

京张经纬带 - Jing-Zhang Warp-Weft Belt

Centennial Jing-Zhang AI Innovation Belt Urban Design - English edition (conceptual suggestion)

Concept suggestion - V1.0 | Provisional boundary - conceptual suggestion | Offline submission package | 2026-08-11

The Jing-Zhang Warp-Weft Belt (■■■■■) weaves a century of railway heritage - the Jing-Zhang Railway (1905-1909, surveyed, designed and built under Zhan Tianyou) - with a future AI-innovation urban belt along the Jing-Zhang heritage park greenway in Haidian, Beijing. The design language borrows from weaving: the heritage park greenway is the warp line (■■), three stitch corridors S1/S2/S3 are the weft (■■), and a system of weave points, weave faces and weave bridges stitches the urban fabric together - "Warp of Heritage, Weft of AI."

FIVE REGIONS OF THE BELT

Weave-Source	Zhongzhiyuan AI self-reliance acceleration area	North core	192.1 ha	P3
Weave-Heart	Beijing AI Origin Community	Central core	104.3 ha	P2
Weave-Echo	Dazhong Temple AI industry cluster	South core	72.0 ha	P1+P3
Weave-Capital	Zhongguancun tech-service wing	East wing	-	P3
Weave-Eco	Xiaoyue River scenario wing	West wing	-	P2

THREE-LEVEL SCOPE & PHASING (CONCEPTUAL)

Overall research scope 43.6 km2 | Overall design scope 11.4 km2 (this submission) | Key areas 368.4 ha (three cores). Phasing: P1 near term 0-3 y - scenario pop-ups, waystations, slow-traffic links; P2 mid term 3-5 y - demonstration weave points, stitch pilots, Weave-Heart Plaza; P3 far term 5-10 y - full network, industrial scale, international events.

Provisional boundary - conceptual suggestion

All boundaries, key areas and parcel divisions in this booklet are provisional_constraint temporary ranges for display and interim self-check only - they are not official redlines, approval basis or precise area recomputation basis. The official scope follows drawings published by the commissioning party and government authorities. All spatial arrangements are conceptual suggestions.

Fig. 1 Site Overview - Jing-Zhang Warp-Weft Belt

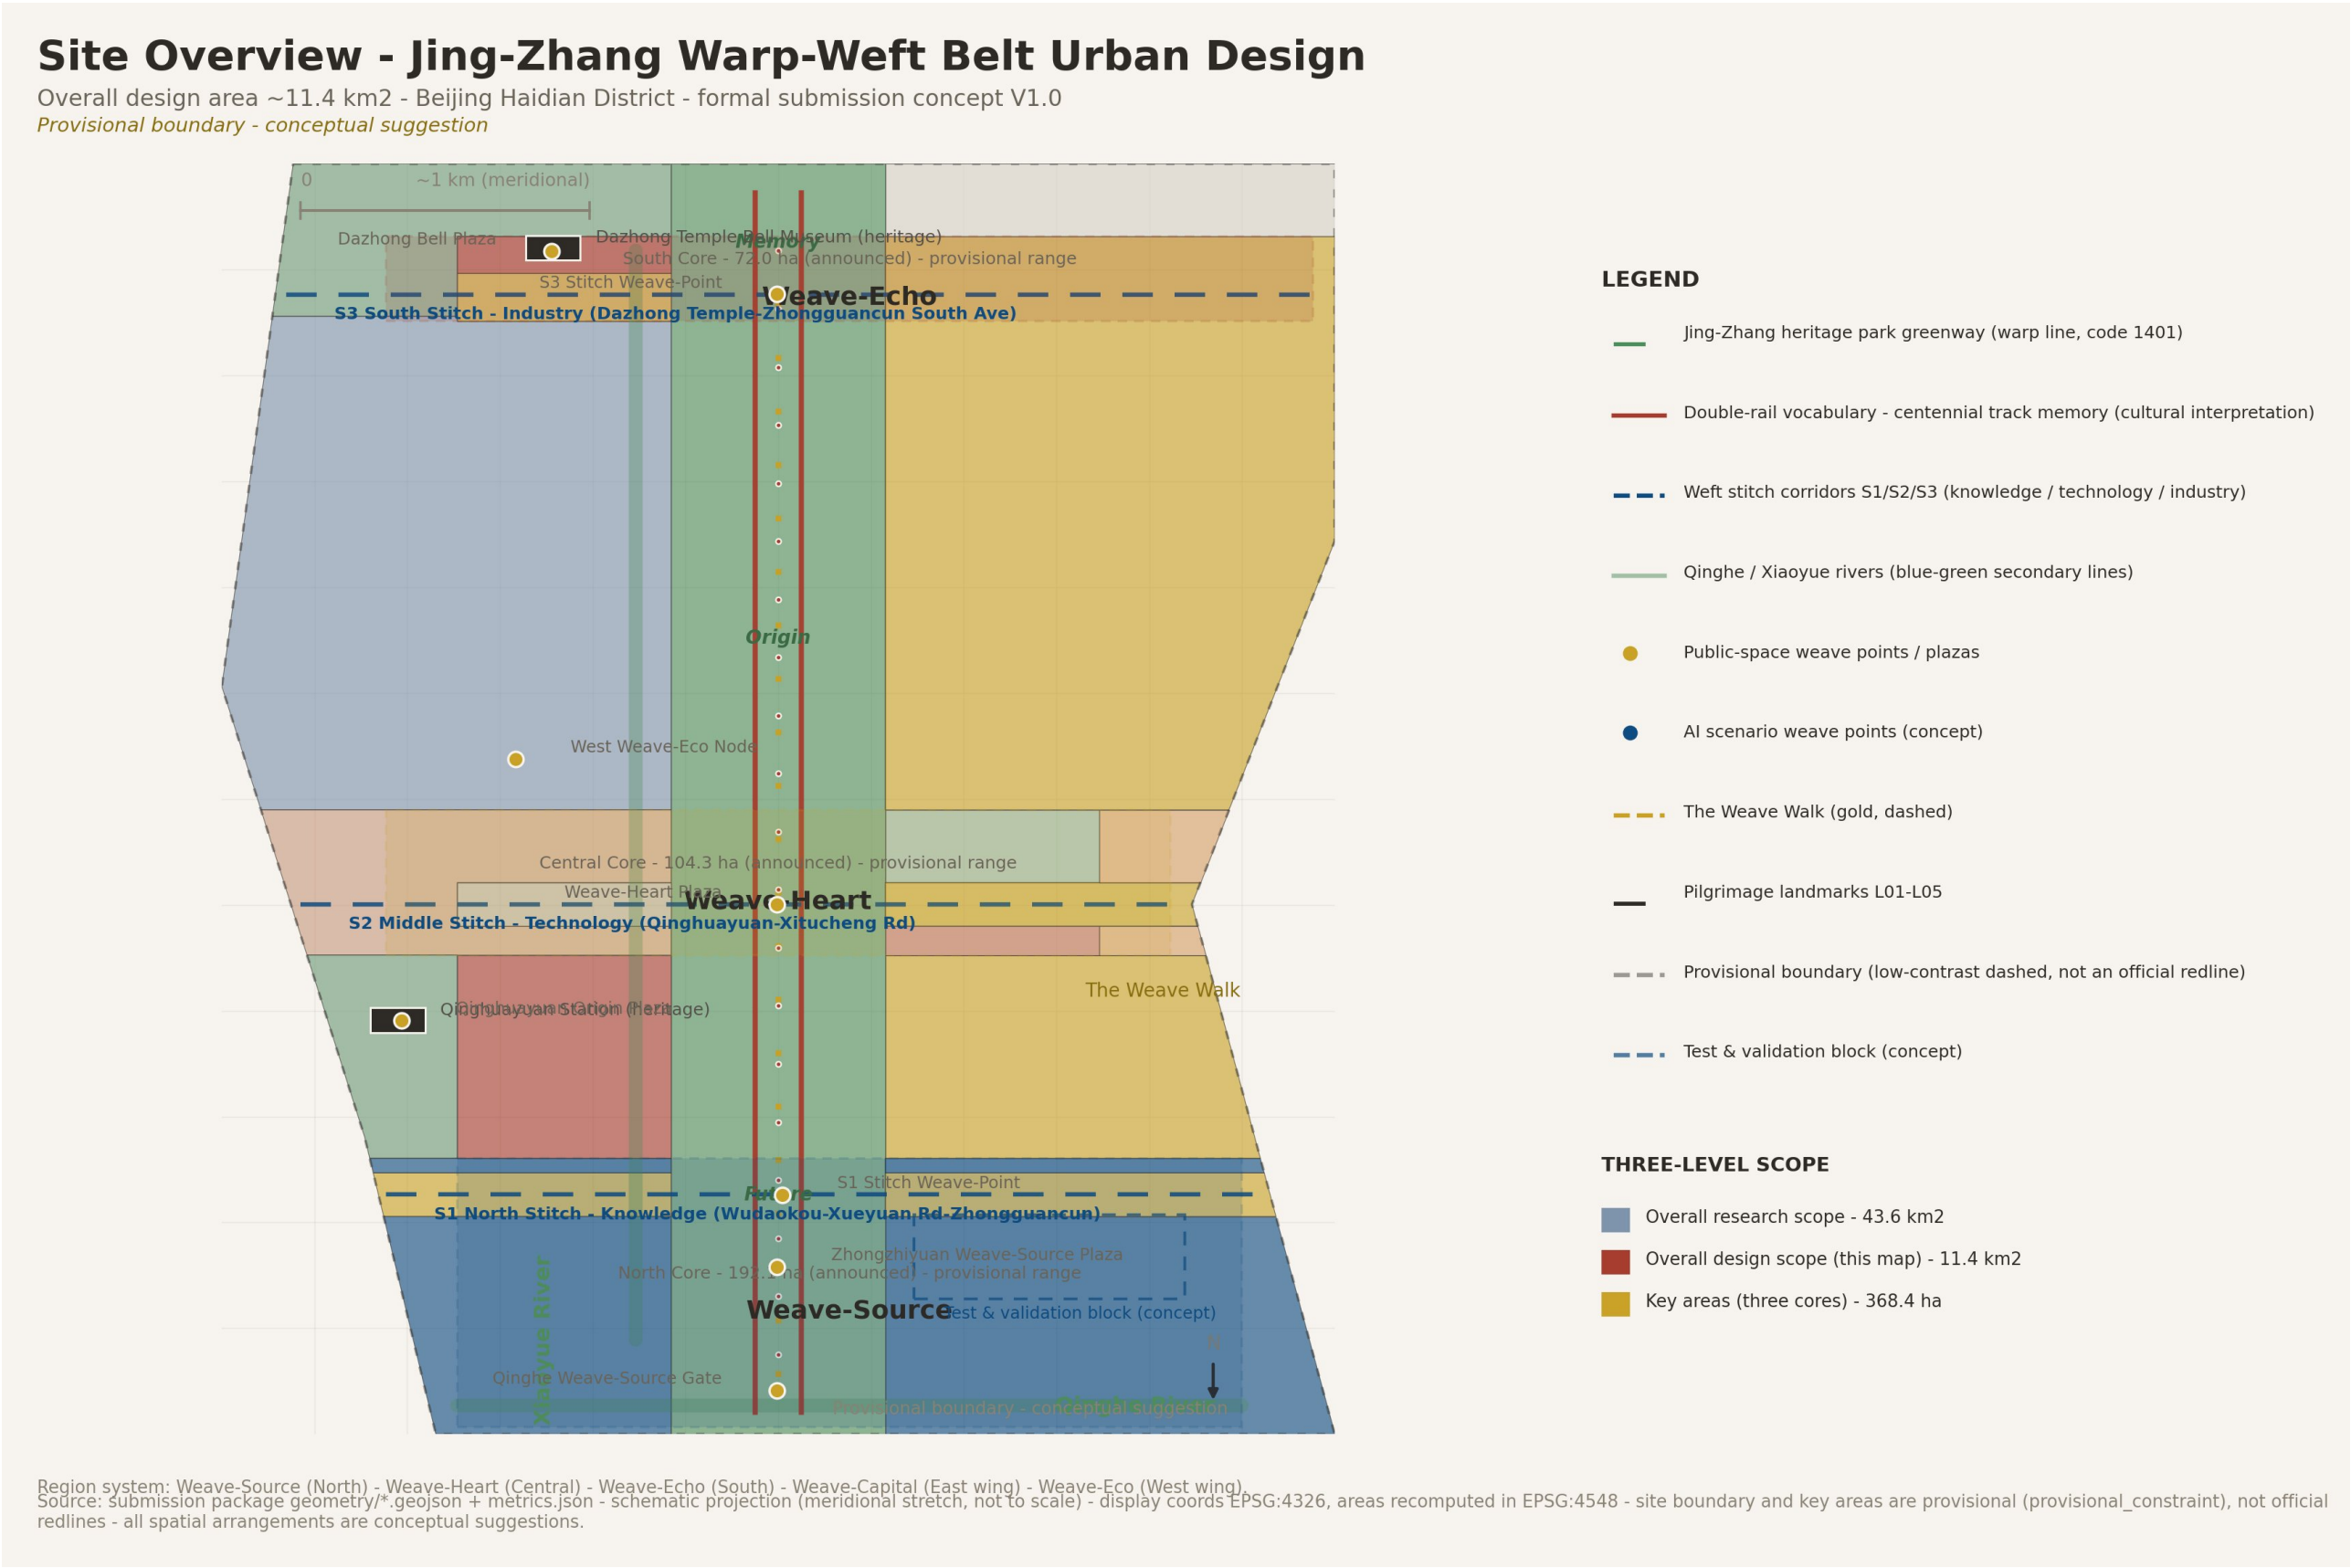

Fig. 1 Site Overview - Jing-Zhang Warp-Weft Belt
Overall design area ~11.4 km2 in Haidian, Beijing: warp-line heritage park greenway, weft stitch corridors S1/S2/S3, Qinghe / Xiaoyue rivers, double-rail heritage vocabulary, The Weave Walk, pilgrimage landmarks L01-L05, public-space weave points and the provisional site boundary (low-contrast dashed).

Fig. 2 Land-Use Structure (MNR codes)

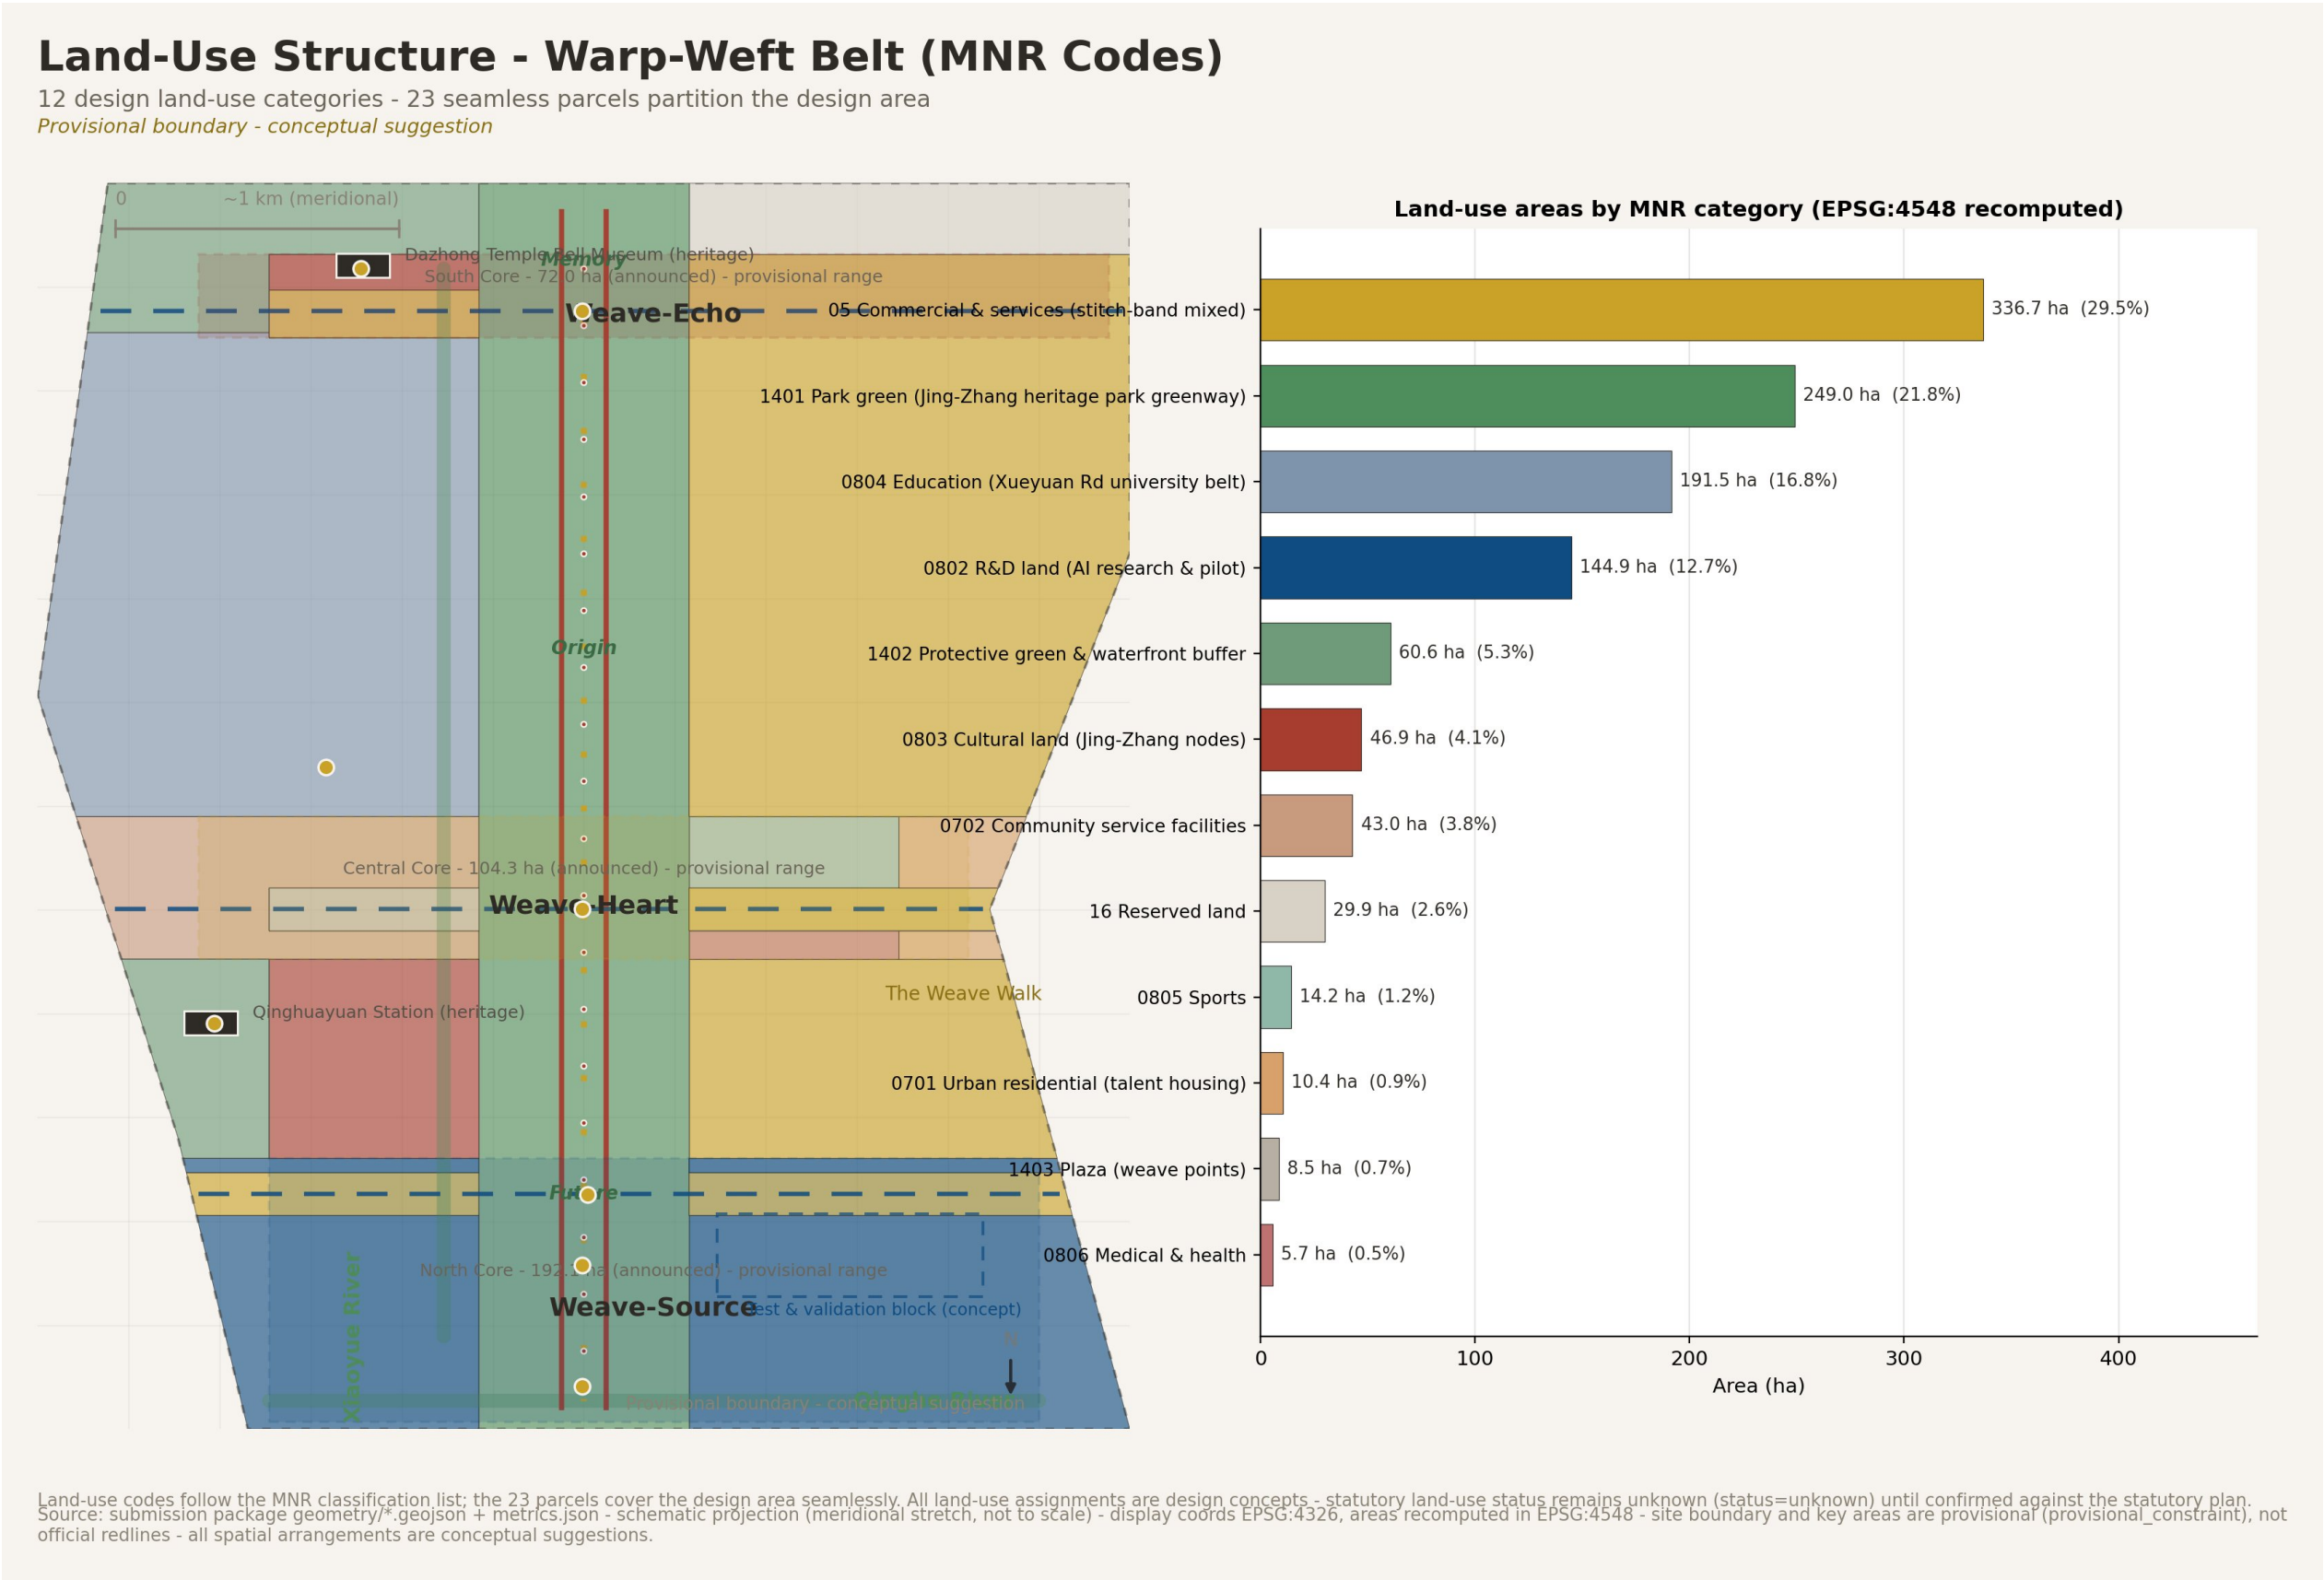

Fig. 2 Land-Use Structure (MNR codes)
12 design land-use categories across 23 seamless parcels: park green (1401, 248.97 ha, 21.8%), R&D; 0802 (144.86 ha), education 0804 (191.46 ha), commercial 05 (336.74 ha) and seven further categories. Areas recomputed in EPSG:4548; statutory land-use status remains unknown.

Fig. 3 Key Areas & Pilgrimage Landmarks

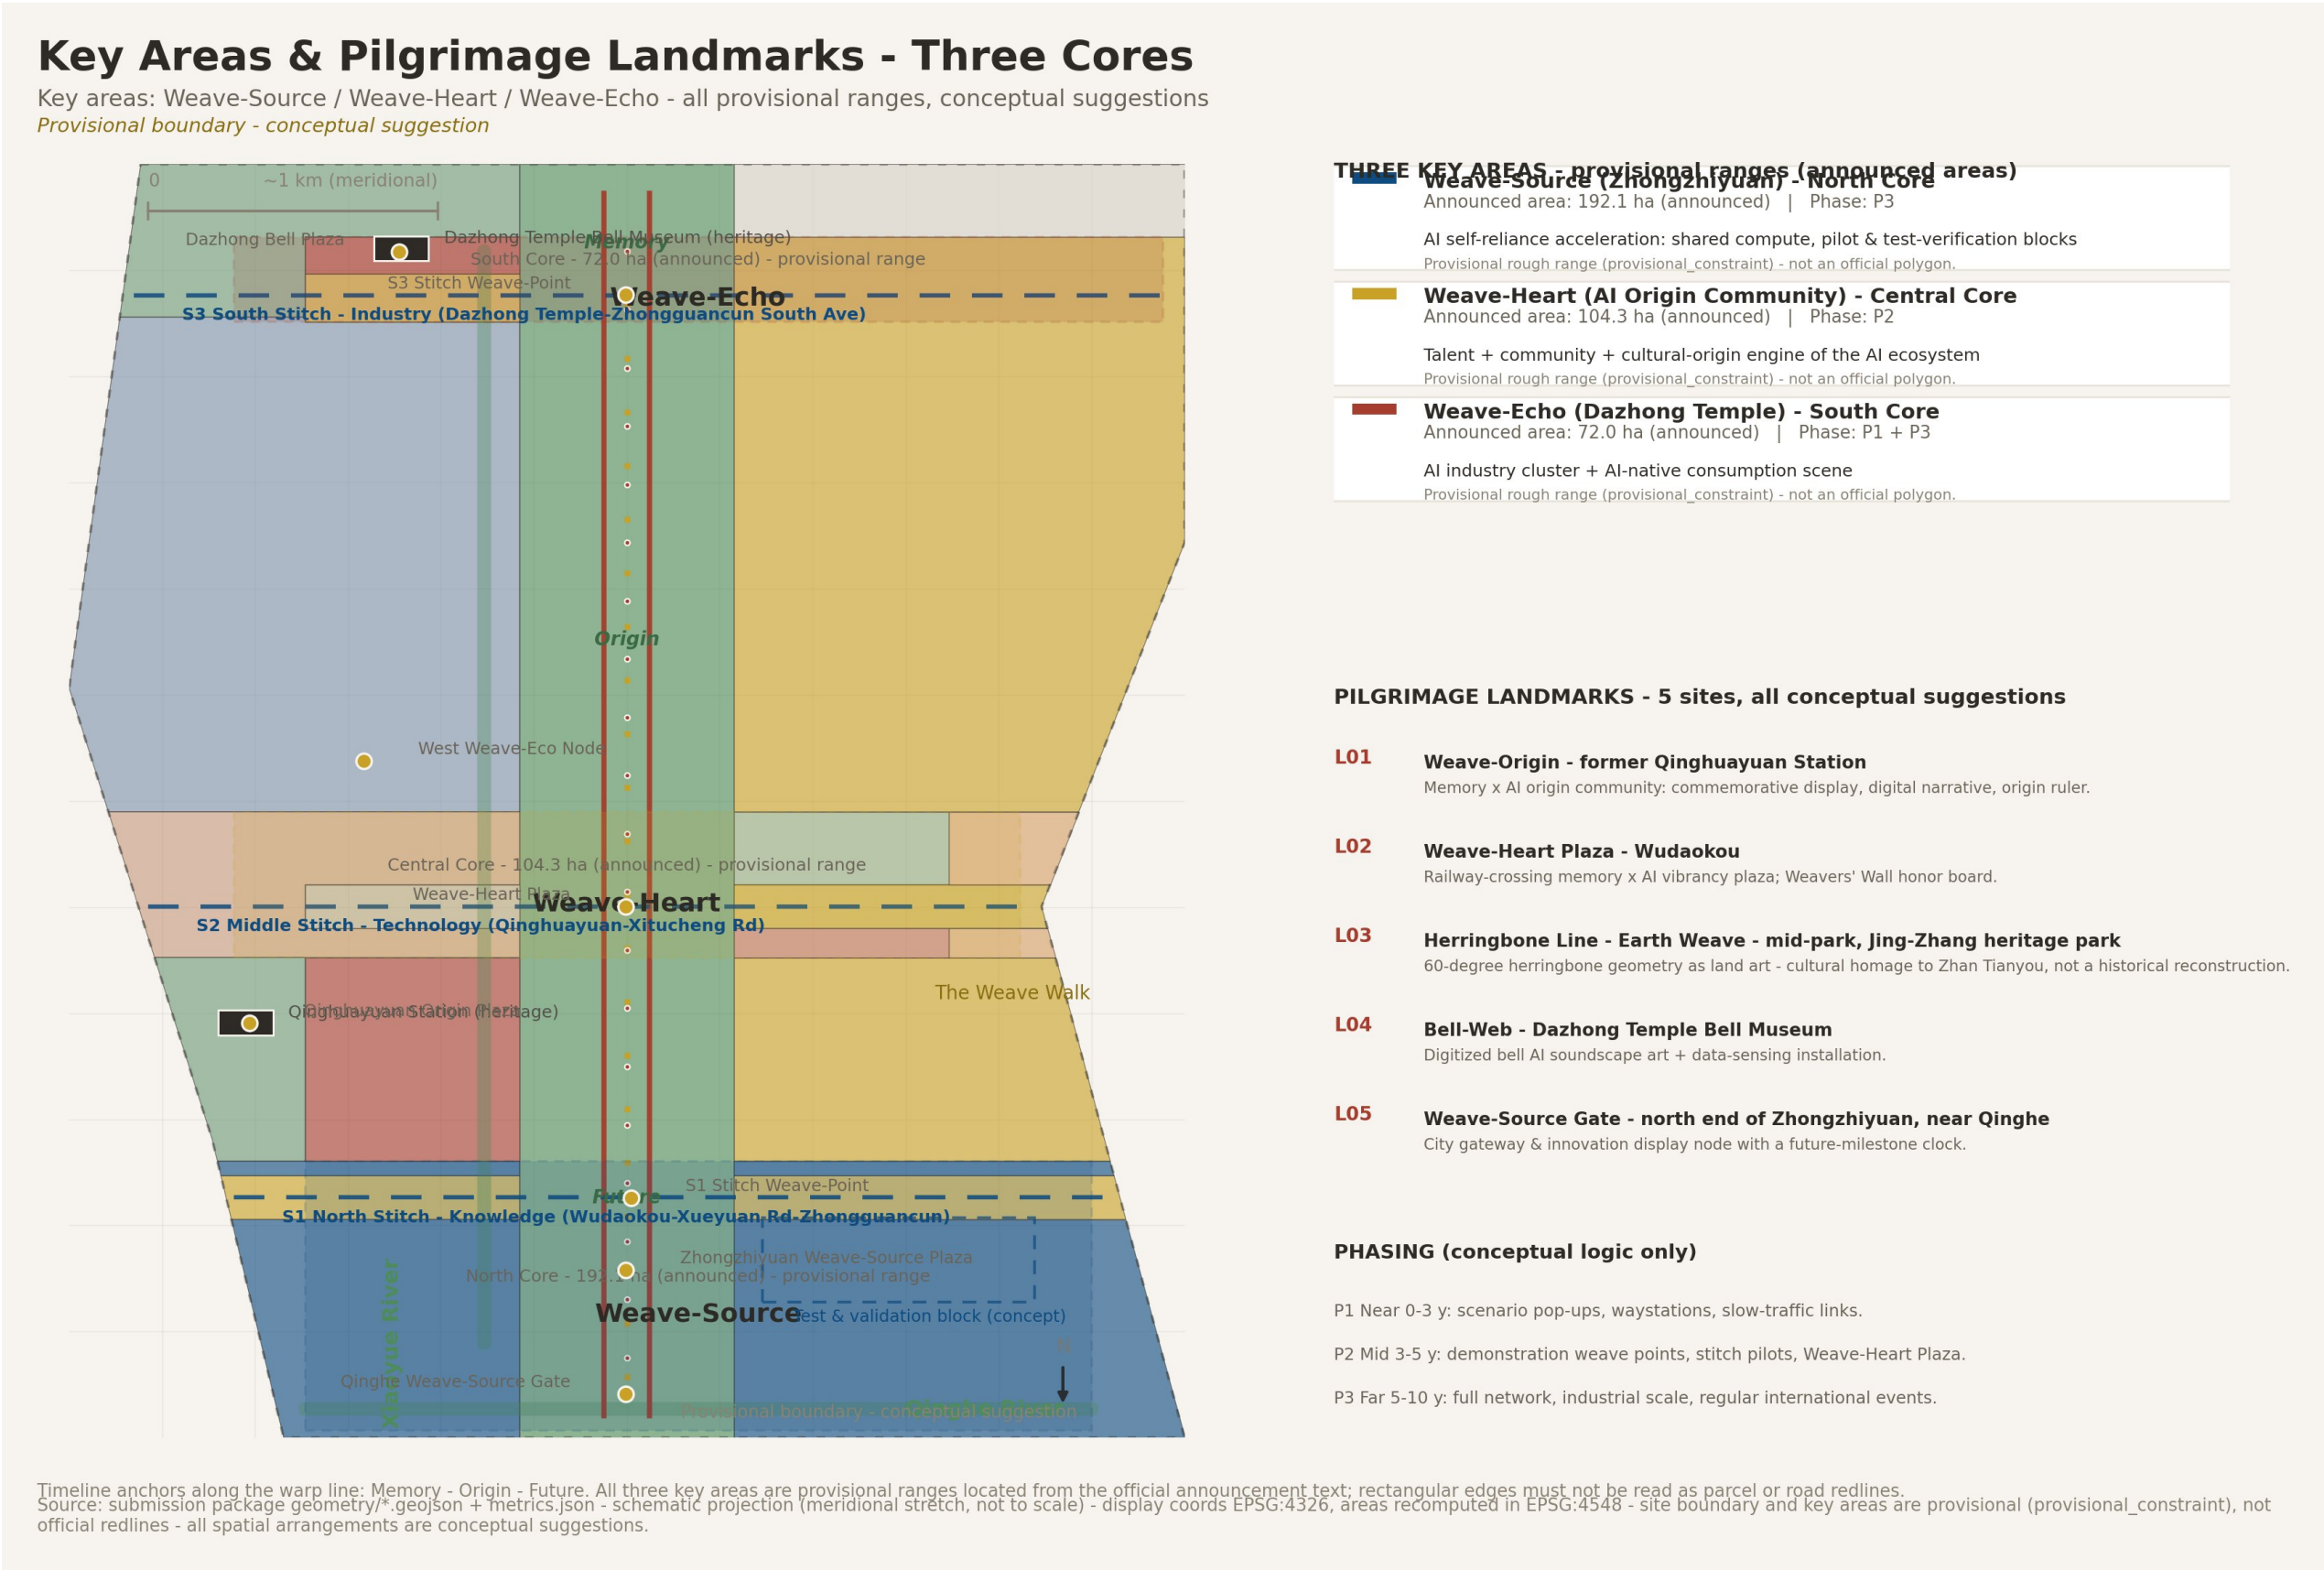

Fig. 3 Key Areas & Pilgrimage Landmarks
Three cores Weave-Source (Zhongzhiyuan, North, ~192.1 ha), Weave-Heart (AI Origin Community, Central, ~104.3 ha), Weave-Echo (Dazhong Temple, South, ~72.0 ha) - all provisional ranges; five pilgrimage landmarks L01-L05; three-phase implementation logic (conceptual).

Fig. 4 Mobility & Blue-Green Network

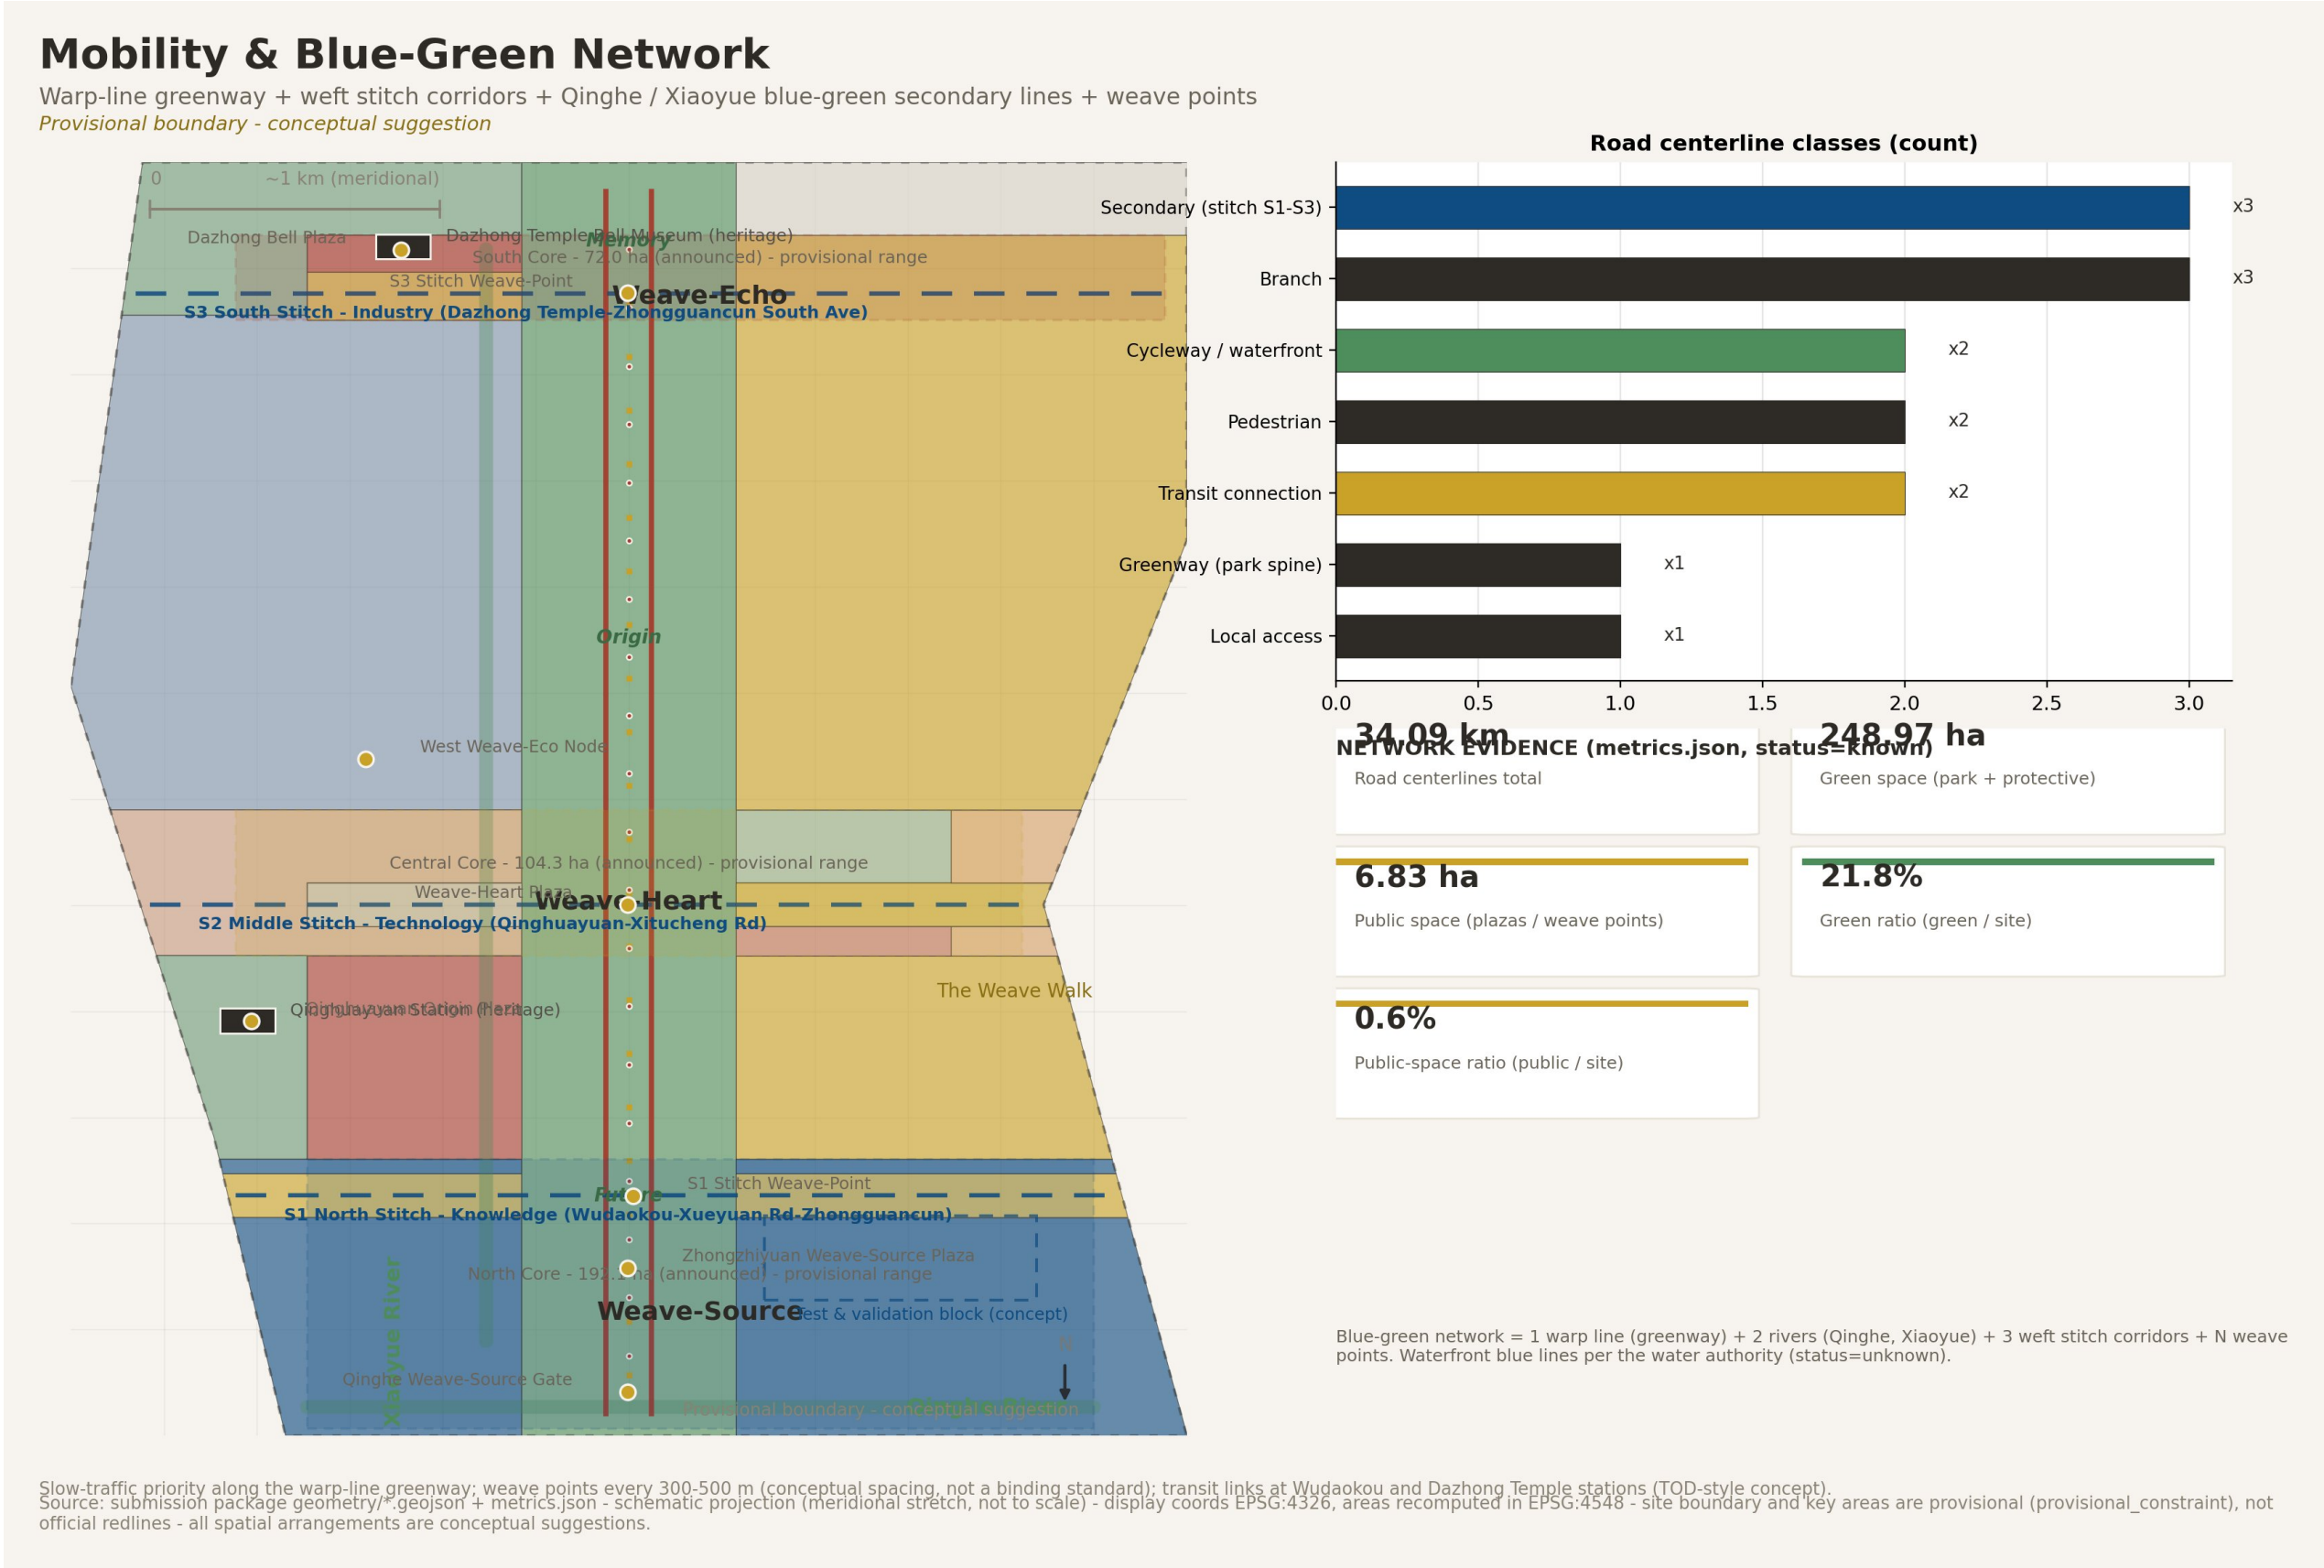

Fig. 4 Mobility & Blue-Green Network
Warp-line greenway spine, weft stitch corridors, Qinghe / Xiaoyue waterfront greenways and 8 weave points; road centerlines total 34.09 km; green ratio 21.8%, public-space ratio 0.6%.

All values from metrics.json (status=known), recomputed from geometry layers in EPSG:4548; display text and machine data-value consistent (tolerance 1e-6).

LAND-USE BREAKDOWN (MNR CODES)

Compliance red line: floor-area ratio (FAR) and average building height have no public statutory control basis (status=unknown) - no values are shown; development intensity follows the statutory plan.

```
road.redlines.session package geometry/*.geojson + metrics.json | schematic projection (meridional stretch, not to scale) | display coords EPSG:4326, are...
