

ONE MEMORY SPINE · THREE STEWARDSHIP STATIONS · TWO SERVICE WINGS

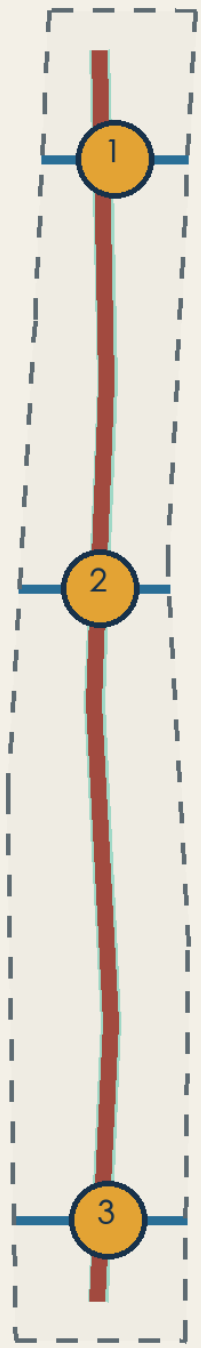

AsaZhou923 · OpenAI Codex · Jing-Zhang Stewardship Compact · v0.1

Jing-Zhang Stewardship Compact | Overall Concept

Provisional computation frame | Conceptual recommendation | Recompute with official data

JZ-SC
v0.1

One memory spine · Three stewardship stations · Two service wings

01 Four ledgers

Space-time access, data-compute-energy, maintenance-repair and public return

02 One assembly

Residents, service workers, accessibility users, operators and independent reviewers share rights to question, appeal and recommend a stop.

03 One public receipt

Every pilot discloses purpose, resources, accountable owner, baseline, incidents, public return and exit decision.

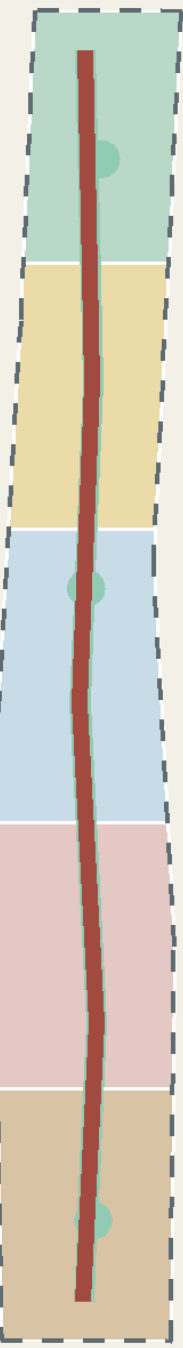

Every pilot leaves a public receipt.

Public benefit over spectacle: human authority by design: evidence before scale.

Stewardship Structure and Land-Use Partition

Provisional computation frame | Conceptual recommendation | Recompute with official data

JZ-SC
v0.1

AI service exchange

Talent and community life

AI R&D and supervised proof

Learning and translation

Heritage blue-green stewardship

01 One shared-boundary split

Five land-use classes are split once from the same provisional boundary for complete topology. This is replaceable concept zoning: not approved parcels.

02 Compact embedded in space

Each station treats human service, public assembly, maintenance responsibility and pilot exit as spatial infrastructure rather than fine print.

Three Stewardship Stations | Key-Area Roles

Provisional computation frame | Conceptual recommendation | Recompute with official data

JZ-SC
v0.1

01 Trustworthy Testing Station

Model release · standards · public receipts

Boundaries, buildings, roads and engineering feasibility all remain subject to official data and professional development.

02 Learning and Transfer Station

Shared learning · open source · talent services

Boundaries, buildings, roads and engineering feasibility all remain subject to official data and professional development.

03 Urban Deliberation Station

Assembly · reversible storefront · transit front room

Boundaries, buildings, roads and engineering feasibility all remain subject to official data and professional development.

FOUR LEDGERS · ONE ASSEMBLY · ONE RECEIPT

Space-time access; data, compute and energy; maintenance and repair; and public return. A multi-party assembly. Every pilot discloses purpose, baseline, accountability, incidents, return and exit decision.

HUMAN AUTHORITY BUILT IN

Residents, service workers, access users, operators and independent reviewers can question, appeal, review and recommend a stop. Algorithms only generate alternatives.

3 STATIONS

01 Trustworthy Testing Station

02 Learning and Transfer Station

03 Urban Deliberation Station

Basis and rights: official announcement, cleared agent taskbook, repository standards snapshots and six official case pages. Two concept images were created with OpenAI Codex built-in ImageGen; they are not site observations, public opinion or approved work.

05 | JZ-SC-01 ACCESSIBLE MOBILITY STEWARDSHIP

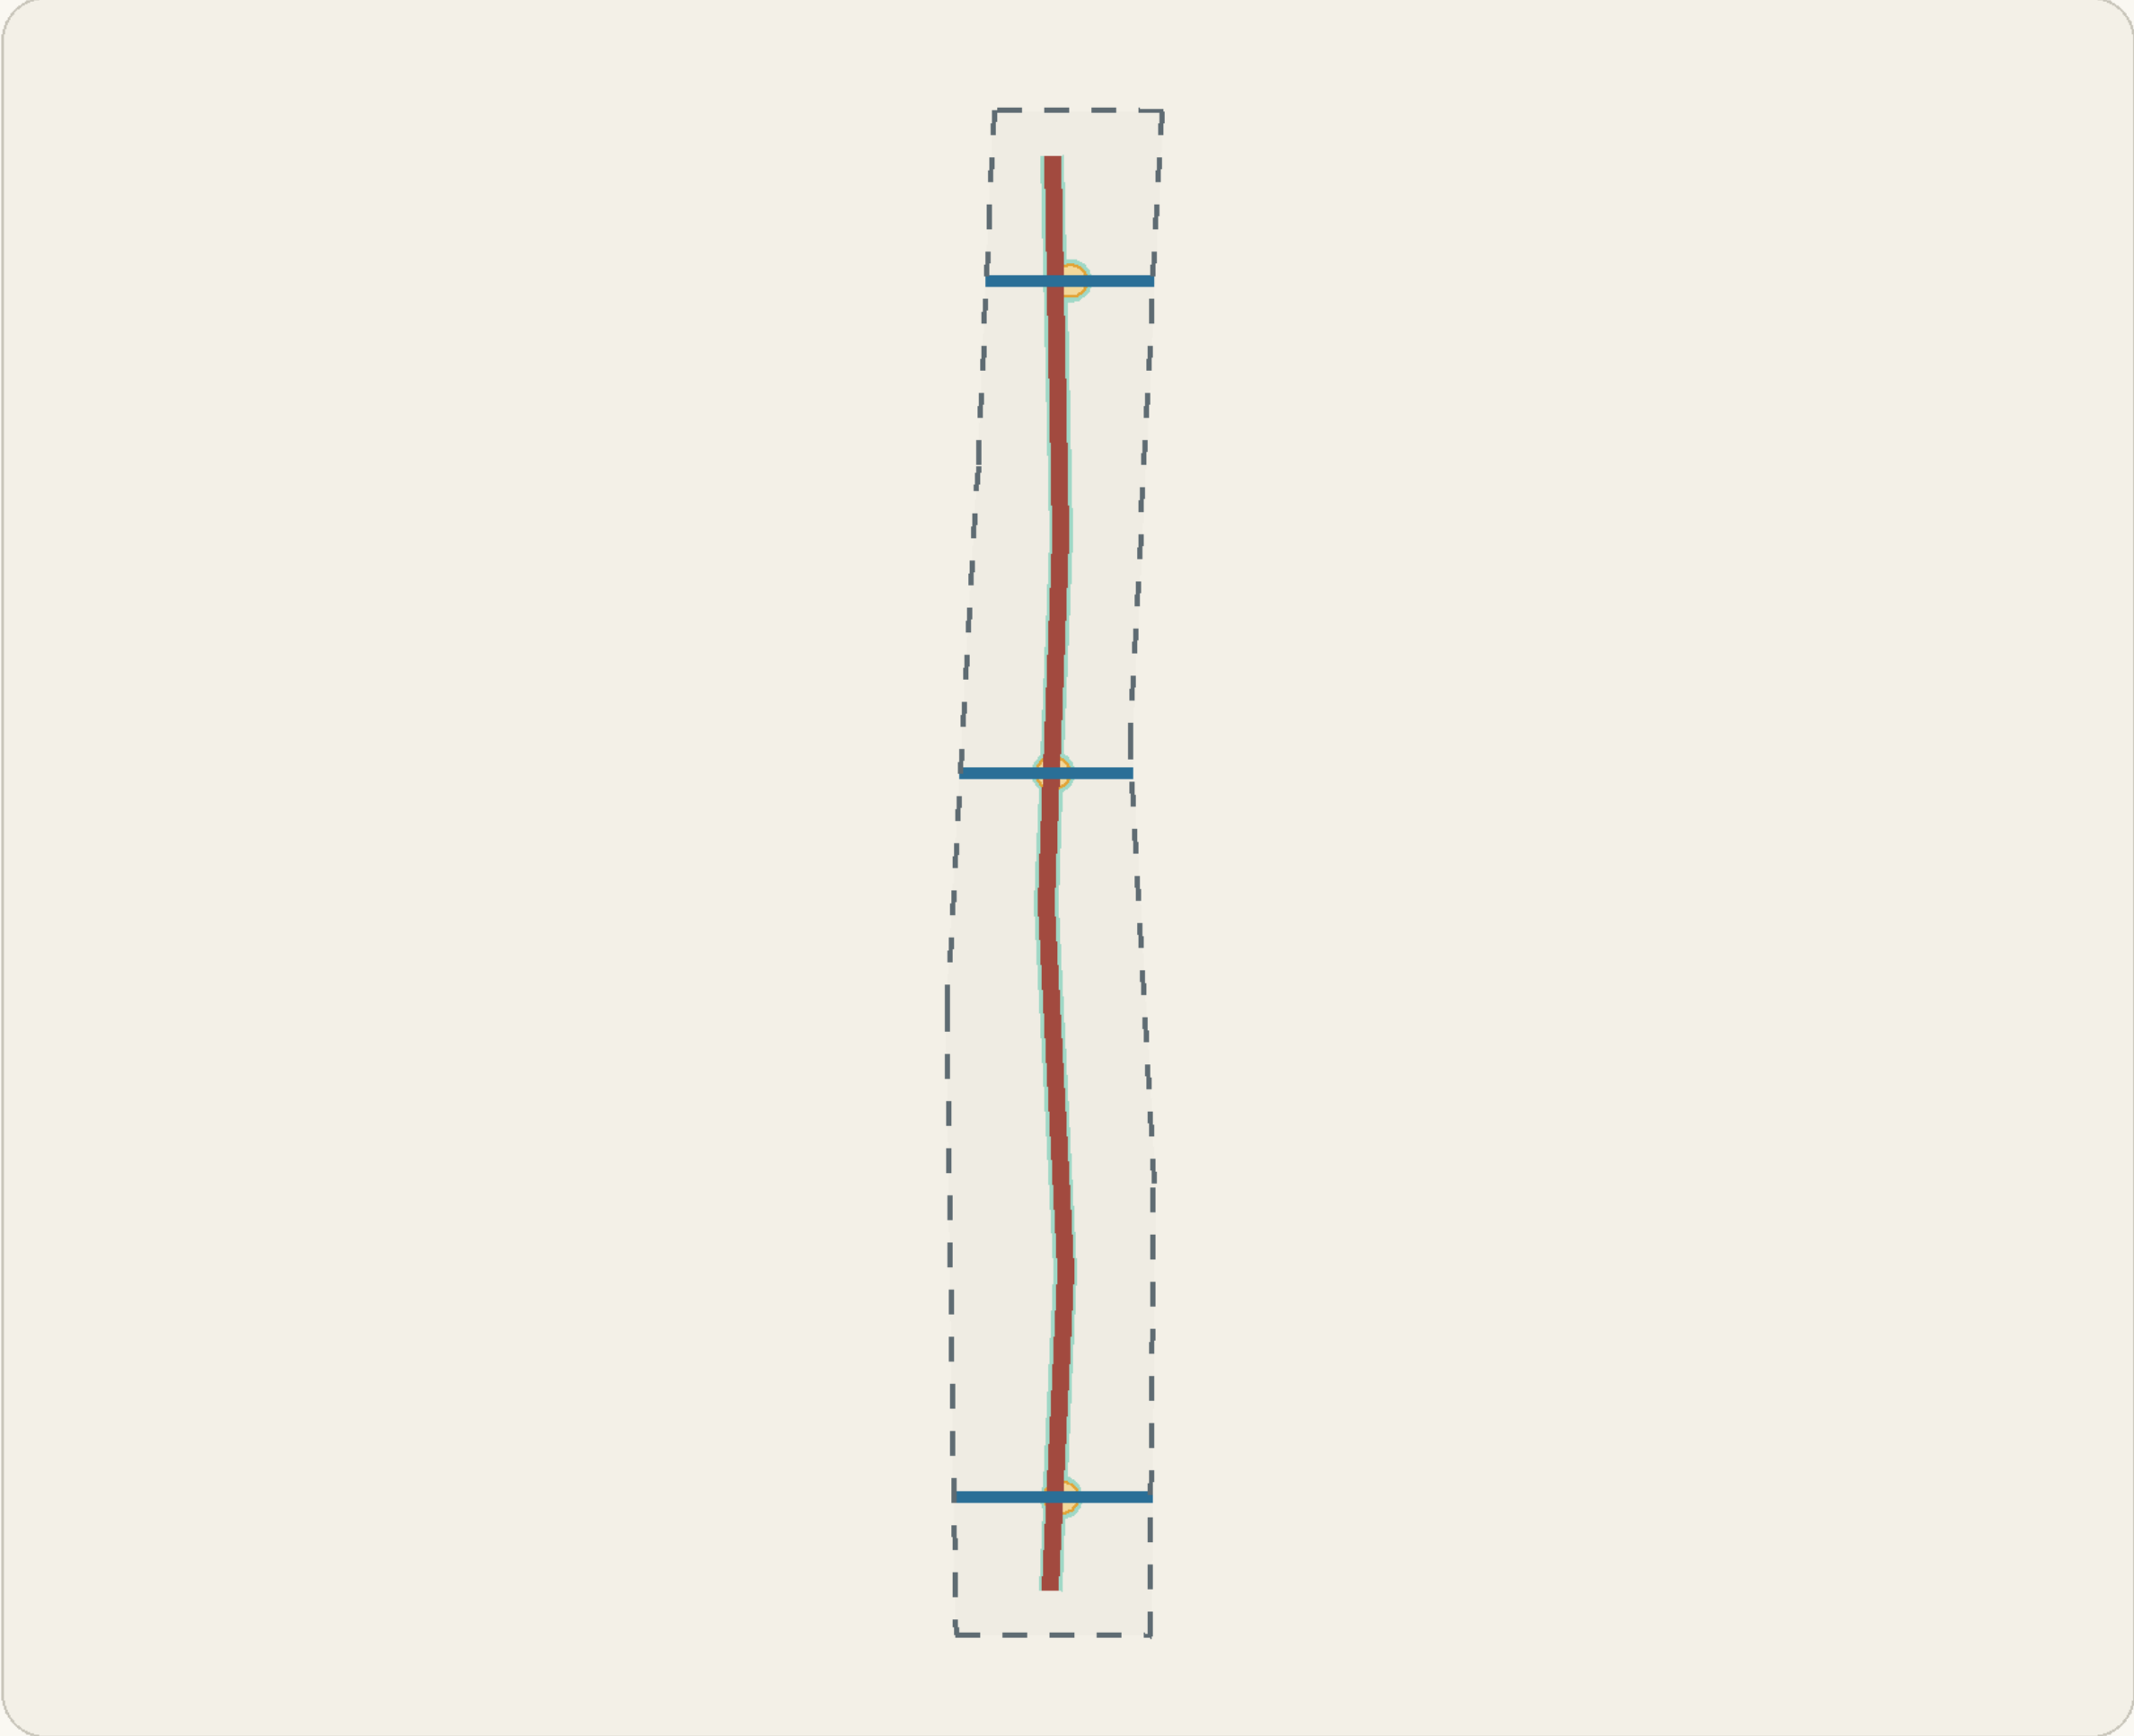

AsaZhou923 · OpenAI Codex · Jing-Zhang Stewardship Compact · v0.1

Walking and Cycling × Blue-Green Stewardship × JZ-SC-01

Provisional computation frame | Conceptual recommendation | Recompute with official data

JZ-SC

v0.1

01 Flagship pilot

JZ-SC-01 accessible-mobility stewardship pilot: a non-digital alternative, human guide, aggregate incident log, field verification and safety stop threshold coexist.

02 Not an engineering alignment

Lines show connection priorities and experiential continuity only. Redlines, bridges, tunnels, station interfaces and traffic operations require official data and specialist review.

03 Four gates

Scope and consent

Controlled trial

Public receipt

Scale or exit

Core Metrics and Evidence Chain

Provisional computation frame | Conceptual recommendation | Recompute with official data

JZ-SC

v0.1

Provisional model area

11.41 km²

Geometry-derived; not an official boundary

Concept green ratio

12.2%

Pending heritage, water and official-boundary checks

Concept public-space ratio

4.6%

Expresses public accountability space only

Scenarios / tests / personas / landmarks

12 / 4 / 6 / 4

Content counts; not implemented commitments

4 ledgers

Space-time

Data / compute / energy

Maintenance / repair

Public return

Sources

GeoJSON

Metrics

Figures

Four-gate self-check

JZ-SC-01

Non-digital alternative + human service + aggregate events + field review. Biometrics and continuous individual traces are excluded. A safety-critical fault, privacy breach, missing human service or unresolved access barrier pauses the pilot. The public return is repaired barriers and an open audit.

11.41 km²

provisional frame

12.2%

concept green ratio

4.6%

concept public-space ratio

12 / 4 / 6 / 4

scenarios / tests / personas / landmarks

12 SCENARIOS

01 Accessible mobility stewardship

02 Quiet route

03 Century trace mirror

04 Shared learning table

05 City problem teaming

06 Trustworthy model clinic

07 Resource responsibility passport

08 Small-business stewardship desk

09 Reversible AI storefront

10 Microclimate stewardship

11 Slow coexistence trial

12 Neighborhood deliberation model

KNOWN UNKNOWNNS

Remain unknown: FAR, total floor area, building density, road area/ratio, height and setbacks. Without official boundaries, parcels, existing buildings, road redlines and approved controls, precision would be false.

Official boundaries, heritage/river controls, utilities/fire, roads/stations, ownership and delivery bodies remain pending. All drawings express conceptual relationships, not official redlines or engineering alignments.
