

Smart Rail Weaves the City

A four-line symbiosis system for the Centennial Jing-Zhang AI Innovation Belt

01 Four lines, one weave: from heritage time to accountable operations

Jing-Zhang rail heritage is the temporal warp ; AI innovation, rail-walking-blue-green continuity, and accountable governance form the weft. Three key areas test complementary operating models.

- 01

Rail heritage time
Verify history; keep interventions reversible and low-impact.
- 02

AI innovation & industry
Open source → evaluation → production → adoption → review.
- 03

Rail–walking–blue-green
Interchange, accessibility, shade, and public-space continuity.
- 04

Accountable governance
Purpose, minimum data, Human Review, grievance, and stop rules.

3 KEY AREAS / 三处重点区

1 → 2 → 3 Open evaluation → daily co-testing → enterprise adoption feedback

940842546

05 Three evidence classes: announced approximations, provisional calculations, authored counts

ANNOUNCED APPROXIMATIONS	PROVISIONAL DESIGN CALCULATIONS	AUTHORED OUTPUT COUNTS
≈ 43.6 km² Coordinated research area	11.413 km² Provisional overall polygon	6 design personas
≈ 11.4 km² Overall design area	12.34% Concept green-space ratio	12 scenario cards
≈ 368.4 ha Three key areas combined	7.33% Concept public-space ratio	4 industrial test scenarios
	31.08 ha Scaffold building footprint	4 concept landmarks
Describe task scale only; they do not generate precise polygons.	All low-confidence; recalculate after official geometry and professional base data arrive.	13 documented assumption groups They are stop conditions, not deferred fine print.

CONCEPT DESIGN • PROVISIONAL GEOMETRY • NOT FOR MEASUREMENT, APPROVAL, OR IMPLEMENTATION

940842546

02 One spine • three knots • two wings • many stitches • one ledger

CONCEPT DESIGN • PROVISIONAL GEOMETRY • NOT FOR MEASUREMENT, APPROVAL, OR IMPLEMENTATION

940842546

FOUR LINES / 四线不可拆分

- Rail heritage time

Verify history; keep interventions reversible and low-impact.
- AI innovation & industry

Open source → evaluation → production → adoption → review.
- Rail–walking–blue-green

Interchange, accessibility, shade, and public-space continuity.
- Accountable governance

Purpose, minimum data, Human Review, grievance, and stop rules.

Three key areas: differentiated roles, reciprocal feedback

03 Three key areas: differentiated roles, reciprocal feedback

CONCEPT DESIGN • PROVISIONAL GEOMETRY • NOT FOR MEASUREMENT, APPROVAL, OR IMPLEMENTATION 940842546

ADOPTION AND FAILURE RETURN UPSTREAM

01 ZHONGZHIYUAN
Reproducible evaluation and safety review

02 AI ORIGIN
Daily co-testing and human fallback

03 DAZHONGSI
Adoption conditions and international exchange

No duplicated roles; no equipment, investment-promotion, or station-engineering promise.

12 SCENARIOS / 4 INDUSTRIAL TESTS

TV-01 Reproducible eval	TV-02 Edge & access	TV-03 Controlled robots	TV-04 Civic red-team
SC-05 Walking guide	SC-06 Heritage markers	SC-07 Talent assistant	SC-08 Offline fallback
SC-09 Enterprise matching	SC-10 Bilingual guide	SC-11 Blue-green upkeep	SC-12 Public ledger

Rail–walking–blue-green: repair continuity before engineering

04 Rail–walking–blue-green: repair continuity before engineering

CONCEPT DESIGN • PROVISIONAL GEOMETRY • NOT FOR MEASUREMENT, APPROVAL, OR IMPLEMENTATION

940842546

Heritage stitch
Time marker → park entrance

Innovation stitch
Collaboration → testing → release

Daily-life stitch
Community service → rail interchange

Ecological stitch
Shade → stormwater → active travel

Five gates before any pilot expansion

Purpose • Minimum data • Human takeover •
Grievance/correction • Exit disposition

If one is missing, do not enter public space

05 Three evidence classes: announced approximations, provisional calculations, authored counts

ANNOUNCED APPROXIMATIONS	PROVISIONAL DESIGN CALCULATIONS	AUTHORED OUTPUT COUNTS
≈ 43.6 km² Coordinated research area	11.413 km² Provisional overall polygon	6 design personas
≈ 11.4 km² Overall design area	12.34% Concept green-space ratio	12 scenario cards
≈ 368.4 ha Three key areas combined	7.33% Concept public-space ratio	4 industrial test scenarios
	31.08 ha Scaffold building footprint	4 concept landmarks
Describe task scale only; they do not generate precise polygons.	All low-confidence; recalculate after official geometry and professional base data arrive.	13 documented assumption groups They are stop conditions, not deferred fine print.

940842546

PUBLIC-SCENARIO GATES

Purpose limitation
Minimum data
Human takeover
Grievance/correction
Exit disposition

REGISTER → CLASSIFY → TEST → AUDIT → RENEW / EXIT

If accountable ownership, Human Review, grievance/correction, or exit is missing, the scenario does not launch.

All building, road, bridge/tunnel, utility, investment, promotion, and operator claims await formal data and professional procedures.
