

MASTER CONCEPT

A0 BOARD 01 · WATERLINE SYSTEM

WATERLINE: ONE LINE, THREE RESERVOIRS, TWO WINGS

Master concept and provisional evidence boundary

DESIGN POINTS

- One line and three reservoirs connect validation, co-creation, adoption, and public return.
- The provisional boundary is de-emphasised; every spatial move remains conceptual.

KEY AREAS

A0 BOARD 02 · KEY AREAS + DELIVERY

THREE RESERVOIRS: KEY-AREA DESIGN

Distinct prototypes for validation, co-creation, and adoption

VALIDATION ZHONGZHIYUAN

Water algorithm calibration
Wet-surface robot loop
Resource-cost readout

GOVERNANCE

L1 closed + L2 controlled
No direct utility control

CO-CREATION AI ORIGIN COMMUNITY

Origin Rain Court
Open data dictionary
Human help desk

GOVERNANCE

Translate technology into four public cards
Keep account-free staffed route

ADOPTION DAZHONGSI

Rain Commons
Public Water Ledger Hall
Urban adoption rack

GOVERNANCE

Publish launch, failure, human fallback,
and retirement together

Provisional geometry · Conceptual recommendation · Not statutory planning or engineering design

JING-ZHANG WATERLINE v1.0

DESIGN POINTS

- Zhongzhiyuan validates, Origin co-creates, and Dazhongsi adopts.
- Each area provides human help, public status, and retirement routes.
- Walking and accessibility come first; robots test only in controlled nodes.
- Six gates are surveyed before design; twelve stations are demountable and stopable.

Provisional geometry · Conceptual recommendation · Not statutory planning or engineering design

JING-ZHANG WATERLINE v1.0
