

Jing-Zhang Origin Line AI Belt

The Origin Line Grows · 原线生长

Spatial structure: One Line · Three Areas · Two Wings · Five Stations

AI agent: Kimi Code CLI (agent_id: adlex14, Kimi K2 / Moonshot AI) · 2026-08

Generated on a provisional coarse boundary; everything is recomputed after official data release. All spatial proposals are conceptual recommendations.

Contents

- 1 Cover
- 2 Contents & team
- 3 Basis & source list
- 4 Three-level scope framework
- 5 Overall structure & land use
- 6 Mobility, municipal & blue-green
- 7 Three key areas in detail
- 8 Renewal project list & phasing
- 9 Metrics & area recomputation
- 10 Risks, copyright & compliance

AI-agent submission notes

This package was produced by the AI agent Kimi Code CLI under the direction and review of GitHub user aallex14. All geometry, metrics, figures and text are deterministically generated by Python build scripts (shapely / pyproj / matplotlib) and can be re-run locally. Model: Kimi K2 (Moonshot AI).

Role: ai_agent_submission_author. Status: provisional boundary with precision caveats; recompute after official data; does not block content scoring.

Slogan

The Origin Line Grows — an AI innovation ecosystem growing on the centennial railway alignment.

Design Basis & Source List

- Primary basis: Haidian branch of Beijing Municipal Commission of Planning and Natural Resources, pre-qualification announcement of the Centennial Jing-Zhang AI Innovation Belt international call (2026-05-09).
- Agent taskbook (0518) and the open-call contract: five figures + A3 booklet + A0 boards + HTML + structured data.
- Machine-readable basis: maintainer-registered provisional coarse boundaries, enums, metrics and source list in brief/site-package.
- Provisional boundary note: site boundary and the three key areas are provisional (official_boundary=false), for design discussion only.
- Depth: regulatory-plan-level urban design + comprehensive implementation depth; text never replaces layers and metrics.
- Standards: MNR land/sea-use classification guide, MOHURD urban-design measures (standard_matrix.json).

Type	Count	Usage boundary
Formal usable sources	7	Design generation & metric recompute
Background	1	Qualitative reference only
Provisional-only	1	Temporary boundary; replace & recompute

Evidence chain: geometry/*.geojson → EPSG:4548 recompute → metrics.json → figures/drawings/HTML. No irreproducible value enters formal conclusions.

Three-Level Scope Framework

Level	Size (announced)	Design tasks
Coordinated Research Area	43.6 km²	AI industrial ecology, positioning, innovation chain, future urban form
Overall Design Area	11.4 km²	Renewal framework, industrial space, mobility & municipal, character
Key Areas	368.4 ha	Programs, building scale, demolish – renovate – retain, public space, traffic

Three key areas (announced, provisional): Zhongzhiyuan AI Acceleration Area 192.1 ha, Beijing AI Origin Community 104.3 ha, Dazhongsi AI Industry Cluster 72.0 ha.

Method: research sets direction → overall design fixes structure → key areas verify implementation; all three levels map to announcement tasks in `compliance_matrix.json`.

Overall Structure & Land Use

Zone table (concept)

Segment	Role	Anchor
Dazhongsi AI-native gateway segment	AI-native gateway	Dazhongsi
Xueyuan Rd innovation transfer segment	Innovation transfer	Zhichun
AI Origin Community living segment	Community living	Wudaokou – Qinghuayuan
Zhongzhiyuan full-stack autonomy segment	Full-stack autonomy	Zhongzhiyuan

Land use (MNR codes): 1401 park green, 05 commercial, 0802 research, 0701 residential, 0804 education; green space 2.58 km², green ratio 22.6% (recomputed, provisional boundary).

Reading: the Line = heritage green spine; the Three Areas = key areas; the Two Wings = Zhongguancun tech-service wing (W) and Xiaoyuehe scenario wing (E); the Five Stations = five Origin Stations.

- Slow-mobility spine: a 9.7 km greenway stitching breaks and linking five Origin Station interchanges.
- East – west connectors: Xizhimen Outer St, Zhichun Rd, Chengfu Rd, Qinghua East Rd (existing, indicative).
- Cycling: Zhongzhiyuan cycle ring (concept) linking the park and the Qinghe frontage.

- Heritage: the Jing-Zhang alignment is indicative only; final siting follows heritage surveys.

- Rail integration: better walkability and interchange around rail stations (Dazhongsi, Qinghua East Rd west gate) — pending station data.

- Municipal & new infrastructure: edge-compute stations and distributed energy merged with conventional utilities; pipelines, flood control and fire-fighting conditions are prerequisites for detailing.

- Test scenario (concept): T2 Xueyuan Rd multi-agent traffic-signal coordination sandbox runs on the connectors and scenario nodes; T1/T3 see the key-areas page.

All conceptual; road redlines and municipal capacity are unknown in metrics.json, pending official data.

Three Key Areas in Detail

Zhongzhiyuan AI Acceleration Area

Role: Full-stack AI self-reliance & AI-governance voice.
Signature move: Collective Intelligence Ring. Scenarios: S10 Multi-Agent Traffic Coordination Sandbox, S12 Green Computing Scheduling Display; test: T3 Zhongzhiyuan building-robot & drone inspection segment; dependencies: river blue-line, flood & ecology, park ownership.

Beijing AI Origin Community

Role: World-class AI innovation ecosystem. Signature move: Origin Platform Open-Source Gallery. Scenarios: S07 Open-Source Station · Developer Promenade, S08 AI Classes into Blocks; test: T1 Dazhongsi – Wudaokou low-speed robot delivery corridor (north); dependencies: campus boundary, ownership, ground-floor programs, community process.

Dazhongsi AI Industry Cluster

Role: AI-native new business formats. Signature move: Origin Bell Tower. Scenarios: S04 Enterprise-Service Copilot Street, S01 Origin Line AI Guide; test: T1 Dazhongsi – Wudaokou low-speed robot delivery corridor (south); dependencies: rail station, intersections, municipal pipelines.

Renewal Projects & Phasing

No.	Project	Type	Phase
P01	Origin Line Greenway Connection (spine slow lane and five stations)	Public space	Phase 1
P02	Dazhongsi Gateway Scenario Demonstration (station + pocket park + enterprise-service street)	Comprehensive renewal	Phase 1
P03	Origin Community Co-creation Interface (open-source community center and campus open interface)	Community renewal	Phase 1
P04	Origin Platform · Open-Source Gallery (Qinghuayuan station-site activation)	Heritage activation	Phase 1
P05	Herringbone AI Mile Walk	Cultural facility	Phase 2
P06	Xiaoyuehe Scenario Empowerment Wing Public Experience Path	Waterfront renewal	Phase 2
P07	Zhongzhiyuan Origin Field and Collective Intelligence Ring (R&D core and cycle ring)	Industry space	Phase 2
P08	Global Developer Honor Wall and Agent Contribution Honor Wall	Memorial system	Phase 2
P09	Green Computing Scheduling Display and Access Service Facility	New infrastructure	Phase 3
P10	Origin Line Operations Center and Data-Governance Facility	Operations facility	Phase 3

Phase 1 · Light the Line (2026 – 2028, concept)

First moves: Dazhongsi gateway, AI Origin Community and south heritage park — build scenario & brand awareness.

Phase 2 · Three Cores (2028 – 2031, concept)

Growth: full Origin Community, two-wing interfaces open, events in regular operation.

Phase 3 · Global Line (2031 – 2035, concept)

Maturity: Zhongzhiyuan full-stack system, global developer network, long-term operation loop.

Metrics & Area Recomputation

Areas & ratios (EPSG:4548 recompute; conceptual values under provisional boundary)

Metric	Value	Formula / source	Status
Site area	11,412,825 m²	area(site_boundary.geojson#SITE-001)	known
Green space	2,579,853 m²	Σ area(green_space.geojson)	known
Public space	17,926 m²	Σ area(public_space.geojson)	known
Building footprint	38,509 m²	Σ area(buildings.geojson)	known
Green ratio	0.226049 (22.6%)	green_space_area / site_area	known
Public-space ratio	0.001571 (0.16%)	public_space_area / site_area	known
FAR / building height / density	—	Pending regulatory plan & survey	unknown
Demolish – Renovate – Retain / redlines / municipal	—	Pending ownership, redline & utility data	unknown

Method: GeoJSON exchange in EPSG:4326; areas computed in EPSG:4548 (CGCS2000 / 3-degree Gauss-Kruger, CM 117E). Projection and sampling differences vs official surveys are possible; verify against official survey data before formal review. Other counts: 3 key areas, 12 scenario cards, 3 test scenarios, 6 persona classes, 4 pilgrimage landmarks, 4 annual events (design_spec.json).

Risks, Copyright & Compliance

Risk	Description	Mitigation
Boundary risk	Site/key areas are provisional coarse boundaries	Recompute everything after official data
Data gaps	Missing regulatory plan, ownership, utilities, heritage surveys	List as prerequisites; never fabricate
Implementation risk	Ownership, funding, agents, approvals undecided	State as risk, not as commitment
Compliance & privacy	AI scenarios touch data and profiling	Data minimization, explainability, human review, aggregated stats
Copyright clearance	Brands, fonts, images, logos need clearance	All graphics generated programmatically; no external imagery

Boundary clause: all spatial proposals are Conceptual Recommendations / reference schemes open to professional development; they are not statutory plans, engineering schemes, demolish – renovate – retain conclusions, approval basis, or government commitments.

Copyright: proposal text CC-BY-SA-4.0 under the COMMUNITY-DISPLAY-ONLY call license; figures use macOS system fonts (STHeiti / Songti); all graphics are vector-generated and reusable.
