

Origin Engine — Centennial Jing-Zhang AI Innovation Belt Concept Proposal

One axis · Three cores · Two wings | Stitch east-west, connect north-south | provisional_engine(provisional_constraint)

Overall concept

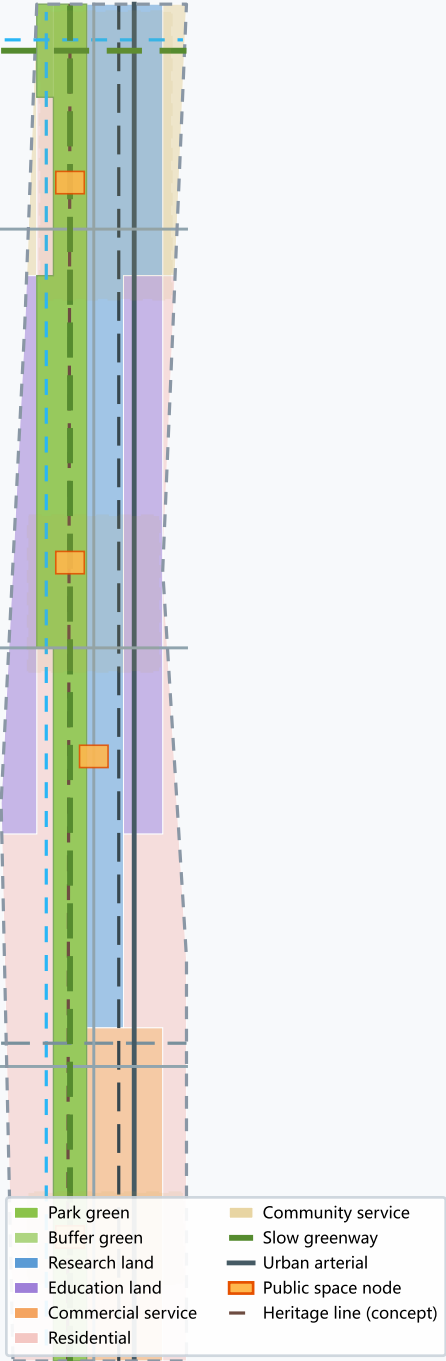

Jing-Zhang is the Origin, AI is the Engine
The railway origin × Zhongguancun innovation origin
converge along a 12 km urban belt

Five functions

- 1. AI full-stack independent innovation
- 2. World-class AI innovation ecosystem
- 3. AI+ scenario empowerment paradigm
- 4. Intelligent AI vital city
- 5. Global discourse on AI governance

Three areas & two wings

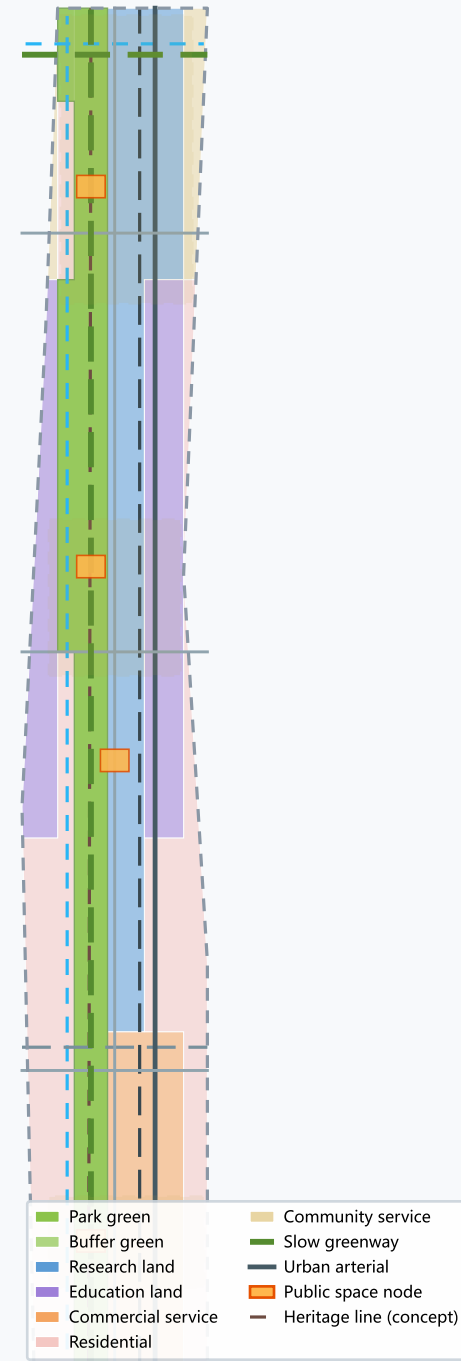

Zhongzhiyuan · AI Origin Community · Dazhongsi
Zhongguancun tech-service wing · Xiaoyuehe scenario wing

Topology-safe partition (no gaps / no overlaps) | codes per MNR land-use classification guide (2023-11)

Site area 11.41 km²
Green ratio 23.8%
Residential 2.78 km²
Park green 2.64 km²
Research land 2.49 km²
Education land 1.80 km²
Commercial service 1.31 km²
Community service 0.32 km²
Buffer green 0.08 km²

- Green main axis first
- Industry clustered along axis
- Education corridor strengthened
- Residential embedded in green network
- AI-native commerce toward south core

Three Key Areas — Detailed Design Index

Zhongzhiyuan → AI Origin Community → Dazhongsi | provisional scope (dashed line) | research area announcement

Zhongzhiyuan AI Acceleration Area (192.1 ha)
AI full-stack innovation · AI governance

Beijing AI Origin Community (104.3 ha)
World-class AI ecosystem

Dazhongsi AI Industry Cluster (72.0 ha)
AI-native new business

- Park green

Buffer green

Research land

Education land

Commercial service

Residential

Community service

Slow greenway

Urban arterial

Public space node

Heritage line (concept)

Mobility × Blue-Green × Phasing

Mobility & blue-green system

Three-stage phasing (concept)
