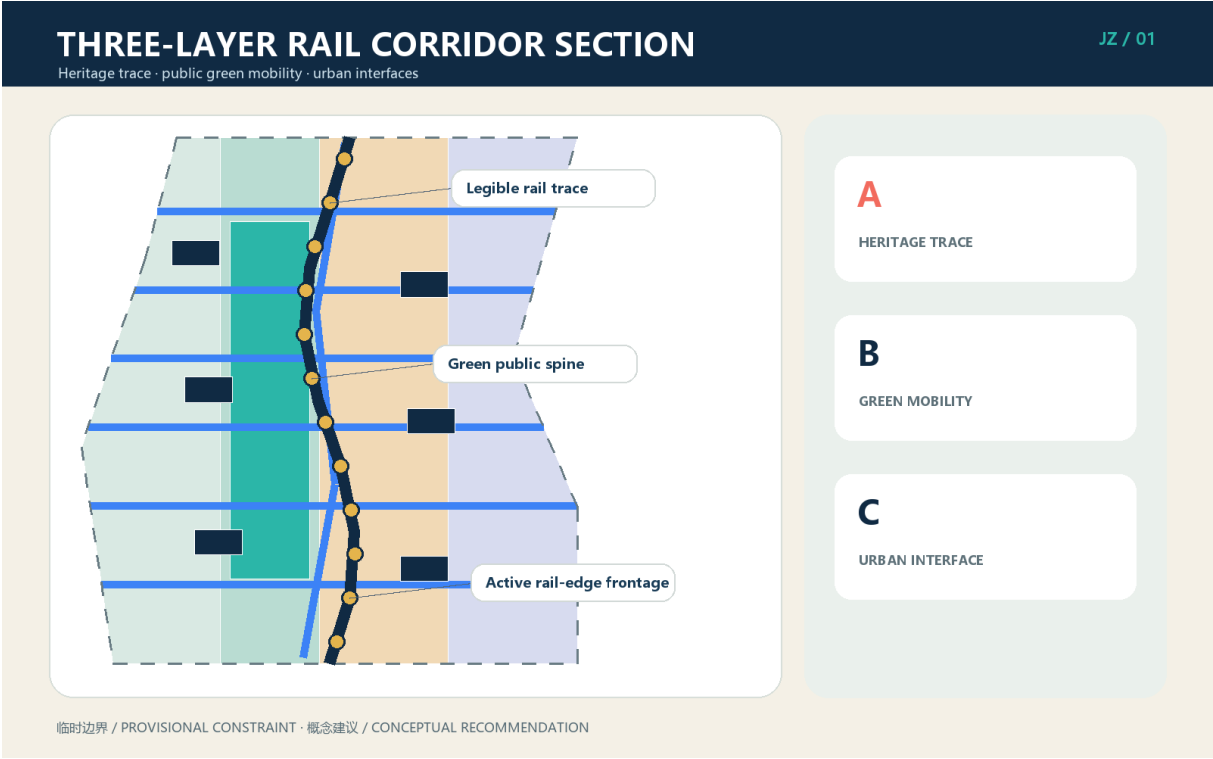

Railway is the spatial skeleton: one longitudinal heritage spine, six transverse seam zones, and three urban segments.

CITY ALONG THE JING-ZHANG LINE

Corridor section

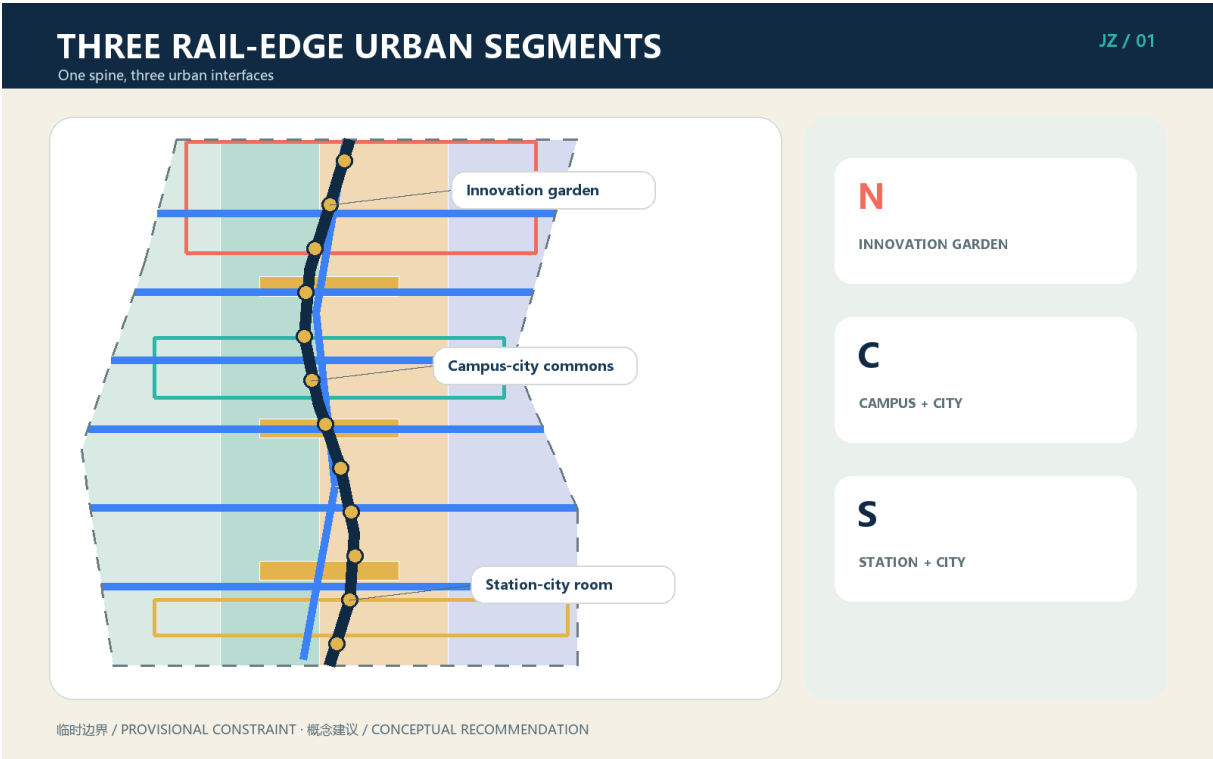

Heritage trace, public green mobility, and active urban interfaces remain distinct and coordinated.

CITY ALONG THE JING-ZHANG LINE

Three key-area segments

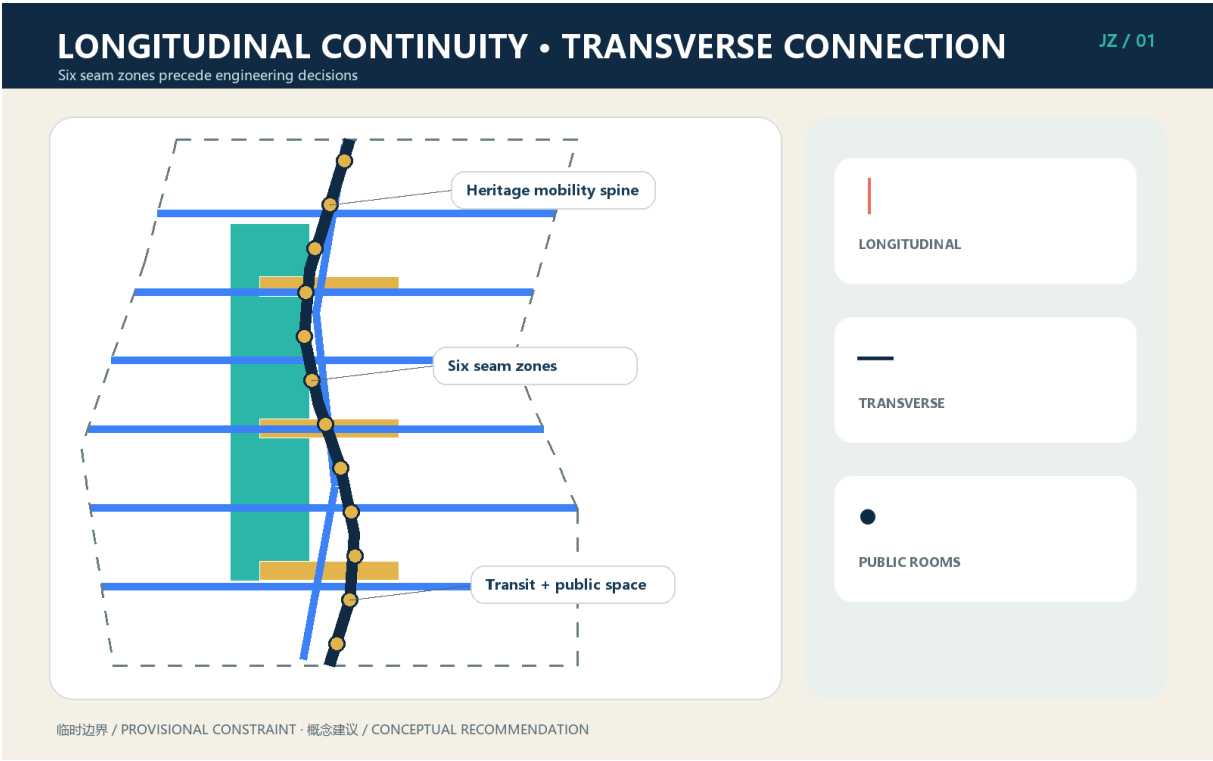

North: innovation gardens. Centre: campus-city integration. South: station-city public rooms.

CITY ALONG THE JING-ZHANG LINE

Mobility + blue-green

Longitudinal walking continuity and six transverse urban connections precede any engineering-form decision.

CITY ALONG THE JING-ZHANG LINE

Evidence + implementation

Official railway, planning, and survey data trigger full-package recalculation and professional development.
