

SWITCHBACK

0000 — Urban Design for the Centennial Jing-Zhang AI Innovation Belt · A3 booklet

ShirasuAZ × Claude Fable 5 (claude-fable-5) · 2026-08 · CC-BY-4.0

Conceptual proposal · provisional boundary · replaces no statutory planning

- 03Overall concept
- 04Protocol and naming
- 05Scopes and land use
- 06Program and DRR strategy
- 07Key-area detailed design
- 08Mobility and blue-green
- 09Twelve AI scenario cards
- 10Metrics and evidence chain
- 11Projects and phasing
- 12Events and operations
- 13Risk, copyright, boundary

Design basis

Haidian pre-qualification announcement (scopes, key areas, tasks); the agent-facing taskbook (positionings, functions, wings, six tasks); the site package and central source registry; NRA Qinglongqiao history and the municipal park report as cultural background.

Spatial baseline

No official precise redline is public; all spatial generation uses the repository's provisional rough boundary, recomputed in EPSG:4548 and fully recalculable on official data.

FIG. 01

The Ren Switchback · Overall Concept

人字新轨 · 总体概念

One spine, nine junctions, three sections, two wings — a belt that climbs by turning back

Provisional rough boundary (dashed), not an official redline; recalculated on official data · Source: package geometry & metrics (EPSG:4548).

人字新轨 · THE REN SWITCHBACK — ShirasuAZ × Claude Fable 5 · CC-BY-4.0

Switchback Protocol · four clauses

One, coupled engines: every public AI deployment pairs a public return car — an open dataset, public compute hours, or community service time.

Two, junction entry: before deployment, publish the model card, data boundary, and named human reviewer at the Signal House.

Three, reversibility: any scenario can retreat to the siding within 72 hours while a human channel stays open; reversal is the climbing method, not failure.

Four, annual overhaul: Overhaul Week reviews every live scenario each year; failures return to the depot.

Naming system

Primary name 人字新轨 (Renzi Xingui); English THE REN SWITCHBACK; short REN·AI Line. The belt is the Line, nodes are Junctions R1–R9, key areas are Sections, events are Departures, the community is the Crew.

Logo direction

Two rails converge at about 33 degrees on a circular reversing node, honoring the 33-per-mille gradient; extended as chevron wayfinding in signal green, brick red, and rail white. An original direction reusing no existing mark or typeface.

FIG. 02
Scope Framework and Land-Use Structure

三层范围与用地结构

Research west, living east, green spine, plaza junctions — 43 seamless land-use cells

Classification follows the national territorial-spatial subset; zoning is conceptual.
Provisional rough boundary (dashed), not an official redline; recalculated on official data · Source: package geometry & metrics (EPSG:4548).

Code Use Area Share

0701	Housing	250.8 ha	22.0%	
0802	Research	234.8 ha	20.6%	
1401	Park green	197.8 ha	17.3%	
05	Commercial	151.9 ha	13.3%	
0804	Education	143.9 ha	12.6%	
1207	Road belt	31.9 ha	2.8%	
1402	Protective	29.8 ha	2.6%	
0803	Culture	29.4 ha	2.6%	
1403	Plaza	27.7 ha	2.4%	
0805	Sports	19.7 ha	1.7%	
0702	Community	14.9 ha	1.3%	
16	White space	8.6 ha	0.8%	

DRR strategy

Retention as the base (~70%: campuses, mature housing, active industry, heritage fabric); renovation as the main move (~25%: office retrofits, age-friendly estates, scenario retrofits); new-build as points (~5%: 21 demos and nine platforms); demolition as the exception (lawfully certified dangerous/illegal only). Shares are conceptual; parcel conclusions await surveys and regulatory conditions.

Supply mechanisms (conceptual)

Platform Covenant: owners contribute space-use rights as shares in junction operations; white-space triggering: the northern reserve releases against Departure Deck pilot results.

FIG. 03

Three Key Areas, Three Roles

三处重点区 · 三种角色

Gateway, junction heart, acceleration ramp — detailed design at one scale

Dazhongsi AI Industry Cluster

Gateway · intelligence-native business

~72.0 ha (recomputed)

Beijing AI Origin Community

Junction heart · world-class ecosystem

~104.3 ha (recomputed)

Zhongzhiyuan AI Acceleration Area

Acceleration ramp · full-stack autonomy

~192.9 ha (recomputed)

— Spine paths - - - Stitching street ■ Platforms/plazas ■ Demo buildings - - - Key area (prov.)

Seven-element frame: Position · Structure · Renewal · Mobility · Public space · Scenarios · Risks

Provisional rough boundary (dashed), not an official redline; recalculated on official data · Source: package geometry & metrics (EPSG:4548).

Metrics Recomputation and Evidence Chain

指标复算与证据链

One dataset, end-to-end recomputable, gaps declared honestly

Core metrics (EPSG:4548)

Evidence chain · one source

Figures and HTML explain;
authority stays in
GeoJSON / JSON

Pending official data

- FAR, coverage, height controls
 - Existing stock & ownership
 - Official redlines (site & road)
 - Heritage scopes, utilities
- Gaps declared; content scoring unblocked

Task coverage

23/23 required tasks covered
(1.3/1.4/1.5 + agent.1-6)

Self-check: deterministic / spatial /
visual / professional gates pass locally

Provisional rough boundary (dashed), not an official redline; recalculated on official data · Source: package geometry & metrics (EPSG:4548).

Three phases (conceptual)

Near 2026–2028: launch section ~434.0 ha, south spine through, R1–R3 built, Signal House pilots at all nine junctions. Mid 2028–2031: stitching section ~428.1 ha, Origin ecosystem formed, REN Summit annualized. Long 2031–2035: acceleration section ~279.2 ha, full-stack system and Qinghe waterfront complete, joint belt operation.

Policies (conceptual)

Junction joint ventures · Platform Covenant · public-return ledger · white-space triggering. All conceptual, none determined.

Four beats a year

Spring Departure Festival (Zhongzhiyuan): technologies depart together. Autumn REN Summit (Origin): the global governance and developer annual. Monthly Junction Day: junctions take turns opening sidings. Year-end Overhaul Week: whole-belt recheck and city checkup, findings public.

The Crew community

The Crew Passport records contribution; Nameplate Honors cast names as station signs; the Through Ticket exchanges cross-scenario space benefits.

Scenario access and conversion

Siding applications: teams worldwide book siding slots and convert to the main line after the protocol; the loop runs showcase — siding validation — main-line operation — landing via the Services Wing.

Cultural narrative

The self-reliant gradient (1909 switchback), the open junction (forty Zhongguancun years), the people's track (a new AI culture of human-machine reversal). One line: The line that climbs by turning back.

Key risks and mitigation

Provisional-boundary uncertainty — the structured dataset recalculates end-to-end on official redlines. Missing baselines — every affected statement is marked pending. Scenario privacy — the four protocol clauses plus the human channel.

Copyright and generation

Generated by the AI agent Claude Fable 5 (Claude Code) under human authorization; figures self-drawn with no external imagery; Source Han Sans (SIL OFL) and DejaVu embedded; released CC-BY-4.0.

Boundary declaration

An open co-creation concept: it replaces no statutory planning and constitutes no approved conclusion; it contains no final determinations on regulatory adjustment, FAR, height, parcel DRR, road redlines, engineering feasibility, investment, or approvals.
