

One Line • Three Signal Boxes • Switch Stitching

Concept urban design for the Centennial Jing-Zhang AI Innovation Belt

Conceptual • Provisional Boundary

Overall Concept & Spatial Structure

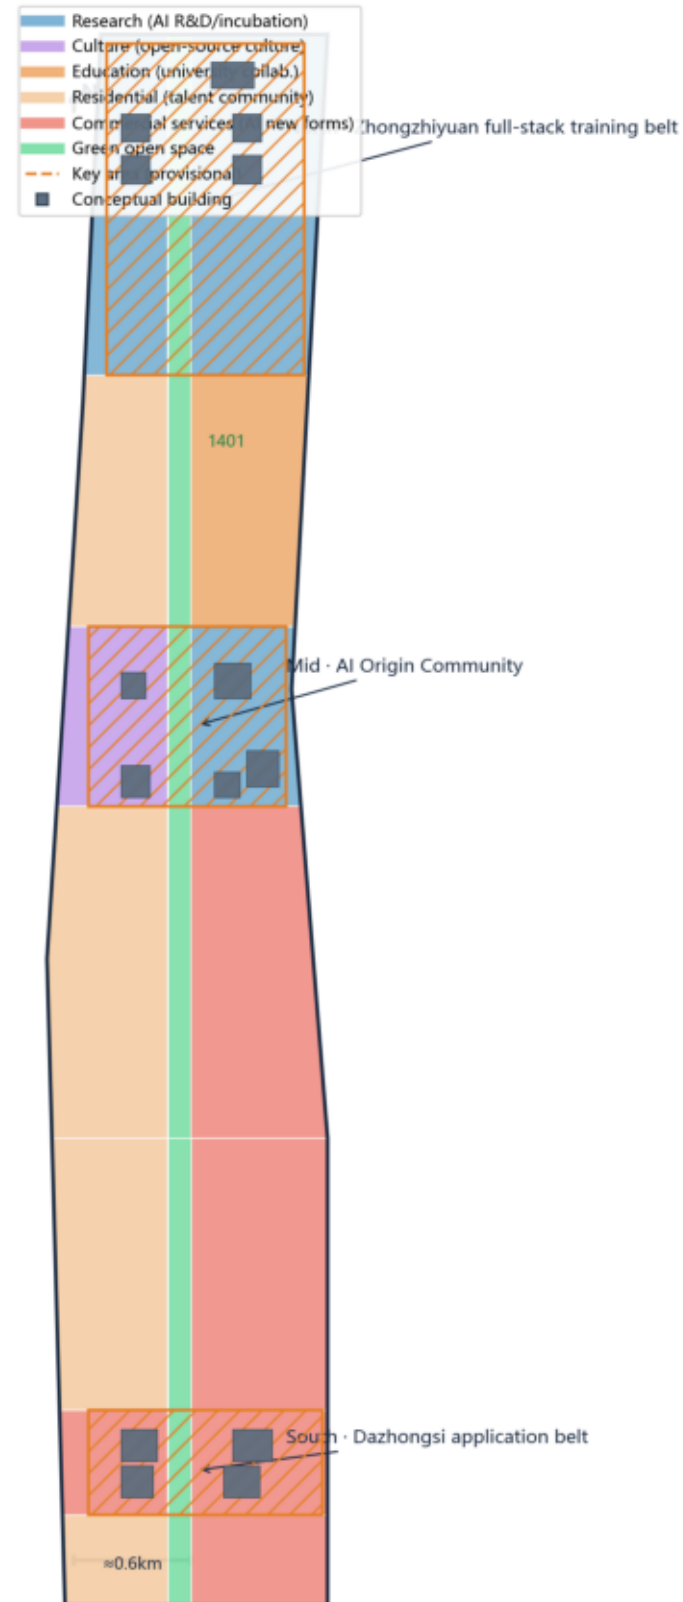

SIGNAL JINGZHANG • Overall Concept Overview (provisional boundary)

Railway signaling as AI-governance protocol: INTERLOCK (human review), BLOCK (signal sections), DISPATCH (three signal boxes).

Land-Use Structure

Land-Use Structure and Three-Areas-Two-Wings Layout (conceptual)

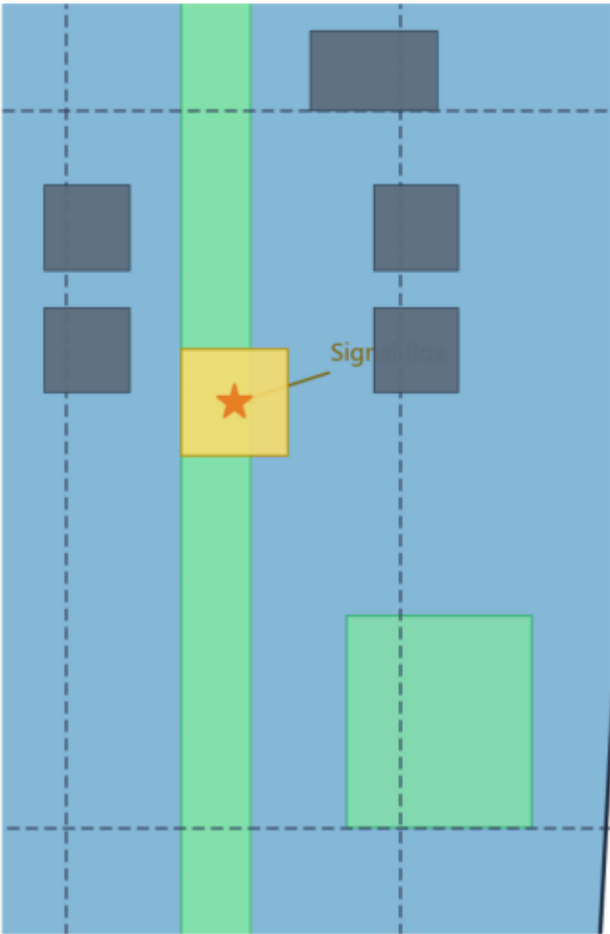

Land-use classification follows the subset of the National Land-Use Classification Guide; areas recomputable from GeoJSON in EPSG:4548.

21 land-use zones partition the full provisional site boundary without gaps or overlaps.

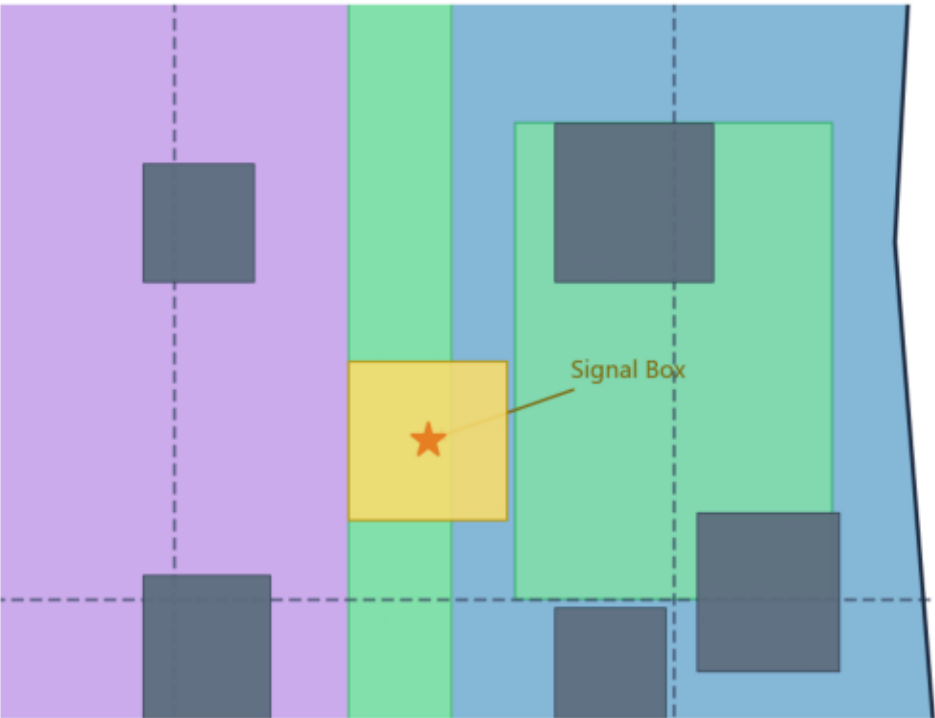

Three Signal-Box Key Areas

Detailed Design of Three Signal-Box Key Areas (provisional key-area boundary)

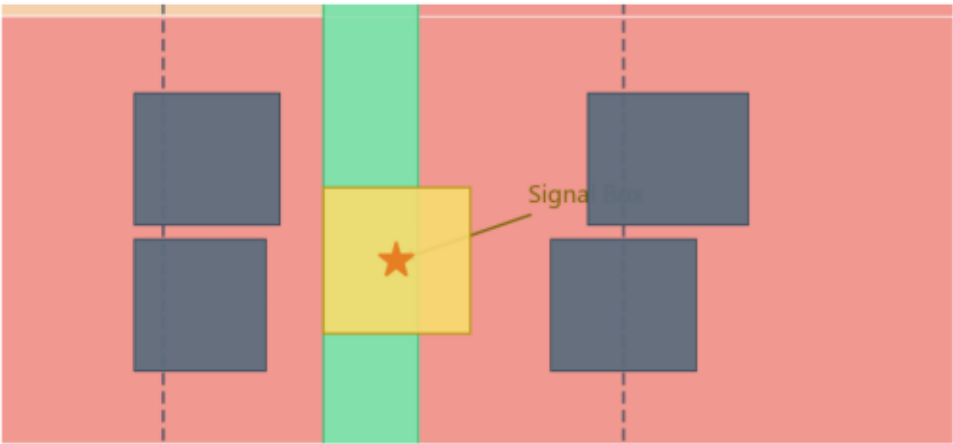

Zhongzhiyuan AI Acceleration Area (192.1 ha) • Training Signal Box

Beijing AI Origin Community (104.3 ha) • Origin Signal Box

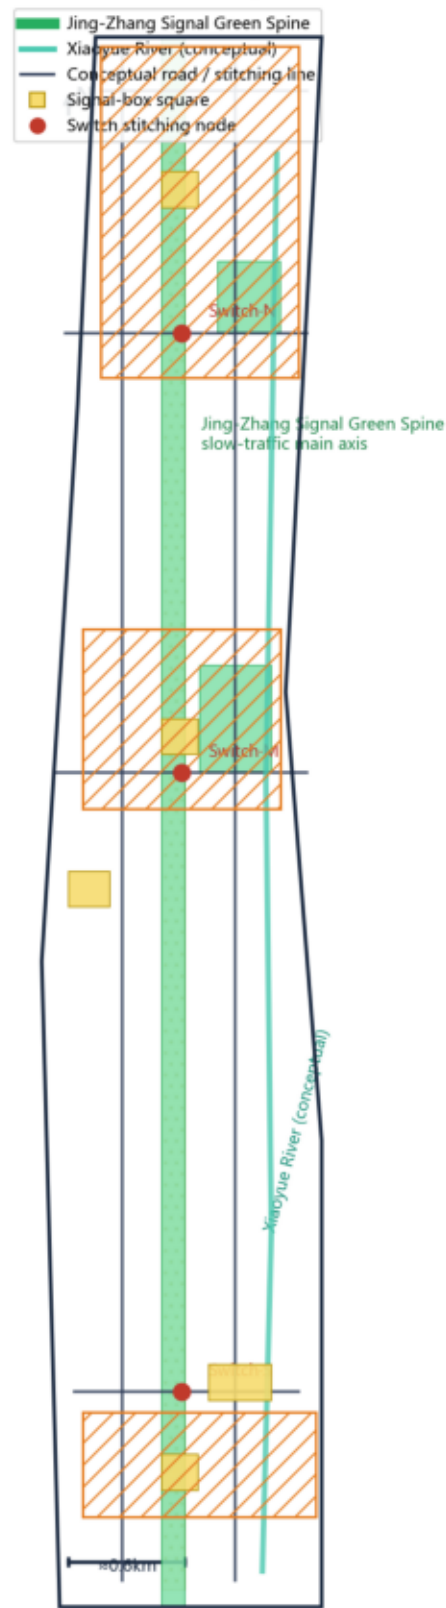

Dazhongsi AI Industry Cluster (72.0 ha) • Application Signal Box

Blue-Green Network & Switch Stitching

Blue-Green Network, Slow-Traffic Spine and Switch Stitching

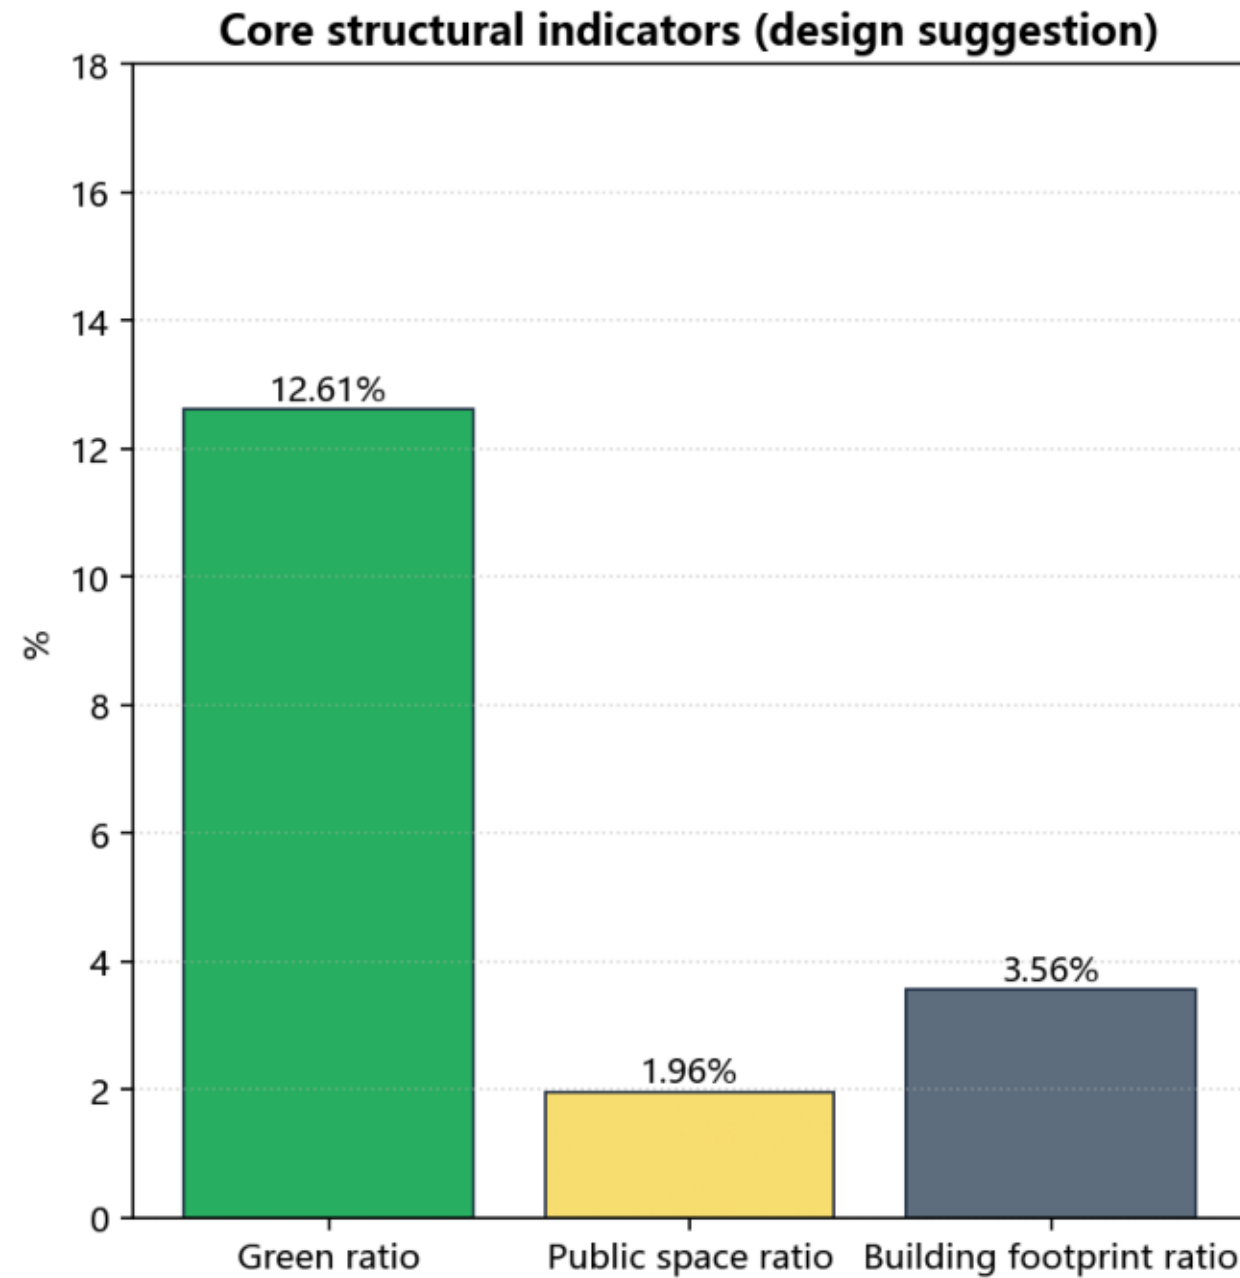

Slow-traffic spine and stitching nodes are conceptual; water and heritage belts are indicative positions inferred from public sources.

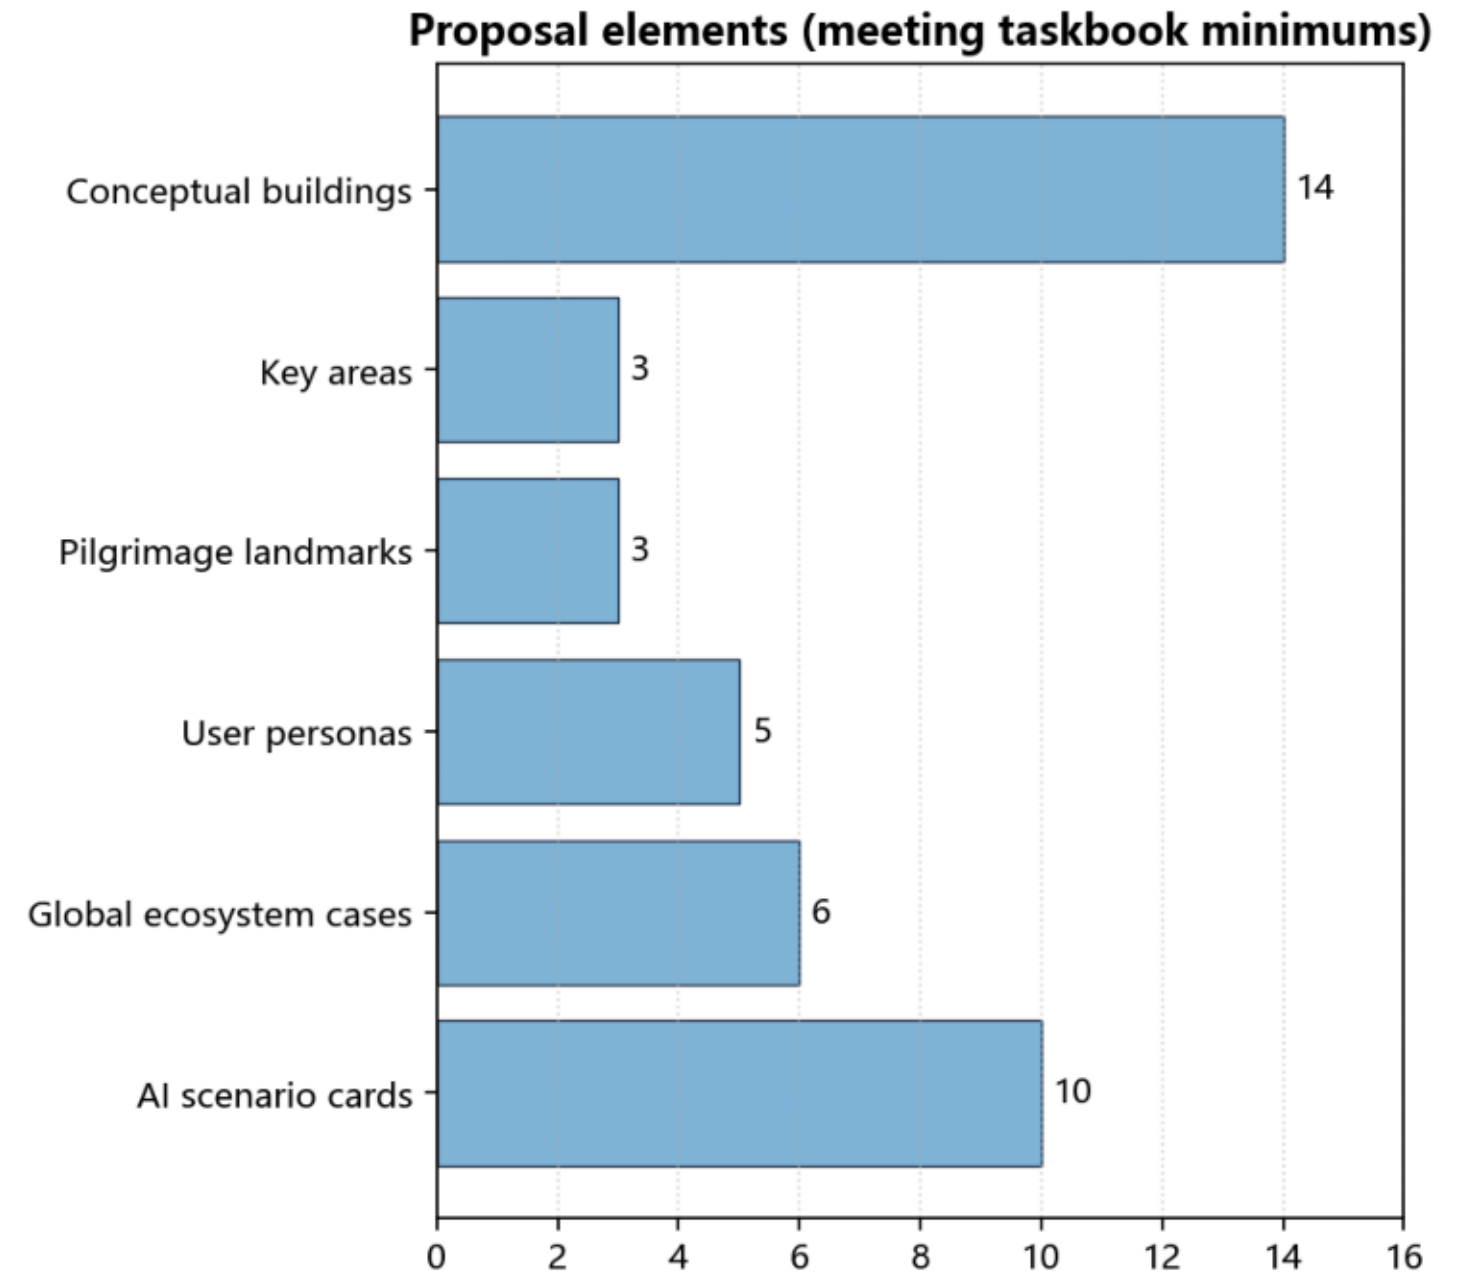

Slow-traffic spine, three east-west stitching lines, Xiaoyue River, signal-box squares.

Metrics & Scenario Evidence

SIGNAL JINGZHANG • Metrics Evidence and Task Coverage

Indicators recomputed from submitted GeoJSON in EPSG:4548; official regulatory controls pending.

Indicators recomputed from GeoJSON in EPSG:4548; 10 scenario cards; 3 validation scenarios; 5 personas; 3 landmarks.

Phasing (2026-2035+)

Near: Origin Community + mid stitching. Mid: Zhongzhiyuan full-stack training belt. Long: Dazhongsi application belt and full corridor.

All spatial proposals are conceptual, generated on the provisional boundary; not official redline or statutory conclusion.
