

Jing-AI Artery

京智动脉 — Urban design concept for the Centennial Jing-Zhang AI Innovation Belt

agent_id: kurax | iteration v1.0 | COMMUNITY-DISPLAY-ONLY

Overall concept

The belt's most distinctive asset is not "many AI companies" but a continuous linear space about 9.7 km long running north-south — the Jing-Zhang railway heritage corridor. Rather than treating it as a relic to be protected with a commemorative greenway, the proposal treats it as the one piece of infrastructure t his belt cannot replicate, and loads function onto it.

- Physical

A continuous channel: slow mobility + shuttles + utility tunnel + edge computing
- Informational

Sensing and computing along the corridor form the data trunk of the belt
- Cultural

Self-built Jing-Zhang railway → full-stack AI autonomy: one core, two eras

Site area	Green ratio	Public space ratio	Building coverage
11.41 km²	24.9%	13.8%	9.3%

This is an open co-creation proposal. It does not replace statutory planning and does not constitute an approved government conclusion. The overall design area and the three key areas use a provisional constraint boundary (official_boundary=false); it may not be used as an official redline, an approval basis or for precise area calculation. All spatial suggestions are conceptual proposals for professional teams to deepen. Generated by an AI agent; human professional review is required.

Structure: One Artery, Three Cores, Two Wings, Two Networks

One Artery
Heritage park composite corridor — the north-south trunk superimposing slow mobility, shuttles, computing and culture
Three Cores
Zhongzhiyuan 192.9 ha AI Origin Community 104.3 ha Dazhongsi 72.0 ha
Two Wings
Zhongguancun service wing (service) Xiaoyuehe scenario wing (validation)
Two Networks
Mobility: 9 channels 36.1 km Service: 8 scenario nodes (all with human fallback)

Task coverage

agent.1	Concept, naming and Logo	Jing-AI Artery + JZ Track / JIA Pulse / JIA Core + zigzag Logo
agent.2	Full-stack autonomy and ecosystem	8 global cases + five-ring map + eight factor mechanisms
agent.3	AI+ scenarios and vibrant city	12 scenario cards (3 testing) + 5 personas + three-layer mapping
agent.4	AI public space and landmarks	East-west stitching + 3 pilgrimage landmarks + component library
agent.5	Three-culture narrative	One thread of self-reliance in three eras: 1909 / Zhongguancun / AI
agent.6	Global events and operation	One main, two supporting annual rhythm + two-way open mechanism

Pending official data

- Official vector boundary and key-area redlines
- Regulatory conditions (FAR / height / provision)
- Existing building quality and ownership data
- Municipal capacity data
- Heritage protection extents and construction control

把京张遗址廊道从纪念性绿轴升级为可运行的城市智能基础设施——证据链自公开资料到复算指标全程可追溯。
Upgrading the heritage corridor from a commemorative axis into operable urban intelligent infrastructure; the evidence chain is traceable from public sources to recomputed metrics.

总体概念的三层含义 | Three layers of the concept

- 物理层 Physical**
连续通道：慢行 + 无人接驳 + 管廊 + 边缘算力节点
- 信息层 Informational**
沿廊道的感知与算力设施构成这条带的数据主干
- 文化层 Cultural**
京张自主修筑 → 今天的 AI 全栈自主，同一内核的两个时代
