

Three Key Area Detailed Design Index

Positioning / spatial moves / AI scenarios / implementation dependencies

1 Zhiyuan Accelerator

2 AI Origin Community

3 Dazhongsi Cluster

~1 km

- Key areas with detail design
- Land use (design)
- Slow-traffic corridor

provisional_constraint • official_boundary=false • derived from submission.GeoJSON/metrics; replace with official polygons before formal scoring

Three-Level Scope & Spatial Structure

43.6 km2 study / 11.4 km2 overall design / 368.4 ha key areas

provisional_constraint • official_boundary=false • derived from submission.GeoJSON/metrics; replace with official polygons before formal scoring

Metrics Recalculation & Evidence Chain

site_area / green_ratio / public_space_ratio from GeoJSON, confidence=low, provisional

site_area_sqm

11,412,825

green_ratio

0.123

public_space_ratio

0.073

building_footprint_sqm

310,807

All values recalculated from submission GeoJSON (EPSG:4548 area).
confidence=low; must be recalculated after official boundary release.
evidence: geometry/*.geojson + metrics.json + spatial_review + visual_review.

metrics.json: values, formula, source_files, confidence, assumptions
compliance_matrix.json: 23 requirement entries with distinct evidence
standard_matrix.json / design_depth_matrix.json: depth & standard coverage
self_check: deterministic / spatial / visual / professional evidence

provisional_constraint • official_boundary=false • derived from submission GeoJSON/metrics; replace with official polygons before formal scoring

Mobility, Slow Traffic & Blue-Green System

roads / green_space / public_space layers jointly support the spatial development

provisional_constraint • official_boundary=false • derived from submission.GeoJSON/metrics; replace with official polygons before formal scoring

Evidence Chain & Submission Packa

Announcement + site-package -> layers -> metrics -> self-check

~2.5 km

- Site boundary (provisional)
- Key areas (provisional)
- Land use (design)

provisional_constraint • official_boundary=false • derived from submission.GeoJSON/metrics; replace with official polygons before formal scoring
