

FIG-01

Site Overview | Maintenance Debt into a Distributed Intervention Fabric

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

Four joined synthetic golden assets demonstrate method only; interventions are distributed across three scopes, with recovery, accountability, retirement/reuse, and cross-zone resource specialisms.

service fabric repair inlay provisional

Sources/evidence: OFFICIAL-ANNOUNCEMENT; geometry/*;geojson; maintenance-debt-map.json [SYNTHETIC]

THREE SCOPE LEVELS

- 43.6 km² coordination | capability
- ≈11.413 km² overall | responsibility
- 368.4 ha key areas | verification

ZONE SPECIALISMS

- 1 Zhongzhiyuan: maintainability/recovery
- 2 AI Origin: fallback/accountability
- 3 Dazhongsi: retirement/repair/reuse

RESPONSIBILITY LENS / MECHANISM CHECK

BOUNDARY STAMP | Provisional, conceptual, synthetic; no statutory, approval, field, or implementation claim.

Seven cells, two clocks, and repairable buildings

FIG-02

Land-Use Structure | Seven Non-linear Service-Life Cells + Two Clocks

Seven cells encode repair, care, learning, and reuse actions—not statutory land use; the earlier clock triggers human review only.

repair/action slow assets fast assets

Sources/evidence: geometry/land_use.geojson; two-clock-interface.json; MNR-LAND-USE [CONCEPTUAL]

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

Allo
Pen

BOUNDARY STAMP | Provisional, conceptual, synthetic; no statutory, approval, field, or implementation claim.

Seven non-linear service-life cells

Slow and fast clocks trigger human review only

Statutory use, intensity, and ownership remain pending

Recovery, civic fallback, retirement and reuse

01 · ZHONGZHIYUAN

ZONE-01

Zhongzhiyuan | Durability Foundry for Model / Edge Rollback

Concept plan, section, and service flow show isolated testing, human stop, rollback recertification, and night maintenance—without claiming existing buildings or engineering dimensions.

PROV-KEY-001 × BLDG-001 → SYN-ASSET-ZZY-001 → MDEBT-ZZY-001 · 3.35 → SYN-RECEIPT-ZZY-001

SYN-CLOSING-ZZY-001 · 4 LEDGERS CLOSED SEPARATELY → SYN-ESCROW-ZZY-001 · ESCROW 20 + 7 – 9 = 18

CONCEPT SECTION: isolated yard / openable service layer / night-maintainer room

ordinary/fallback stop/repair destination

Sources/evidence: closure-input.fixtures.json; geometry/key_areas.geojson; implementation-risk-register.json [SYNTHETIC / PROVISIONAL]

DIRECTIONAL CONCEPT | PROVISIONAL BOUNDARIES | SYNTHETIC, NOT FIELD DATA

SERVICE FLOW

01 INJECT

02 SAFE STOP

03 ROLLBACK

04 RECERTIFY

P0—P3 GATE

ACCEPT: Rollback reproducible · human stop works · four ledgers=0

STOP on real-service spillover / failed rollback / budget breach

v0.3 · 2026-08-11

Zhongzhiyuan: maintainability and recovery

AI Origin: ordinary service and accountability

02 · AI ORIGIN

ZONE-02

Beijing AI Origin Community | Civic Fallback and Accountability Commons

Concept court, service section, and dual-route flow preserve no-phone, offline, and accessible service without treating residents, facilities, or capacity as verified facts.

PROV-KEY-002 × PUBLIC-002 → SYN-ASSET-ORIGIN-001 → MDEBT-ORIGIN-001 · 3.10 → SYN-RECEIPT-ORIGIN-001

SYN-CLOSING-ORIGIN-001 · 4 LEDGERS CLOSED SEPARATELY → SYN-ESCROW-ORIGIN-001 · ESCROW 20 + 7 – 9 = 18

SERVICE FLOW

01 REQUEST

02 STAFF/PAPER

03 APPEAL

04 RECERTIFY/EXIT

P0—P3 GATE

ACCEPT: Staff/paper equivalence · appeal resolvable · four ledgers=0

PAUSE if AI gates eligibility / fallback fails / users are excluded

v0.3 · 2026-08-11

BOUNDARY STAMP | Provisional, conceptual, synthetic; no statutory, approval, field, or implementation claim.

Dazhongs: retirement, repair, and reuse

Mobility, blue-green care, night work, and offline fallback

FIG-04

Mobility + Blue-Green Commons | Ground-Service Weave and Repair Section

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

Ordinary non-digital paths come first; repair access, night safety, and climate care share the ground through time, width, and physical wayfinding.

Sources/evidence: geometry/roads.geojson; green_space.geojson; public_space.geojson; A-MOBILITY-001 [CONCEPTUAL]

Ordinary and non-digital routes come first

Repair access is short, slow, and timed

Night safety and blue-green care are reviewed together

FIG-05

Metrics + Evidence | Receipt → Four Separate Ledgers → Escrow → Closure

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

SIM-003 and SIM-004 are the only two non-successes; SIM-016 restores successfully with its audit blocker retained.

Phasing, task coverage, sources, assumptions, and gaps

IMP-01

Implementation + Phasing | RACI, 23-Task Coverage, and Source-Gap Gates

P0–P3 are obligation and stop gates, not a committed schedule; each phase aligns accountable roles, receipts, task coverage, and official-data gaps on one decision surface.

RACI	OWNER / VETO	EVIDENCE	GAP / TRIGGER
R	operator + maintainer	event journal / receipt	real asset + maintenance baseline
A / VETO	human authority	authorization / stop signature	legal authority + accountable owner
C	public + accessibility	fallback / appeal record	consented field review
I	independent reviewer	oracle / hashes / ledger closing	official controls + approvals

OFFICIAL • required for P3

PROVISIONAL · recalculate geometry

23
MANDATORY
TASKS

9 STANDARDS

4 JOINED GOLDEN ASSETS

stop gate evidence source gap

Sources/evidence: geometry/phasing.geojson; compliance_matrix.json; design_depth_matrix.json; sources.json; assumptions.json [CONCEPTUAL]

v0.3 · 2026-08-11

SETTLEMENT EVIDENCE CHECK

RISK / VETO

Ten implementation risks retain owner, trigger, mitigation, and review date; the human authority keeps stop power

SOURCE GAPS

OFFICIAL enables P3; PROVISIONAL recalculates; SYNTHETIC tests rules only; UNKNOWN is never zero-filled.

VERIFICATION EDGE

Four joined golden assets are accepted; twenty negative fixtures reject by oracle; Node --check must reproduce bytes

BOUNDARY STAMP | Provisional, conceptual, synthetic; no statutory, approval, field, or implementation claim

P0 evidence baseline → P3 selective integration

23 tasks, 15 depth items, 9 standards mapped

Recalculate nine layers when official inputs arrive
