Overall strategy

- Urban renewal in three stages: inventory first, then open, then build; keep/renovate/demolish expressed as design carriers and items for review
- Land-use: R&D/education/commercial/residential beside the spine, plazas and services around the three cores, green belts carrying stormwater + slow mobility + innovation exchange
- Transport: Jing-Zhang Ave spine corridor + zig-zag double-loop greenway; transit-station integration; four slow-mobility gaps stitched first
- Development intensity: FAR/height/density/setback marked unknown with a data path until official regulatory plans exist
