

The Jingzhang Diagram

Overview

A city that runs by the diagram — meta-concept · three scopes · four world-firsts

Working Diagram

Space × Time × Permission × Rhythm — the master score of rail

Section=switchback unit · Time=arrival/departure · Permission=token · Punctuality=

Four firsts on one corridor

1909 · Homegrown

Jingzhang Railway · switchback line · swapping grade for distance

1980s · Entrepreneurship

Zhongguancun electronics street · wisdom as industry

2019 · Smart

Jingzhang HSR · world's first intelligent railway

2026 · Symbiosis

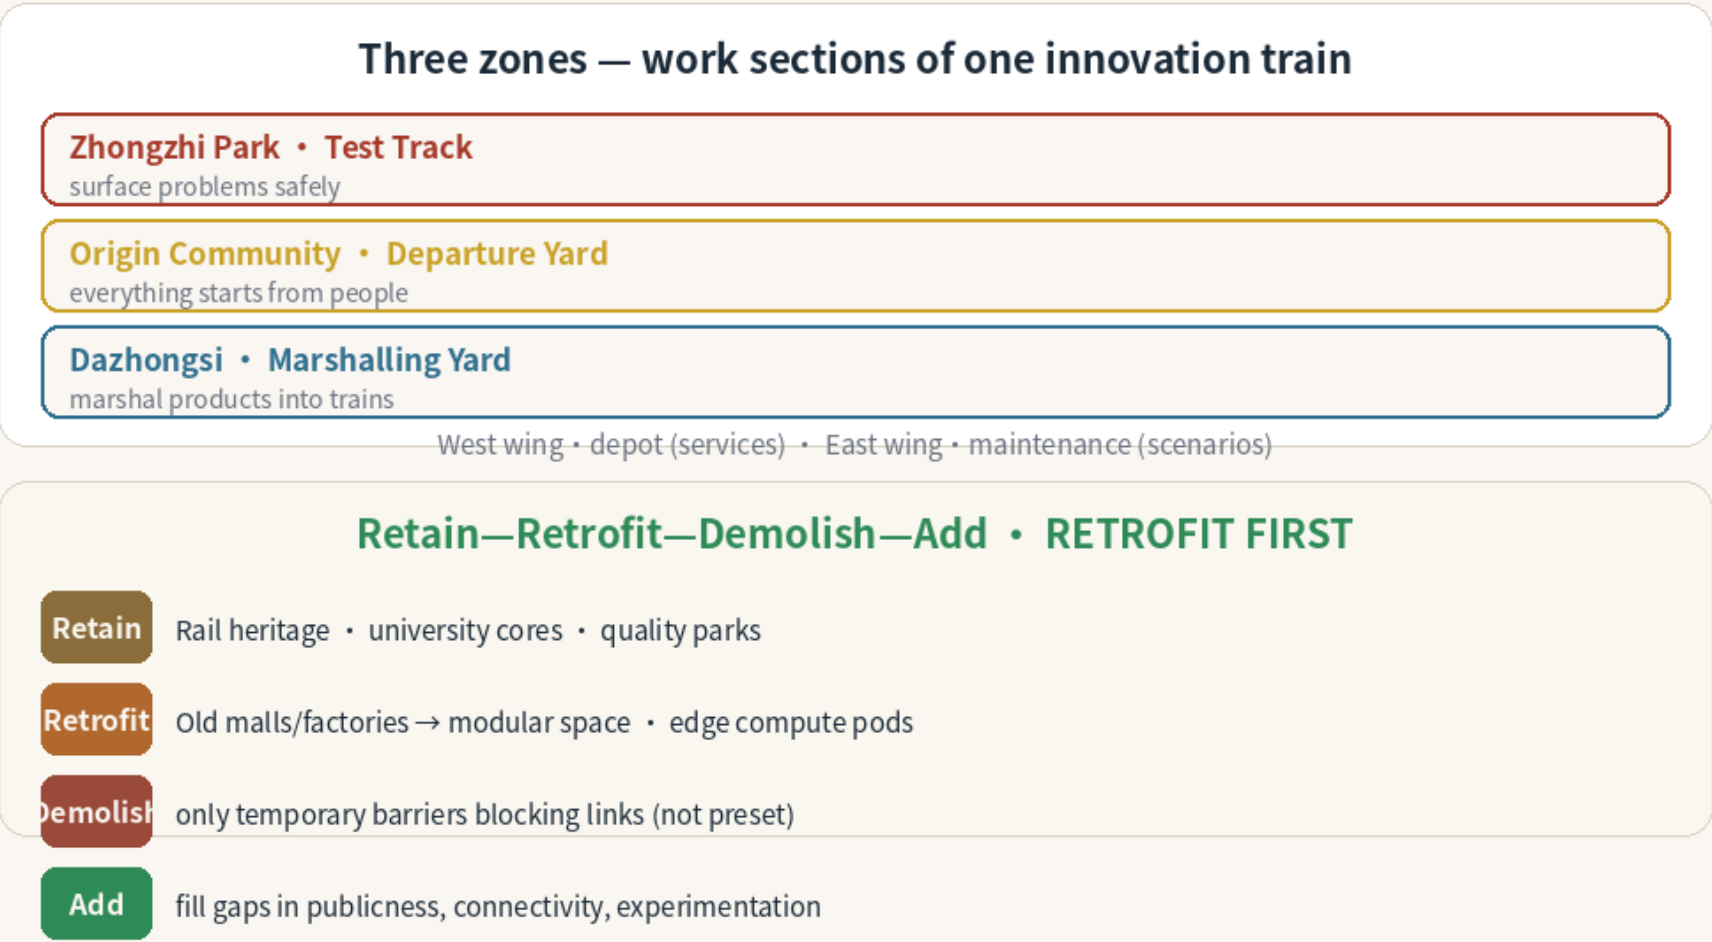

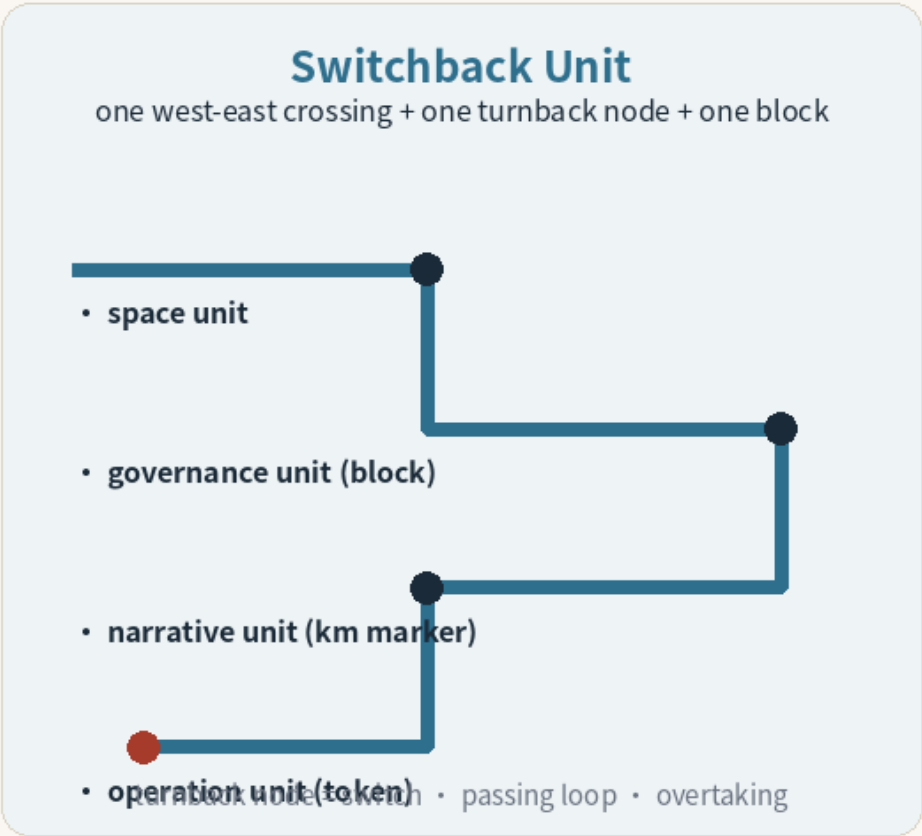

AI belt · humans and AI climbing the same grade

Three scopes: strategic 43.6 km² · overall 11.4 km² · key areas 368.4 ha (provisional, recompute on EPSG:4548)

Switchback Unit — Three Zones, Two Wings, Retrofit-First

Structure

Space unit = governance unit = narrative unit = operation unit

Five constitutions: DIAGRAM • ROUTE • TEST • RETROFIT • PEOPLE FIRST

Key Areas Detailed Design · 368.4 ha

Test Track · Departure Yard · Marshalling Yard — three work sections

Key Areas

Zhongzhi AI Acceleration 192.1 ha · Test Track

- Full-stack test street
- AI safety commons
- Standard lab
- Switch Tower
- Qinghe innovation edge
- Governance sandbox

provisional boundary
awaiting official polygon

Beijing AI Origin Community 104.3 ha · Departure Yard

- Origin auditorium
- Human-gradient plaza
- Dispatch hall
- Scholar alleys
- Boundaryless campus crossing
- High-entropy maker box

provisional boundary
awaiting official polygon

Dazhongsi AI Cluster 72.0 ha · Marshalling Yard

- Bell of Signals plaza
- AI-native market
- Bell-tower night school
- Station four-quadrant walk
- Data-element lounge

provisional boundary
awaiting official polygon

Loop: depot injection → test-track validation → incubate at origin → marshal & dispatch → maintenance feedback

Mobility · Utilities · Blue-Green Slow Loop

Mobility

Switchback walkway as slow spine · stations as pivot · blue-green network

Rail-micro TOD · AI-Native retrofit

Line 13/12

Changping Line

Beijing North · Qinghuangdao

- Edge compute node interface
- Robot/delivery standby core
- All-electric low-latency base
- Integrated accessible routes

No new alignments or station relocations · AV only reversible low-speed trials

Blue-Green Slow Loop

Turnback node parks

Xiaoyue · corridor

Heritage park

Human Walk

Surface · zero-carbon slow + robot lane

Low-altitude · delivery air lanes (zoned)

Underground · duct fiber/liquid cooling (concept)

Future infrastructure = Physical + Intelligence + Trust Infrastructure

Metrics · Area Recalculation · Compliance Matrix

Metrics

ILL + diagram punctuality as core KPIs · provisional recompute discipline

Innovation Loop Latency

Diagram punctuality: share of scenarios cleared on schedule, exposing admin delay

Metric discipline & compliance

- site_area_sqm
- building_footprint_area_sqm
- green_ratio
- public_space_ratio
- key_area_count

provisional · recompute on EPSG:4548

FAR / height / density = unknown / pending

NORTH STAR

How many real urban problems are solved each year through open collaboration and reused elsewhere.

Compliance: compliance_matrix.json item-by-item mapping
AI Urban Performance Index · 100% human-reviewed accountability chain

All spatial metrics in metrics.json (status/value/unit/source_files/formula/confidence/assumptions)
