

SITE OVERVIEW | A COMMON-GROUND SPATIAL CONTRACT

One commons · three civic courts · four safeguards · twelve everyday outcomes

THREE SCALES

43.6 km²

Study area | industry and future-city network

11.413 km²

Overall design | parametric concept geometry

3 / 368.4 ha

Three key areas | announced scale, boundaries pending

DESIGN JUDGMENT

- Secure right-to-remain, care, and daily services first
- Stitch three civic courts with walking and cycling
- Keep human and non-digital channels for every smart service
- Re-anchor and recompute when official data arrives

43.6 km²

announced study scale

11.413 km²

provisional site recomputation

3

low-confidence key areas

PROVISIONAL BOUNDARY WARNING: all extents and key areas are low-confidence concept geometry, not official redlines, precise-area, approval, or investment evidence.

Sources: geometry/site_boundary.geojson; geometry/key_areas.geojson; geometry/green_space.geojson; metrics.json

01 The commons binds right-to-remain, care, active travel, climate adaptation, and AI innovation into one public contract.

02 When official boundaries arrive, retain connection and public-obligation relationships and re-anchor coordinates.

LAND-USE STRUCTURE | COMPLETE, RECOMPUTABLE, NON-STATUTORY

Nine parametric units share cut lines; their union equals the provisional site

CONCEPT LEGEND

- 0701 Right-to-remain housing
- 0702 Care/community
- 0802 AI R&D
- 08 Public service
- 1401 Climate commons
- 05 Productive commerce
- 0803 Culture/memory
- 1207 Adaptable streets
- 16 Evidence reserve

TOPOLOGY STATUS

- 9 concept land-use units
- 0.0 m² recorded balance error
- EPSG:4548 area recomputation CRS

PROVISIONAL BOUNDARY WARNING: all extents and key areas are low-confidence concept geometry, not official redlines, precise-area, approval, or investment evidence.

Sources: geometry/land_use.geojson; geometry/site_boundary.geojson; metrics.json. Codes are concept labels, not approved statutory controls.

9

complete gap-free concept land units

0.0 m²

recorded land-use balance error

14

first-round renewal projects

4

conditional implementation gates

01 Nine land-use units express relationships and public obligations; they do not replace statutory plans.

02 Retain-repair-add-replace evidence gates precede any demolition conclusion.

MOBILITY + BLUE-GREEN PUBLIC SPACE | KEEP THE CITY CONNECTED

Continuous walking/cycling, eight stitches, three key-area links, nine care-rest nodes

NETWORK COMPONENTS

- 13 concept mobility features
- 8 transverse stitches
- 3 key-area concept links
- 9 care-rest nodes
- 3 civic courts

PRIORITY ORDER

- 01 Continuity for the most vulnerable user
- 02 Transit and barrier-crossing access
- 03 Emergency, delivery, and maintenance
- 04 General vehicle efficiency

PROVISIONAL BOUNDARY WARNING: all extents and key areas are low-confidence concept geometry, not official redlines, precise-area, approval, or investment evidence.

Sources: geometry/roads.geojson; geometry/green_space.geojson; geometry/public_space.geojson. Lines are normalized concepts, not surveyed roads or stations.

13

concept mobility features

8

transverse stitches

3

key-area concept links

NO CLAIM

no invented roads, stations, or utility capacity

01 Connection priorities begin with the most vulnerable user; average vehicle speed must not hide risk.

02 Conventional utilities keep independent manual operation; digital devices can be switched off, logged, and retired.

MOBILITY + BLUE-GREEN PUBLIC SPACE | KEEP THE CITY CONNECTED

Continuous walking/cycling, eight stitches, three key-area links, nine care-rest nodes

NETWORK COMPONENTS

- 13 concept mobility features
- 8 transverse stitches
- 3 key-area concept links
- 9 care-rest nodes
- 3 civic courts

PRIORITY ORDER

- 01 Continuity for the most vulnerable user
- 02 Transit and barrier-crossing access
- 03 Emergency, delivery, and maintenance
- 04 General vehicle efficiency

PROVISIONAL BOUNDARY WARNING: all extents and key areas are low-confidence concept geometry, not official redlines, precise-area, approval, or investment evidence.

Sources: geometry/roads.geojson; geometry/green_space.geojson; geometry/public_space.geojson. Lines are normalized concepts, not surveyed roads or stations.

15.207%

provisional climate-commons ratio

3.453%

provisional public-space ratio

9 + 3

care-rest nodes + civic courts

3

civic-institution landmarks

01 Start with reversible shade, rest, water, and rainwater comparison segments and record maintenance and conflicts.

02 Public space must remain usable without screens, QR codes, or automated assistance.

KEY AREAS | CIVIC COURTS + PROTOTYPE ENVELOPES

Four candidate envelopes per area; retain-first, without existing/approved-building claims

THREE DISTINCT ROLES

1 Zhongzhiyuan

Visible R&D-test-maintenance chain

Civic landmark: Open-source test depot

2 AI Origin

Learning, care, affordable innovation

Civic landmark: Century-and-tomorrow archive court

3 Dazhongsi

Enterprise, mobility interface, culture

Civic landmark: Common protocol hall

12 envelopes test capacity and adaptability only

3

provisional key areas

4 × 3

four prototype envelopes per area

RETAIN

retain first, decide after survey

3

civic courts and learning landmarks

PROVISIONAL BOUNDARY WARNING: all extents and key areas are low-confidence concept geometry, not official redlines, precise-area, approval, or investment evidence.

Sources: geometry/key_areas.geojson; geometry/buildings.geojson; geometry/public_space.geojson; proposal.md

01 North emphasizes R&D, testing, and maintenance; center learning and care; south enterprise interface and culture.

02 All twelve envelopes are candidate prototypes, not existing/approved buildings or demolition/build decisions.
