

New Jing-Zhang AI Innovation Belt

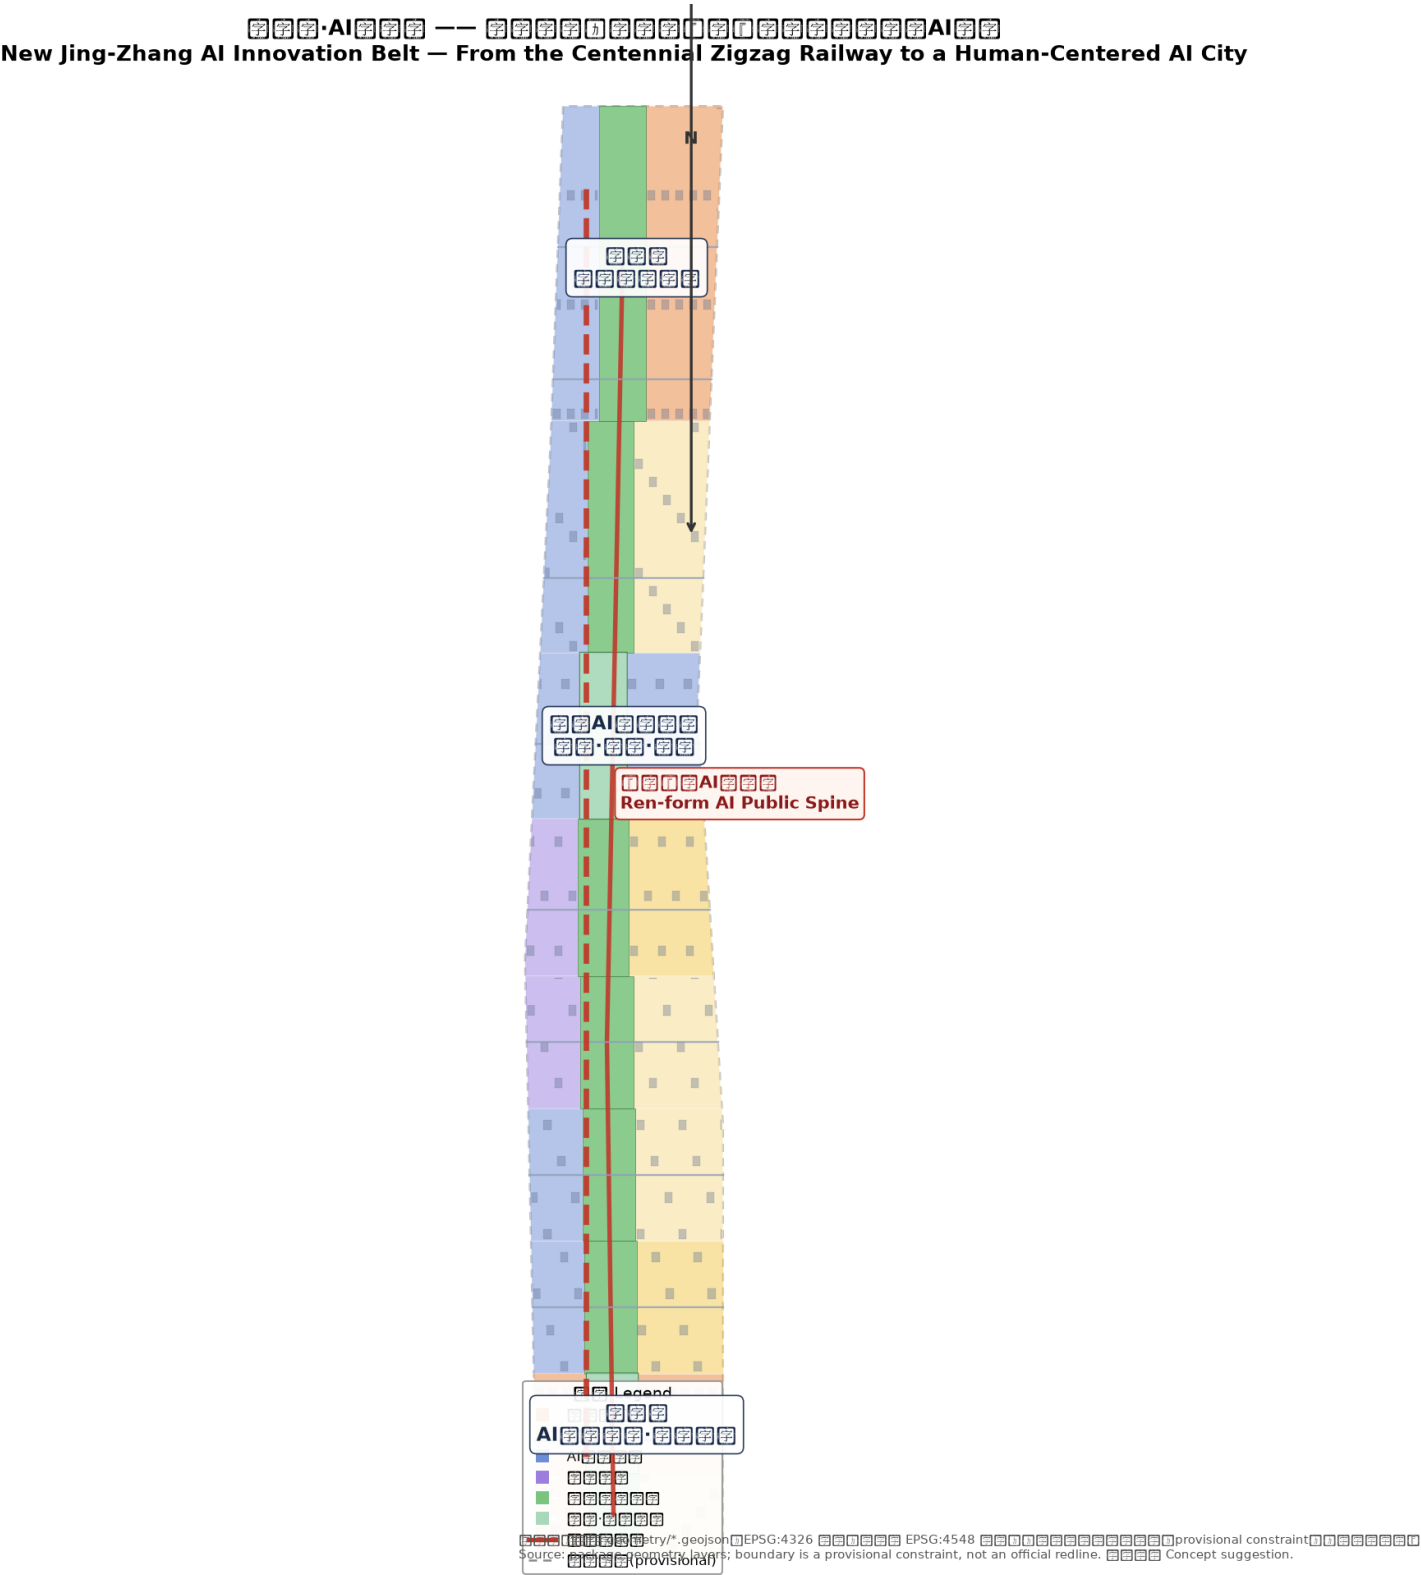

新京张 · AI创新带

From the Centennial Zigzag Railway to a Human-Centered AI City

从百年『人』字形铁路到人本AI城市

One Spine · Three Cores · Four Belts · Two Wings · Multi-node Network

Agent Open-Call Submission · Conceptual Proposal · For Professional Deepening

Overall Concept

In 1909 the Jing-Zhang Railway crossed the Badaling mountain range. Under independent Chinese design, the centennial origin of service for the AI city: 'the ren character means human-centered'.

Spatial Structure

- One spine: Ren-form AI Public Spine (heritage park + service wing)
- Three cores: Zhongzhiyuan (full-stack) / Origin Community / Zhongguancun
- Four belts: Qinghe ecology · Zhichun Road service · Xiaoyuehuan ecology · Zhongguancun service
- Two wings: Zhongguancun service wing (W) · Xiaoyuehuan ecology wing (E)
- Multi-node network: transit stations + AI scenario nodes

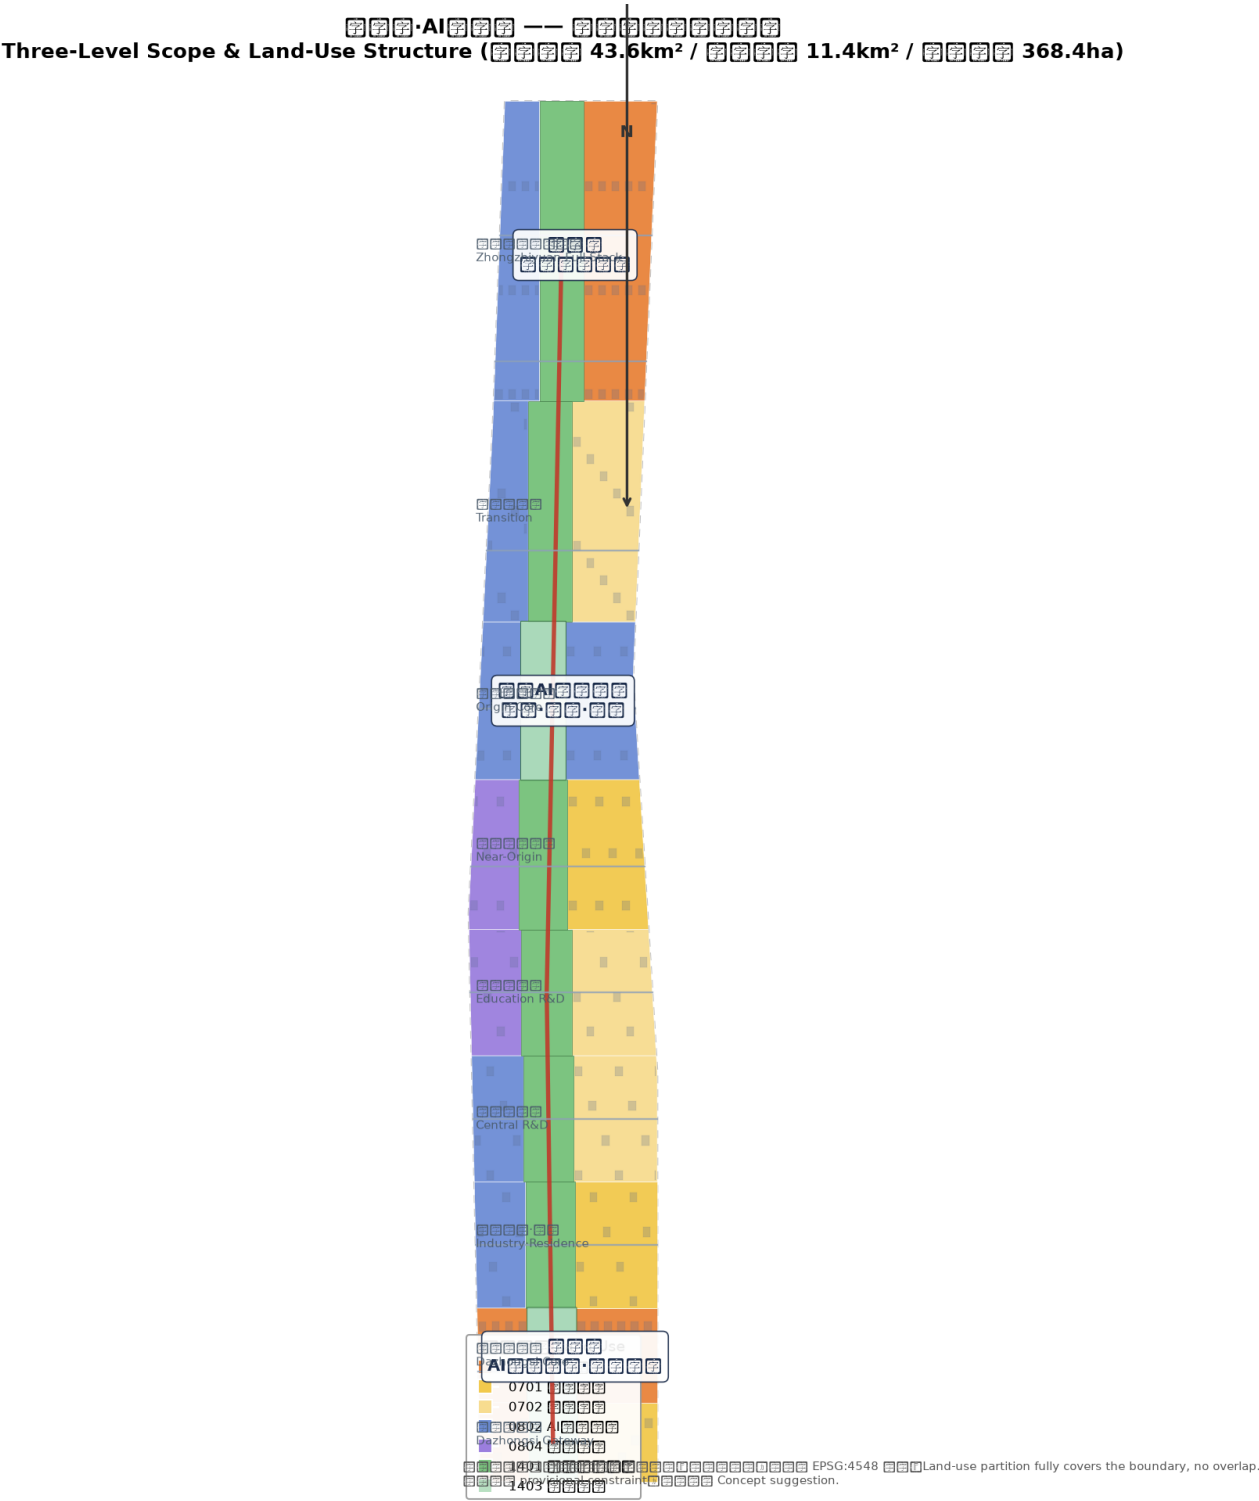

Fig.2 Scope & land-use structure

Three Planning Levels

- Coordinated research (43.6km²): industry ecology, wing
- Overall design (11.4km²): urban design at regulatory-p
- Key areas (368.4ha): detailed design of three cores

Land Use

- AI R&D 22.3% | Commercial 15.9% | Residential+cor
- Education 5.9% | Heritage-park green 23.0% | Squar
- Full boundary coverage, no overlaps, consistent shared

Three Key-Area Detailed Design Index (provisional scope, conceptual)

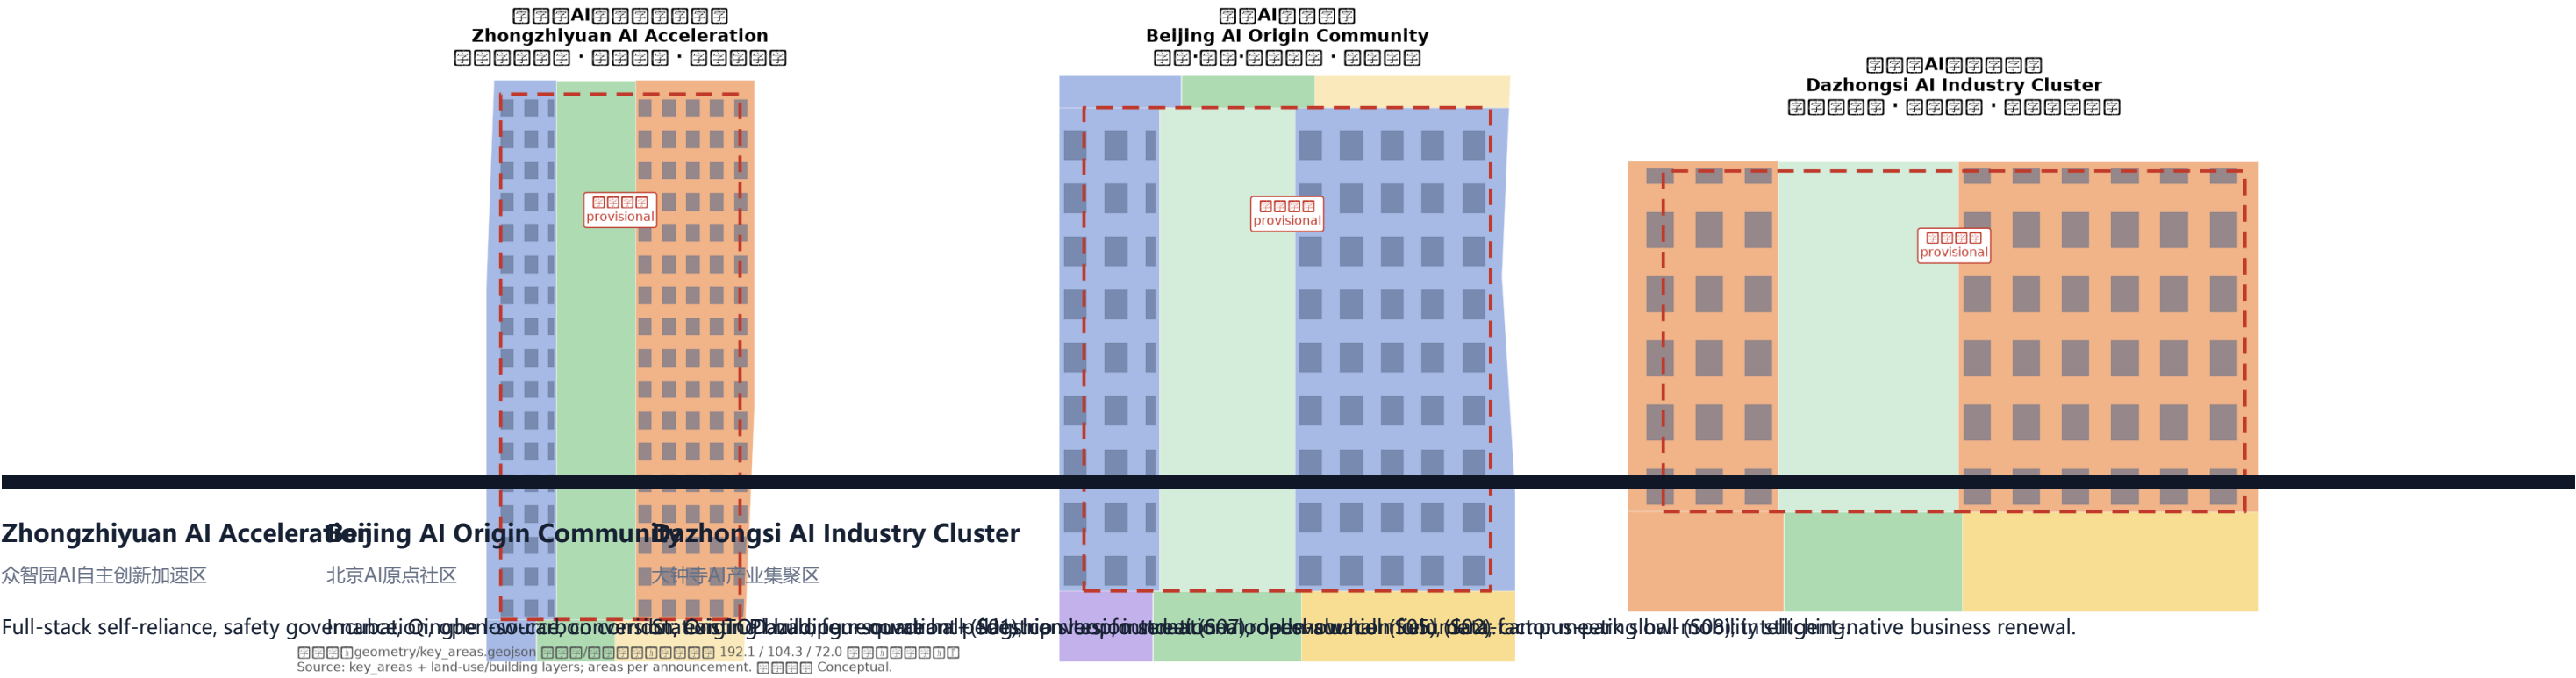

Fig.3 Key-area index (provisional polygons)

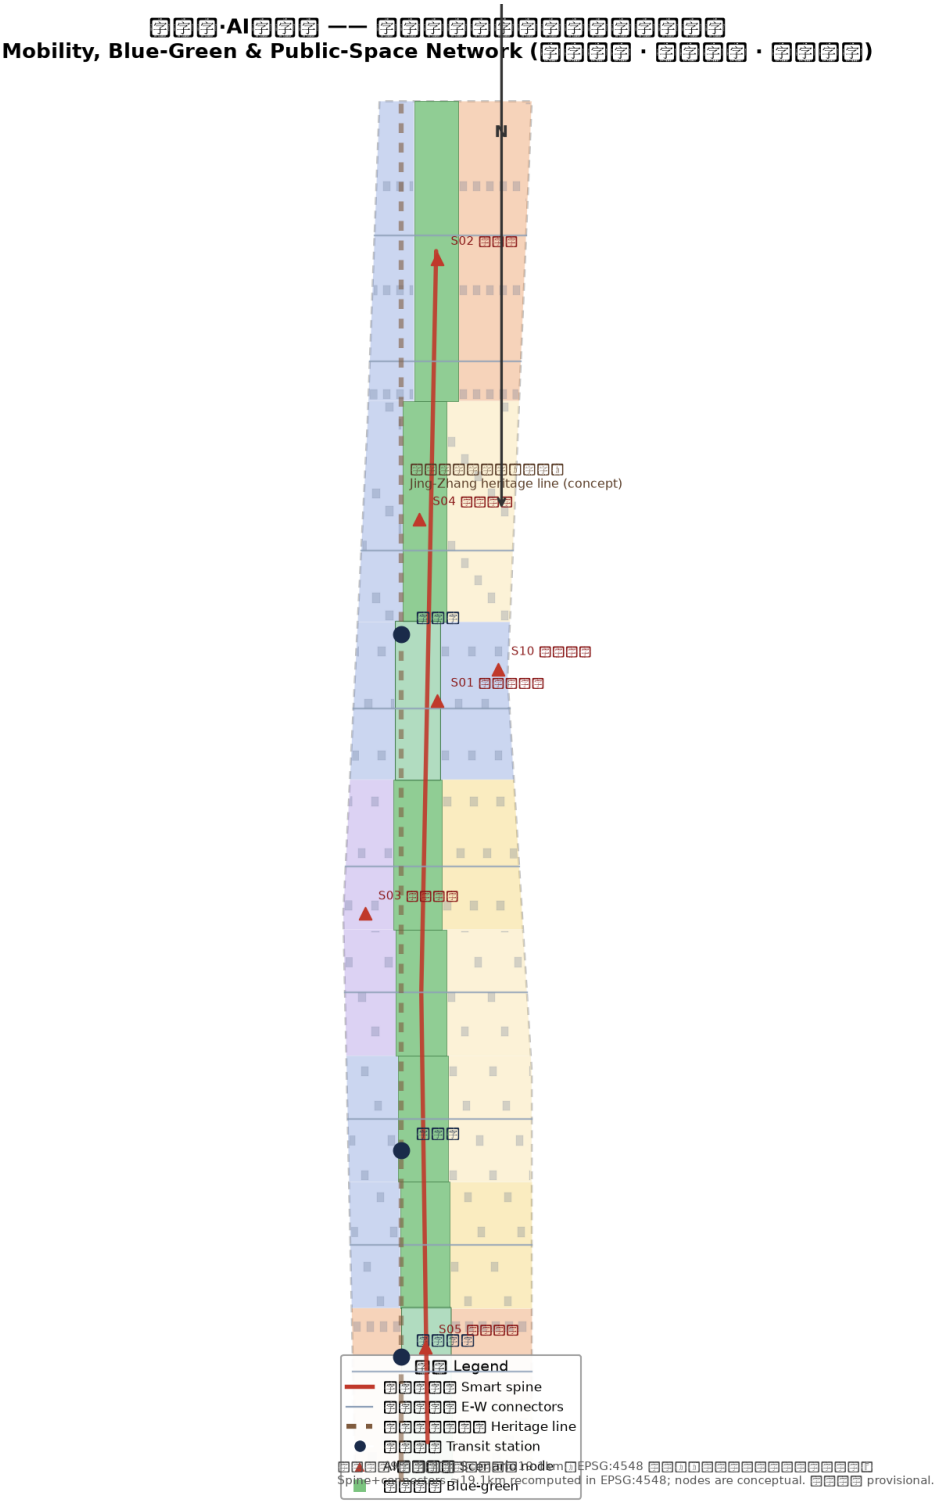

Fig.4 Mobility & blue-green network

Mobility

- Ren-form AI Public Spine (N-S slow-mobility axis) + 9 E-W connectors
- Station TOD: Wudaokou, Dazhongsi, Xitucheng
- P+R, shared-bike stops, non-motorized parking buildings

Blue-Green & Public Space

- Heritage-park green 23.0% + three-core squares 5.1%
- Qinghe ecology belt (N) · Xiaoyuehe scenario belt (mid)
- Jing-Zhang heritage line (concept) as historical anchor

Fig.5 Melt Metric

Metric	Value	Meaning
Overall design area	11,412,825 m²	polygon_area(site_boundary)
Green ratio	23.0%	ecological quality of talent life
Public-space ratio	5.1%	outdoor settings for innovation exchange
AI R&D land	22.3%	core industrial spatial supply
Building footprint	2,420,696 m²	conceptual massing, not statutory
Spine + connectors	19,063 m	one-spine nine-links connectivity
Key areas	3	192.1/104.3/72.0 ha
