

The Twin-Rail Symbiosis Belt: Urban Design for the Centennial Jing-Zhang AI Innovation Belt

Twin-Rail Symbiosis Belt (TRSB) · Hyp6666

Based on public / cleared sources; provisional boundary; official redline pending. A conceptual-study package, not an approved regulatory plan.

Twin-Rail Symbiosis Belt — Overview

Iron-Rail heritage x Light-Rail innovation x three key areas · land use (provisional)

Derived from geometry/*.geojson and metrics.json; official redline pending recalculation.

Fig 0-1 Overall concept: Iron-Rail heritage x Light-Rail innovation x sleeper corridors

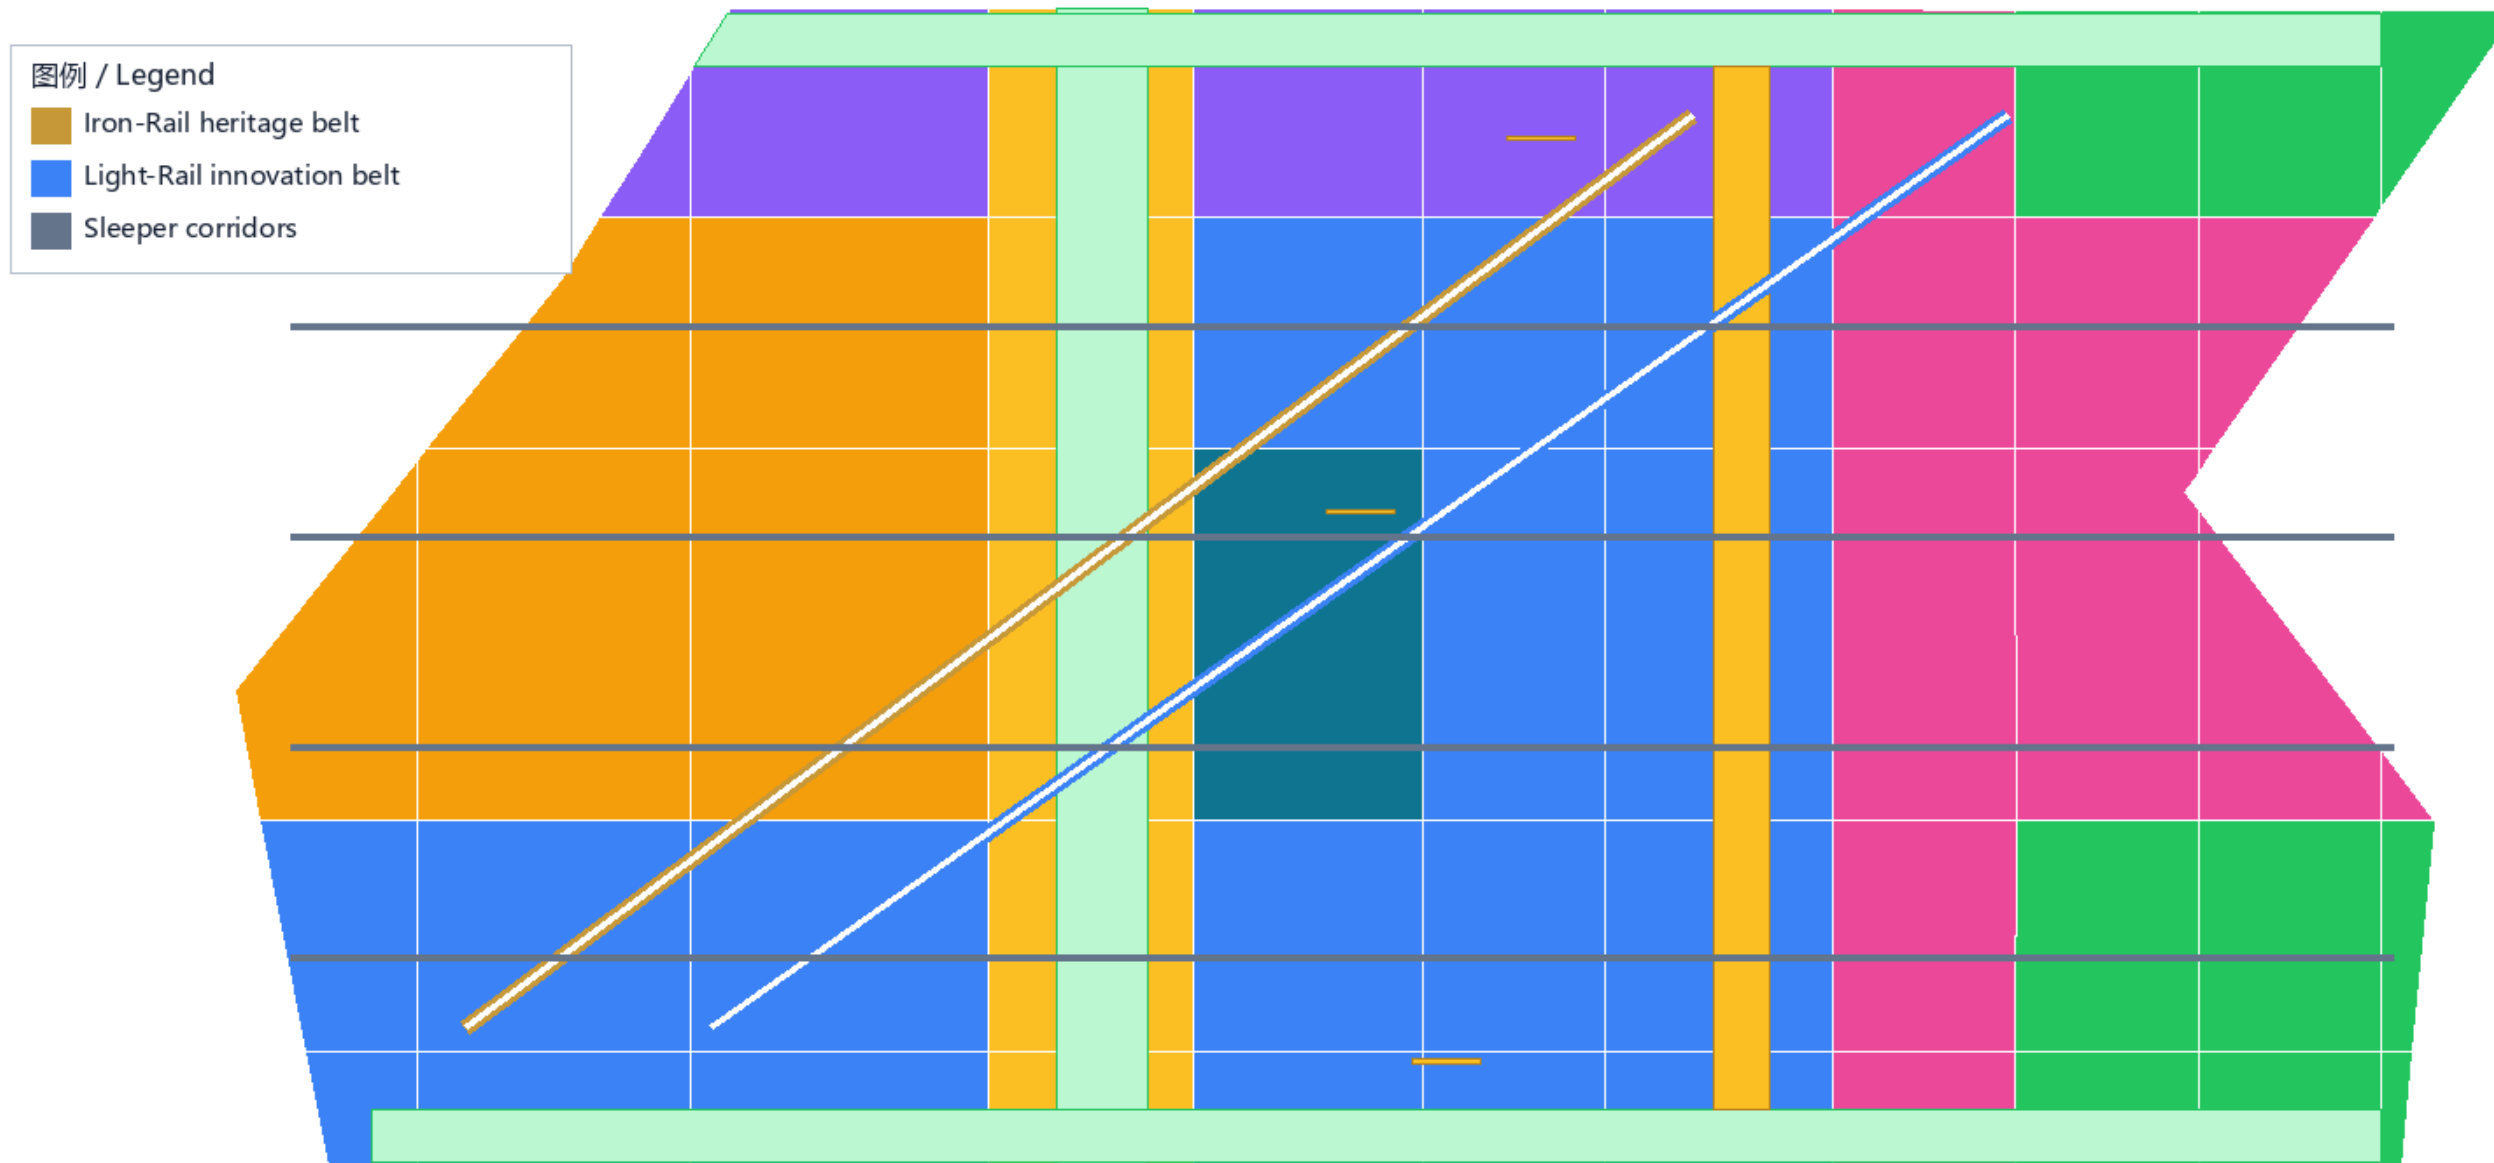

1. 总体概念与三层范围 / Overall Concept & Three-Level Scope

Using the centennial Jing-Zhang twin rails as prototype: Iron Rail carries heritage (Culture Belt), Light Rail carries AI innovation (Innovation Belt), sleepers are slow-traffic and blue-green corridors (Life Experience Belt). Three areas / two wings: Zhongzhiyuan (Acceleration Rail), AI Origin Community (Origin Rail), Dazhongsi (Application Rail).

Scope	Area	Task
Coordinated Research Area	43.6 km²	Industry ecosystem, future city form, naming/logo
Overall Design Area	11.4 km²	Regulatory-plan-depth renewal, transport, character
Key Detailed-Design Area	368.4 ha	Detailed design of the three key areas

Twin-Rail Five-Chain Land-Use Structure

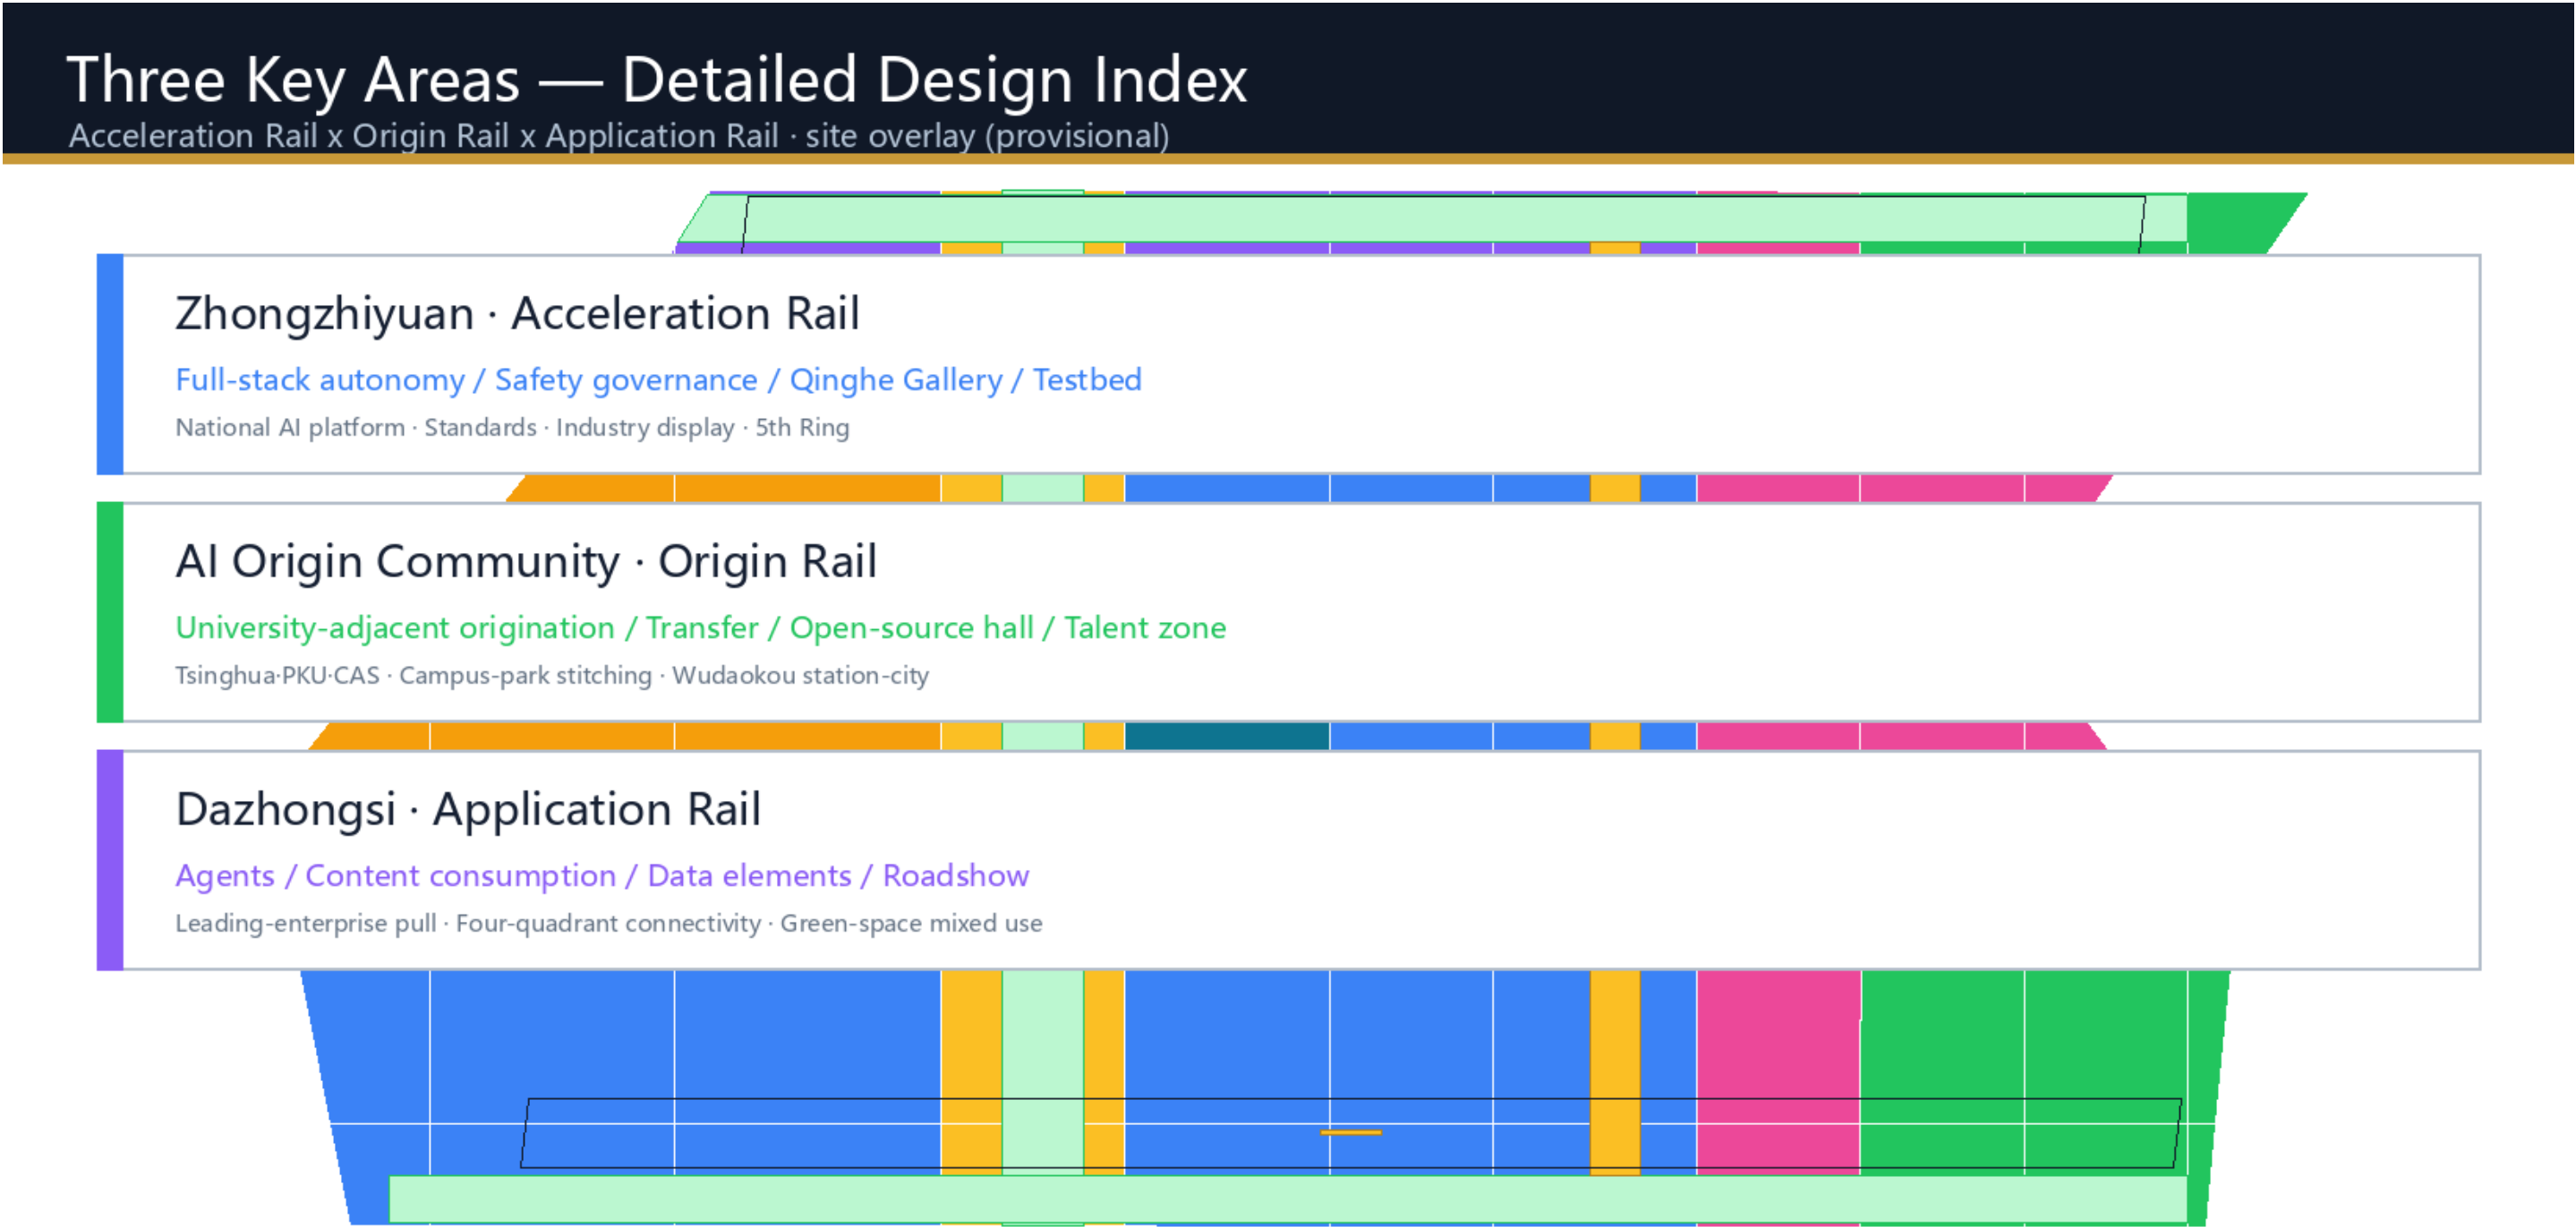

AI R&D x culture x residential x commercial x green x plaza (provisional)

Twin rails in parallel; sleepers are east-west slow-traffic and blue-green corridors; ratios from metrics.json.

Fig 1-1 Twin-rail five-chain land-use structure

2. 三处重点区域 / Three Key Areas

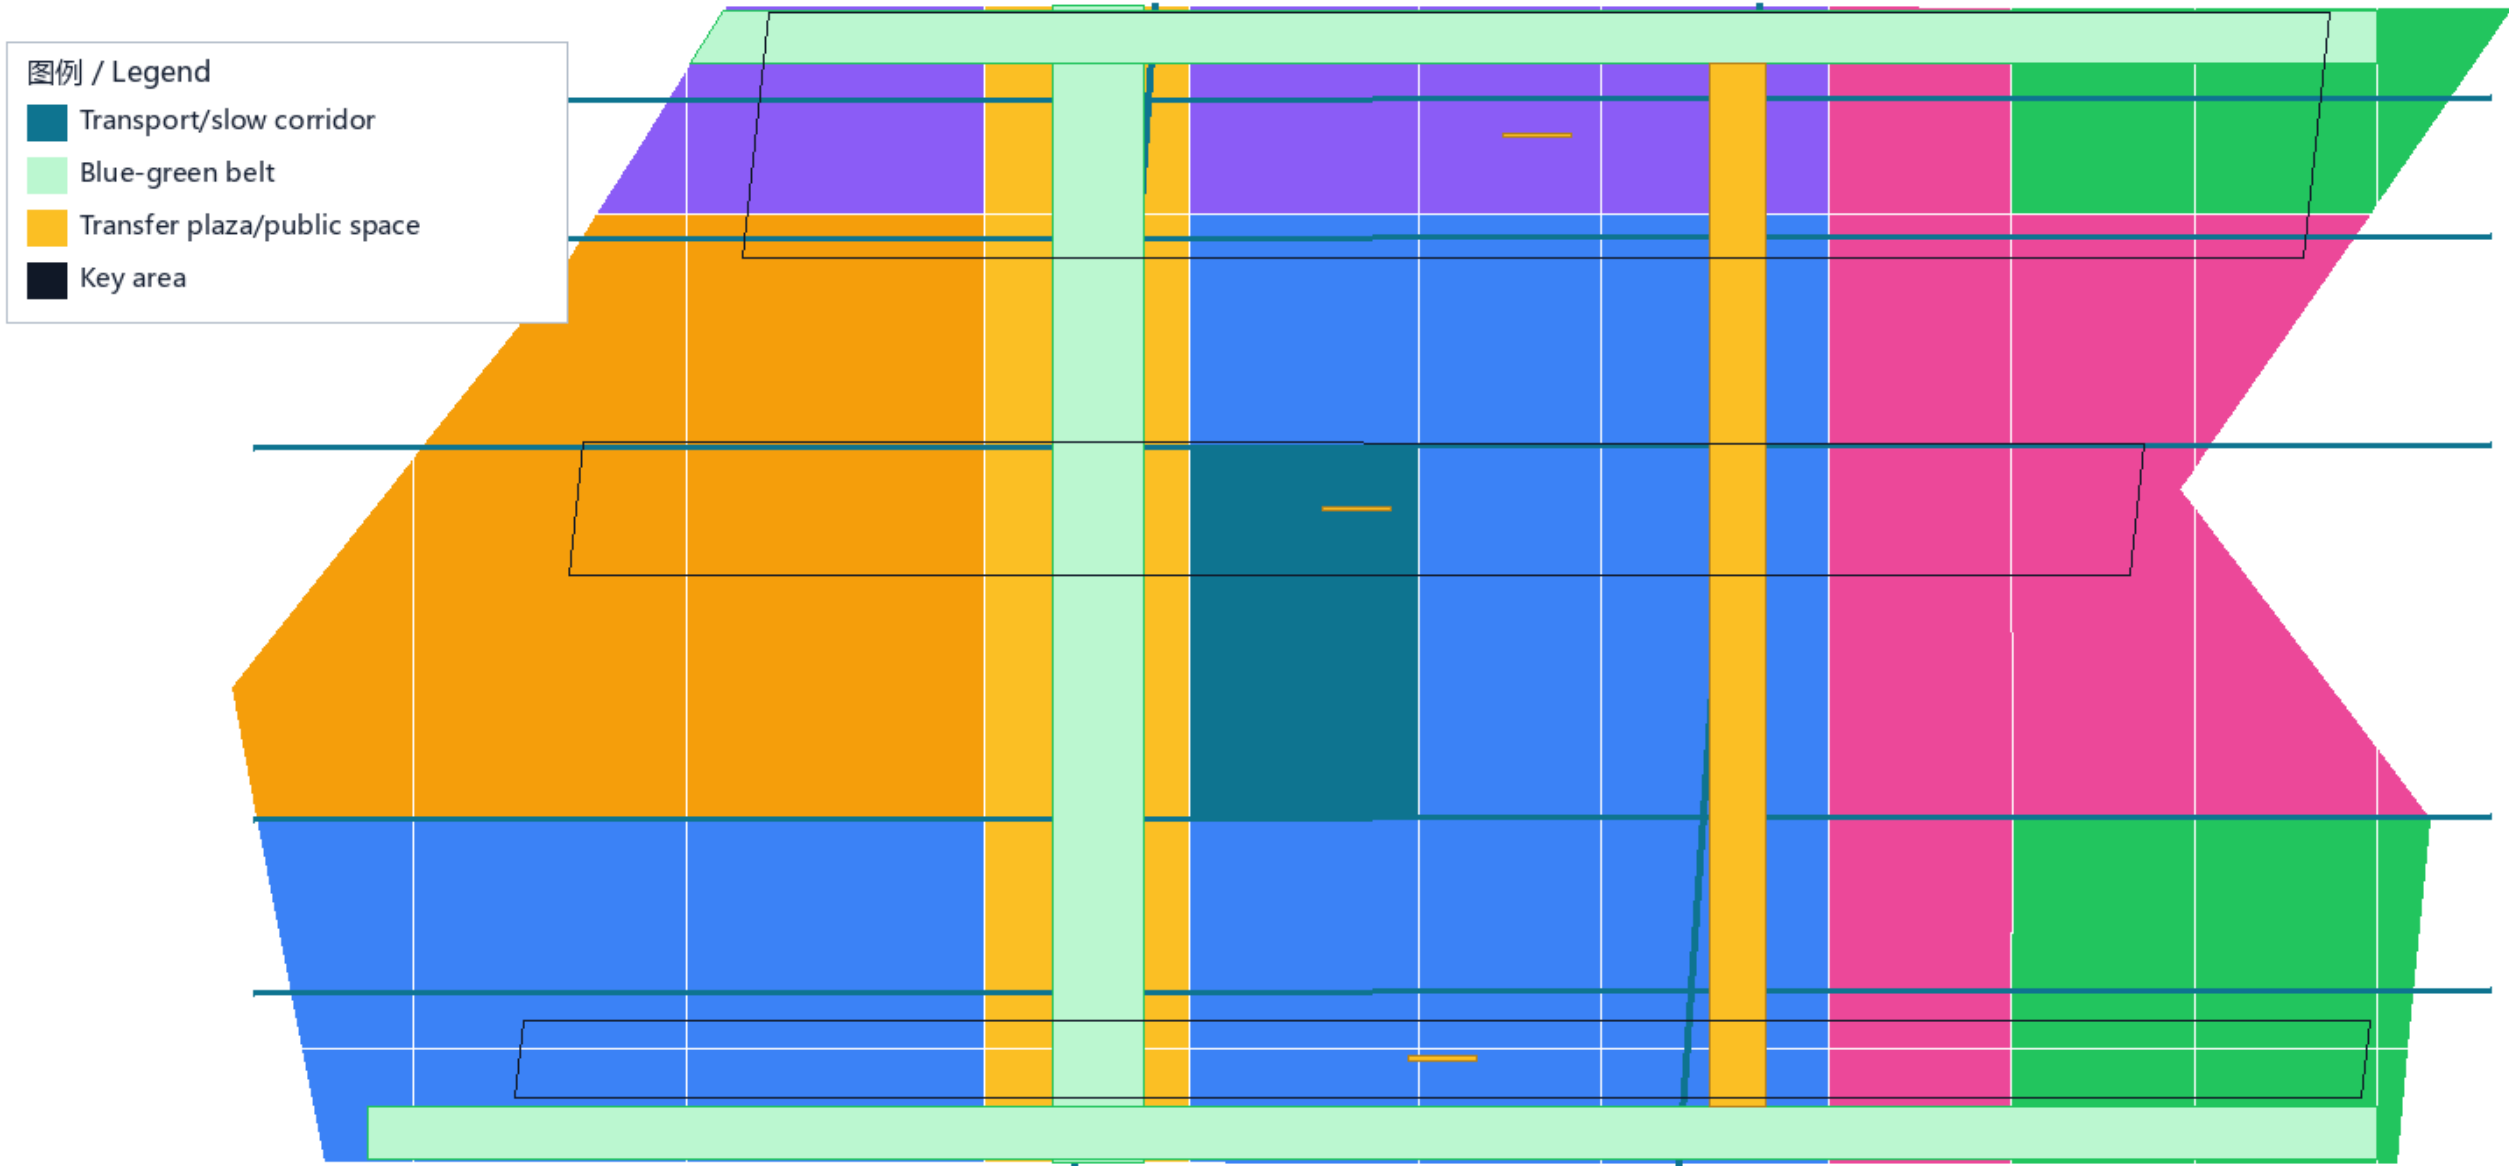

Three key areas at conceptual-study depth; area deviation <0.5%, pending official recalculation.

Fig 2-1 Three key areas (provisional): Acceleration / Origin / Application rails

Zhongzhiyuan: garden-style full-stack autonomy district with Qinghe gallery and safety sandbox. AI Origin Community: university-adjacent transfer and talent district with campus-park stitching and open-source hall. Dazhongsi: urban smart-economy district with four-quadrant connectivity and data-element reception hall.

3. 交通慢行 × 蓝绿公共空间 / Mobility × Blue-Green

Mobility x Blue-Green Network
Transport corridors x slow traffic x blue-green belts x transfer plazas (provisional)

Station-city integration, slow-traffic gap stitching, and blue-green continuity; roads and blue lines need professional deepening.

Fig 3-1 Twin-rail corridors + sleeper connectors + transfer plazas + blue-green belts

Transport is organized around twin rails + sleepers: two south-north composite corridors as spines, five east-west connectors as sleepers linking universities, parks, communities and stations (Wudaokou, West Qinghua East Road, Dazhongsi). Municipal explores distributed energy, edge computing and traditional utilities. Road redlines and rail alignments need professional deepening.

4. 核心指标 / Core Metrics

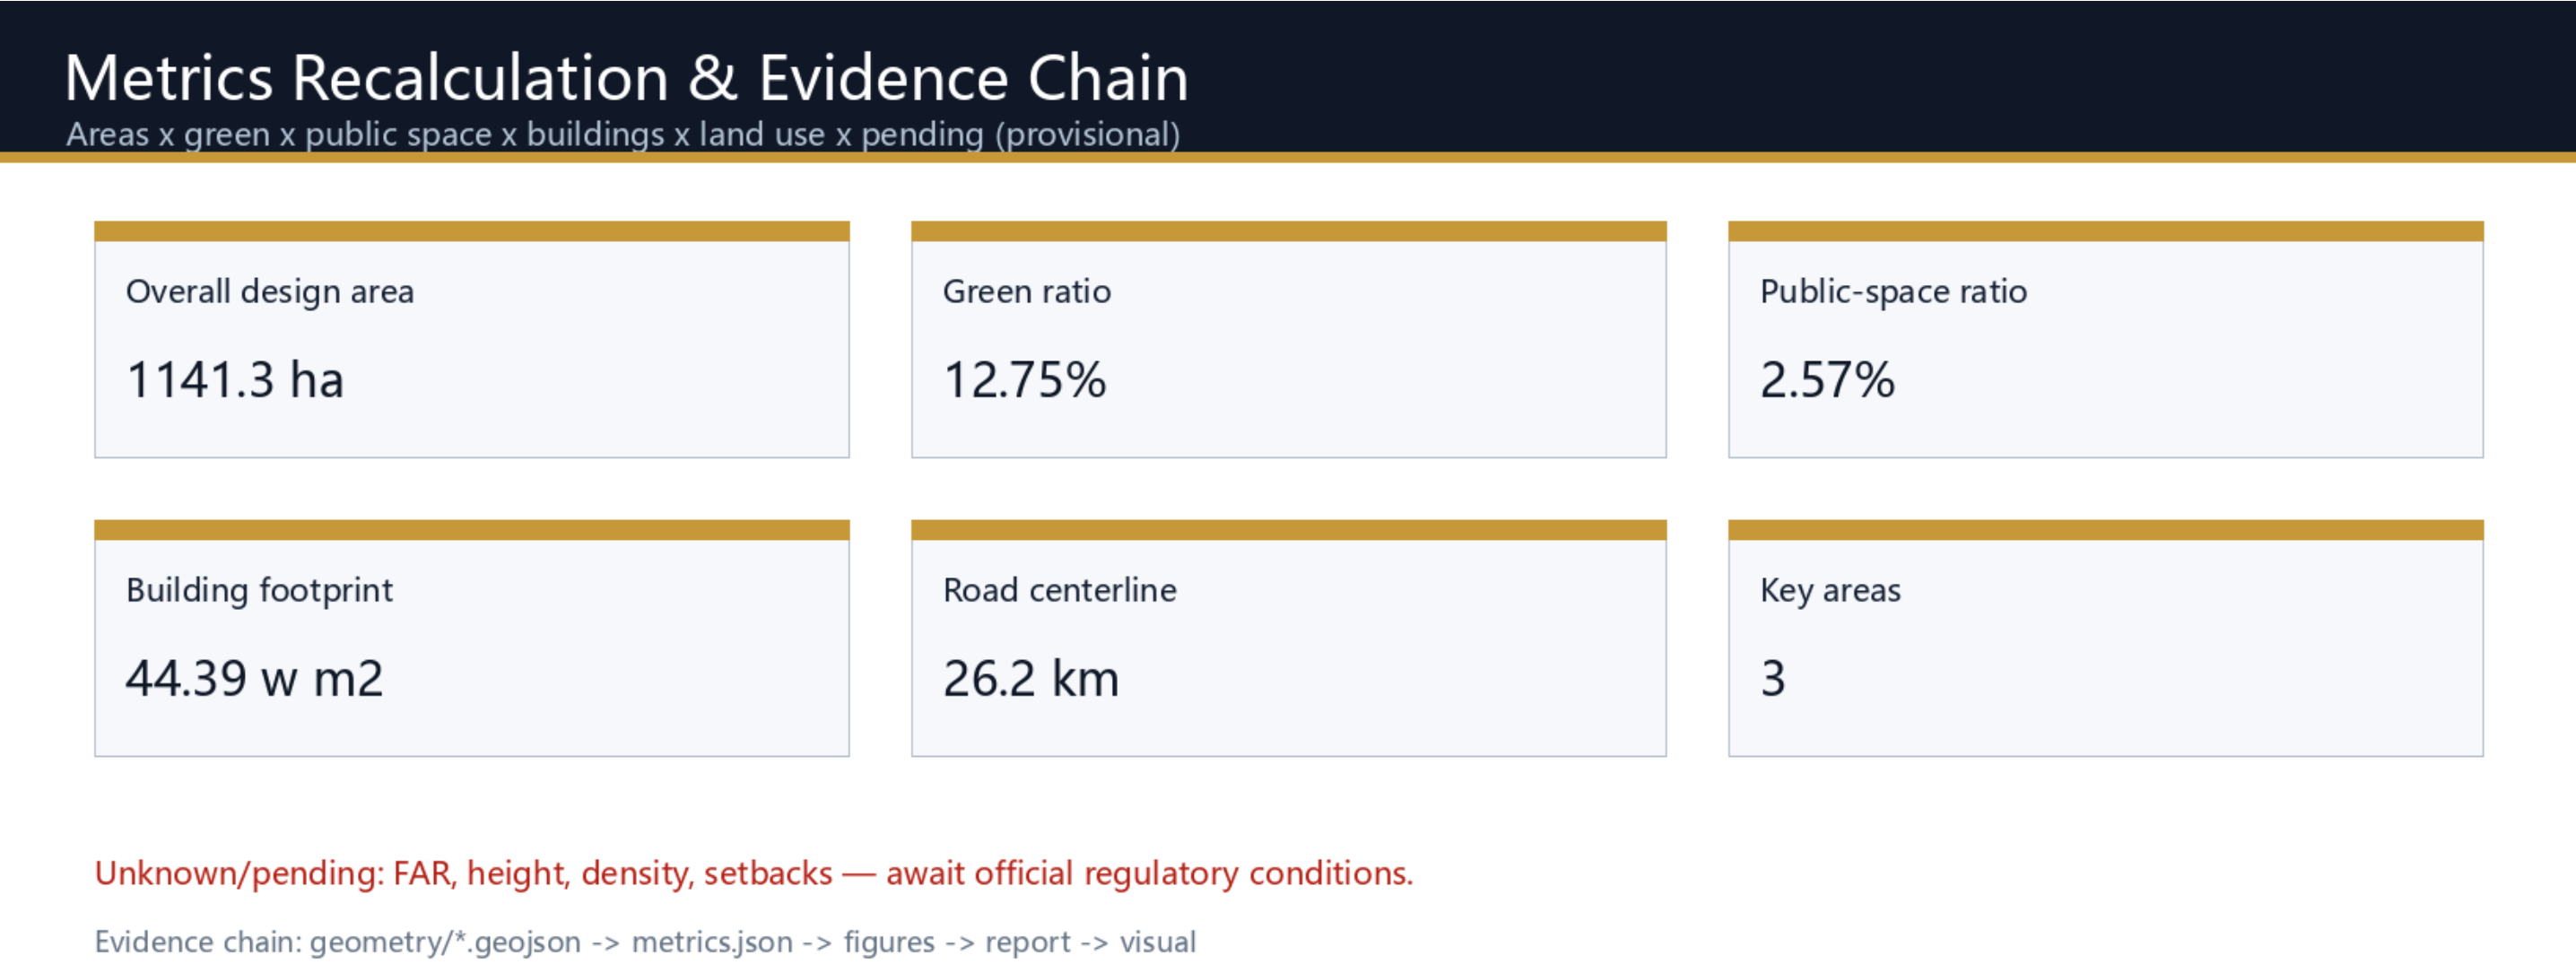

Fig 4-1 Metrics recalculation and evidence chain

指标 / Metric	数值 / Value
site_area_sqm	11412825.386
green_ratio	0.12747

public_space_ratio	0.02573
building_footprint_area_sqm	443875.173
road_length_m	26236.172
floor_area_ratio	待官方条件 / pending

5. 任务覆盖与合规 / Task Coverage & Compliance

Compliance matrix covers announcement 1.3/1.4/1.5 and agent.1-agent.6; standard matrix covers urban design measures, regulatory planning, land-use classification; all core depth items complete. All spatial-landing suggestions are conceptual, not government commitments.

Statement: this proposal does not claim official approval, approved plans, final ownership, or guaranteed implementation; recalculate once official geometry and controls are available.
