

THE SEASON LINE: CLIMATE ADAPTATION AS CIVIC INFRASTRUCTURE

Concept design · provisional geometry · recalculable evidence

THE SEASON LINE

REV 1.1

DESIGN PREMISE

Make public space usable all year before adding AI. Every automated service keeps human takeover and a non-digital equivalent.

01 One seasonal civic spine

03 Three seasonal commons

02 Two supporting wings

12 Twelve AI scenario nodes

PROVISIONAL BOUNDARY IS NOT AN OFFICIAL REDLINE. Official polygons trigger full recalculation of all layers, metrics, figures, and text.

One seasonal civic spine · three commons · two wings · twelve scenarios

Provisional geometry supports directional design only; official polygons trigger full recalculation.

FUNCTIONAL RESPONSIBILITIES

- 研发 / TEST**
Real-weather validation
- 公园 / CIVIC**
All-season civic spine
- 产业 / RELEASE**
Pilot, release, services
- 社区 / CARE**
Learning, care, backup

Dashed = provisional constraint, not parcel

43.6 km² research → approx. 11.4 km² overall design → 368.4 ha key areas

Complete topology is not statutory land use; metrics retain source and precision levels.

- Open-source night school
- Lab time bank

DIRECTIONAL DESIGN / PROVISIONAL GEOMETRY

03 DAZHONGSI

- All-weather commons
- Night public service
- Heat/cold navigation

DIRECTIONAL DESIGN / PROVISIONAL GEOMETRY

Zhongzhiyuan: real-weather validation; AI Origin: learning translation; Dazhongsi: all-weather public service.

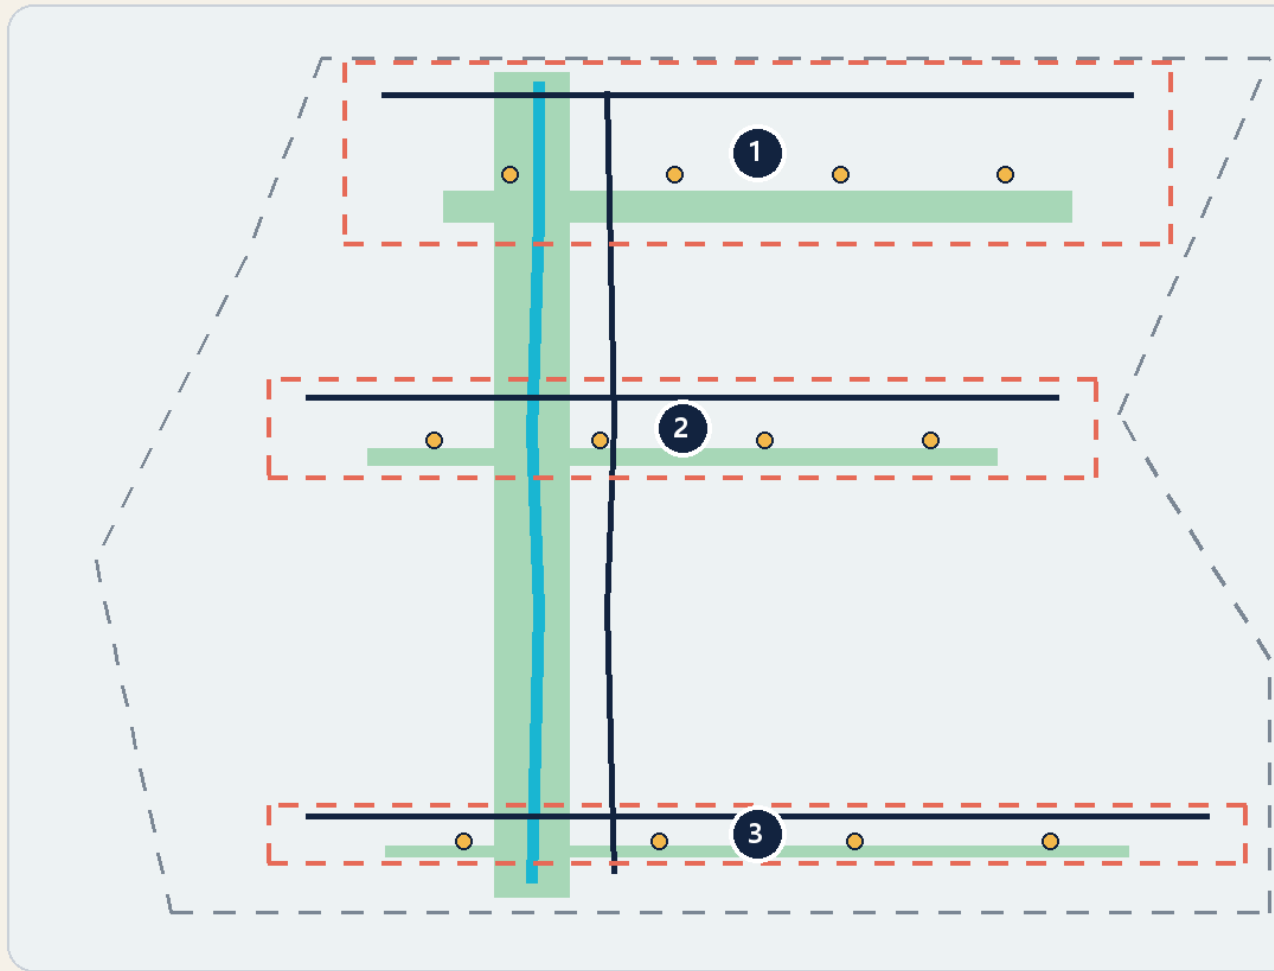

Each area includes role, space, buildings, mobility, scenarios, projects, and risk.

COMMON PROTOCOL

- Works offline
- Human takeover
- Access first
- No tracking by default

Fix breaks, shade, rain cover, winter sun, access, and offline service before adding AI.

All centerlines and station relationships await official transport data.

UNKNOWN: FAR / height / setbacks / official stations / site comfort thresholds — awaiting official data and professional review

Known values are recalculated from GeoJSON; unknowns state reason, dependency, and reviewer.

Any file edit requires refreshed hashes and all four checks.

SPACE

Provisional site/key areas are not official; Dazhongsi location awaits authoritative data.

CONTROLS

FAR, height, density, setbacks, roads, and utilities remain unknown.

AI

No tracking by default, minimum data, human takeover, non-digital equivalence, appeal and exit.
